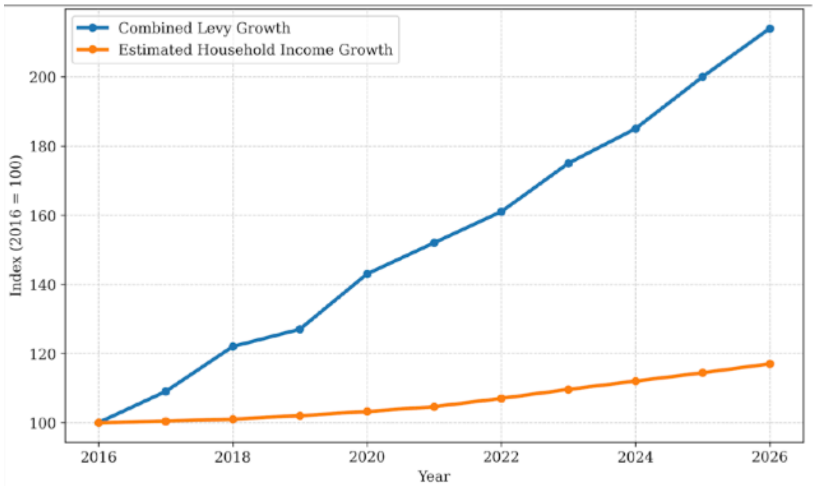
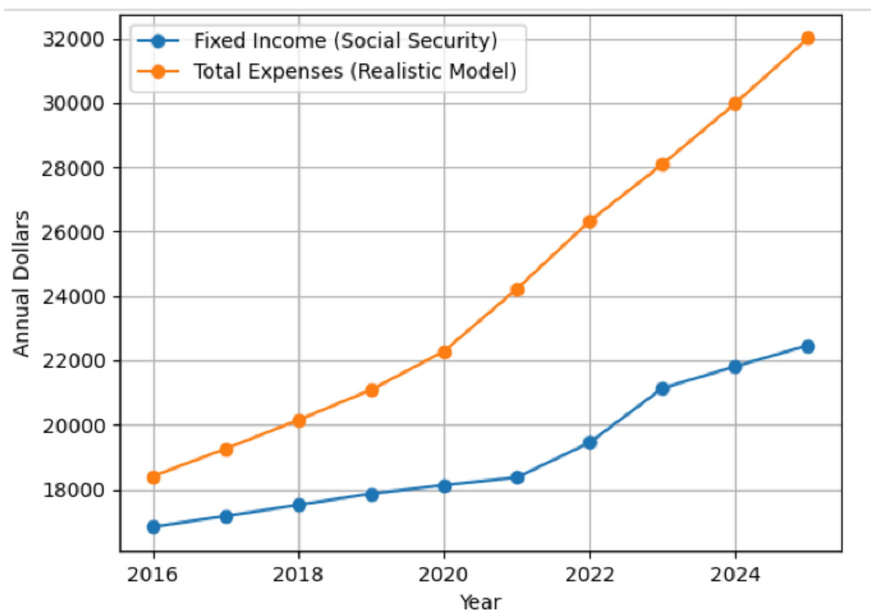
# You're Right!

## Fairmont Taxpayers are Falling Behind

Fairmont's citizens have watched their tax levy grow by leaps and bounds while their household income has barely risen.



26.1% of Fairmont's citizens are estimated to be on social security and other fixed income models which have not kept pace with their expenses. It gets harder and harder for them to make ends meet.



The solution is to widen the tax base with better jobs and better opportunities. That puts more disposable income in the hands of those who are working and eases the tax burden on those who are on fixed incomes. Ask us how!
