ACTION ALBERTA
HELLO ALL (The Group of 8,470+ and growing):

A VIEW FROM THE WEST

I am a fourth-generation Canadian who has lived in Vancouver for most of my almost 80 years. I have always believed that I resided in a place that represents the world's best geography: one of the largest land masses, thinly populated, resource-rich. It is next to the world's most powerful nation and yet far enough from the squabbles of Europe and the travesty that is occurring in the Middle East. We are also among the freest countries in the world, including freedom of religion, assembly, movement and trade.

Considering our preferred positioning, Canadians should ask themselves a few questions. Why is investment rapidly fleeing Canada? Consider that in the past five years, the amount of Canadian business capital invested abroad has exceeded the amount of foreign capital invested into Canada by more than $150 BILLION.

Why is economic growth so low? The average annual rate of economic growth since the Liberals formed government is 1.8% – barely above population growth – and the Bank of Canada projects an annual GDP growth of just 1.3% this year.

Why are politicians celebrating disastrous job numbers? While Statistics Canada announced more than 80,000 new jobs last month, nearly three-quarters were part time, with full-time employment actually decreasing by 7,500 jobs for those over 25. Worse still, nearly 35,000 women lost full-time employment.

Internationally, because of respect earned over a century, Canada belongs to many international organizations such as the British Commonwealth, NATO, G8, G20 and the Organization of American States. As a result, when we have a respected and qualified prime minister attending, we are able to punch above our weight and contribute positively to the discussions of the day, to the pride of Canadians. (To include examples from both major political parties, take Lester Pearson and Brian Mulroney.) Unfortunately, our present foreign affairs team seems to have failed to perform to traditional standards and, in the case of India, brought Canadians ridicule and embarrassment. Our leader’s recent international contributions seem to have denigrated our nation
in the eyes of many in the global community.

With all our natural advantages, Canadians are seemingly mismanaging a wonderful opportunity. Our citizens are Canada’s shareholders, and clearly they should vote for a change at the top so we can restore our economy, our unity and our spirit.

Peter M. Brown Founder, Canaccord Genuity; Vancouver

THE POLITICAL ATTACK ON CANADA’S OIL INDUSTRY

For the first time in Canada’s short and dull history, the future of the world depends upon how we vote in upcoming election.

How can a country with only 0.5% of the population and no meaningful military become this important? Climate change. Green Party leader Elizabeth May explained it when interviewed by the CBC on September 10th. Asked why she was in politics May replied, “Because I have to save the whole world and we’re running out of time.”

Should she succeed, the collateral damage of May’s crusade is well understood by anyone reading this column.

Because Elizabeth May’s platform is to significantly shrink Canada’s oil industry, thereby putting hundreds of thousands out of work and creating the greatest economic disruption in Canadian history.

Joined by the NDP, this is surely the first federal election in which national party leaders are campaigning not on the number of jobs they will create, but how many they pledge to destroy.

Why? Because that’s where the votes are. And that’s what elections are all about; attracting the most possible votes."

This is an enormous responsibility. CHOOSE YOUR VOTE CAREFULLY.

OUR READERS’ COMMENTS SECTION

1. From a Reader: We should ask our friends in Quebec if our Alberta resources are still morally unpalatable? When the next attack on The kingdom occurs (this success could surely breed further attacks)and, Quebec and Others are forced to pay a significantly inflated world price, ((from my mouth to g-d’s ears)) I fully expect the little duplicitous, rabidly ambitious dullard in Ottawa to allocate further billions to those delightful, generous, fair minded folks in Quebec .....to lower their price at the pump to what “their” dear, dear friends in Alberta pay. ...... “A national emergency of gross unfairness in the Canadian economy” he will say ... and we will pay for that with ....Alberta tax dollar transfer payments.

Of course, we already fund their day care, post secondary education and hydro...why not the gas to run their cars ... “Vive le Quebec libra”...that is, if they continue to endorse national entrenched inequities, and obstruct prosperity.

2. From a Reader: In a bargain with Rachel Notley’s Alberta NDP government in Alberta, the Trudeau government promised new pipelines in exchange for ambitious climate change policies. I don’t buy this narrative that Notley made a deal. She, with a rabid anti-oil advisor like Tzeporah Berman, no more wanted a pipeline to go ahead as did Trudeau.

With respect to receiving handouts from Trudeau and the Liberals such ‘infrastructure’ spending by the federal government is outside its mandate according to our constitution, but Conservatives have indulged in such pork barrel politics as well. Max has called for an end to it. With respect to “LIBERAL GOVERNMENT SPENDING $300,000 TO ‘STUDY’ ELIMINATION OF FOSSIL FUELS IN CANADA'”, it’s even worse in that the sole course contract went to Butts’ employer after he left the PMO in disgrace.

3. From a Reader: Of the three pipelines impacted by Trudeau’s save-the-whales and trees policies, the one hardest to explain is the delay on twinning
an existing pipeline on an existing right-of-way. In the U.S., that would fall under "eminent domain; end of argument. Remember, too, the "Great Bear Forest" (The reason given by Trudeau for cancelling approved Northern Gateway) was simply a natural forest until Tzeporah Berman and associates gave the name to it, and it became a sacred native monument.

4. From a Reader: Unfortunately, what we need is a set of world events where you can’t get foreign oil; THEN the Greens, NDP and/or Liberals will attempt to confiscate Western Canadian oil. Thus Western Separation is the only practical measure. As i said IT WILL NEVER CHANGE. Western Canada Concept some 30 yrs ago had it right but got coopted by THE REFORMERS who ultimately got swallowed up by the Conservatives.

5. From a Reader: Good Morning Mr. Kenney: You did a fabulous job on behalf of all Albertans with your recent letter to Amnesty International. It shows your passion for and protection of our oil industry and jobs for all Albertans! https://nationalpost.com/news/canada/read-the-full-text-jason-kenney-responds-to-amnesty-internationals-criticism-of-his-fight-back-strategy

ADDITIONAL READING/ VIEWING

In closing, here is additional information on the problems we are facing and the need for us to take remedial action immediately to right our sinking ship.

ACTION ALBERTA - WHO WE ARE

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta’s energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please share this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

Thank you for ALL of your support and interest!
