

BE READY FOR HURRICANE SEASON: THE MOBILE COMMAND CENTER

An average of 5 hurricanes make landfall on the U.S. in a given 3-year period*, causing widespread panic, destruction, and mayhem. Don't be caught off guard with a lack of Internet, but be prepared, with CSG's ruggedized Mobile Command Centers (MCCs).

The MCC provides uncompromising Internet in the harshest of environments to ensure you have the connection you need, come rain or shine.

BENEFITS:

Powerful Cradlepoint routers ensure you have a steady, strong Internet presence to coordinate emergency response efforts across entire teams.

Ruggedized cases are built to be weather resilient and easy to handle, so you can worry less about transporting them and focus more on helping others.

Up to 128 users per MCC. No matter your team, we've got you covered.

Built-in high-gain antenna for stronger signals in rural locations.
