About Thaba Tholo

Welcome to Thaba Tholo, a 37,000-hectare game farm in the Limpopo Province of South Africa. Established in the late 1980s, our farm was formed by consolidating several properties and creating a company to manage them as a single ecological unit. This allowed us to reintroduce the Big Five and other rare species, fostering a thriving ecosystem.

Our mission is to protect biodiversity and conserve species, with a focus on endangered ones. We believe that Africa's wildlife treasure should be shared with all who live on this continent. To achieve this, we continually develop our farming practices to enhance and expand the gene pool of African wildlife.

Our breeding approach prioritizes quality and vibrancy, aiming to produce specimens that will diversify and strengthen external populations regionally, nationally, and internationally. To support this goal, we've adopted employment and social development models that benefit local South Africans and ensure they share in our country's wealth.

At Thaba Tholo, we're committed to creating a sustainable ecosystem where rare and endangered species, including the Big Five, can thrive. We safeguard genetic diversity by maintaining optimal numbers of each species, ensuring a healthy environment and habitat. We take great care to improve habitat quality and ensure sustainable, environmentally friendly farming practices.

Our vision is to give back to nature, preserving the beauty and majesty of African wildlife for future generations. We strive to make a positive impact on the community through job creation, social responsibility initiatives, and collaborative efforts.

The environment and community must be better off because we are here.

Lot 000

RHINO CHARITY LOT

R:

004

Information

Bidding on this lot will give you the chance to win an exclusive hands-on rhino conservation experience at Thaba Tholo.

What the experience includes:

- A 2-nights' stay at Thaba Tholo for 6 people.
- 1 life changing day in the bush, along with the specialised Thaba Tholo conservation team and veterinarians. Look forward to activities such as hands-on rhino darting, ear notching, data collection, translocation, etc.
- All food and drinks included (Alcohol in moderation)

**ALL FUNDS RAISED
FROM OUR CHARITY
LOT WILL GO DIRECTLY
TOWARDS RHINO
CONSERVATION**

WELCOME TO WILDLIFE RANCHING SOUTH AFRICA

Wildlife Ranching (WRSA) is a voluntary, non-profit membership organization that serves the interests of wildlife ranchers and private conservationists on provincial, national, and international platforms. The expansion, protection, renewal, and sustainable utilization of habitats for the conservation of species in a vibrant biodiverse environment outside protected areas is **OUR GAME**

WHY JOIN WRSA?

- Reports on the latest news and events from the wildlife sector.
- Represents members at provincial, national, and international level regarding legislation and matters concerning the industry.
- Through participation in the Regional Interest Groups (RIG's), every member is represented in their region.
- Provides members with the latest and customized technology with the WRSAPortal-online management system as well as the Gamelab Wildlife Management System.

Gamelab
Wildlife Management Simplified
WRSA members receive
Gamelab included in their
membership fees.

So wen jy teen sekelbos!

Vir tegniese bystand en advies kontak vir Stephan Jooste
T: 072 275 7160 / E: stephan@terravusa.com

www.terravusa.com

Sendero® is 'n onkruidodder wat veilig met lug- en grondtoediening gebruik word om sekelbos te beheer. Die produk is uiters doeltreffend teen sekelbos terwyl meeste ander voordelige spesies nie beskadig word nie. Daar is ook geen onderdrukking van enige ontkiemende of gevestigde grasse nie.

Sekere houtagtige plante is noodsaaklik vir die gewenste habitat vir wild of vee. Diere gebruik hierdie plante vir skuiling asook vir voeding. Inheemse bosspesies soos sekelbos, kompeteer egter teen grasspesies vir noodsaaklike vog, voedingstowwe en sonlig indien dit nie beheer en goed bestuur word nie.

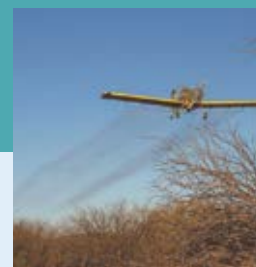

Die selektiwiteit van Sendero® 336 SL sal ongewenste bosverdichtingspesies beheer met min of geen effek op voordelige boomspesies nie, selfs wanneer lugbespuiting toegepas word.

Sendero® 336 SL translokeer vinniger en deegliker na die wortels as ander produkte. Dit maak Sendero® 336 SL die ideale produk om jou wild- en veehabitat te verbeter.

Sendero® 336 SL is 'n ouksien-tipe groei-reguleerder wat deur die blare en groen plantstamme opgeneem word. Die aktiewe bestanddele boots planthormone na om die plant se normale groei te ontwig, wat daartoe lei dat die teikenspesie doodgaan.

