Mortality Management Plan

Cattle mortality will be managed by cremation on-site.

In the case of an unlikely catastrophic event that goes beyond the capacity of normal mortality management practices, the following process will occur:

1. Contact the Department of Agriculture, Trade, and Consumer Protection (DATCP) for guidance from the State Veterinarian.
2. Contact the Wisconsin Department of Natural Resources (WDNR) for guidance regarding the process to ensure all guidelines are met.
3. Use the following mortality management entities:
 - a. GFL Environmental LLC
 - b. Sanimax
 - c. Organic Waste Connections
