A Clear Path
TO DIABETES CONTROL

D-PATH STUDY NEWSLETTER

OCTOBER 2026

STUDY UPDATE

As of the end of October, there are 38 pharmacies enrolled in D-PATH, and 109 patients. This represents 18% of our overall target of 600 participants.

Every enrollment matters.
Thank you for helping us build momentum and demonstrate the impact of pharmacist-led diabetes care.

COMPLETED PATIENTS

We have now sent the second round of payment information to the sites with participants who have completed the full six-month study period between July 1 and September 30, 2026. **Please send us a copy of the receipt when you have processed the transaction.**
Site remuneration will be issued quarterly at a rate of $150 for each Intervention participant and $50 for each Usual Care participant who completes the study. We will contact eligible sites again at the beginning of January to arrange the next round of payments.

ETHNICITY INFORMATION REQUIRING VERIFICATION – WE NEED YOUR HELP!!

Due to an IT data-entry issue, the ethnicity recorded at Intake was not saved for several participants. We would appreciate your help please verifying this information for the affected participants.

Accurate ethnicity data are important for describing the study population and conducting any analyses involving participant ethnicity.

Please verify each participant's ethnicity using either:

- The original paper Intake form; or
- Confirmation directly from the participant.

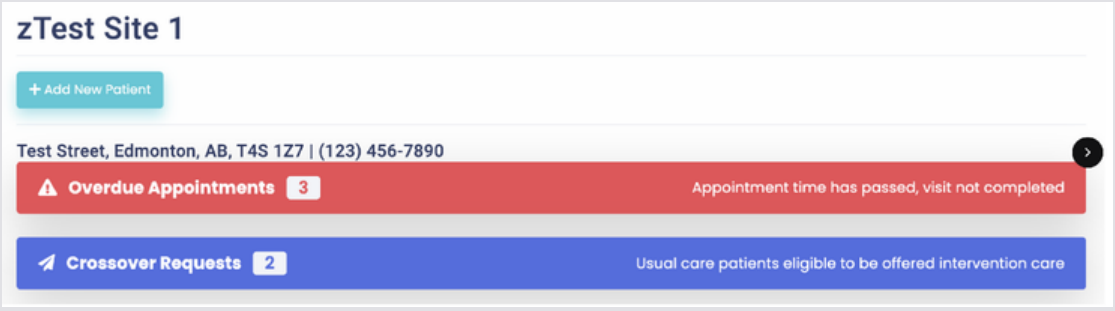

Once verified, please send the information to our team, and we will enter it into the algorithm for you. Thank you to the sites that have already completed this step. If you are unsure which participants at your site require verification, please contact us and we will be happy to clarify.

HOW TO MANUALLY SEND THE CROSSOVER REQUEST FROM USUAL CARE TO INTERVENTION AND THE ELECTRONIC QUESTIONNAIRES

1. Crossover Request

When someone finishes the study as a Usual Care participant, they can be offered Intervention care. Each morning the system will scan for new qualified participants who have finished Usual Care and send an email invitation to them.

To send the request manually:
By clicking on the blue "Crossover Requests" bar, this allows you to send a crossover request to a participant either by email or SMS (in case the participant did not receive the automatic system email).

2. Electronic Questionnaires

To send the questionnaires electronically, click “Send Patient Questionnaire and DTSQs Electronically” in the Intake visit and “Send Week 24 Survey Electronically” in the Week 24 visit when they come up in the algorithm.

To send manually:
Clicking on the box “Send Survey” next to the participant’s name allows you to send the survey to that participant either by email or SMS. Clicking on the box “Complete Survey” will bring you to the appropriate place in the algorithm where you can then click “Send Patient Questionnaire and DTSQs Electronically” in the Intake visit and “Send Week 24 Survey Electronically” in the Week 24 visit as above.
