

Zero Gravity

Background: The writing of this song started out as fun and turned into a multi-verse science themed song. It ended up too wordy and complicated to play practically, but I'm working on it. It was fun nevertheless.

Bonus Verses

The Chemical Verse

We are the nucleus
A strong force holds our bond
To her high valency
I am that missing electron
Her spirit charges me
A positive ion
Her chemical reactions
Turn me on

Pre-chorus

We have organic chemistry
Floating in zero gravity
Black magic is her alchemy
I'm floating in zero gravity

Chorus

The Chaos Verse

Her strange attractor
Feeds back chaotically
Her golden body spirals
Like Fibonacci
The butterfly affects you
With infinite intricacy
Mandelbrot set her straight
Straight as nonlinearities

Pre-chorus

There's order in her fractality
Floating in zero gravity
Disorder, unpredictability
I'm floating in zero gravity

Chorus

Bonuse Outro Choruses

Zero gravity
She's a sci-fi fantasy

Zero gravity
I'll follow her to infinity

Zero gravity
I'm drawn to her magnetically

Zero gravity
I'm focused on her concavity

Zero gravity
She approaches asymptotically

Zero gravity
She divides irrationally

Zero gravity
She's un-phased spatially

Zero gravity
I'm drawn to her inertially

Zero gravity
She courses through electrically
