PRINT3D Clock-it Funnel

- The Clock-it Funnel is designed for directing water from clock-it holes straight to a sump or drain line to protect underground roadways.
- Easy assembly.
- Suits 1" FRAS hose for discharge line.
- Also catches internal water entering the clockit via the wires.
- Overflow indicator spout.
- Mesh grate to keep loose material out of the funnel.

The Code A buddy

- A six in one set of Allen Keys in the palm of your hand. 5, 6, 8, 10, 12 and 14mm keys are incorporated into the Buddy. Designed for Underground Production Electricians conducting daily inspections. Swapping from enclosure to enclosure with different size bolts made a breeze with the Code A Buddy.

PRINT3D

Gas Calibration Equipment

- Flexible and robust Gas calibration applicators to suit all makes and models of sensor heads. Our Cal Cups are rigorously tested by the NATA certified company Cal Pacific with certificates issued for each batch of applicators. Requirements of AS2290.3:2018 are the benchmark for our testing, and certificates stating compliance are issued with each batch of Cal cups produced.
- We supply full kits including Bags, regs, hose, stopwatches, cal magnets and cups to suit all sensor heads. Components can be purchased individually or kits customised to suit your operation.

PRINT3D

Mining Laser - Mount Sleeves

- Mounting sleeves designed to adapt the Applied Resolution Technology laser and battery to the traditional roof mounted laser bracket for continuous miner survey sights. Send us dimensions of your lasers, batteries and mounts and we will design the perfect fit for your application.

PRINT3D Laser Tri-Pod

- Designed for Aligning belt Structure during belt Extensions, the Tri-Pod Gymbal accommodates the Applied Resolution Technologies SLX-635S Laser, and can also be designed to fit any type of laser upon request.
- The extendable legs gives a range of height that can be adjusted to suit the conditions.
- The legs fold in and lock together when not in use for easy handling & transport.

Locker Labels

- Label to suit your team, company or logo.
- Includes your logo image and any 2 colour combination.
- Dimensions 245x30x3mm.
- Custom orders available in different sizes, shapes and colours.

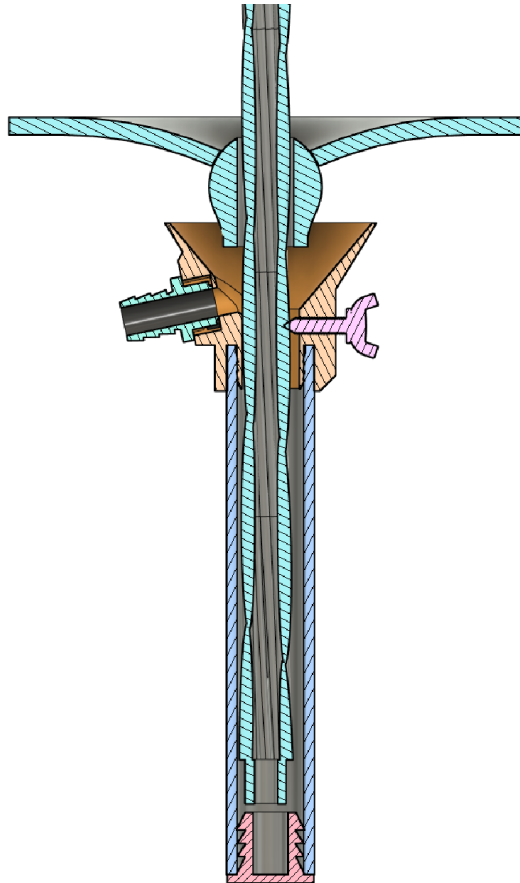

Longwall Roof Support

- Perfect for a mining award. Comes in a premium display case with SS label if required. Can be decorated with a skin displaying your company Logo or any info your desire.

PRINT3D Megga Funnel

- Water trap designed to fit most Megga-Bolts/Flexi-Bolts, for water management and roadway housekeeping.
- Main tube that encapsulates the mega-bolt tail is FRAS hosing.
- 400mm supplied length can be cut down on install for shorter tails if desired.
- Discharge outlet accommodates 1" FRAS hose so water can be directed to the gutter or sump. Can be supplied with discharge hose cut to length.
- Simple and quick installation & re-useable.

Miner Remote Cover

- Flexible yet strong cover that snaps onto your remote or pendant that protects the crash bar and toggle switches from mechanical damage during transport or storage on the machine.
- Designed to suit any make or model of remote.

