## **Landing Page Samples**

## **Text for Medical Spa Landing Page**

**SEO:** Minimal upon client request.

**About:** A Medical Spa offering beauty products and services. First part of name scrubbed. Displayed is the adjusted website content for their general information and samples from the services and products they offer, the original of which were crafted by myself.

### **About Us**

\*\*\*\*\* Medical Spa began as a revolutionary idea to provide a wider range of cosmetic health services and products in one location, in a market place where a limited range of services is the norm. It is our unwavering priority to find a suitable solution for every client's needs, and in pursuit of that goal we have expanded the scope of the skin care, cosmetic health and rejuvenation services and products that we offer, pushing the limits of all that can be offered in one place. Along with this wide range of aesthetic medical services, we do not compromise on specialty. Every service we offer and every product we sell is backed by the extensive expertise of our team, with at least one specialist or expert on our staff for every service or product we offer. Our equipment is state-of-the-art and the techniques employed by our personnel are always the latest and most cutting edge in our field. Your needs for skin, cosmetic, aesthetic, and rejuvenation are of paramount importance to us.

### **Treatments**

#### ***Skin Peel Treatments***

A peel is a treatment which enhances the softness of the skin and makes its texture smoother, eliminating wrinkles, reducing pore spots and more. There is a variety of peel treatments available to our clients, and since each client's needs are unique and different, our specialized staff will be happy to assist you understand the advantages of each type so that you can select the peel treatment you feel suits you the most.

### ***Microneedling***

Microneedling is a treatment which rejuvenates the skin by utilizing professional equipment which depends on needles that are extremely fine and slender. These needles make minimal incursions into the skin's surface and due to their slender nature and their controlled and limited progression past the skin's surface, those microneedles stimulate the body to generate collagen elastin to fill those extremely minor punctures, rather than haematological clotting factors. This new collagen enhances the cohesion and smoother texture of the skin, reducing marks such as stretch marks, enlarged pores, or even scars.

### ***Facial Treatments***

There are many factors that harm your skin in small ways every day. Over many days, this damage accumulates. Some factors include ultraviolet light from sun exposure, exposure to airborne substances harmful to the skin such as heavy metals, and even biological remnants you are exposed to every day in your environment and surroundings. The effect of all these factors compounds the natural regression of your skin's health over time. Our variety of facial treatments, also selected based on your specific personal needs will protect your skin from the various external factors which

affect its health and in some cases with the use of your choice of natural or synthetic substances, it may also reduce the rate of your skin's natural regression, improving skin appearance, elasticity, smoothness, clarity and more.

### ***Skin Imperfection Treatments***

A number of treatments are also available to treat various other imperfections of the skin such as Freckles, Acne, Spider Veins and more. These treatments, like all our other treatments are specially tailored to your needs and are selected in accordance with your aim. Our relevant professional staff will be delighted to guide you through the benefits of each treatment and assist you until you choose the treatment you find more suitable for you.

### ***About our products***

Aside from our wide variety of services tailored to fit your needs, our products are sourced from the most highly regarded manufacturers combining the use of the most cutting edge materials available with the materials' authentic high quality. We source the best products in each class to better serve you and your every need.

## Banty. Easy. Secure.

Experience premium PHIPA, HIPAA & PIPEDA compliant video conferencing

To understand the ease and security which make Banty's foundation, we need to first look at how Banty began.

Banty was originally built for doctors and their patients. Our origins lie in telemedicine, which is still a key focus of our company. But, telemedicine has rules and regulations. For example, in Ontario (where we're based), not all video conferencing software is appropriate for doctors to use while interacting with patients – it should be PHIPA compliant video conferencing software.

There are other PHIPA compliant video conferencing solutions out there. However, using many of these solutions requires technical expertise which often seems akin to flying an airplane. Our founders wanted to build a safe, secure, and easy to use medical platform.

With the help and perspective of doctors and patients, we built Banty. While doctors quickly began to appreciate the convenience of hosting virtual appointments, patients soon expressed an interest in having access to Banty for personal and business use. What started as an online meeting solution for medical professionals, soon turned into a service desired by people from all walks of life.

This led to us developing a suite of premium, PHIPA, HIPAA & PIPEDA compliant video conferencing platforms and further video networking solutions; [Banty Personal](#), [Banty Plus](#), [Banty Business](#), [Banty Enterprise](#), [Banty Medical](#), and [Banty Virtual Events](#).

