About Us.

Introduction:

We would like to introduce our company ACCESS KEY LLC, which has been in business with Access control, Parking Gate Barriers, Automatic Doors, Automatic Gates and Garage doors since 2012 in United Arab Emirates (UAE). We are an established and popular company with an excellent track record of the best customer satisfaction. We have never compromised on the quality and the services provided to the customer. We believe in keeping customers happy and providing them with products at a very competent price. We have excellent staff members who will guide you with their best ideas by keeping in constant touch with you and your company and informing you about the market trends. Barrier gate Automatic gate.

Mission & Vision.

MISSION

To provide reliable, efficient, and aesthetically pleasing automatic gate barrier solutions that enhance security, convenience, and property value for our clients across the UAE.

VISION

To be the preferred and trusted partner for automatic gate barrier solutions in the UAE, recognized for our expertise, exceptional service, and commitment to exceeding customer expectations.

Our Services.

- **Supply & Installation:** We offer a comprehensive range of automatic gate barriers from leading international brands, catering to diverse needs and budgets. Our experienced technicians ensure professional and efficient installation, adhering to the highest safety standards.

- **Maintenance & Repair:** We provide comprehensive maintenance contracts to ensure the long-term performance and reliability of your gate barrier system. Our skilled technicians are available for prompt and efficient repairs, minimizing downtime and inconvenience.

- **Custom Solutions:** We understand that every property is unique. We offer customized solutions tailored to specific requirements, including gate design, automation features, and access control systems.

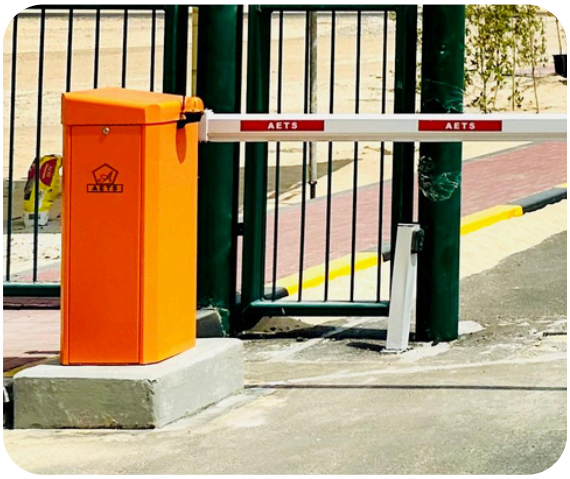

- **Consultation & Design:** Our team of experts provides professional consultation and design services, helping clients choose the right gate barrier solution for their needs and budget.

- **Upgrades & Automation:** We offer upgrades and automation services for existing gate systems, enhancing their functionality and convenience.

Our Products.

1 BOOM BARRIERS:

Our company specializes in the provision of reliable and cost-effective parking barrier gates and boom barriers. We possess a highly experienced team dedicated to new installations, comprehensive maintenance, and efficient repair services. Recognizing the unique security requirements of each property, we offer fully customizable gate barrier solutions designed to meet specific needs and budgetary considerations.

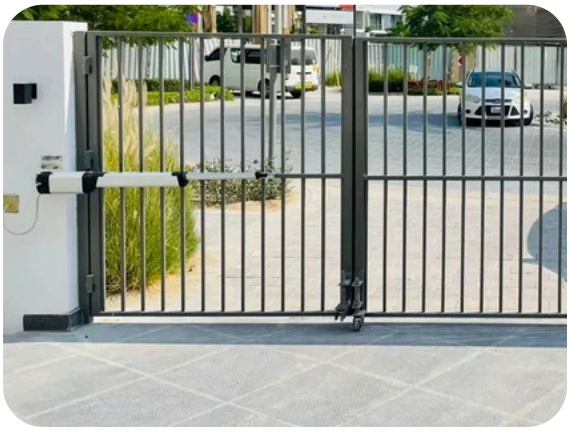

2 SLIDING GATE MOTORS:

Sliding gate openers are the most common and convenient solution for driveway gates. You can safely park your car close to the gates, without exposing the vehicle to the risk of being hit. This is because sliding gates open sidewards, leaving more room on your driveway. Besides, sliding gates are more secure and more difficult to force open. We have professional technical team for New Automatic gates installations and maintenance of automatic gates in Dubai.

3 SWING GATE MOTORS:

Swing gate openers are designed for large-sized Swing gates, and such a system is highly reliable. Due to their great weight, Swing gates require a heavy-duty opener appropriate for their dimensions. This type of mechanism opens both gates simultaneously, which is very convenient and time-saving. Another strength of dual gate openers is their versatility. You can use them to open a single gate as well.

