

Stratosphere

(Rocket Me Up)

Background: The news is depressing. It seems like people are getting further apart than ever. Just want to rise about it all.

Written: 2023

Verse

Been feeling too earth bound
Frozen by gravity's pull
Tired of being stuck to the ground
Staring up at a moon in full

This world's got my head spinning
I think it's time to lift off
The ground beneath me is falling
I'm reaching for the stars above

Chorus

Rocket me up
Above the stratosphere
I wanna float above the clouds
So I can look down
And watch the world disappear
Rocket me up

Above the stratosphere
Let's fly away
Make our getaway
Let's get out of here

Verse

Seems our Earth's going nowhere
There're no world leaders anymore
Just everyone choosing sides
It's a disease looking for a cure

Two many hearts lost in conflict
Petrified into stone
Blackened like soot
As hollow as a bone

Chorus

Rocket me up
Above the stratosphere
I wanna float above the clouds
And look down
To see the world disappear
Let's fly up
Above the stratosphere
Let's fly away
Make our getaway
Let's get out of here

Bridge

Across the skies into orbit
Past where angels stand guard
Where the stars arrange as gods
Where time and space are one

Verse

I can't stay here any longer
There's nothing left here for me
I'm tired of feeling orphaned
And speaking in soliloquies

This heart is feeling heavy
I want a black hole to climb into
This rain's 'bout to break the levee
Just needs another inch or two

Chorus

Let's rise up
Above the stratosphere
I wanna float above the clouds
And look down
And watch the world disappear
Let's rise up
Above the stratosphere
Let's fly away
Make our getaway
Let's get out of here
