ACTION ALBERTA
CANADA RISKS BECOMING A ‘BANANA REPUBLIC’ OVER ENERGY

Canada risks becoming a “banana republic” for its restrictive energy policy and failure to attract new investment into the sector, according to a Calgary money manager. “We have had basically signs on our energy industry that Canada is closed for business,” Geeta Sankappanavar, co-founder of Grafton Asset Management, said Thursday at the Bloomberg Canadian Capital Markets conference in London.

“Today we are in danger of becoming unfortunately a little bit like a banana republic on the energy side.” Sankappanavar, who says her firm has raised and deployed $1-billion (US$760-million) in the Alberta oilpatch, blamed carbon taxes, falling oil prices and increased regulatory scrutiny under new federal government rules for contributing to what she calls an “awful” malaise in the sector. The money manager sees some room for optimism following the approval this week of the Trans Mountain pipeline expansion. More needs to be done, she said. “We are wasting our time” and at risk of becoming “violinists on the Titanic,” she said.

Sankappanavar said Canada does offer some opportunities as a “deep value” play given the decline in asset values. The industry also needs to do a better job promoting the progress it’s made in reducing relative emissions and investing in renewable energy. “Canada has a brand issue,” she said.

WHY ARE THESE LIBERAL BILLS AIMED AT ALBERTA’S ECONOMY?

The oil and gas extraction sector accounted for two-thirds (67.3%) of Alberta’s total international merchandise exports in 2018. The only other province to come even close to this was Newfoundland and Labrador at 46.5%. Saskatchewan’s oil and gas extraction sector exports accounted for 23.3% of its total exports last year followed by British Columbia at 7.1 %.

At nearly $80 billion, Alberta’s oil and gas extraction sector exports represented 82.3% of the Canadian total of $96.5 billion. Canada’s oil and
gas extraction sector was the largest export category at 16.5% of total Canadian exports in 2018 followed closely by transportation equipment manufacturing at 16.4%.

So we ask, why are the Federal Liberals, NDP and Greens out to destroy Alberta's energy sector?

**IS IT JUST ME?: GREAT COMMENTARY FROM A READER**

Is it just me or is the media ramping up their “unbiased” reporting on climate change? You know what I find interesting? “Scientists”, politicians, and the media are ignoring the history of climate change especially since humans appeared on earth. Changes in our earth's climate have occurred for millions of years. For the past 200,000 years, there have been catastrophic climate changes – warming and cooling. There's evidence everywhere! Somehow, homo sapiens have survived but they (we) were never the cause – until now. There are many major forces at work which influence climate – ocean currents, earthquakes (tectonic plate movement), volcanoes, subtle variations of earth's orbit, subtle “wobbles” of the earth on its axis, solar activity, and more. It's complex! And yet, current global warming is being attributed by “scientists”, politicians, and the media, to activity by homo sapiens (us). Even worse, people are being brainwashed to believe this to be true.

Greta Thunberg is a Swedish activist who, at age 15, began protesting outside the Swedish parliament about the need for immediate action to combat climate change and has since become an outspoken climate activist. In a very recent interview, Greta said that all fossil fuels should remain in the ground NOW (immediately). If homo sapiens were to follow Greta’s recommendation NOW (at this very moment), most homo sapiens would be dead before the end of the summer. And now we have Climate Kids who lead school strikes all in the name of climate change.

My opinion? I'm delighted that young people have this kind of interest in a serious issue. I'm terrified that they are being brain-washed and convinced that change in climate is caused by homo sapiens thus can be controlled by homo sapiens. It makes more sense to me to prepare for climate change (change in climate is inevitable). If ocean levels are going to rise – and climate changes can cause water levels to rise – take the steps necessary to adapt.
changes can cause water levels to rise – take the steps necessary to adapt and survive. **The notion that homo sapiens can control climate change is absurd.**

**Bottom line(s):** Climate is changing (it’s natural!). Humans are NOT the cause! Humans CANNOT control/stop climate change! “Scientists”, politicians, and the media are brainwashing people. Resist and put a stop to this absurdity!

I’m a retired school teacher/principal and I’m appalled with what children are being taught – especially with the “skewing”. Additionally, I’m alarmed with the “slant” the media takes on issues. It’s that same old story – if a lie is repeated often enough it becomes the “truth”. And if the media reports it – it MUST be true. If enough Canadians are brainwashed and believe that we are the cause of global warming, we could be in for a rough future.

We must fight this through October 21. **Trudeau and the Liberals must be removed or Canada will be facing a disaster.** I’ve been around a long time but I’ve never seen this kind and magnitude of damage from a federal government ever! Thank heaven we got rid of the provincial NDP. Keep throwing punches! They’re bound to have an impact!!

**OUR READERS’ COMMENTS SECTION**

1. **From a Reader:** I read that Anna Johnston, a lawyer with West Coast Environmental Law, was appointed to sit on the advisory committee for Bill C-69. Licia Corbella’s same-day story showed that West Coast Environmental Law received a U.S. funded grant to wage the Tar Sands Campaign. Was Anna Johnston “the fox put in charge of the chicken coup”?

2. **From a Reader:** “The danger to Canada is not Justin Trudeau but a citizenry capable of entrusting a man like him with the job of Prime Minister. It will be far easier to limit and undo the follies of a Trudeau than to restore the necessary common sense and good judgement to a depraved electorate willing to have such a man for their Prime Minister in the first place. The far more serious than Mr. Trudeau, who is a mere symptom of what ails Canada. Blaming the ‘prince of fools’ should not blind anyone to the vast
Canada. Blaming the “prince of fools” should not blind anyone to the vast confederacy of fools that made him their prince. The country can survive a Justin Trudeau, who is, after all, merely a fool and puppet. It is less likely to survive the multitude of fools who made him their leader."

3. From a Reader: Do you realize what this national emergency means? I don’t think most people will understand what has just happened. The House of Commons passed a motion to declare a national climate emergency in Canada on Monday night. The Emergency Measures Act defines an “emergency” as an “urgent or critical situation of a temporary nature” that meets one, or both, of the following criteria:

(a) It seriously endangers the lives, health or safety of Canadians and is of such proportions or nature as to exceed the capacity or authority of a province to deal with it.
(b) It seriously threatens the ability of the Government of Canada to preserve the sovereignty, security and territorial integrity of Canada.

Note that first sentence. This declaration has given the government all kinds of unusual powers to impose restrictions on our activities. They can expropriate property, overrule provincial and municipal authority. Pretty well do anything they like, so long as they can say it is to do with the climate change threat. Think about that.

4. From a Reader: You may have seen this already. Something our ignorant gang in Ottawa with their “Globalist-Socialist Agenda” refuse to acknowledge. Canadians, especially this millennial generation, need to wake up to this fraud being perpetuated by Trudeau and company. https://youtu.be/fA5sGtj7QKQ

5. From a Reader: Two easy reasons for any Albertan not to ever vote for Trudeau-C-48 and C-69. Actually another reason-Catherine McKenna-I hope I never have to listen to her spouting off on climate change, floods and forest fires again. Plus another dozen reasons I can easily think of.

ADDITIONAL READING/ VIEWING

In closing, here is additional information on the problems we are facing and the need for us to take remedial action immediately to right our sinking ship.

**ACTION ALBERTA - WHO WE ARE**

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta’s energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please **share** this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

**Thank you for ALL of your support and interest!**

Robert (Bob) J. Iverach, Q.C.
