

GuardianAngel Support for Hurricane Florence

On September 12, 2019, at the request of NCEM, GuardianAngel was deployed at the Emergency Operations Center and the Garner RSOI site in support of the State of North Carolina's response to Hurricane Florence.

MISSION

Our mission was to stand up the **GuardianAngel** situational awareness platform and deploy tracking devices to all response assets in order to help EM maintain visibility on all of the multi-jurisdictional resources and their location. Based on the strength of the storm and the potential impact to cellular infrastructure, EM selected satellite-enabled trackers as the primary device, followed by GuardianAngel phone apps. The mission was successfully completed.

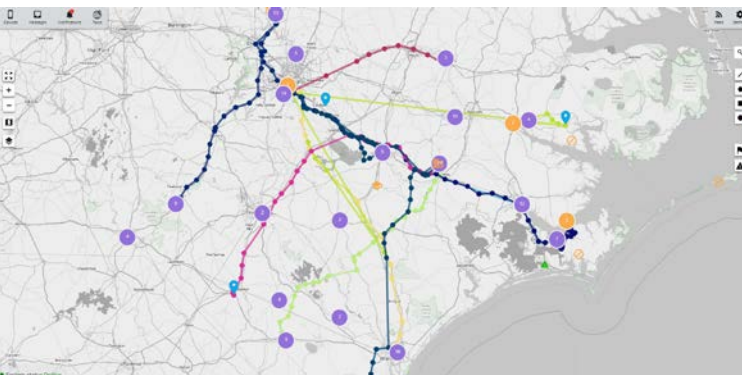

BACKGROUND

In 2017 Budget, the NCGA appropriated \$500,000 in new-money funding for GuardianAngel Emergency Management Personnel / Equipment Tracking Tool to be utilized by NCEM and NCNG

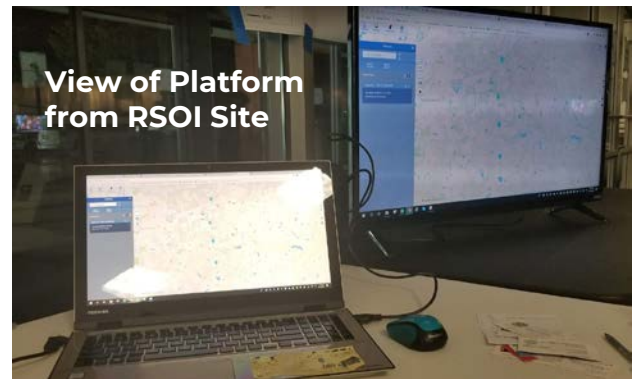

BY THE NUMBERS

- Deployed 12 days
- Served 5 sites
- Provisioned and Distributed 800 satellite-enabled devices
- Supported teams from 39 states
