***Student STEM Project: Design a Sustainable Building* PART 4**

**1. Put together a PowerPoint presentation to showcase your sustainable design**

- PowerPoint should have a Title page with your Design Name and the names of individuals in your group
- The following slide should include: Location, LEED Certification Goal, and any other introductory information you would like to include
- Slide 3 should showcase the overall concept of your design
- Slides 4 should highlight your alternative energy source & WHY you chose it
- Slides 5+ should highlight each of the sustainable or energy efficient features on the inside and outside of your design
- The last slide should include a “Call to Action” in which you promote sustainable practices for our future

**2. Present your project to the class on Wednesday May 22, 2019 or Thursday May 23, 2019**

# Grading Rubric

Category	Points Received	Points Possible
Organization		10
