HELLO ALL (The Group of 4,611+ and growing):

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. That motivation should naturally flow from the fact that Alberta's energy business is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian.

MY INTERVIEW ON CHQR 770 RADIO

On March 7, 2019 I was interviewed on **CHQR 770** by **Zach Hewitt** about the deeply embedded "enviro" officials in both the Federal and Alberta governments. Here is the Podcast. You can hear it at 3/7/2019: "**Who's who? The History of those involved in the Trudeau Scandal.**" It is 21 minutes 28 seconds long.

<https://tunein.com/podcasts/News/Afternoons-with-Rob-Breakenridge-p939476/?topicId=129717897>

THE UNITED NATIONS' AGENDA 21 - THE "ENVIRO" MOVEMENT'S ACTIVITIES NOW MAKE SENSE!!!!

Before you read the following, please watch this short video!

<https://www.youtube.com/watch?v=govL-fUAwMA> (4 minutes 44 seconds)

From its inception in **1992** at the **United Nation's Earth Summit** in Rio de Janeiro, Brazil, 50,000 delegates, heads of state, diplomats and Non-governmental organizations (NGOs) hailed **Agenda 21** as the “comprehensive blueprint for the reorganization of human society.” The 350-page, 40 chapter, Agenda 21 document was quite detailed and explicit in its purpose and goals. They warned us that the reorganization would be dictated through all-encompassing policies affecting every aspect of our lives, **using environmental protection simply as the excuse to pull at our emotions and get us to voluntarily surrender our liberties.**

Section I details “Social and Economic Dimensions” of the plan, including **redistribution of wealth to eradicate poverty, maintain health through vaccinations and modern medicine, and population control.**

To introduce the plan, the Earth Summit Chairman, **Canadian Maurice Strong** boldly proclaimed, “**Current lifestyles and consumption patterns of the affluent middle class – involving meat intake, use of fossil fuels, appliances, air-conditioning, and suburban housing – are not sustainable.**” **Of course, according to the plan, if it's not “sustainable” it must be stopped.**

In support of the plan, David Brower of the **Sierra Club (one of the NGO authors of Agenda 21)** said, “Childbearing should be a punishable crime against society, unless the parents hold a government license.” **Leading environmental groups advocated that the Earth could only support a maximum of one billion people,** leading famed Dr. Jacques Cousteau to declare, “In order to stabilize world populations, we must eliminate 350,000 people per day.”

Section II provides the “Conservation and Management of Resources for Development” by **outlining how environmental protection was to be the main weapon, including global protection of the atmosphere, land, mountains, oceans, and fresh waters – all under the control of the United Nations.**

To achieve such global control to save the planet, it is necessary to eliminate national sovereignty and independent nations. Eliminating national borders quickly led to the excuse for openly allowing the “natural

migration” of peoples. The UN Commission on Global Governance clearly outlined the goal for global control stating, **“The concept of national sovereignty has been immutable, indeed a sacred principle of international relations. It is a principle which will yield only slowly and reluctantly to the new imperatives of global environmental cooperation.”** That pretty much explains why the supporters of such a goal go a little off the rails when a presidential candidate makes his campaign slogan “Make America Great Again.”

The main weapon for the Agenda was the threat of Environmental Armageddon, particularly manifested through the charge of man-made global warming, later to conveniently become “climate change.” It didn’t matter if true science refused to cooperate in this scheme as actual global temperatures really are not rising and there continues to be no evidence of any man-made affect on the climate. **Truth hasn’t been important to the scare mongers. Timothy Wirth, President of the UN Foundation said, “We’ve got to ride this global warming issue. Even if the theory of global warming is wrong, we will be doing the right thing in terms of economic and environmental policy.”** To further drive home their complete lack of concern for truth, Paul Watson of Green Peace declared, “It doesn’t matter what is true, it only matters what people believe is true.”

So in their zealotry to enforce the grand agenda, **social justice became the “moral force” over the rule of law as free enterprise, private property, rural communities and individual consumption habits became the targets, labeled as racist and a social injustice.** Such established institutions and free market economics were seen as obstructions to the plan, as were traditional family units, religion, and those who were able to live independently in rural areas.

