*Thank you for helping
us move D-PATH forward!*

STUDY UPDATE

As of mid-June, we have recruited 86 participants to D-PATH across 45 pharmacies. Thank you to all sites who are actively recruiting participants to the study!

For sites that have not yet enrolled a participant, now is the time to jump in. Even one participant per week from each of our 45 sites would allow us to reach our recruitment target of 600 participants by early September 2026.

Every enrollment matters. Thank you for helping us build momentum and demonstrate the impact of pharmacist-led diabetes care.

SITE VISITS

We are pleased to introduce Vincent and Genieve, two research students who will be helping with site visits.

Thank you to all of the pharmacists we have had the opportunity to visit over the past two months. We truly appreciate the time you have taken to speak with us and share your experiences, including the barriers you have encountered, what has worked well, and where challenges remain.

Your feedback is incredibly valuable. We are here to support you, and we are actively using what we hear from sites to better understand how we can make participation easier and more successful.

FEEDBACK

As one example of how pharmacist feedback is being used, the Intake and Week 24 visits will soon be streamlined.

Several forms will be able to be sent directly to patients to complete on their phone or computer. Once completed, the information will automatically populate into the algorithm, reducing duplicate data entry and making the visit workflow easier.

This will include:

Intake:

DTSQs and Patient Questionnaire

Week 24 — Intervention and Usual Care:

Socioeconomic Update, DTSQs, DTSQc, and SDM-Q-9

D-PATH RENUMERATION

- As a reminder, remuneration for your patient care in D-PATH is as follows:
- Pharmacies will be offered an honorarium of \$150 per Intervention participant and \$50 per Usual Care participant when that participant completes the 6-month study. Payments will be made quarterly.

SUMMER STUDENTS

Do you have a student this summer?

Students can be a tremendous support for D-PATH recruitment. Some sites have had students set up a table in the pharmacy to speak with patients about the study, answer basic questions, and help identify people who may be interested in participating.

Students are often enthusiastic, approachable, and eager to be involved in patient care. This can make a big difference in starting conversations, increasing awareness, and helping your site build momentum with recruitment.

D-PATH COACHING

In addition to offering virtual or in-person sessions to walk through the pathway together, we are also happy to support you when enrolling your first patient. A member of the D-PATH team can join by phone or video (and occasionally in person) while you complete the enrollment with your patient. This provides an opportunity to ask questions in real time and helps make the process straightforward and comfortable for everyone involved.
