

# Welcome !

Alondra Union Commodities Knowledge Center.

**Dear friend:**

Welcome to the Commodities Knowledge Center, called Alondra Union. I hope all this information is useful to you.

Alondra Union is a software driven algorithm, based on net hedges, published weekly by the Commodity Futures and Trading Commission (CFTC) of the United States government.

Here there are no opinions, but an objective numerical analysis, which has revealed to be very effective in its forecasts. It works like a weather forecast.

There are short-term (30 days) and medium-term (30 days to 18 months) forecasts, depending on the commodity.

These are grouped into classes: Agriculture, Energy, Metals, Currencies and Indices (Bonds and Stocks). There are 280 commodities in total.

All information is free, and is intended for professional commodity investors.