Finally, Agenda 21 was summed up in supporting documents this way: “Effective execution of Agenda 21 will require a profound reorientation of all human society, unlike anything the world has ever experienced. It requires a major shift in the priorities of both governments and individuals, and an unprecedented redeployment of human and financial resources. **This shift will demand that a concern for the environmental consequences of every human action be integrated into individual and collective decision-making at every level.**”

Over the years, since the introduction of Agenda 21 in 1992, the United Nations has created several companion updates to the original documents. This practice serves two purposes. One is to provide more detail on how the plan is to be implemented. The second is to excite its global activists with a new rallying cry. In 2000, the UN held the Millennium Summit, launching the Millennium Project featuring eight goals for global sustainability to be reached by 2015. Then, when those goals were not achieved, the UN held another summit in New York City in September of 2015, this time outlining 17 goals to be reached by 2030. This document became known as the **2030 Agenda**, containing the exact same goals as were first outlined in Agenda 21 in 1992, and then again in 2000, only with each new incarnation offering more explicit direction for completion.

Enter the **Green New Deal** in the USA, representing the boldest tactic yet. The origins and the purpose of the Green New Deal couldn't be more transparent. The forces behind Agenda 21 and its goal of reorganizing human society have become both impatient and scared. Impatient that 27 years after Agenda 21 was introduced, and after hundreds of meetings, planning sessions, massive propaganda, and billions of dollars spent, the plan still is not fully in place. Scared because people around the world are starting to learn its true purpose and opposition is beginning to grow.

So the forces behind the Agenda have boldly thrown off their cloaking devices and their innocent sounding arguments that they just want to protect the environment and make a better life for us all. Instead, they are now openly revealing that their goal is socialism and global control, just as some have been warning for the past twenty years. Now they are determined to take congressional action to finally make it the law of the land.

Agenda 21 will control every aspect of our lives, including how and where we live, the jobs we have, the mode of transportation available to us, and even what we eat. In the USA, the proposed Green New Deal is a tax on everything they do, make, wear, eat, drink, drive, import, export and even breathe. In opposing Smart Growth plans in your local community, the main goal was to eliminate cars, to be replaced with bikes, walking, and light rail trains. The **Green New Deal calls for the elimination of the internal combustion engine.** Stay alert. The next step will be to put a ban on the sale of new combustion engines by a specific date and then limiting the number of new vehicles to be sold. Bans on commercial truck shipping will follow. Then they

will turn to airplanes, reducing their use. Always higher and higher taxes will be used to get the public to “voluntarily” reduce their use of such personal transportation choices. That’s how it works, slowly but steadily towards the goal.

Under Smart Growth programs now taking over every city in the nation that single-family homes are a target for elimination, to be replaced by high-rise **stack and pack apartments in the name of reducing energy use**. That will include curfews on carbon heating systems, mandating they be turned off during certain hours. Heating oil devices will become illegal. Gradually, energy use of any kind will be continually reduced. The Green New Deal calls for government control of every single home, office and factory to tear down or retrofit them to comply with massive environmental energy regulations.

Agenda 21 sustainable policy sought to drive those in rural areas off the farms and into the cities where they could be better controlled. Those in the cities will be ordered to convert their gardens into food producers. **The beef industry is a direct target for elimination**. It will start with mandatory decreases in meat consumption until it disappears from our daily diet. The consumption of dairy will follow. Since the revelation of the Green New Deal the national debate is now over cattle emissions of methane and the drive to eliminate them from the planet. Controlling what Americans eat is a major part of the Green New Deal.

The plan for Agenda 2030 was “Zero Economic Growth.” The Green New Deal calls for a massive welfare plan where no one earns more than anyone else. **Incentive to get ahead is dead**. New inventions would disrupt their plan for a well-organized, controlled society. So, where will jobs come from after we have banned most manufacturing, shut down most stores, stopped single-family home construction, closed the airline industry, and severely regulated farms and the entire food industry? This is their answer to the hated free markets and individual choice. The Green New Deal will destroy the very concept of our Constitutional Republic, eliminating private property, locally elected representative government, free markets and individual freedom. All decisions will be made for us by the government – **just to protect the environment of course**. They haven’t forgotten how well that scheme works to keep the masses under control.

Behind the sudden excitement and rush to support it are three radical groups each having direct ties to George Soros, including the Sunrise Movement –

which markets itself as an “army of young people” seeking to make climate change a major priority. Justice Democrats – which finds and recruits progressive candidates, and New Consensus – organized to change how we think about issues.

To sum up, Agenda 21, the Millennium Project, Agenda 2030, the Green New Deal. Progress in the world of Progressives! They warned us from the beginning that their plan was the “comprehensive blueprint for the reorganization of human society”. And so it is to be the total destruction of our way of life.

