HELLO ALL (The Group of 6,312+ and growing):

CLIMATE CHANGE - THE BIGGEST FRAUD OF ALL TIME!

Carbon dioxide accounts for less than 400 parts per 1,000,000 parts of the earth's atmosphere. That is **0.04%!!** And **without it, plants cannot live!** Yet we are being lead to believe that **0.0004% is causing all of this "Climate Change"**! That is about a cup full air in your living room. **THIS IS TOTALLY RIDICULOUS**, as demonstrated by this video!!

<https://www.youtube.com/embed/BC1I4geSTP8>

Despite this, the **Canadian federal government** (along with its **propaganda arm, the CBC**) is currently promoting an **eco-agenda of fear** that if we do not act now to reduce CO2, our planet will be lost. Hence, the **federal carbon tax** which is now being **applied unequally across the country**. For instance, Newfoundlanders are paying an emission tax that works out to less than half-a-cent per litre, while Albertans are paying 6.7 cents and Ontarians 4.4 cents, according to a study released this week by the Canadian Taxpayers Federation (CTF).

However, the **carbon tax** is so **unpopular with about two-thirds of Canadian voters** and the Liberals will be running on this as a campaign platform in October. I cannot wait!!

<https://winnipeg.sun.com/opinion/columnists/gunter-why-the-liberals-are-getting-unhinged-on-climate-issues/wcm/97041ab2-e83d-42e8-aae2-027d64156c0e>

The federal carbon tax will be \$20 per tonne this year, rising to \$50 per tonne in 2022. B.C.'s 2019 rate is \$40 per tonne; Alberta's is \$30.

But get this: the **UN's Intergovernmental Panel on Climate Change** noted the price of carbon needs to reach **\$184 a tonne** by 2030 to shake enough consumers from their carbon-heavy lifestyles. I can't wait for 2030. **Buggy whips and Amish buggies will be back in vogue!!**

<https://www.cbc.ca/news/canada/montreal/quebec-carbon-cap-and-trade-tax-1.5036044>

A **shocking statement** was made by **United Nations official Christiana Figueres** at a news conference in Brussels. **Figueres admitted** that the **Global Warming conspiracy set by the U.N.'s Framework Convention on Climate Change** of which she is the executive secretary has a **goal not of saving the**

change, of which she is the executive secretary, has a goal not of saving the world from ecological calamity, but to destroy capitalism. She said very casually: **“This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for at least 150 years, since the Industrial Revolution.”**

She even restated that goal ensuring it was **not a mistake**: **“This is probably the most difficult task we have ever given ourselves, which is to intentionally transform the economic development model for the first time in human history.” PURE AND SIMPLE: THIS IS SOCIALISM - THE REDISTRIBUTION OF WEALTH!**

<https://www.unric.org/en/latest-un-buzz/29623-figueres-first-time-the-world-economy-is-transformed-intentionally>

Here is further evidence of this **global fraud** in the words of **former United Nations climate official Ottmar Edenhofer**: **“One has to free oneself from the illusion that international climate policy is environmental policy. This has almost nothing to do with the environmental policy anymore, with problems such as deforestation or the ozone hole”** said Edenhofer, who co-chaired the U.N.'s Intergovernmental Panel on Climate Change working group on Mitigation of Climate Change from 2008 to 2015.

“We redistribute de facto the world's wealth by climate policy” said **Edenhofer**. Consider that a little more than five years ago he also said that **“the next world climate summit in Cancun is actually an economy summit during which the distribution of the world's resources will be negotiated.”**

<https://www.investors.com/politics/editorials/another-climate-alarmist-admits-real-motive-behind-warming-scare/>

<https://nationalpost.com/opinion/carbon-tax-smackdown-terence-corcoran-says-higher-prices-at-the-pump-dont-mean-fewer-emissions>

It is time for Canadians to stand up to this campaign of lies by our own government - designed to kill all energy projects - and run our economy (especially Alberta's) into the toilet!!

