

# Blown Away

**Background:** I'm a second amendment proponent. But like anything in a society where many must live together in compromise if not harmony, like the first amendment, there are limits, lines, and laws that must restrict. It's sickening is this country to continue to live with mass shootings and the murder of children on a weekly basis yet such have such massive resistance to any kind or reasonable rules on gun control. It's all done under the guise of 2A being an incontrovertible, limitless "human" right like breathing, and that the Constitution is an infallible, timeless document that doesn't need to grow and adapt as time, culture and technology change. I don't believe the forefathers meant for every citizen without restriction to own assault weapons, nor could they predict advances in technology and the ease of which to acquire it 200 years into the future no more than we can 200 years from now. That's an enormous amount of time. Common sense and compromise need to prevail. But what it really is, is politics and people digging in merely because their side supports it, and you have to support your side unconditionally. People I grew up with like me in liberal Maryland in a non-gun DC suburb have suddenly become rabid 2A gun nuts even though they didn't grow up with guns, were not hunters or gun sportsmen, and otherwise lived in nice areas with minimal crime and only a debatable need to own a gun, or at least not much more than a basic weapon for home protection. I'm in favor of that and want that right/option, but there are limits, and no, not every citizen should own guns. Many are just not responsible enough, trained, or have the right temperament for that responsibility. Every right, including 1A, comes with responsibility and limits. 2A must too. It's not a slippery slope. It's particularly upsetting that the side most in favor of guns and unwillingness to bend to help are the same ones constantly touting pro-life. It's the worst hypocrisy there is. It's also baffling how people think needing to be armed in public or to have an arsenal at home is a form of freedom. How is living in such fear freedom? It's everything but.
