HELLO ALL (The Group of 8,690+ and growing):

BALANCING THE VIEW ON CLIMATE CHANGE - FOR ONCE!

With **Climate Change** being a **big issue in the current federal election**, we are often asked, **“Are there any groups providing a balanced view of climate change?”** The answer is **yes**, because the **science is NOT settled**. Let us begin by reflecting on the wisdom of two experienced humans that have gone before us:

The fact that an opinion has been widely held is no evidence whatever that it is not utterly absurd: Bertrand Russell (1872 – 1970).

The urge to save humanity is almost always a false front for the urge to rule: H.L. Mencken (1880 – 1956).

Let's define the meaning of three key words:

Balanced – ‘taking everything into account, fairly judged or presented’;

Climate – ‘the weather conditions prevailing in an area in general or over a long period’;

Change – ‘make or become different’;

It's when we put two of those words together, in the phrase ‘climate change’, that things immediately become **‘unbalanced’**.

The dictionary meaning of the phrase ‘climate change’ is: **“A change in global or regional climate patterns, in particular a change apparent from the mid to late twentieth century onwards and attributed largely to the increased levels of carbon dioxide produced by the use of fossil fuels.”**

From this definition of ‘climate change’ we can see that the **earth's climate prior to the ‘mid-twentieth century’ is not apparently relevant to ‘climate change’**, which is simply ignoring **millions of years** of fact-based climate history. Secondly, the phrase ‘attributed largely to the increased levels of carbon dioxide’ is highly subjective and **ignores** the complex composition of all greenhouse gases, of which carbon dioxide is only one.

The phrase ‘climate change’ is therefore in itself unbalanced, not to mention incomplete and biased. The reader must accept that it is difficult to present a ‘balanced’ view when challenging, pushing back on or putting down some of the extreme ‘climate change hysteria’ (**‘the world will end in 8 years’**...an unbalanced and hysterical statement) that we are deluged with

daily by the Main Stream Media. Therefore, the definition of 'balance' is tested with some of the websites we recommend.

Our strong position on this is that the **climate change 'hystericals', those establishing a 'Climate Emergency' like the Federal Government of Canada and the City of Edmonton** (for example) are clearly off balance because **they place the health of the planet as a higher priority over that of the economic and lifestyle health of humans**. That position is absurd, pre-dates Adam and Eve, and is a complete non-starter in our view.

We in **Action Alberta** have been following this Climate Change issue (previously labelled Global Warming.... and changed to deflect the arguments from either warming or cooling to 'all bad') since the late 1990's. Over the past couple of years, and based upon more historical research, we have become increasingly firm in our belief that the Global Warming movement, the Climate Change movement or as it is becoming known as today, the **Climate Emergency Movement**, began in the late 1960's as a now-evident global movement, further accelerated in Buenos Aires in 1992 by the UN Earth Summit https://en.wikipedia.org/wiki/Earth_Summit

The passage of time has revealed the UN Earth Summit's hidden motivation to redistribute wealth from developed countries to developing countries, from the 1% to the 99%, to re-order the foundation of the global economy and ultimately, destroy capitalism.

Because that tends to sound like a tin foil hat conspiracy theory, there are many excellent institutions, foundations and organizations that provide a much more balanced view of the entire environmental movement, including Climate Change, today. The subject is not simple to understand, nor easy to communicate. One must invest time and ultimately depend upon common sense and good judgement to reach your own conclusions.

We highlight these organizations below, with links to their websites, and not in any specific order. We know well that you always have a choice: passive vs. engaged. **Passive** means you choose to do nothing, or you choose to surf the websites for awareness and then do nothing. **Engaged** means you invest the time to review their websites and content and not only surf, but 'register' with your email address to receive a daily, bi-weekly, weekly or monthly email usually containing excellent timely updates, commentary and information. It is

the only way to develop your own opinion, and then speak out.

To kick this 'list' off, let's begin with the most recent:

Global Climate Intelligence Foundation [Click here](#)

The GCIF sent a letter (see in above link) to the United Nations on September 28, signed by 500 qualified scientists and climate experts.

Here is a bullet point summary of what their letter said:

- o There is no climate emergency;
- o Natural as well as anthropogenic factors cause warming;
- o Warming is far slower than predicted;
- o Climate policy relies on inadequate models;
- o CO2 is plant food, the basis of all life on earth;
- o Global warming has not increased natural disasters; and
- o Climate policy must respect scientific and economic realities.

Climate Discussion Nexus [Click here](#)

Climate Discussion Nexus is based in Toronto and was founded over a year ago.

Friends of Science [Click here](#)

Friends of Science is based in Calgary and is a volunteer-based (retired geologists, geophysicists and scientists) non-profit organization. It has a treasure trove of well cataloged research on its website and a very active Executive Director, Michelle Sterling. Below is a link to one of her latest videos that since being first posted on September 27, 2019, has over 520,000 views and growing:

<https://www.youtube.com/watch?v=GpVBH-HY5Ow>

Friends of Science is very active on email (if you register), YouTube, Facebook and Twitter @FriendsOScience

What's Up With That [Click here](#)

This website is run out of the USA by a retired weatherman.

The Global Warming Policy Forum [Click here](#)

This website and newsletter are run by The Global Warming Policy Foundation out of the U.K.

Climate Change Dispatch [Click here](#)

This is run out of the USA and offers daily email with very brief and timely articles.

