SAY WHAAAT

DON'T BOTHER ME

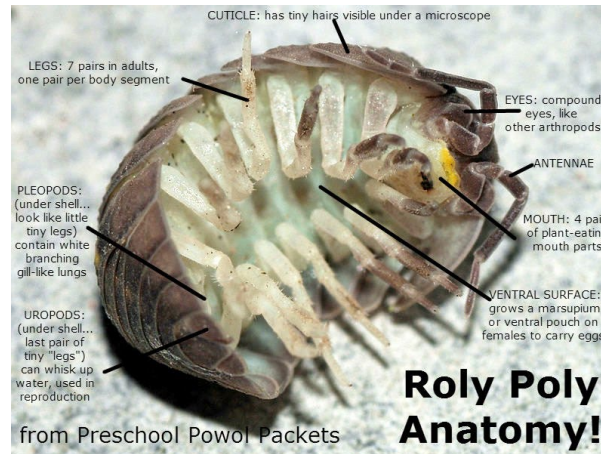

I'M CRABBY

What is the only crustacean that is completely adapted to living on land?

On a roll!

©2007 IGOR SIWANOWICZ

- Breathe through gills/ moist environment
- High ammonia tolerance means no urine
- Drink from mouth and their uropods – yep! Their backsides
- Reduce CO2 out put from soils

Ewww! Pill bugs!

**No! I am
extremely
cool!**

**We are actually
crustaceans! And
we can remove
heavy metals from
the soil!**