## SECURITY STANDARDS

All Banty platforms are encrypted end-to-end, server-to-server, but our non-medical platforms also offer a toggle option for some of the automated Banty Medical security features.

To become a PHIPA, HIPAA & PIPEDA compliant video conferencing platform provider, we needed to undertake extensive security preparation. As such, Banty underwent a lengthy security evaluation via multiple penetration tests by specially licensed professionals. Threat risk and privacy impact assessments were also performed to ensure maximum security.

Banty's video conferencing protocols have also undergone verification for the Ontario Health Provincial Standard to make us one of the Verified Virtual Visit Solutions of Ontario Health.

The Ontario Health Provincial Standard is a standard developed by Ontario Health in collaboration with the Ministry of Health and OntarioMD. The standard aims to help doctors and other health care providers select the best virtual health care solutions for their patients, whilst maintaining their data privacy and security.

Meanwhile, HIPAA standards empower Banty to be used by physicians with their patients across all 50 U.S. States.

Internally, all Banty employees have completed comprehensive digital security training as a way for them to have a broader understanding of online threats and how to manage them if they arise.

← → ↻ banty.org

## IT'S TIME TO TRY BANTY

All this security comes without compromising the ease of use Banty is dedicated to. Are you joining a meeting? Simply enter the host's custom URL in your address bar and you'll be taken to their online meeting space. (You can also click the custom link found in your meeting invite).

Once in the virtual waiting room, enter your name and you will be welcomed into the meeting when the host is ready to begin. Inside the meeting space, all of the intuitive productivity tools are just a click away and easy to use.

Banty meeting rooms are accessible via any desktop browser, as well as through dedicated apps for iOS and Android devices.

No matter where in the world you are, Banty is the virtual meeting solution that you can always rely on.

## Why Banty?

### One-click virtual meetings

Say goodbye to generating complex meeting identifications. No more complicated pins and passwords with long-winded requirements. Hosting a meeting? Just click. Boom. You're meeting. Joining a video call? Just put in your name. Boom. You're on the call.

### Premium video conferencing

Minimal lags and minimal bugs. Features like advanced video presentation, split-screen, picture-in-picture display, and more! Our developers and our technical support team work very closely together to ensure an optimum video call experience for you.

### Customized unique banty URL

Want someone to find you? Want to find someone? Easy. No downloads. No temporary meeting platforms. Just use a custom URL to put into any browser. If you're hosting, you let them in. If they're hosting, they let you in. No hassle.

### Search Engine Optimization

Want to be more accessible to people, professionally? Or even socially? Allow search engines to display your Banty space, and people can find you for video meetings just by searching your name along with Banty, or even just your name! Our SEO content allows you to be found whenever you wish to be.

### Data Security

Generally, people worry about digital privacy when communicating online. And they should, in this day and age. But not with Banty! Featuring direct server-to-server connections, advanced encrypting, and compliance with a host of security standards, banty is the safest platform online.

## FURTHER MEDICAL SECURITY STANDARDS AT BANTY

Along with being PHIPA compliant and OHIP compliant per Canadian digital security standards in health care, Banty is also HIPAA compliant per the United States digital security standards in health care.

### ABOUT HIPAA

If your health care focus isn't the United States you might be asking "What is HIPAA compliance?" HIPAA is the Health Insurance Portability and Accountability Act, enacted in the United States in 1996. This act provides for the protection of information under a clause known as the HIPAA Privacy Rule. Per the HIPAA Privacy Rule, HIPAA compliance in our case means complying with the HIPAA network requirements for digital security. On top of PHIPA and OHIP security compliance, Banty provides HIPAA compliant video conferencing as well.

## WHITE GLOVE IMPLEMENTATION

The video call needs for every office and every person are unique. We hear you, at Banty. This is why for a one time fee of \$199, we help you customise various Banty platforms to your virtual offices and meeting rooms to your requirements. There are also other pricing options for higher customisation. Unlike other video call solutions and video conferencing applications, at Banty, our developers and customer service experts come together to design an online digital presence specifically designed for your particular set of business needs.