The Heartland Institute: Arthur B. Robinson Center on Climate and Environmental Policy [Click here](#)

This too is run out of the USA

Principa Scientific International [Click here](#)

This is run out of the U.K.

Climate Depot [Click here](#)

This is run out of the USA by an amazing journalist, Mark Morano.

Real Climate Science [Click here](#)

A very active and hard-hitting website by founder Tony Heller, a lifelong environmentalist and a geologist with his master's degree in electrical engineering. Very active on YouTube and Twitter;

The Sensible Environmentalist [Click here](#)

Founder, Dr. Patrick Moore, Ph.D. in Ecology from U.B.C. and very active on Twitter @EcoSenseNow

Bjorn Lomborg [Click here](#)

Lomborg, very active on Twitter @BjornLomborg, is based in Denmark and is also founder of the Copenhagen Consensus Centre [Click here](#)

Popular Technology [Click here](#)

1350+ Peer-reviewed papers supporting skeptic arguments against ACC/AGW Alarmism.

There are others and from this list alone, the reader can see that there are groups in Canada, the USA and the UK who provide a strong push back to all of the hysteria that is being broadcast by governments, by the main stream media, by the Roman Catholic Church, NASA and National Geographic.

We all must fight against this destructive hysteria.

Thanks for standing up and getting engaged.

OUR READERS' COMMENTS SECTION

1. From a Reader: Unless you like smoking marijuana, think the Liberals' proposed firearms control will apply to criminals, believe Carbon Taxation will really go towards reducing global temperatures predicted by the IPCC's fraudulent "hockey stick" temperature graph, feel that Canada's 1.66% World carbon contribution warrants being a world leader in carbon emissions at the expense of developing Canada's Oil & Gas resources, believe Liberal lobbyists and Eastern cronies should continue making money importing conflict oil from the Middle East without benefit of Federal Income Tax taken from Alberta and Saskatchewan oil industry workers (to fund Eastern provinces' Transfer Payment programs), think that we should continue apologizing for past transgressions followed up by millions of dollars continually being paid out, believe we should pander to special interest groups continually rewriting our Canadian Charter of Rights and Freedoms to grant additional freedoms or believe we should pay 10.5 million dollars + to convicted war criminals, then consider NOT voting Liberal!

2. From a Reader: Did I get this straight? The university administrators forced one of their executives to resign for TELLING THE TRUTH. A one or two degree increase in temperature in Alberta will definitely improve crop yields. This observation is scientifically sound, but it doesn't pass the PC sniff test. Therefore, OFF WITH HER HEAD! What is more telling than anything else is that the mainstream media sided with the Soviet-style commissars who claim that the truth is whatever they want it to be. This is so Orwellian it is beyond "slippery slope." It signals a wholesale return to the Flat-Earth rejection of the scientific method and the embrace of totalitarianism. They call themselves "progressives," but in reality they are retrograde in every sense of the word. The future is not friendly - it is downright scary. [Click here](#) (Editor's Note: Watch U of Alberta President David Turpin's comments at the end of the video! Education in Alberta - as elsewhere - is all in the tank for the socialist Climate Emergency fraud! Is it any wonder that donations to the U of A tanked after the Suzuki fiasco last year?)

3. From a Reader): Within the last few days, Brad Wall alluded that senior people in Alberta's legal and energy sectors are organized and prepared to proceed down the road to independence, not based on emotion, but in a very business like matter and as a matter of survival. I hope this is fact and not fiction. The Canadian constitution has proven itself to be dysfunctional and beyond repair as Quebec and Ontario will never agree to cede their power

within confederation. Alberta has the human and natural resources, and Albertans have the ability, work ethic and desire to build a bright, prosperous future, free from bondage by Laurentian Liberals, Quebec and ND's. ASAP after Trudeau wins a 2nd term, a special meeting of the UCP needs to be called. The agenda will need resolutions to:

1. amend the UCP charter, allowing for separation; and
2. hold a referendum on a declaration of independence (a referendum on equalization makes no sense and is only a delay tactic by Kenney). With these resolutions passed, Kenney will then have to either get on board, or step aside for leadership that will act to take Alberta out of confederation.

4. From a Reader (in Quebec for now): I have been receiving 'Action Alberta' for sometime and fully support the cause in the name of fairness. The story has to be told especially in Quebec & Ontario. I'd support running full page ads in the Qc media and the Ont. leftist media to get this information in the citizen's hands. Maybe they can be shamed?

[Editor's note: Action Alberta does not raise money and has no budget.]

5. From a Reader (in Lloydminster): Hate to inform but there is a third Liberal MP you missed in your article - Randy Bossionnault, Edmonton Centre!!

ADDITIONAL READING/ VIEWING

In closing, here is additional information on the problems we are facing and the need for us to take remedial action immediately to right our sinking ship.

ACTION ALBERTA - WHO WE ARE

We are a group of deeply concerned, unpaid Alberta resident volunteers. Our work is intended to educate, inform and motivate all Canadians to be visible and vocal regarding the unequal, unfair and discriminatory treatment of Alberta by our Federal Government. Alberta's energy sector is the most important driver of the Canadian economy and its health directly impacts the standard of living of every Canadian. Unfortunately, that is not happening under our current Federal government!

Please **share** this email with your contacts so we can turn this unfair, inequitable, unjustifiable travesty around for the good of all Canadians. If you would like to submit information or articles, please send them to me.

Thank you for ALL of your support and interest!
