

ELEVATE YOUR RESPONSE EFFORTS

ON-DEMAND CONNECTIVITY FOR EMERGENCY RESPONSE AND DISASTER RELIEF

LIGHTWEIGHT AND PORTABLE INTERNET

In the aftermath of significant fires, storms, and hurricanes, thousands of emergency response workers are called into action to provide life-saving services. The effectiveness of these responses hinge on having the appropriate equipment on hand. That's where the Mobile Command Center (MCC) comes in. Never be on-site without connectivity again with the day-1 connectivity option you've been looking for.

CSG presents three rugged command center options – the MCC Mini 2, MCC 2.0, and the Brute – tailored to address the specific communication and connectivity challenges that arise. These portable, rapidly deployable solutions become crucial in delivering swift connectivity across the Verizon LTE network, especially in remote locations prone to the impact of hurricanes and other severe weather conditions.

MCC MINI 2

Built for ultimate power and portability for up to 128 users.

10.9" x 9.9" x 5"

7.0lbs

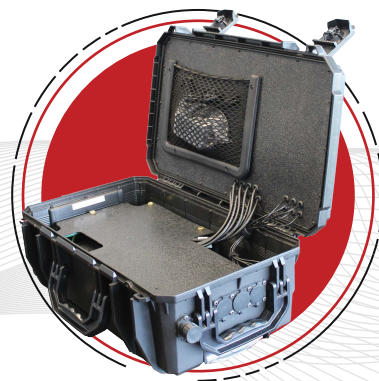

MCC 2.0

Harness the power of a portable office with an included VoIP telephone system.

24" x 16" x 10.1"

51.0lbs

MCC BRUTE

Connect without external power for up to 30 hours on the Brute's powerful battery.

21.9" x 13.9" x 8.9"

27.0lbs