4

SLIDING GLASS DOORS:

Elevate your property with the perfect combination of style, convenience, and security. Contact us today for a consultation and discover the ideal sliding glass door and opener solution for your UAE project. Seamless style & automated convenience for UAE homes. Maximize views & light. Effortless indoor/outdoor flow. Space-saving design. Secure & energy-efficient for UAE climate. Key Features: Quality glass, smooth operation, robust security, heat-reducing options, durable materials, modern aesthetics, automated openers (remote/sensor), customizable. Ideal for: Villas, apartments, balconies, hotels.

5

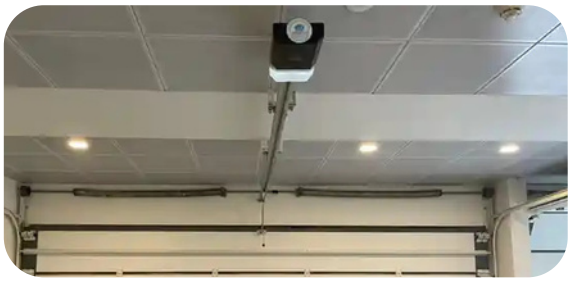

UNI PARK:

Secure Your Parking Space with Intelligent & Reliable UNI PARK Systems – Now with Battery Backup and Manual Override for Ultimate Control in the UAE. In the bustling urban environments of the UAE, securing your designated parking spot is paramount. UNI PARK offers a robust and user-friendly solution to reserve your space, preventing unauthorized parking and ensuring convenience. Our advanced systems are now enhanced with both battery operation for uninterrupted functionality and a manual override for ultimate flexibility.

6 GARAGE DOOR MOTORS:

We specialise in supplying and Insall a variety of high-quality automated garage doors in Dubai. our high quality electric garage door services, you can rest assured your door will last a long time, as modern automation methods are highly durable and reliable.

7 ACCESS CONTROL SYSTEMS:

Access control technologies have undergone significant advancements, progressing from traditional mechanical systems to sophisticated electronic solutions. This evolution can be categorized into the following key areas:

1. Mechanical Systems: The foundational approach, relying on locks and keys.
2. Electronic Access Control Systems: Utilizing electronic credentials and readers, providing enhanced security and management.
3. Biometric Systems: Employing unique biological identifiers for advanced authentication.
4. Smart Cards: Utilizing embedded microchips for secure credential storage and communication.
5. Mobile Access: Leveraging mobile devices for convenient and flexible access control.

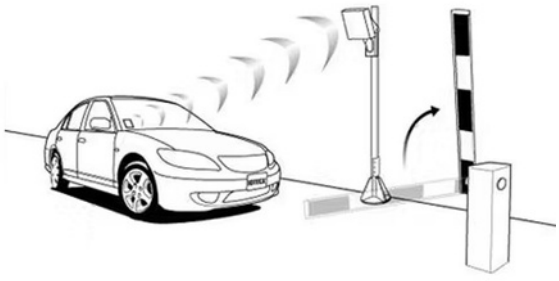

8 ULTRA HIGH FREQUENCY (UHF) ACCESS CONTROL:

For efficient, long-distance access control, UHF RFID systems are used. Operating between 860-960 MHz, these systems provide contactless identification, ideal for buildings and parking lots where hands-free access is desired, improving both security and convenience.

Quality & HSE Policy

ACCESS KEY AUTOMATIC GATES TRADING LLC

QUALITY & HSE POLICY

Quality Control Policy, Plan & Program

Quality Policy

Zero defect and continuous improvement in the quality of product, process and delivery play vital roles in gaining Client's confidence and ACCESS KEY**,** being one of the industry pioneers, has been incorporating all possible measures in establishing standards in all its activities, services, and products.

Quality standards practiced by the industry and as prescribed by the Client are always given prime importance. Also, safety precautions of industrial standards and norms are observed in all its operations by educating employees at all levels, suppliers to maintain zero accident. The company quality policy is primarily based in accomplishing:

a) Preventing non-conformances reaching to Clients/customers;
b) Zero defects in its products and services;
c) Achieving Client's satisfaction.

