

IcMD Health - Secure Virtual Care

- ✓ Over 70% of clinic visits can be avoided by providing virtual care. Why leave home?
- ✓ Decide when you want an appointment. Log in, pick a day & time that works for you and book it.
- ✓ A web based app with Desktop, Apple & Android support. Connect no matter device you use.
- ✓ Keep the records where they belong. By using the EMR from each clinic or pharmacy IcMD ensures records are only accessible by authorized healthcare professionals.

Simple | Secure | Private

- Simple** We created our app with feedback from seniors and other electronically challenged people. Auto generated emails confirm appointments, send reminders and guide the patient each step of the way.
- Secure** 100% Canadian made, owned & operated. Video appointments use end to end encryption that only runs through Canadian servers ensuring Canadian law is followed. Feel safer knowing your important records are secure.
- Private** Each appointment is as private as a face to face in the clinic. No one is in the corner mining the appointment for data and the same holds true with IcMD Health. The only information we store is a basic profile. We don't collect it so we can't share it!

Improved Access = Better Outcomes = Reduced Costs

Remote, Rural & Urban we have a solution no matter where you live

Over 120 partner pharmacies across Canada with more on the way

Partner clinics capable of providing over 100 video appointments per day
