

WHO THE HECK IS KATALYST?

OUR WHOLE DEAL.

Katalyst is a fast-moving tech company built on the idea of sparking progress and keeping businesses connected—**without emptying your wallet.**

If your business is tired of slow, outdated solutions and complicated nonsense, buckle up: we're here to show you that reliable tech doesn't have to cost a fortune.

**TECH THAT
WON'T MAKE
YOU RAGE QUIT.**

Name Origin

We took "catalyst" (something that sparks change) and slapped in a "K" for kinetic energy—because we're all about keeping things moving.

What We Stand For

Cutting the crap, delivering real results, and making sure you don't waste hours screaming at your internet connection.

Our Goal

To give you straightforward, headache-free tech solutions that just work—like a dependable Toyota.

WHY WE EXIST.

The Mission

Let's be real: most tech is either too complicated, too expensive, or both. We exist to connect small businesses so you can focus on what really matters—growing your operation or, at the very least, not wanting to toss your router out the window.

Our Vision

We're not here to reinvent the wheel; we just want to keep it rolling smoothly at a fair price—with minimal swearing. Our vision? A future where businesses can trust that their tech will keep them online, whether they use T-Mobile, AT&T, or Verizon. When you plug in our hardware, it just works—no 50-page manuals, no endless phone trees, no bloated bells and whistles you don't need.

Katalyst Spark 5G Router

LAUNCHING Q1 2025

TIRED OF ROUTERS THAT PROMISE THE WORLD & DELIVER NOTHING BUT HEADACHES?

Meet the **Katalyst Spark 5G Business Router**—a straightforward device that delivers fast, reliable connectivity without draining your bank account.

Stream, download, and crush video calls across 5,000 sq. ft. with 5G speeds and Wi-Fi 6 power. And because life happens, the Dual SIM feature and internal battery keep you covered— No downtime, no “oops, the internet’s down.” The Spark is just a router that does its job—so you can do yours.

Your Old Router Is Trash

Faster speeds. Better coverage. Smarter connections. No more battling for bandwidth—this router handles up to 200 devices like a pro. Streaming, gaming, video calls? Bring it on.

Pick a 5G Network, Any Network

Why settle for one carrier when you can have them all? The Spark works on Verizon, AT&T, or T-Mobile, so you get the best 5G coverage, wherever you are. Stuck with one provider that sucks? Not anymore. Your business, your rules, your network.

Power Outages Are Dumb

Your lights might go out, but your Wi-Fi won't. The Spark's internal 6400 mAh battery keeps your business online no matter what. Power outage? Big deal. This router doesn't quit, so neither do you. Stop letting a blackout boss you around.

TECH SPECS.

Wi-Fi Standard | Wi-Fi 6 (802.11ax), MIMO: 4x4 MU-MIMO

Modem | Integrated 5G NR Sub-6GHz and 4G LTE CAT 19 modem