Quality Assurance

- Quality control using in-house quality management system
- Calibration program for production methods and systems
- Preventive maintenance program for plant, equipment and machineries
- Periodical inspection and employing latest technology in production facilities

Quality Control Plan

ACCESS KEY shall be responsible for quality control during construction and for meeting end results for all design parameters. ACCESS KEY shall follow prescriptive contractual requirements in performing suitability and control tests. ACCESS KEY employees own personnel to perform the required sampling and testing or avail the services of certified consultants or accredited Labs to perform such tests. The client or its Consultants may accept such quality control test results for approvals and acceptance decisions, provided that the sampling was witnessed by them and that test results are in compliance with the project standards.

When the specifications require a contractor quality control program, ACCESS KEY shall establish, provide and maintain an effective quality control program. The details to include the methods and procedures to be taken to assure that all materials and completed Works are confirming to contract plans, technical specifications and performance requirements. Although guide lines are established and certain minimum requirements are specified herein and elsewhere, ACCESS KEY assumes full responsibility for accomplishing the stated purpose and set standards.

Our program shall be described in general as follows.

a). **General Description**:

ACCESS KEY shall establish a quality control program to perform inspection and testing of all items of work required by the technical specifications. This quality Control program shall ensure conformance to applicable specifications and plans with respect to materials and workmanship, construction finish and functional performance. The quality control program shall be effective for control of all construction work performed by ACCESS KEY and shall specifically include surveillance and tests to comply applicable standards, in addition to engineer's standards to establish an effective level of quality control and assurance.

b) **Quality Control Program (QCP):**

ACCESS KEY shall describe the detailed quality control program in written document which shall be reviewed by the Engineer prior to the start of any production, construction or off-site fabrication. The written quality control program shall be submitted to the Engineer for record purposes.

The QCP shall be organized to address, as a minimum, the following items:-

- Quality Control Organization
- Project Progress Schedule
- Submittal Schedules
- Inspection Requirements
- Quality Control Testing Plan
- Documentation of Quality Control Activities
- Requirements for corrective action, in case of failure

c) **QA/QC Statement**

ACCESS KEY is dedicated and encouraged to periodically review the existing QCP and add additional elements to the QCP that deems necessary to adequately control all production and/or construction process required by the nature of job. As particulars to the suggested QCP, ACCESS KEY shall provide construction contract administration, construction monitoring, create and maintain daily log of the construction operations, shop drawings, response to RFIs, O&M documentation, record of approvals for variation, preparation of progress reports, review and maintaining of project schedule, digital documentation of site work in progress, supervise and check laboratory sample testing, etc.

-: oOo:-

Health / Safety / Environment Policy

1.0 Introduction

1.1 Objective

Company objective is to provide a safe and healthy working environment for its entire staff and to actively remove or reduce accidents, incidents and injuries related to the construction industry.

Company will implement and maintain an active Safety, Health and Environment plan throughout the **Project**.

This Safety, Health and Environment plan is intended to set out guidelines to ensure the safe execution of the construction works.

The systems contained within it are designed to reduce or remove the risk of injuries, loss or damage to the general public, site personnel, permanent and temporary works.

1.2 Target

Our target is to complete the construction of Projects with **ZERO accidents, incidents and injuries**.

2.0 General Statement of Policy

Company's objective and policy on Health and Safety is to provide and to maintain safe and healthy working conditions for all employees, and to furnish such information, training and supervision that may be needed for this purpose.

We recognize as well, our responsibility for the health and safety of other people who may be affected by our activities.

The allocation of duties for safety matters and the particular arrangements, which we will follow to implement this policy, are set out here on in.

An emphasis is placed upon the importance of co-operation, good communications and training at all levels within the practice, in an effort to achieve improved standards in all areas of health and safety.

This policy is a general statement and may be tailored to suit the business changes in nature and size.

To ensure this, the policy and the way in which it is operated will be continuously reviewed and amended by the management.

3.0 Safety policy

ACCESS KEY believe that safety of employee is an essential responsibility. Therefore, our safety policy is related to every employee in the company. The efforts start from the very early stage during the preparation of the work and continue until final handing over.

Our safety measures are:

➢ For the management

1. To practice accident preventive programs.
2. To employ one safety officer for each site, who will be responsible for carrying out all safety measures independently from the operation.
3. To work with the client, the consultant and the Main Contractor in compliance with the project safety program.

➢ For the safety officer

1. To strictly apply the company safety programs.
2. To be an approval safety officer in company to sign hot and cold work orders.
3. To work with the client and the consultant to comply with the project's safety program.

➢ For the labors

1. To wear safety shoes, safety helmets, dust mask, gloves and uniforms with company name printed on them.
2. Be encouraged to report any work hazards and to co-operate with their supervisors to avoid accidents.
