Resident Info ▼

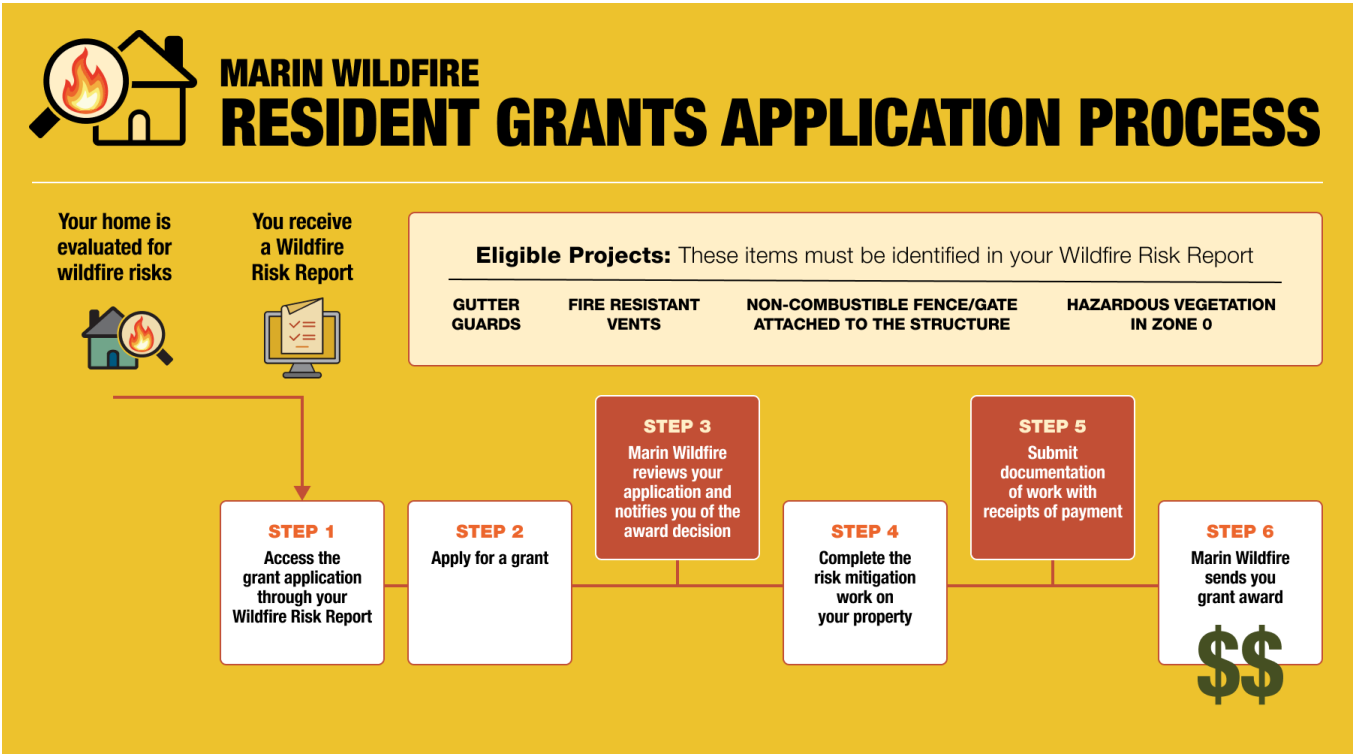

Marin Wildfire is committed to helping our residents lower wildfire risks on their properties. The Wildfire Risk Home Evaluation Program identifies what those risks are and what needs to be done to make homes and neighborhoods safer throughout Marin.

We recognize that the cost of work required to mitigate risks can be a barrier for many residents. Our grant program is intended to help residents take care of home hardening and defensible space issues that are prioritized as high risks.

We are currently accepting applications from residents who have recently received a full evaluation. **Log in to your Wildfire Risk Report to learn more and apply!**

For questions or application assistance please email grants@marinwildfire.org or call 415-342-8912. Begin each message with your name and street address.
