HELLO ALL:

MY FELLOW CANADIANS!

My fellow Canadians, you are **buying into a lie** regarding our **energy industry and the global environment**. We are a **mere 35 million people**, just **0.5% of this planet's 7.3 billion population**. Our country covers roughly 10 million square kilometres of which probably **90% is realistically uninhabitable** (explaining why over 80% of our population live in urban centres within 200 kms of the U.S. border).

We endure **temperature extremes ranging from -40C or colder to 35C or warmer**. Out of **necessity** we need to **heat our homes for 6+ months** of the year. We face **major transportation challenges** simply because of the geography of our country. Yet, through all this we are **responsible for less than 0.5% of the pollution generated globally**.

We ARE NOT the problem! If every one of us here in Canada chose to sacrifice ourselves for the betterment of mother earth and self-terminated, **the positive effect** on the global environment would be ... drum roll please ... **zero!**

The global effect would **actually be negative** because we are one of the **most ethical, environmentally responsible producers of energy** in the world! If we were out of the picture, the **U.S. would be mining our oil sands before our corpses had even started giving off methane gas**. They would then proceed to build the **biggest pipeline imaginable, from Fort Mac to Texas**.

Don't believe me? **Let's look at some facts**. The U.S. has **no problem with pipelines** - U.S. pipelines that is. They actually have over **3.2 'million' kilometres of liquid petroleum and natural gas pipelines** already. There's also the **1300 kilometre, 122cm (48 inch) line running from Prudhoe Bay to the Valdez Marine Terminal** (yes, big bad oil tankers). You are aware, aren't you, of the **Trans Alaskan pipeline** running directly through the **pristine heart** of that beautiful state?

As of 2010, **16 'BILLION' Barrels** of oil had been transported through this U.S. pipeline and terminal. The US. also has **no problem drilling** for oil in the **Atlantic Ocean, the Pacific Ocean, the Arctic Ocean or the Gulf of Mexico** yet they have the **audacity to condemn Canada** for mining our oil sands in northern Alberta and Saskatchewan?

The **opposition to our Canadian energy development** is a **well-organized attempt** to keep our **Canadian oil land locked** so that we are **forced to sell to the U.S.** and to the **U.S. only** and then at a **very discounted price**. The U.S. is attempting and succeeding in **preventing** us from **marketing our own natural resources globally** to the **highest bidder**. **U.S. foundations** (HP, Tides - THE ROCKEFELLERS - et al) **are funding the opposition to our oil sands** and contrary to popular belief, it has **absolutely nothing to do with threats to the environment**.

If they really were that **concerned** about our planet, why are they not protesting the **real polluters**, the real threats to our environment?

China, the world's worst polluter (besides having a tragic human rights record)? **No protests**.

Why isn't **David Suzuki** over in **Beijing chastising Jinping**? What about the other major polluters? **Russia**? The **U.S.** themselves? **India**?

I can understand a Canadian that is **benefiting financially**, who is **receiving grants to oppose or protest** or hamstringing our own resource development. **What I can't understand is the rest of my fellow Canadians buying into their bovine excrement**.

In the oil sands, our very own **Canadian oil sands**, we have the **third largest proven crude oil reserve in the world**, behind only Saudi Arabia and Venezuela - again, both with 'stellar' human and women's rights track records. **EVERY person** in Canada, and **EVERY province and territory** in Canada has **benefited tremendously**, whether directly, indirectly or both **from our oil sands development**.

Over the next 25 years the oil sands have the **potential to generate over \$1.5 TRILLION** in federal and provincial taxes and royalties. Of course, **Quebec will need their share** - but, oh yeah, **they don't want a pipeline** either! There is the potential for well over **500,000 direct and indirect jobs**.

So here's the deal my fellow Canadians. I fear our **Canadian 'goose that lays the golden egg'** is suffering the **death by a thousand cuts**. Alas, it may already be too late. Maybe it's already on **life support**.

If you share the views of the **Carols**, the **Suzukis**, and the **Obamas** of the

If you share the **views of the Gore's, the Suzuki's, and the Obama's** of the world, that our Canadian energy producers and those that work in this industry are **bad and evil and a scourge on the Earth**, a blight on Canada's reputation in the global community then fine, **stick your fork into the goose as well** but please **do not whine and complain 10 or 15 years** down the road when the wait time for your **hip replacement is 3-5 years** because our health care system is **underfunded** and there's a severe shortage of doctors and nurses in the system. Meanwhile, the Suzuki's and their ilk will be **flying down to the Mayo clinic in a big bad fossil fuel burning jet** for their medical needs.

