

She Flies Electric

- Girls, STEM, and the Stories That Inspire
- Speaker: Susan Roe Musacchio
- Founder, Aviatrix Company
- Tagline: Tomorrow Takes Flight

Introduction

- Welcome and purpose of the talk
- Why sustainable aviation needs diverse voices
- Intro to Aviatrix Company and Susan Roe Musacchio

The Future of Flight

- What is Advanced Air Mobility (AAM)?
- eVTOL and electric aircraft explained simply
- Why this matters to the next generation

Why Girls Matter in Aviation

- Current stats on women in aviation and STEM
- Missed opportunities = missed innovation
- Importance of representation

Real Role Models

- Examples of young women in aviation today
- Stories of trailblazing female pilots and engineers
- Susan's family story: 3 generations of flyers

She Flies Electric

- How electric flight opens new doors
- Careers in clean aviation
- Why girls will lead the change

How to Get Involved

- STEM programs and aviation camps
- Resources and scholarships
- Start small: drones, simulators, storytelling

Interactive Moment / Q&A

- What would you name your electric aircraft?
- Questions, stories, and dreams

Call to Action

- The sky is not the limit
- Explore, connect, imagine
- Contact info and Aviatrrix social handles

Thank You

- Image of a girl near an electric plane
- Quote: 'She believed she could, so she took off.'
- Logo and tagline: Tomorrow Takes Flight
