

WHY DID THE DIABETIC BRING A LADDER?

BECAUSE THEIR SUGAR WAS HIGH.

Something that's no Dad joke is diabetes. You are being invited to participate in a research study! D-PATH is a research study about pharmacist-based care for type 2 diabetes in Alberta. You may be eligible to participate if you are an adult with type 2 diabetes and are not at your target A1C.

D-PATH Study: Evaluation of pharmacist-led diabetes care pathway in Alberta community pharmacies and pharmacist primary care clinics. Exclusion criteria: type 1 diabetes, pregnancy, A1C target >7%. Estimation of time required to take part: less than 3 hours over 6 months time. Principal Investigator: Dr. Ross Tsuyuki. Study Coordinator: Dr. Stephanie Gysel
Contact info: 587-897-2257. The University of Alberta Health Research Ethics Board approved this study (Ethics ID: Pro00145395 version 18 Jan 2026)
