September 16, 2016 to September 15, 2020  
Provider ID# 208117

## AM: “The Oral–Systemic Connection”

Whitney D. Weiner, DDS, MS Diplomate of the American Board of Periodontology

Dr. Weiner was born and raised in Cedar Rapids, Iowa. In 2001, she was awarded a full academic scholarship to The Colorado College where she graduated with honors. Dr. Weiner was accepted early to the prestigious University of Iowa College of Dentistry. At Iowa, Dr. Weiner received several awards for excellence in research, practice management, oral pathology, and leadership, and was the sole recipient of a scholarship for outstanding achievement in periodontics.

Following dental school, Dr. Weiner spent three years training in the post-graduate periodontics program at the University of Illinois at Chicago (UIC) and in 2013 was awarded a **specialty certification in periodontics**. During her periodontal residency she earned her **master’s degree in Oral Sciences** and her research evaluating gene expression and inflammation in aggressive periodontitis has been recognized at the national level. Following residency, Dr. Weiner’s husband, Eliot, was offered the opportunity to manage a steel business in Wollongong, Australia so they made the move “down under.” While in Australia, Dr. Weiner spent two years working as the sole periodontist in three multi-specialist practices.

In early 2015, Dr. Weiner and her husband returned to his hometown in Metro Detroit to raise their son, Jake, now four years old. Dr. Weiner worked in a boutique periodontal specialty office in Birmingham until 2017, but she came to miss the team approach to dentistry provided by group dental care. It was at this point she began to search for the opportunity to join a dental practice that was compatible with her core professional values – **a focus on comprehensive dental care with a firm and clear commitment to patient health and wellness**. In 2018 she launched Whole Dental Wellness, a rapidly growing, specialist led, interdisciplinary group practice in the metro Detroit area.

To keep up with the latest advances in periodontology and dental implant therapy, Dr. Weiner attends several regional and national professional meetings each year. **Dr. Weiner has lectured nationally and internationally** on the Oral-Systemic Link (the connection between dental disease and overall health) and several aspects of Periodontology and Implantology. The knowledge gained from attending and lecturing at conferences like these allows Dr. Weiner and her team to be at the forefront of periodontal practice and deliver the most advanced treatments to their patients.

In 2016, Dr. Weiner was honored as one of the **“Top 25 Women in Dentistry”** by Dental Product Report and named the **“Most Interesting Person in Dentistry”** for February by Curasan.com. In 2017, Incisal Edge named her in their **“40 under 40”** young rising dental stars in the nation.

In recognition of her accomplishments in implant dentistry, in 2016 Dr. Weiner was selected for membership to **DENTSPLY Implants’ PEERS North America, an exclusive group of key opinion leaders and experts in the field of implant dentistry** – there are less than 100 experts in this elite group throughout North America. Dr. Weiner has been **voted a “Top Dentist” by a group of her peers in Hour Magazine** every year since moving to the metro Detroit area. Only a handful of periodontists have received this honor. **Dr. Weiner is a board-certified periodontist and a Diplomate of the American Board of Periodontology**. She believes in a patient-centered approach to periodontal care.

### COURSE OBJECTIVES:

Over the years, the connection between oral and systemic health has gained more recognition. We have come so far since the days of thinking that diseases in the body are independent of one another – now we know that most diseases are connected! So, what is the oral systemic connection? Put simply, it is the widely accepted fact that the mouth is a mirror to general health status. Or more technically, it is bacteria, endotoxins, and cytokines that enter general circulation through diseased gum tissue and exert influences throughout the rest of the body. So why do dentistry and medicine seem two disconnected fields? My goal of today is to shed some light on this connection and briefly review several body systems that research has shown are intimately connected to the oral cavity.

1. Have a basic level of understanding of the etiology periodontitis
2. Understand how chronic inflammation is the key underlying the oral systemic link
3. Realize that ideal treatment and management of our patients with high inflammatory burden mandates interdisciplinary collaboration between the dental and medical colleagues

**PM: "Pain Management in Dentistry: An Update" Sanjay Chand, MD**

Dr. Sanjay Chand has specialized in Medicine with emphasis on infection control. He is Clinical Associate Professor at the University of Detroit Mercy's School of Dentistry.

Dr. Chand brings a medical perspective to the practice of Dentistry.

Dr. Chand is Director of Infection Control and oversees best practice at the Dental School and is responsible for infection control policies and their implementation in accordance with CDC guidelines.

He is director of Dental, Dental Hygiene, Physician Assistant (PA) and Nurse Anesthesia (NA) courses at the University.

Dr. Chand is a popular speaker at many Continuing Education talks at national and international conferences. His area of expertise includes infection control and chronic disease management in the dental patient. He has been well received at the Michigan Dental Association (MDA), Michigan Dental Hygienists Association (MDHA) and OSAP (Organization for Safety, Asepsis and Prevention) Annual conference where he has been key-note speaker.

Dr. Chand lives in Windsor, Canada and is associated with the Toldo School of Nursing and Schulich School of Medicine, Western University Canada.

**COURSE OBJECTIVES:**

- Discuss common Opioids prescribed in the dental practice
- Discuss new Opioid prescription guidelines
- Develop awareness of misconceptions & consequences of Opioid use in Dental case scenarios
- Recognize different types of Opioid misuse
- Discuss ADA Recommendations for Opioid use in the Dental Practice