MX Sixer

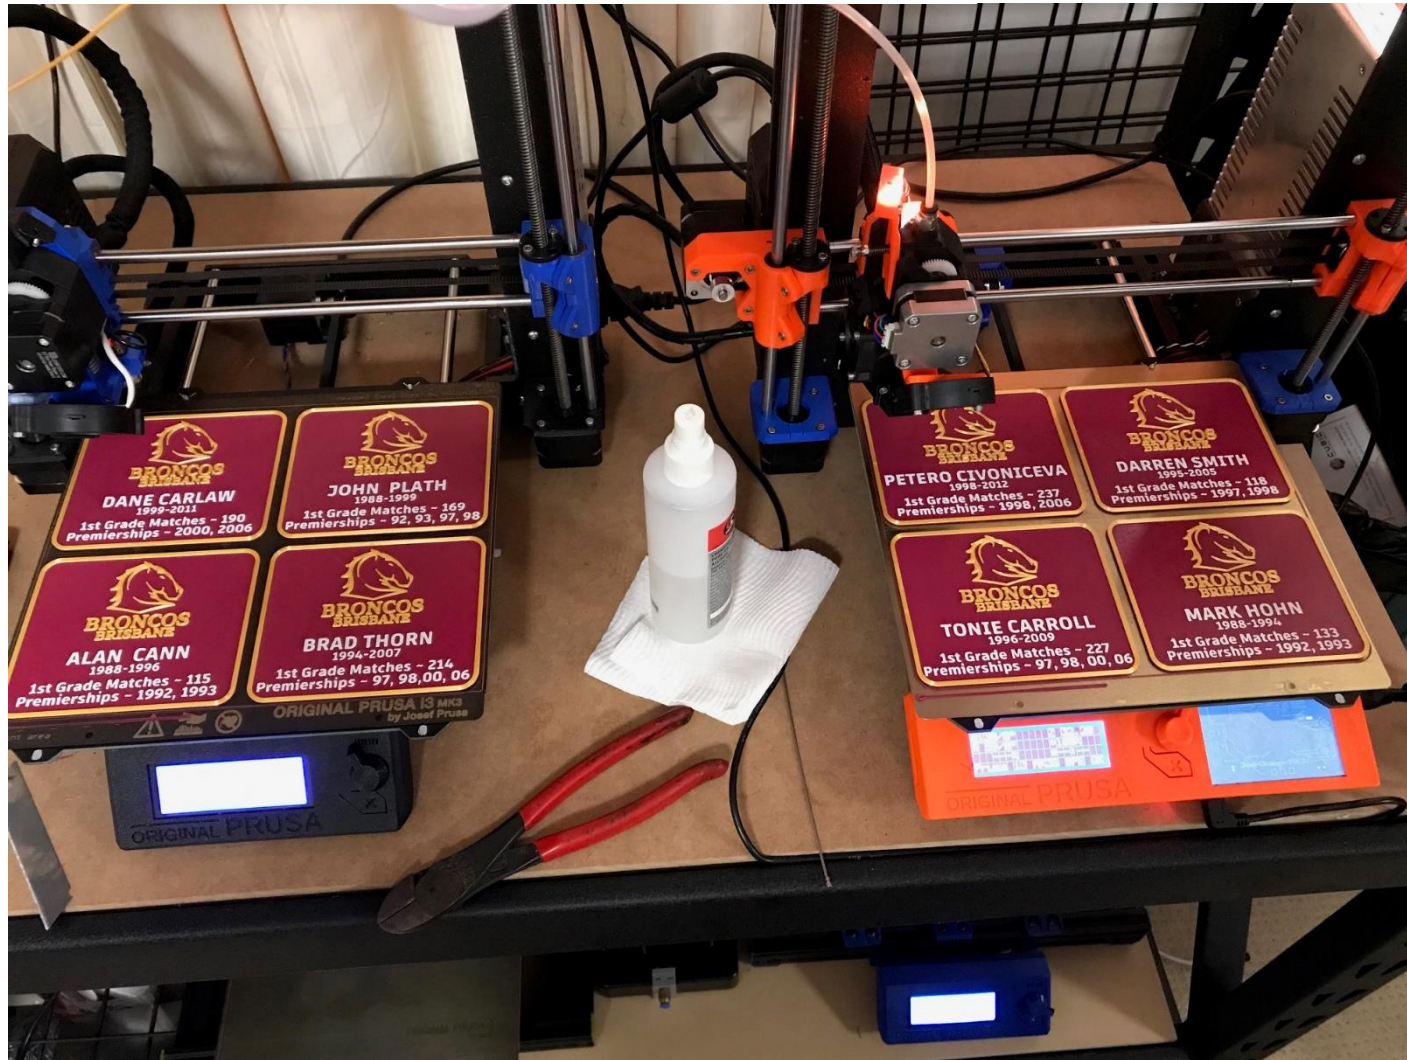

- A Personal Gas Detector extension pole designed for detecting methane layering on the roof. Comes in 2 lengths: 1m - 2.5m and 1.5m - 4m for high reach areas, designed for underground mining the flexible MX Sixer snugly holds an MX6 gas monitor that won't fall out. If you run a different PGD we can design a holder to suit.