Sendero® 336 SL het 'n lugbespuiting- sowel as 'n kolbespuitingregistrasie en het geen beperking met betrekking tot die verwydering of verskuiwing van vee of wild voor toediening nie. Dit benadeel ook nie fauna in sensitiewe ekosisteme nie.

Sendero®
336 SL
HERBICIDE

*Doeltreffende
lugtoediening.*

*Nuwe weidinggras
keer terug na die
Sendero®-toediening.*

*Die aktiewe bestanddele is nie
skadelik vir wild, vee, voëls of
enige ander boslewe nie.*

Weiding- en grondbestuur

Waar sekelbos welig en dig groei, word waterbronne en grondvoedingstowwe uitgeput. Die weidingspotensiaal van die veld neem af en digte, ondeurdringbare ruigtes word gevorm. Onkruidbeheer deur lugtoediening is die goedkoopste metode en mees praktiese manier om hierdie indringing drasties te verminder.

Sendero® 336 SL produkvoordele

- Groot gebiede kan deur middel van lugbespuiting behandel word wat perfek geskik is vir vee- en wildboerderye.
- Dit kan met helikopter- of rugsakbespuiting op kleiner areas toegedien word.
- Die produk se doeltreffendheid word nie deur grond klei-inhoud beïnvloed nie.
- Dit het geen effek op grasse nie, natuurlike weiding sal dus nie beïnvloed word nie.
- Beweidingspotensiaal sal feitlik onmiddellik verbeter omdat behandelde bome en struik nie meer vir grondvog en voedingstowwe sal meeding nie.
- Weidingareas wat herstel, kan nuwe bosse onderdruk en verdere verdigting voorkom.
- Dooie boommateriaal kan 2 jaar na toediening bymekaar gemaak word vir vuurmaakhout.
- Aërobiese-mikrobiese afbraak van aktiewe bestanddele is die primêre afbreekroete in die grond.
- Sendero® het 'n uiters gunstige omgewingsprofiel en is glad nie skadelik vir mense of diere nie.
- Grondwater-besoedelingspotensiaal is uiters laag as gevolg van die lae toedieningsdosis, die aktiewe bestanddele loog feitlik glad nie in die grond nie, en het 'n matige grond-halfleeftyd.

Gebruik altyd volgens die aanwysings op die produketiket. Sendero® 336 SL bevat *aminopirialied* en *klopipirialied*.
Reg. nr. L10569, Wet nr. 36 van 1947. Registrasiehouer: Corteva Agriscience RSA (Edms.) Bpk.
Reg. nr. 1991/003030/07. Lakefield Office Park, 272 Weslaan, Centurion, 0157 Suid-Afrika.

A Kudu antelope stands in profile, facing left, in a lush green savanna. It has long, spiraling, ridged horns that curve backwards and then forwards. The antelope's coat is a rich brown, with a lighter tan or cream-colored stripe running down its side and across its face. Its ears are large and pointed. The background is a dense forest of green trees and foliage.

Microchip: 991001003555590
Date of birth: 12/07/2020
Age at auction: 4Y 2M
Sire: 53 3/8" Quantum
Dam: Z1026
Bloodline: Zambian
MC DNA: Zambian
Nuclear: 86% Zambian
Pregnancy: Open - Walking with 56 1/8" Buzz

Measurements

Date measured: 25/07/2024
Age measured: 4Y 0M
Horn Length (L/R): 34" / 33 5/8"
Base (L/R): 7 3/8" / 7 3/8"
Rings (L/R): 36 / 34
Tips (L/R): 9 7/8" / 9 5/8"
Tip to Tip: 19"
SCI: 82 4/8"

Spectacular young Zambian cow that measured 34" at only 4 years of age. Based on current growth vs age trends, she could potentially reach the 40" mark. Dark faced with beautiful horn shape, she is picture perfect. Sired by 53 3/8" Quantum, from a mother line that roots back to legendary Nike, she combines two proven genetic lines. Selling with bull calf sired by 56 1/8" Buzz, this is a parcel not to be missed. Now running with 56 1/8" Buzz for a possible 3 in 1.

V28439 (Wet 36 van 1947)

Wildsonderhouds- korrels

QPro Wildsonderhoudskorrels is 'n hoëgehalte-, gebalanseerde voer vir wildspesies waar byvoeding benodig word. Die produk is lusermgebaseer wat smaaklik is. Wildsonderhoudskorrels is geformuleer om genoegsame proteïene, energie en spoorminerale in droë tye aan diere te voorsien. Die produk bevat geen ureum nie en is dus veilig om aan alle wildspesies te voer. Die pilgrootte is 8 mm om in alle behoeftes te voorsien.

vir die LIEFDE van jou DIERE
