SABLE LEGENDS

# THE SABLE LEGENDS OF THABA THOLO

## A CELEBRATION OF THE MAJESTIC SABLE ANTELOPE

Whenever we see any of our sable antelope roaming in the expansive bushveld at Thaba Tholo, our hearts swell with pride. Such is the magical quality of these stunning animals.

As appropriate and successful conservation of all our wildlife is what we strive to achieve, being able to breed with and enjoy our sables in the veld is a huge privilege and one that we take seriously. Our goal has always been and remains to preserve, develop and grow the quality of our sables in order to contribute to a sustainable wildlife industry over the long term.

Achievements in conservation, just like in any other endeavour, should be celebrated because it assists us all in motivation to strive even further. For many years the ultimate goal in sable bull breeding was the aim of reaching a magical 50" horn length. At Thaba Tholo, our 50" Club, as we like to call our selection of superb bulls that have achieved this milestone, keeps growing.

Allow us therefore to celebrate, with you, our top sable bulls in the 50" Club with this booklet.

In addition, we also showcase the current group of Thaba Tholo breeding bulls, as we look to the future to see what is in stock. Who knows, is a 60" Club perhaps on the horizon?

The legendary Thaba Tholo sables that got us to where we are today are all household names, so we also give pride of place to these animals, whose breeding qualities can be completely appreciated by simply looking at their offspring over the years.

Indeed a sable legacy without comparison.

**SABLE LEGENDS**

“

—  
|  
...few can sojourn long

within the unspoilt wilderness of a game sanctuary,  
surrounded on all sides by its confiding animals, without  
absorbing its atmosphere; the Spirit of the Wild is quick  
to assert supremacy, and no man of any sensibility can  
resist her.

James Stevenson-Hamilton  
*First warden of South Africa's  
Sabi Nature Reserve*