PRINT3D

Name Plate

- Name plate/plaque to suit your team or logo.
- Includes your logo image and any 3 colour combination.
- Dimensions 120x100x3mm

Oil Level indicator

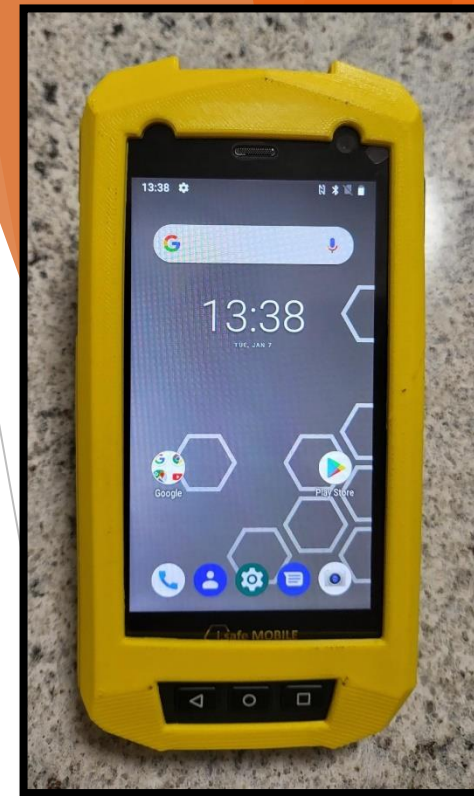

- Snaps around the sight glass neatly with an adjustable (screw Lockable) level indicator to set the correct oil level in any gearbox. Product shown is for a CST anti-run back oil level. Send us the dimensions of your sight glass for a perfect fit.

PRINT3D I.S. Phone Cover

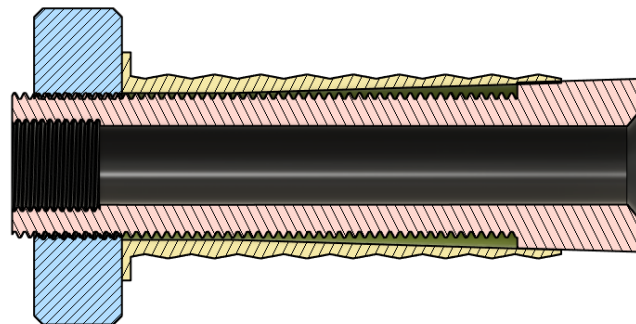

- To suit Intrinsically Safe Mobile “i.safe MOBILE Model IS530.M1”
- Flexible rubber case to protect the Phone with all ports and camera accessible.
- Comes with Stainless removable insert for customer requested text.
- Custom glass screen protector also available.

Relief Hole Drain/Plug

- With a large water table sitting above the coal seam, relief holes can be drilled to drain the water so it can be directed and managed effectively.
- The relief Hole Drain/Plug is designed to direct water to a sump or drain line to prevent water damage to Underground roadways.
- Works on a taper-lock principle, the outer sheath is flexible to ensure a good seal against the coal walls of the hole.
- 1" BSP external thread to accommodate Minsup fittings/valve etc.
- Can be fitted with relief valve if required, or simply used to plug the hole, or drain the hole.

Self Rescuer Cover

- Designed for the CSE-ASR Self Rescuer.
- Can be redesigned to suit any SCSR.
- Flexible covers for the top and bottom of the rescuer provide mechanical protection against damage sustained when driving loaders etc. Also keeps the unit protected against chemicals like PUR.
- The covers will not fall off, but can easily be pulled off by hand for inspections or in the unlikely event of an emergency.

S-Hooker

- A cable hanging extension pole designed for hanging “S-Hooks” and the cables supported by the S-Hook. The Stainless-Steel extension pole has 1m - 2.5m reach. Designed for underground mining, gas and comms cables. 4 x magnets accommodate all 4 styles of S-Hooks on the market including the double S-Hook.

3D PRINT I.S. Tablet Cover

- To suit Intrinsically Safe Tablet “i.safe MOBILE Model IS930.M1”
- Flexible rubber case to hold and protect the tablet with magnetically held hard screen cover that removes and snaps onto the rear of the case while in use.
- Customised text.
- Optional custom glass screen protector available.

PRINT3D

V-Prodder

- An all-in-one safety tool for opening/closing isolation valves, disconnecting/re-connecting air and water hoses from pipe ranges safely, in high reach areas without the need for a machine or ladder.
- Uses magnets to grab the safety clip, which can then be removed in either up or downward direction.
- Install the safety clip which is held apart by the V-Prodder, also in either the up or downward direction.
- The hose is disconnected and re-connected by the V-Prodder horns pushing and twisting against the coupling bolts or the coupling itself. Works on swaged fittings also.

PRINT3D

XA M8000

- The XA M8000 Securely Supports the XAM-8000 hand held gas monitor for detecting Methane layering on the roof. The Stainless-Steel extension pole comes in 2 lengths: 1m - 2.5m, and 1.5m - 4m for high reach areas. Can also be designed to suit your type of gas monitor upon request.
