HELLO ALL (The Group of 7,805+ and growing):

NORTHWEST CANADA - A VIABLE ENTITY

[Here is an article by **Mike Priaro** that expresses the **sentiments of Western Canadians (and particularly Albertan)** and demonstrates the **great country that we could be if we rid ourselves of the "East"**.]

There has been a **dramatic increase in western resentment, anger, frustration, and alienation** after the recent passing of **Bill C-48 (Oil Tanker Ban)**, **Bill C-69 (Impact Assessment Act/Canadian Energy Regulator Act)**, and **Bill C-88 (Mackenzie Valley Act)** by Justin (“We can’t shutdown the oil sands tomorrow, we need to phase them out”) Trudeau’s federal Liberal government, its imposition, or threats to impose, a **national carbon tax**, and its **regulatory overkill**, along with **Quebec’s opposition**, that helped **scuttle the Energy East pipeline application**. Many are fed up with yet another **Trudeau’s attack on our jobs, resources, and prosperity**.

There are once again **many westerners contemplating separation**, according to the recent Abacus Poll, and there would be **many more if western Canadians were aware of the economic viability of Northwest Canada**:

POPULATION: 10.65 million

LAND AREA: 2,627,000 sq. km. — 10th largest on Earth

GDP: \$701 billion

GDP PER CAPITA: \$67,400 — rest of Canada \$54,900

AVERAGE POPULATION DENSITY: 4 per sq. km. — southern Ontario: 91 per sq. km.

RESOURCES: Oil and Gas, Refining, Petrochemicals, LNG, Mining (uranium — largest reserves on Earth, potash — largest reserves on Earth, ammonia fertilizer — largest plant in Canada, bauxite (aluminum), nickel, gold, coal, sulphur, diamonds, etc.), Forestry, Agriculture, Ranching, Tourism, Hydropower, Software, Trade — easy access to western U.S. and southeast Asia markets, Clean air and water, Highly-educated and skilled workforce

OIL AND GAS RESOURCES:

Oil-in-place: 2,582 billion barrels - **largest on Earth**; depending on oil sands and bitumen carbonates recovery factors, oil reserves are largest on Earth, by far.

Natural gas-in-place: 8,203 trillion cu. ft. - **among largest**, if not largest, on Earth depending on shale gas recovery factors (note that not all known Alberta/B.C./Yukon shale gas formations have been evaluated)

Natural gas liquids-in-place: 157 billion barrels

RESOURCE POTENTIAL AND DEVELOPMENT: Barely tapped

CLIMATE: Improves with global warming

GEOGRAPHY: Temperate rain forest, wine making/fruit growing region, forested montane/plateau, continental plains/grain lands, boreal forest, mineral-rich Canadian Shield, sub-Arctic, and Arctic

CAPITAL OF NORTHWEST CANADA: To be determined after October 21, 2019.

The **re-election of Justin Trudeau and the Liberal Party of Canada on October 21, 2019**, as a majority government or as a majority or minority coalition with the support of the NDP, Bloc, and/or Greens, **must trigger an Alberta referendum as follows:**

“Do you authorize the Alberta Government to negotiate secession from Confederation?”

Equally dissatisfied **Saskatchewan is very likely to follow Alberta’s lead as may Yukon, Northwest Territories, and the northwest, northeast, central, and southeast areas of B.C.** Even **Manitoba and parts of northwest Ontario** may consider joining Northwest Canada.

MAKE CANADA ONTARIO WEST ("MCOW")

After reading the above article, consider the following additional thoughts on a **new and improved country consisting of Ontario west!**

- 1. English becomes the ONLY official language (bilingualism is dead);**
- 2. Equalization is eliminated;**
- 3. The Senate is restructured to be elected with equal representation by each province and has real power;**
- 4. ALL provinces are treated equally;**
- 5. There is free trade across ALL provincial borders;**
- 6. ALL resource products of ALL provinces are guaranteed to reach tidewater unimpeded;**
- 7. Our military is strongly beefed up to bear our fair share of defending ourselves;**
- 8. Levels of immigration are agreed upon by the new Parliament - not arbitrarily decided by an unelected bureaucracy;**
- 9. Our borders are strongly defended; and**
- 10. Tax rates are reduced and carbon taxes are eliminated.**

So let's **see how the October federal election goes**. The above thoughts are **more than just wishful thinking**. **Alberta is tired of being treated as a colony of the East!! ENOUGH IS ENOUGH!**

OUR READERS' COMMENTS SECTION

1. From a Reader: Quebec gets \$13 billion per year in “equalization” payments from English Canada, claiming they are a poor have-not province. Yet they use that money to provide services that English Canada can only dream of like subsidized child-care, low-cost University, subsidized low electricity costs etc. They also purposely do not develop their own natural resources, preferring to allow the “ROC” to develop and deplete theirs instead (and then send Quebec the equalization payments). As soon as this toxic “relationship” with Canada stops being to their advantage, Quebec will simply leave and then develop their own resources. Do you think Quebec would stay in Canada if they actually had to pay everyone else? Not for one second. Quebec also holds the political power in Canada through its manipulation of Official Bilingualism to gain control of all high-level decision-making Government positions and institutions. In addition, Quebec gets to enjoy all the

benefits of being its own “country within a country”, but accepts none of the accountability for it. Quebec controls its own language policies, controls its own immigration and reviles against the ROC. Yet, when it comes time to pay for all these special privileges, they simply demand the ROC pays them “equalization” payments. Who, in their right mind, would enter into and stay in a relationship like this? Quebec's goal clearly is to be an anchor around the neck of Canada and force it to either capitulate or die. It’s time to divorce Quebec while you still can.

2. From a Reader (from New Brunswick): I am 100% behind everyone out there. I live in the Bilingual province of New Brunswick and that is joke. I am sure there are a lot of people in the Eastern part of Canada outside of Quebec that support you. Thank you for providing jobs to all of Atlantic Canadians that went out there .

3. From a Reader (from Eastern Ontario): I live in Eastern Ontario and we are not much better off and are constantly having French shoved down our throats. Also illegal immigration is a major issue with most of the people I talk to.

4. From a Reader: Thanks for using the “Where’s Alberta?” cartoon – it hits the nail on the head and truly says it ALL! Unbelievable that an ex drama teacher and his university buddy are at the helm of our magnificent, high potential, internationally respected country – and while there – they are wrecking it from a financial and social perspective! Without money, nothing happens, so demolishing Canada’s energy industry as they are doing (an industry that has contributed BILLIONS to the well-being of ALL Canadians, especially Quebecers) is reckless, irresponsible and shameful. I don’t want the environment wrecked either, and I completely agree that certain situations need to be cleaned up, but surely there is a way to protect the golden goose while taking specific, observable, measurable action to address environmental issues. I sincerely hope all Canadians from coast, to coast, to coast realize the seriousness of this Federal Government’s business acumen incompetence, and how they, their families, their incomes and their work places will be negatively impacted if this Government wins another term.

ADDITIONAL READING/ VIEWING

In closing, here is additional information on the problems we are facing and the

need for us to take remedial action immediately to right our sinking ship.

1. TRUDEAU SHOULD RESIGN BUT WE KNOW HE WON'T

ACTION ALBERTA - WHO WE ARE

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta's energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please **share** this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

Thank you for ALL of your support and interest!
