“Healing with Heart, Science, and Purpose”

TELE-MEDICINE & FUNCTIONAL-MEDICINE DISCLAIMER

This document clarifies the distinction between tele-medicine medical treatment and wellness / functional-medicine consultation services provided by Mei Chen, NP, FNP-C, ACNP-BC, CCRN through Angel Walk Wellness (AWW).

Scope of Services:

- Tele-medicine medical treatment is available only to clients residing in California or New York, where Mei Chen, NP, is licensed to practice independently or under a collaborating physician. These services may include medical evaluation, diagnosis, treatment plans, and/or prescriptions, when clinically appropriate.
- Wellness consultation (functional-medicine / tele-consultation) is available nationwide for educational and informational purposes only and does not include diagnosis, prescriptions, or medical treatment.
- In Texas, medical treatment requires physician collaboration; otherwise, sessions are conducted strictly as wellness consultations.

Patient Responsibilities:

- I understand that tele-medicine is not a substitute for in-person emergency care.
- I will maintain an ongoing relationship with a local licensed healthcare provider for urgent or emergent conditions.
- I agree to communicate honestly about my medical history, medications, and symptoms during tele-medicine or consultation sessions.

Limitations of Service:

While reasonable safeguards such as encryption and secure platforms are used, no system guarantees absolute security. AWW assumes no liability for events outside its control, including internet connectivity or third-party platform issues.

Acknowledgment of Understanding:

By signing below, I confirm that I understand the distinctions and limitations described in this disclaimer.
