HELLO ALL (The Group of 6,350+ and growing):

"CLIMATE EMERGENCY" - ESCALATING THE CLIMATE SCAM!!
Before reading the following, please look out your window. Does your weather look about the same as it was this time last year or five years ago or ten years ago?

Having declared themselves superior to others, progressives now want to alter the debate on carbon emissions by changing the language in use. The term “Climate Change” is falling into disrepute. The new and approved term is “Climate Emergency.” If you search that phrase you will find a steady stream on local councils debating whether to declare their own particular geographic location a victim of the “emergency.”

On a broader front, the federal Liberals and New Democrats are backing competing motions to formally declare Canada in the grip of an emergency situation. Both parties say the other party’s emergency is inadequate, but it gives MPs a chance to chatter about it again.

The Toronto Star, of course, is already marching loyally in line, reporting breathlessly that “an intense sense of emergency” is behind a plan to “to shift Canada’s entire economy to battle climate change” launched by no less an evangelist than David Suzuki. Even Maclean’s, usually a bit more skeptical than the pack, advised that one of the tasks remaining before Parliament goes home for the summer includes “efforts to tackle the climate emergency”.

As Environment and Climate Change Minister Catherine McKenna recently observed, in a video clip she uploaded herself, “We’ve learned in the House of Commons, if you repeat it, if you say it louder, if that is your talking point, people will totally believe it.”

The UN driven wealth transfer scam, disguised as a climate initiative now named “Climate Emergency”, is the biggest single obstacle we face in continuing to benefit from our current lifestyle.
It threatens the very existence of the economic system that has delivered the ever-improving standard of living that the world now enjoys. The excellent article linked below was written by Joe Oliver, the last Minister of Finance in the Harper government, and summarizes the severe dangers of the unrealistic, ridiculously expensive path the UN has embarked upon.

We know that our Prime Minister, together with his cadre of socialist ministers, are huge supporters of the UN Globalist movement and in fact have preferred questionable international causes over critical domestic issues on a regular basis. Trudeau has endorsed the UN’s Globalist agenda, has stated that Canada is the first “post national” country and continues to campaign, at great expense, for a senior UN appointment.

However, the UN agenda goes far beyond dealing with climate issues. A senior UN official, Christiana Figueres, made the following astonishing statement: “This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for at least 150 years, since the Industrial Revolution.” THINK ABOUT THAT STATEMENT!

The substance of her statement is that the UN has a goal, not of saving the world from a manufactured ecological calamity, but of destroying capitalism!

Now that we know capitalism is the target and that a massive wealth transfer from developed to developing countries is the primary objective, we must adjust our strategy and fight back as if our way of life depends on it – which it surely does.

Removing the Liberals in October will not stop, or even slow the UN down, but it will allow Canada to restrict its participation and stop the bleeding.

As Edmund Burke famously said: “For evil to triumph good men need only do nothing”! Let us never allow our apathy or inaction to enable that to
Our Readers' Comments Section

1. From a Reader: Trudeau is giving Conservative-hating UNIFOR the power and prestige of the federal government to eliminate media opposition to the Liberals. If this egregious act of politically motivated media manipulation is not enough to rouse the voters in the October election, Canada will cease to be a democracy. Trudeau constantly exposes himself as a fascist. Rather than being horrified at the prospect, the people seem to be entertained by it. They signal to Turd-o that they are very much the fools that he perceives them to be.

2. From a Reader: I like what you are doing and hope you will continue. Unfortunately, the "warmists" have resigned themselves to the fact that most of the skeptics are old and are a dying breed. They may be correct. It is sad to see that our younger and educated (brainwashed?) generation is onside with the IPCC. Currently, I am not aware of any empirical evidence that supports the IPCC theory that CO2 causes warming. On the contrary, ice core data shows that warming precedes CO2 rise by an average of 800 years. The IPCC theory accuses CO2 of “back radiation”, which warms the earth. This theory is contrary to the laws of thermodynamics. Furthermore, if “back radiation” was the driver then what a beautiful arrangement that would be because this “back radiation” would be available day and night every day of the year and all we would have to do is put up some infrared solar panels to capture the back radiation and generate all the energy we want! Alas, no one has ever demonstrated that downward infrared radiation is capable of generating power. In a rare case of an air inversion, this would be possible.

3. From a Reader: In politics, a gaffe occurs when a politician accidentally tells the truth and Environment and Climate Change Minister Catherine McKenna just committed a classic one. Last Thursday she uploaded to her Twitter account (@cathmckenna) a video of her being “screeched in” at Christian’s Pub in St. John’s, N.L., complete with her kissing the cod. Then she offered advice to two bar patrons (one of them CBC comedian Mark Critch) who were engaging in a friendly debate about whether St. John’s is the oldest city in North America. Looking into the camera, a boisterous McKenna, using emphatic hand gestures and raising her voice on key words for emphasis, declares: “But you know, I actually gave them some real advice. I said that if you actually say it louder, we’ve learned in the House of Commons, if
If you actually say it louder, we’ve learned in the House of Commons, if you repeat it, if you say it louder, if that is your talking point, people will totally believe it.”

4. From a Reader: My challenge is to at least open minds to the possibility that a lot of the "Climate Change" rhetoric is actually hysteria that is driven by other agendas, more big government, more taxes, wealth distribution. The founder of this whole campaign was in fact Canadian Maurice Strong. His quote at the Club of Rome meeting in 1972 was "Isn't the only hope for the planet that industrialized civilizations collapse? Isn't it our responsibility to bring that about?" And so they latched on to Global Warming (consequently changed to "Climate Change") to bring that about.

5. From a Reader: The country is screwed under either a 2nd Trudeau majority, or worse, Trudeau minority supported by May and Singh. If such an electoral outcome happens, Liberal, ND and Green energy policies will kill the Alberta economy and Albertans will no longer abide. This will result in the end of confederation as senior people in the business and legal community will be pushing hard for a referendum to vote on a declaration of independence.

ADDITIONAL READING/ VIEWING

In closing, here is additional information on the problems we are facing and the need for us to take remedial action immediately to right our sinking ship.

ACTION ALBERTA - WHO WE ARE

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta’s energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please share this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

Thank you for ALL of your support and interest!
