Mosquito Egg-Laying Habitats Diorama

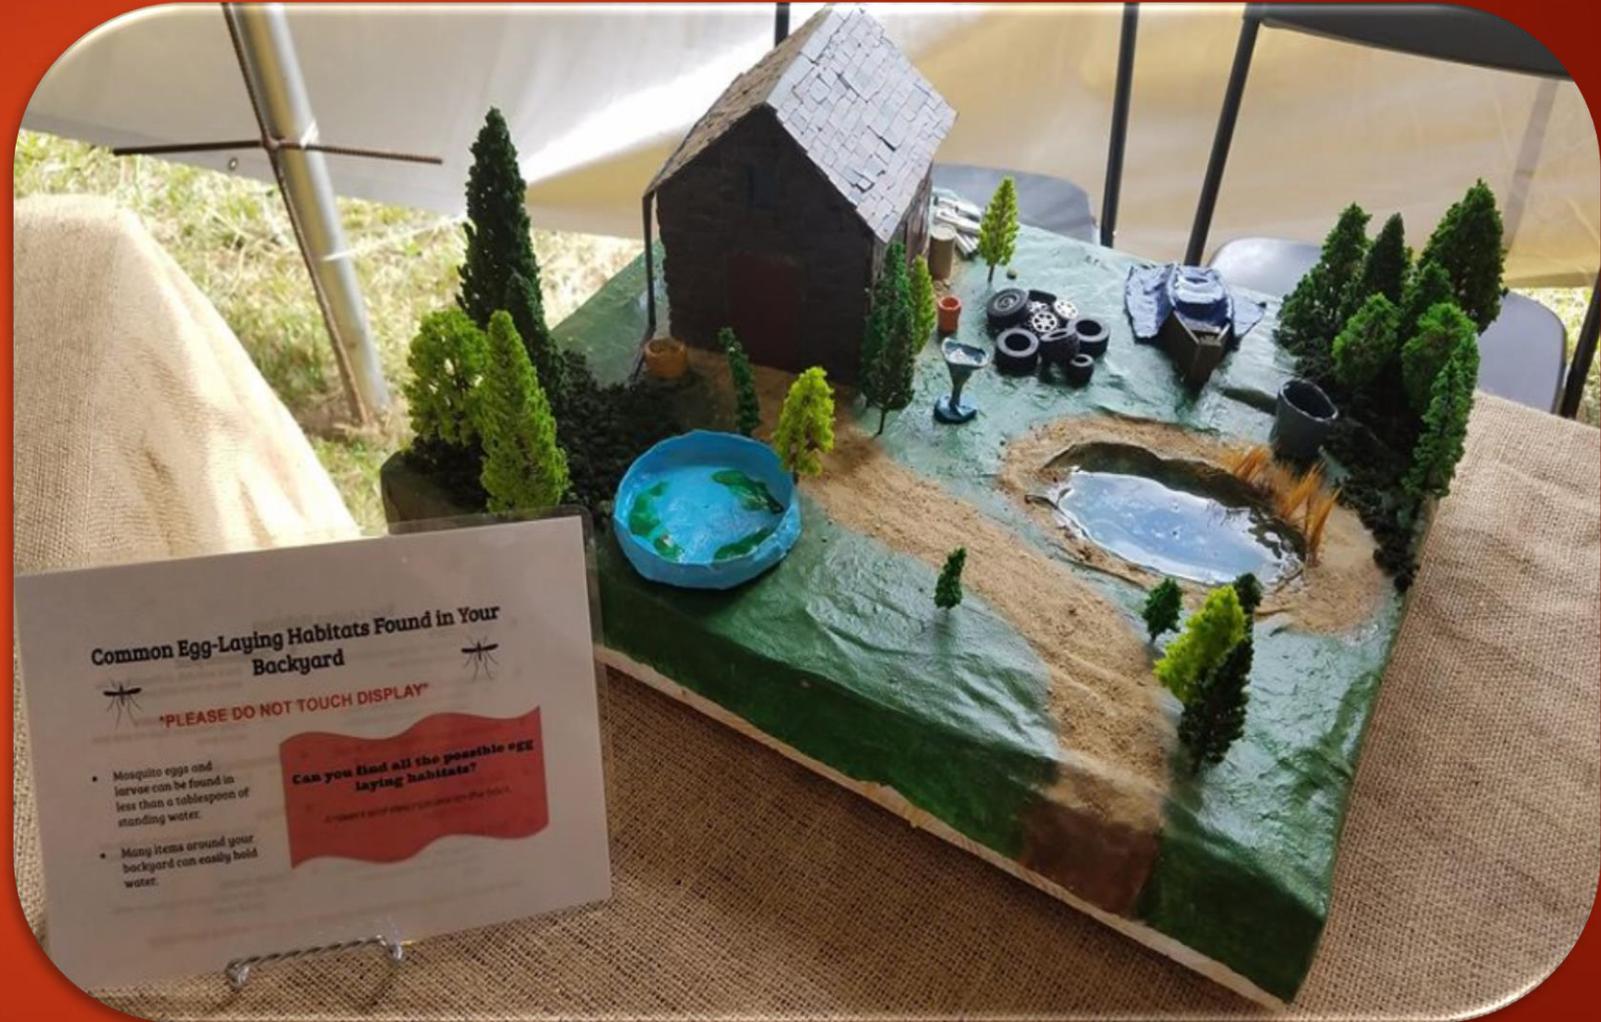

Peanut Fest

The diorama was created to help citizens better understand how they can prevent mosquitoes in their own yard.

We asked citizens if they could point out all the examples of egg-laying habitats on the diorama and informed them on prevention methods.

To our surprise, it was a big hit with the children who were more informed than we had expected.

Demonstrated Examples

Ornamental pond, pool,
bird bath, empty containers,
old tires, shrubbery

Uncovered boat, loose
tarps, corrugated pipes,
potted plant saucers
