**THE WOLVES ARE RUNNING THE HENHOUSE!**

**Elizabeth May, MP** and **Yves-François Blanchet, MP** have at last revealed

that they are united in a single purpose, the **failure of Canada**. In calling the global oil and gas industry **dead**, they have **revealed** their common cause, the **demise of the country**. Regrettably, far too many people at the helm of government concur; **too few disagree**.

**May is a wolf in sheep's clothing. Blanchet is a wolf in wolf's clothing** (to quote Churchill).

Blanchet is clear. **Quebec separation** is his avowed objective. A **weak, failed Canada** would be much easier to leave than a successful, prosperous and generous one.

As for May, she is clear that she puts the **environment above all**. She is a purist in her objective (the environment) and her prescribed solution (**shut down Canada's oil and gas industry**).

Michael Moore's recent movie "**Planet of the Humans**" reveals the **inconvenient truth about environmentalist like May**: their beliefs transcend all evidence of reality and that they are simply **anti-human**. We are too messy. We consume too much. There are too many of us. In May's case these **messy ideas** of country, wealth and democracy are all **subservient to her non-negotiable solution**.

Meanwhile, **Quebec separatist's malevolence** has become a Canadian institution. **If you can't leave it, destroy it**.

I realized the depth of the takeover during **Quebec's 1995 referendum**. It was weeks before the vote and Parizeau looked close to winning. Chretien created a **national unity commission**. I knew one of his appointees on the committee. Over lunch I **proposed a number of things** that I thought the committee should consider; protecting Canadian assets, the currency and the debt. I envisaged something out a Tom Clancy movie where a very smart group was **hunkered down in Ottawa** thinking through all possible outcomes and working for the country.

He confirmed that my thoughts were **exactly what the committee should look at** and asked me to write them down. I wrote the letter and knowing the country, **signed it "R.B. Royer"** rather than my usual "Randy Royer".

Weeks went by and I finally phoned him to see what had happened. He confirmed that the members of the **committee liked it** and forwarded it to the bureaucrats to study and recommend.

What did the bureaucrats say? They had one question, he explained. **They wanted to know my ethnicity.**

At my shock he explained that I needed to understand the federal government. **It had been given over to French speaking Quebec** and many of them, including the ones working for the committee **wanted Quebec to leave, enriched as possible.** They could not fathom that someone with a **French last name** would write such a letter. Not adding my first name hid my real roots. There are and were lots of smart loyal bureaucrats but his statement remains true and the aspiration of **Quebec separation continues. A vibrant oil and gas industry is an obstacle for both the Separatists and the “Single-Solution Environmentalists”.**

The **federal cabinet, the Prime Minister’s Office and Privy Council** reflect this **treasonous axis.** Word is that it was this alliance that **torpedoed the recovery plan** for the industry hinted at by Ministers Morneau and O’Regan.

And **don’t be fooled by the approval on a single pipeline.** Success would have put it somewhere other than down the throat of Vancouver, the nicest city in the world and within easy cab fare for protestors (**yes they did that on purpose**).

**The West needs to come to grips with the reality that Canada seems like it is failing for a reason; the people who want it to fail are in charge.**

**The wolves are running the hen house!**

**Randy Royer  
Calgary, Alberta**

## **OUR READERS' COMMENTS SECTION**

**1. From a Reader:** The federal Liberal government does not have 61 environmentalists in senior positions, they have 61 activists in those senior positions. That’s a big difference!

**2. From a Reader:** While Alberta is being strangled to death by people who are incapable of embracing truth but are beholden to myths, superstitions, frauds, lies and other childish fairy-tales, Quebec continues to harvest approximately \$30 billion/year from Ottawa regardless of what the rest of the Canadian economy is doing - and it's not doing well at the moment. Worse, the francophone-dominated federal civil service that "calculates" what Quebec should get from Ottawa as the price for staying in the Canadian federation, have even "calculated" a steady increase in that annual welfare cheque consisting of the Equalization Formula, Health and Social Transfers (in addition to healthy federal subsidies to help integrate new French speaking immigrants into the province). Talk about the rape of an English speaking civilization on the basis of needing to "protect" a language minority whose last possible advantage was permanently lost on the Plains of Abraham in 1759. This long-defeated language tribe has now arisen from the ashes of that defeat to exact its revenge by becoming a modern terror-like state by extracting a massive annual tribute from its conqueror. It is now behaving like an "enemy within" and doing more possible damage to the national federation than could be done by an enemy from without. The Canadian Sock Boy PM has legalized the consumption of cannabis in Canada. And now we know why. If any voice wants to advocate negotiating with such a relentless welfare-dependent state for a better deal for Alberta, they will be quickly directed to the nearest pot shop for a "fix" to put an end to such an illusion. Has Ms. Corbella from the Calgary Herald in her article of April 26, 2020 [Click here](#), not provided sufficient justification for Alberta's departure from the federation? if not, how much more is needed?

**3. From a Reader:** The blatant payoff of the media, the money sent to buy a UN seat, the destruction of our greatest resource, the payoff by the Saudis to the east politicians to block pipelines, seems to point to Castro's illegitimate son's apple not falling far from the tree and yet a lot of Canadians seem hypnotized. The children and grandchildren of this generation will be paying for this mistake forever.

**4. From a Reader:** Last week, the Prime Minister issued a statement encouraging everyone to buy Canadian. As an Albertan, this is the kind of thinking we've been wishing for and asking for, for years. Obviously though, Trudeau was talking about buying anything, except Canadian oil. Typically, Liberal ideology will trump reality and as expected, Canada will continue to

generate jobs overseas as well as importing 800,000 barrels of oil every day from countries with no environmental, human rights, labour, indigenous or gender recognition record. It's this type of exhaustive Liberal thinking which apparently will stop climate change and save the planet? Considering the current economic mess we're in, buying Canadian would see an East-West pipeline built, generating thousands of jobs and millions if not billions in revenues and royalties. Instead, for the Rideau Cottage PM, buying Canadian means increasing carbon taxes 50% during an economic shutdown.

**5. From a Reader:** Gerald Butts: Did anyone really think he had gone away? His thumb prints are on every bit of word salad that spews from the PM's mouth. Nothing has changed. They have only been waiting for an occasion to make it official and put him on the payroll. Eight weeks? That's another bit of garbage. He is in the back room which he never left, Justin's chief manipulator openly running the show. Justin so far over his head now there was little choice. We still have no leader.

#### **ADDITIONAL READING/ VIEWING**

In closing, here is additional information on the problems we are facing and the need for us to take remedial action immediately to right our sinking ship.

#### **ACTION ALBERTA - WHO WE ARE**

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our

work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta's energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please **share** this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

**Thank you for ALL of your support and interest!**