Over these years you have listened to the Sierra Club, the Nature Conservancy, the World Wildlife Fund, Tides Canada, the David Suzuki Foundation, and many more, as they assured you their plans were just environmental protection, just good policy for future generations. They have been lying to you to fulfill their own agenda! Well, now the truth is right in front of you. There is no question of who and what is behind this. And no doubt as to what the final result will be.

Every industry under attack by this lunacy should now join our efforts to stop it. Cattlemen, farmers, airlines, the energy industry, the auto industry, realtors, tourist industry, and many more, all will be put out of business – all should now take bold action to immediately kill this plan before it kills your industry. Stomp it so deeply into the ground that no politician will ever dare think about resurrecting it.

The enviro movement is pure Socialism. How far its perpetrators get in enforcing it depends entirely on how hard you are willing to fight for freedom. Kill it now or watch freedom die.

DOES THIS BEGIN TO RING TRUE? Enviro groups (such as Tides Canada, World Wildlife Fund Canada, Sierra Club Canada) are all behind Agenda 21 and now have their alumni embedded deep in 22 Federal Ministries!!! CANADA IS CHEST DEEP IN AGENDA 21! THIS NEEDS TO BE MADE WIDELY KNOWN TO ALL CANADIANS AND STOPPED NOW. No wonder we cannot get pipelines approved and all major exploration and development projects are being stymied by our various governments at all levels.

OUR READERS' COMMENTS SECTION (AGAIN MANY)

1. From a Reader: Radio Talk Show 770 CHQR, Thursday 7th Mar 2019. As an Alberta resident for over 29 years it is very important to see this my home province do well in all fields. I was completely taken aback listening to a snippet of the talk show when the guest was talking about the recent award by U of A to David Suzuki, a person who is out to destroy our 'OIL SANDS'. What shocked me the most was the list of present Federal and Provincial Government officials in high places who were hand in gloves with Anti-Oil Sands organizations funded by foreign money to virtually destroy a vital economic engine to Canada, and in particular, Alberta. Is “treasonous” too drastic a word for citizens who are using all their powers to destroy what is important to the Canadian economy?? It is certainly a sad time to see a wonderful country like Canada being hijacked by a few so-called Environmental Fanatics while the ordinary citizens are powerless to stop our economy and jobs are crashing down.

2. From a Reader: I would shut KM down the first day of governing. I would not open it until Northern Gateway was well under construction. This was approved by The Harper Government and Enbridge et al had \$500 million invested in getting this approved. Trudeau broke the law by cancelling this. Can you imagine Trudeau cancelling something SNV had \$500 million invested in? There would BE MORE BUY IN FROM BC RESIDENTS, than shipping oil out of downtown Vancouver. Trudeau would look like an idiot for buying KM. NG would carry far more oil. Secondly, I would tax everything we buy from BC and Quebec. Thirdly, I would create a law fining anyone in or coming to Alberta funded by foreign interests. That would be Suzuki, Reserves etc. If you do not

want to help Alberta move to Quebec. What I would do day two is coming. Fight for our Alberta. It needs help from all these creeps!

3. From a Reader: As Trudeau would say “ let me be perfectly clear” he wants to save 9000 jobs with SNC Lavalin in Quebec in his riding but doesn’t matter about the thousands of jobs lost in Alberta and B.C. with the cancellation of pipelines when in fact he could have pushed the TMP through because it was of national interest. He seems to talk out of both sides of his mouth at the same time. Seems to be a characteristic of PMs from Quebec. Let me be perfectly clear, Trudeau is a liar.

4. From a Reader: Thanks for initiating this newsletter. You are doing a great service to all Albertans. Albertan's will justifiably take their time in the process of realizing that Canada no longer works and other options need to be considered! This article from Action Alberta is a must read, and a guideline for Albertans at this critical time in our history. The truckers’ convoy to Ottawa was the perfect bellwether of how much concern easterners have for the massive unemployment crisis in the west. Few cared, especially the Liberals and as well, the main stream media gave the truckers negative press reviews. It is time for Alberta and other like-minded Western Canadian jurisdictions to move forward with their own best interests in mind, as we are obviously of minimal importance to most of eastern Canada and especially the federal government, regardless of which party is in power!

