

I Candee

Background: Written in about 30 minutes right after the Knicks-Pacers game. The play on words with a woman's nickname and the cliché "eye candy" came to me a while back but I never developed it into anything because it seemed silly. Suddenly it came to me.

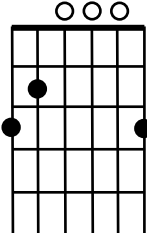

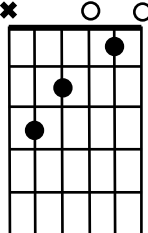

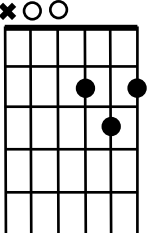

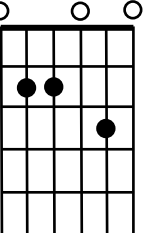

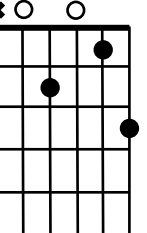

A simple and sappy love song. Intentionally cringe-worthy. Searching for a late 50s, early 60s innocent bubblegum pop sound, a time when simple love songs were common and not considered trite or silly, even when they were. Looking for a song like Ritchie Valens's "Donna", Buddy Holly's "True Love Ways", or even the Four Seasons' "Sherry" without the falsetto. This one is meant to be simple fun and nothing more.