Don't whine and complain when your grandchild's **class has a 50:1 student to teacher ratio** because our education system is **underfunded** and the government coffers are bare. Of course the Suzuki grandchildren will be in **private schools** so no problem there.

Don't whine and complain when your city's infrastructure is **decaying** and falling apart and there's **no money** to repair it. Instead of whining and complaining make sure you **look into the mirror** and realize **you believed a lie that has cost this incredible country and our future generations an amazing opportunity to prosper and succeed globally.**" Kindly take note that Donald Trump's name is not included herein, but he is not excused!

If the arguments here ring true for you as well, then please consider circulating this to others.

Pass it on!

**Randy Pompetti
Hanna, Alberta**

OUR READERS' COMMENTS SECTION

1. From a Reader: Well done. Unfortunately too many people in Canada (including Alberta) will not be persuaded and will write Teck off as more whining from Alberta. In my view, the next front in the war will be the climate alarmists, emboldened by what they will see as their success in getting Teck stopped (they see it as a win), bringing a full court (nation wide) press against the TMX construction – protests at the construction sites plus rail/highway blockades plus demonstrations at government offices and politician's houses across the country. In addition, the company's decision not to proceed takes

across the country. In addition the company's decision not to proceed takes the Liberals off the hook on a critical decision regarding energy infrastructure and the future of Canada. If the Liberals do not act quickly to instruct the police (and the army if necessary) to enforce the rule of law, then anarchy is only a step away. If a tiny minority can adversely influence the course of events to wrongfully impose their view of what is or is not in the national interest, then we are f..ked.

2. From a Reader: The desire to separate does not need to be filled with vitriol either. The reality is Canada is a young country and, as has occurred throughout Europe, borders change as peoples' geo-political cultures mature. If Alberta and Saskatchewan (and parts of BC) continuously vote for policies that are significantly different than those of Ontario or Quebec, it's not so much a separation, but rather a maturation. We simply have different ways of life and differing cultures that go along with that.

3. From a Reader: I'm going to take a page out of the blockaders playbook, yes the ones bringing our country to its knees. I think it's time Premier Jason Kenny et al started putting up blockades on the TransCanada highway and east-west rail lines until Trudeau and the Laurentian elites start making a real effort to help Alberta. Of course dialogue would be required, but as a comparison, Trudeau has told us numerous times, the blockades are unacceptable, that people are hurting, the economy is suffering and his team are "working really really hard" to resolve these complex issues. Have you ever heard Trudeau say the same things about helping Alberta? You'd think the Gretas of this world, including Trudeau and friends, would use their climate change marketing to fight the spread of the coronavirus. Simply introduce legislation and a tax. This kind of thinking apparently is the best way to stop climate change so why wouldn't it work in stopping the spread of the upcoming global pandemic? Save the planet, part deux.

4. From a Reader: Trudeau and the UN are birth twins. I've had it and ready to leave this once great country but in my heart I feel that I should stay and fight. But how? Vigilantism (I don't promote that, we already have that with first Nations's and Environmentalists) is our only hope or separation for once and for all. Separation is NOW! Central/Eastern Canada is now Canada. I will NEVER be a colonist to Mother Ontario but willing to obey HRM the Queen. I will leave for good. I disdain Canada. I'm an Albertan not a Canadian. Lord help you or us all but I'm willing to stay and FIGHT on my decision. I want to fight but the UN is the issue and don't Albertans think for one second it's not

right but the UN is the issue and don't Albertans think for one second it's not. We are being destroyed. Did you watch Question Period on CPAC Feb 26 and Trudeau's attack on cam of his blame for all of Alberta? Watch it! Yet he denies he said it live. God bless us all. I mean all.

5. From a Reader: Why is Canada allowing the UN (a completely un-elected body) to establish governance and rule in our country? The UN is a group of global socialist/communist/anarchists who could never get elected in their respective countries, so they form a coalition and offer it as a scapegoat/guidance to weak leaders like Justin Trudeau who get themselves in trouble and are looking to divert attention/blame to someone else. We should completely ignore the UN and any other organizations like them. I didn't see their name on the last ballot and I certainly didn't vote for them.

ADDITIONAL READING/ VIEWING

In closing, here is additional information on the problems we are facing and the need for us to take remedial action immediately to right our sinking ship.

ACTION ALBERTA - WHO WE ARE

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta's energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of

living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please **share** this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

Thank you for ALL of your support and interest!