FROM JOHN FELDSTED (FROM WINNIPEG)

The intent of the Paris Agreement is pure socialism; the age-old effort to rob the rich to help the poor which never works out in practice. There are **too many sticky fingers** along the rout to allow more than a pittance to trickle though to those in need.

We are spending enormous amounts supporting a global warming/climate change propaganda machine. We are continually bombarded with **dire warnings of impending doom** if we do not take drastic action to curb carbon dioxide emissions. The latest doom forecast is that we are going to lose a million species of plants and animals due to global warming.

We are social animals and seek to be **part of a group (herd) for mutual protection.** Collective fear stimulates our herd instinct and **tends to produce ferocity toward those who are not regarded as members of the herd.** However, simply because an opinion is widely held is no protection against it being absurd. When **Columbus** set sail, tens of thousands believed he would sail off the edge off the **flat earth** to his doom. He was undeterred as he had borrowed maps from Iceland showing Viking travels to the shores of Labrador and northern North America.

DR. PATRICK MOORE ON DANIELLE SMITH'S SHOW

Listen to Dr. Patrick Moore (original co-founder of Greenpeace) expose the Climate Change fraud and the world's NEED for carbon dioxide. Go to 5/27/2019 "Carbon dioxide levels in the atmosphere ..."

OUR READERS' COMMENTS SECTION

1. From a Reader: It has been so very trying to listen to news stories on CBC over the past weeks, as the talk about climate change has been accelerating to such a pitch that appears that climate change is at the root of all bad things happening in the world today. It has become a fundamentalist religion, which demands us to chastise ourselves and sacrifice our country on the pyre of the climate apostles. Canada, by way of our current federal government, is doing a superb job of sacrificing our nation.

The truth is, our offering will be almost entirely useless as other nations are happy to take up the slack in the energy production which we refuse to bring to market. If we are truly concerned about the change of our climate and do not use this ideology to spread the socialism of hate for achievement, we should look at the true root cause. We do not a production problem, but a consumption problem, with the untold root issue being an increasingly unsustainable global population. This does not seem to have occurred to any of the climate apostles as their agenda is not just fighting climate change but mainly to propagate socialism.

2. From a Reader: Before Pierre Elliot Trudeau entered politics, his family owned Champlain Oil and the L'Aigle D'Or (Golden Eagle) gas stations in Easter Ontario, Quebec, New Brunswick and Nova Scotia. Sweet crude from Saudi Arabia was shipped to KC Irving refineries in the Maritimes and sold through Trudeau's firm. He had to divest himself of those assets into a 'blind trust' to be in politics. Ships carrying oil from the Middle East still come to Canada, and unload at the Irving refineries for refining. Gasoline and fuel oil still flow from the Irving refineries. Trudeau and Quebec still profit handsomely from a deal made with Saudi Arabia. And that is why Trudeau and Quebec resist building a pipeline from Western Canada to the Maritimes. Trudeau is the Prime Minister of Canada, but he resists doing what is good and right for Canadians, but he willing enriches his family's portfolio. Without a doubt, these assets are still in the family portfolio, and affects young Trudeau's actions on oil

in Eastern Canada. Bringing oil from Alberta would adversely affect his family's income.

3. From a Reader: Texas pipeline protesters face 10 years in prison under proposed law. A law like this is needed North of the border too.

<https://seekingalpha.com/news/3465901-texas-pipeline-protesters-face-10-years-prison-proposed-law>

4. From a Reader: Turdeau and his acolytes are committed to making climate change the main plank in his election platform. The CPC + Alberta, SK and ON need to lead the charge and out fund, and out campaign the Liberals by getting the real facts into the hands of the voters and by debunking every bit of climate alarmist dogma that surfaces.

5. From a Reader: The attached paper highlights the physics of energy to illustrate why there is no possibility that the world is undergoing, or can undergo, a near-term transition to a “new energy economy.”

ACTION ALBERTA - WHO WE ARE

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta's energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please **share** this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

Thank you for ALL of your support and interest!

Bob
