

REGENERATE HOCATT OZONE SAUNA

Reported Benefits:

Inactivates Viruses, Bacteria, Yeast, Fungi, Parasites

Stimulates Immune System

Speeds Healing

Cleans Arteries and Veins, Improving Circulation

Oxidizes Toxins, Removes Free Radicals

How Does the HOCATT™ Work?

Normalizes Hormone and Enzyme Production

Reduces Inflammation

Reduces Pain, Calm Nerves

Improves Brain Function

Aids in Weight Loss

Medical-grade ozone is the key player in the effectiveness of the sauna. We have seen many successes with the use of ozone to treat pain, inflammation, and infection through our other offered ozone therapies, but the HOCATT™ is different in that it has the ability to expose the entire body to the healing effects of ozone.

Ozone is a colorless gas and each molecule is made up of three atoms of oxygen which are unstably bound together. Because of ozone's positive charge, it has an oxidative effect on organic compounds. It is drawn toward negatively charged foreign cells such as bacteria, yeast, viruses and parasites and neutralizes them as they cannot secrete an anti-oxidize enzyme, effectively killing active infections.

Ozone Quick Facts

Ozone accelerates the production of energy, called ATP, in the mitochondria of the cell

Ozone increases anti-oxidant enzyme system efficiency

Ozone kills bacteria, yeast/fungi, viruses and parasites because these pathogens cannot produce anti-oxidant enzymes, allowing destruction by ozone

Ozone breaks down petrochemicals, removes toxins and free radicals

Ozone increases Oxygen Utilization in tissues

Ozone increases immunity and antibody production

Ozone stimulates secretion of Interleukin-2, an immune system cornerstone, secreted by T-helper cells

Ozone inhibits cancer because cancer cells don't produce enzymes needed for protection from ozone

Ozone stimulates the production of Tumor Necrosis Factor, inhibiting tumor growth

Ozone significantly increases interferon, which helps to orchestrate every aspect of the immune system

Ozone stimulates the production of white blood cells

Ozone oxidizes and breaks down arterial plaque

Ozone increases flexibility/elasticity of red blood cells

The HOCATT™ also offers these therapeutic modalities:

Aromatherapy

Carbonic acid therapy

Frequency Specific Microcurrent Electrotherapy

Exercise with oxygen therapy

Far infrared

Hyperthermia

Photon light therapy

Ultraviolet irradiation

HOCATT™ Sauna Quick Facts

Each session is 25-30 minutes long.

For the first 3-8 minutes of your session, carbon dioxide mixes with steam to form H₂CO₃, carbonic acid which moistens the skin and enter through pores into the lymph system. CA is one of the few compounds

that increases the uptake and delivery of oxygen at the cellular level.

Blood vessels and capillaries dilate, blood acidity increases, increasing blood circulation up to 25%.

After the CA cycle completes, the ozone cycle begins. When ozone reacts with the water from the steam, it creates H₂O₂ which aids in destroying bacterial, yeast, and fungal infections.

At the end of the session, all ozone and oxygen steam is extracted into the ozone destructor and the session ends.