At Banty we rely on Web Real-Time Communication technology. WebRTC for short. WebRTC technology facilitates operating direct, peer-to-peer communication, without outside plugins or external application downloads for your device. This means that webRTC is generally based on platform similarities. Normally, this challenges customisation. However, the Banty team has developed unique webRTC solutions. Solutions allowing for the most versatile video call customisation on the market, without needing to download any dedicated video chat software or video conferencing apps. Get web RTC technology that works for you.

### A completely custom interface developed for your business

Every business's video call needs are unique. At Banty, we recognise that. This is why we help you customise the interface to your virtual offices and meeting rooms at Banty to your exact requirements. Unlike other video call solutions and video conferencing applications, at Banty, our developers and customer service experts come together to design an online digital presence specifically designed for your particular set of business needs.

### Custom webRTC solutions

Banty Enterprise relies on Web Real-Time Communication technology. WebRTC for short. WebRTC technology is about operating direct, peer-to-peer communication, with no additional plugins or external application downloads for your device. That means that webRTC in general is based upon the similarities between platforms. Normally, this doesn't leave much room for customization. However, our team at Banty has developed unique webRTC solutions for Banty Enterprise. Solutions which allow for the most versatile video call customization imaginable, without the need for downloading any dedicated video chat software or video conferencing apps. With Banty Enterprise, you get web RTC technology that works for you.

### Allows teams of over 30 to easily video chat and collaborate

Do you manage a team of over 25 people? 30? 100? More? Do you manage multiple teams who all need to video call you and each other on a regular basis? None of that is a problem. Banty Enterprise can cover that for you and more. Share your screen with as many people as you have on the video call, for essential reading and explanation. Give detailed presentations with video slides to your whole team. Watch videos together, use picture-in-picture and split screen features to magnify and highlight important information, and more! Banty Enterprise is so much more than a secure video platform for larger teams. Banty Enterprise is the ultimate video conferencing solution for your business.

### Record any video session

Just like in-person, proximal meetings, some things get lost in remote video chat. Banty Enterprise however, has just the right video conferencing tools to eliminate this possibility within your organization. To ensure an optimal experience and review both the content of your team's conversations within the meeting, as well as any information displayed visually through manual or digital means, Banty offers you an additional video call feature. All meetings or conferences, no matter the number of attendees and participants, may be recorded in full, if your organization needs to do so. The chance to review a meeting in full is realistic enough in this day and age. Why rely on minutes alone, when you can replay parts (or all!) of the original meeting and correct any potential oversight in the minutes? Banty Enterprise offers you, along with a number of other video call tools, this particular ability.

Dave from Banty  
Hello from Banty Toronto! 🇨🇦 I've been authorized to offer new customers 50%...

The image is a screenshot of the Banty website's enterprise plans page. At the top, the browser address bar shows 'banty.org/enterprise-plans/'. The website header includes the Banty logo with the tagline 'Bringing the world together through better communication', and navigation links for Pricing, Solutions, Press, Support, and Login. A prominent green button labeled 'Start Free Trial' is located in the top right corner. The main content area features a photograph of a person in a meeting room looking at a laptop displaying a multi-person video conference. To the right of the photo, the text discusses 'Role-based permissions' and 'Advanced security and end-to-end encryption'. A notification bubble from 'Dave from Banty' is overlaid on the bottom left, stating: 'Hello from Banty Toronto! 🇨🇦 I've been authorized to offer new customers 50%...'. The footer contains the Banty logo, copyright information '© 2021 Banty Inc.', and links for Privacy, Terms, and social media icons for LinkedIn, Twitter, Facebook, YouTube, and Instagram.

### Role-based permissions

At Banty, we understand how sensitive information can be sometimes. In light of that understanding, we've built a number of solutions to support private video chat functions and private video conferencing. For Banty Enterprise in particular, we give you the option of role-based permissions, also known as role-based access control (RBAC). This ensures the security of your team's information at every layer of your organization, so that everything can be accounted for. If security is a top priority in your organization, Banty Enterprise is a great option.

### Advanced security and end-to-end encryption

Further security features include our standard server-to-server, end-to-end encryption. While role-based access control protects your organization from the inside, our advanced server-to-server encryption security protects you from any potential outside attack, securing any information belonging to your organization or your team externally. Banty Enterprise, along with all of Banty's platforms, has state-of-the-art security.
