

Inspiring Women and Girls to  
Lead the Skies

# The Future of Sustainable Aviation

**AVIATRIX**  
C O M P A N Y

# Why Aviation Needs You

- Aviation is transforming rapidly with new technologies.
- We need more women pilots, engineers, and innovators.
- Diverse voices lead to smarter, more inclusive design.
- You can be part of building a cleaner, greener sky.

# What is Sustainable Aviation?

- Flight powered by cleaner energy (electric, hydrogen, SAF).
- Aircraft designed with low noise and low emissions.
- Focus on efficiency and environmental impact.
- A new career frontier focused on saving the planet.

# What is an eVTOL?

- Electric Vertical Takeoff and Landing aircraft.
- Take off like a drone, fly like a plane.
- Quieter, more efficient, perfect for urban air mobility.
- A key player in future transportation and emergency services.

# Careers in Sustainable Aviation

- Pilot – fly electric or hybrid aircraft.
- Engineer – design new sustainable aircraft.
- Technician – maintain and repair advanced systems.
- Planner – shape vertiports and air mobility networks.

# How to Get Started

- Join aviation or STEM clubs at school.
- Attend airshows and visit aviation museums.
- Connect with mentors or flight schools.
- Follow women aviators and innovators on social media.
- Stay curious, stay inspired—your journey starts now!

# About Aviatrix Company

- Founded by a legacy of women aviators.
- Media company telling the stories of women in flight.
- Podcasts, films, and content about eVTOL and sustainability.
- Empowering the next generation—one story at a time.