5. From a Reader: I'm now questioning if since the Federal Government bought the Pipeline from Edmonton to Burnaby, and the PM is in the hot seat, could he simply tear it down? Wonder why Sheer will not call for a Non-Confidence vote? Is he awaiting an apology from the PM? I'm shocked at how many in in his Cabinet, retired (Scott Brison) who went to a high position job @ BMO 4 days after retiring and not for "family reasons" whether that is legal in time frame? And a former Privy Council Member is now Chairman of the Board at SNC Lavalin after being on the Board @ BMO? Is something going on at BMO? I only have three names confirming this last night on Charles Adler. Cory Litzenburger, Lynch and Ottawa Life Dan Donovan. How legal is it for the Tides Foundation to set up office in Vancouver with all funds coming from San Francisco? There is a very grey area about funding although I know it's been investigated extensively by a wonderful Journalist. Perhaps the US Oil Companies are heavily in the mix too? Cheap oil and I fear that if we separate, they will take us over and then we get zero \$\$ for our Bitumen/Oil. I say if BC

keeps causing roadblocks, shut down the pipeline to Cherry Point WA. YVR depends on that for the Airport. Just an opinion and question.

6. From a Reader: I am happy to share the thoughts of any and all non-governmental advocates who aim to level the playing field with facts and information and those who lift the veils that are the tools of Liberals these days.

While watching the current and deeply disappointing madness occurring in our government in Ottawa, it is occurring to me that perhaps Alberta is about to enter a 'Canadian Catch Twenty-Two Conundrum' and it causes me worry. Mr. Trudeau has often asserted that his Canada has no unique identity. That is to say, there is no typical Canadian. I take huge exception to this ideology as would my parents and my baby boomer peers. The "I Am Canadian" series of ads run some years back make the point that there is and will always be a unique and proud Canadian identity. But that identity is in mortal danger. It is said that a fish stinks from the head first. Mr. Trudeau is that head and is showing us thru his actions and those of his party and loyal minions that he intends to continue promoting and engineering his vision of what the globe understands, is Canada. Seemingly his version of a Canadian is someone who now first asks, "what's in it for me" and then when satisfied that personal gain is to be had, proceeds to acquire that gain thru any means required. In this new order the ends absolutely justify the means. It seems this includes the abuse of position thru deception and access, wordsmithing to blur the facts and with his lawyers help, ignoring and even breaking the law!

His Green Wave ideology is proof of that. Clearly the qualities that made us Canadian need not apply here. Examples of this emerging version of 'the New Canadian' are coming out of the woodwork. For example, former B.C. Liberal premier Christy Clarke pronounced that 'If there was nothing in any deal for BC, then we're not interested" and she set her provincial policies accordingly. Transcending party affiliation her NDP replacement, Mr. John Horgan, seeing that this strategy 'works has not only adopted her skill sets he has taken them to the next level. Quebec's newest premier, the soft conservative Patrick Legault, has proclaimed that there is no place for Alberta's 'dirty oil' yet he has gleefully embraced the self-serving provincial largess for transfer payments, using foreign oil and the continued social genocide in pushing English out of that province. Apparently dirty corporations are however most welcome in his new Quebec, that is as long as he gets a taste (SNC Lavalin).

Saskatchewan's Gary Moe (god bless him) has taken the bit in his teeth and is staring down the prime minister not only on the carbon tax but also on the PMO Environment Barbies recommendations regarding Saskatchewan's autonomy in the marketing of their natural resources. Likewise, Manitoba's Brian Pallister has done a turnabout from supporting the PM's imminent carbon tax and is now cleaving a 'Manitoba only' path for his constituents.

Alberta is next. And talk about "awakening a sleeping giant and filling him with a terrible resolve". For Alberta it is going to be really ugly for Ottawa. This wave of new age Liberal consciousness is driven solely by the prime minister's vision and policies and it is causing our premiers to turn their provinces into mini fiefdoms imbued with a consequential 'siege tactics' mentality. This is destroying that which made us strong, proud, unique and yes, Canadian. I do not blame the premiers.

Their choice is to either submit to the national collective of accepting the madness that is the litany of Trudeau Liberal policy or to fight. We ARE CANADIAN and some 64% of us will choose to fight. By not fighting we lose our very souls. Herein lies the conundrum. I have no doubt that under a Jason Kenny led government, Alberta will not only turn its position around, we will likely lead the challenge against the Trudeau Liberal Autocracy. We will win back some semblance of sovereignty, some control over our destiny, some long due national recognition for the value of our natural resources (I mean OIL) and likely achieve the concessions needed to get our products to market. This will get us back to work which is all we ever wanted. Sadly, through those likely success we will become an active pawn in Trudeau's strategy of becoming 'New identity free Canadians' that I believe will take us closer to an American version of a confederation than the one we held so dear. The Canadian Catch Twenty Conundrum.
