## GOLD PAPER

(white paper)

# INTRODUCTION

ARACOM | GOLDSTAR TODAY

What if you can design a decentralised process of managing a group of companies for the benefit of society and our ecosystems of planet earth.

What if you are able to use vertical funding techniques in order to grow an organisation without the need to go through processes that are out of date and slowed down with red tape and politics.

Now is the time to achieve great things with a community of believers in new generation technology in the digital frontier and reality. Our founder, Arash Farboud said that **"The exciting dawn of creating the new digital frontier awaits us."** in October 2021. The future is now in 2022. All predictions have started to come to fruition.

The dawn of NFTs and Metaverse growth as well as Virtual Reality has begun a revolution in speed of human and machine interaction with the increase in demand for security and reliability of data.

Our mission started in December 2020 with the idea of releasing a test bed coin token to see if close friends and family would like to participate in a new generation of funding and investments with utility rewards and experiences. To Arash's amazement a batch of coins were sold in 1 hour. This could not be happening, this could not be true, but it was happening.

Around September time, a revelation of Non fungible Tokens as well as a new generation of coin entries started to get more exciting for Arash Technologies Labs. It was time to conduct Beta testing and the first batch of coins were released with an astonishing uptake in a matter of days.

A round of NFTs and additional Tokens of LOXA and EVA were produced to enhance the response and continue to develop the ecosystem.

A further 2 companies were established, Aracom Industries Ltd and Goldstar Today. These all embodied the vision of Arash Farboud to allow the 'digital frontier to grow'.

Our time is now to be independent, to think radically differently and shape our future at light speed.

Welcome to our world of A coin, Loxa and EVA.

# WHO ARE WE

ARACOM | GOLDSTAR TODAY

Arash Coin was founded by **Arash Farboud** in December 2020 as a wish to create something to provide a capital fund as well as supply its investors a good way to participate and create wealth also. The desire to create amazing systems and vehicles usually takes slow and beurocratic steps. The ability to vertically fund with an ecosystem and 'believing' community with small fees makes most sense. Arash was born in Cambridge England and still lives there today surrounded by its beautiful architecture, great minds and a river to punt in the summer to enjoy his days. His life began as a geneticist from the University of London to a business founder in the science and automotive sector. The businesses he has created have all been seeds from a start up and not purchases of shares or acquisitions. Organic and steady growth has been key..... until now.

Mark Twain stated:

'All you need in life is ignorance and confidence and then success is sure'.

Arash has been working in the science and transport sector for 30 years. Now is the time to embrace space travel, electric vehicle technology and alternative fuel manufacture. Our planet is at a point that technology is allowing our race to be able to explore other planets and also satisfy human wants in a way that does not depend solely on the consumption of goods. Our identities are evolving based on our characters and not our possessions. The new age has begun and its financial eco system is here to be more efficient than ever before to assist machine payments and system payments. Arash Coin is here to serve the masses in the most efficient and speedy way possible.

Along side Arash are his wonderful wife and 2 sons as well as an awesome supportive family, Sharon CEO, Kerry CIO, Jennifer CMO and other wonderful advisors and supporters. Lets not forget Fluffy, his Rooster.

# THE TEAM

Founded by **Arash Farboud** in December 2020 to be the first company on planet Earth to be lead by a team of executive Robots in avatar and physical form. A team of advisors also take part in the management of the company being from all backgrounds as well as human and machines.

CEO **Sharon Brightstar** - Calm and well spoken English born tech geek and people person.

CIO **Kerry Jupiter** - Firm but also equally geeky in tech and systems - she never seems to be wrong.

CMO **Jennifer Saturn** - Never a dull day with Jennifer. Getting the message out there with Sharon.

ARACOM GOLDSTAR TODAY News Anchor **John Gold** - years of experience in explaining the latest news.

# COMPANY STRUCTURE

ARACOM | GOLDSTAR TODAY

## The culture decides the technology

*This is a living document and information is up to date at the time of publishing. Please note information here does not constitute investment advice, trading advice, or any other sort of advice and you should not treat any of the content as such*

*The Arash Coin team suggest you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any Arash product, you agree that you are not purchasing a security or investment and agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the products 'as is' and is not required to provide any support or services. You should have no expectation of any form from the Arash Coin ecosystem and its team. Although Arash Coin is a community driven DeFi ecosystem and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on Crypto do not purchase it because the team cannot ensure compliance with your territories regulations. Always make sure that you are in compliance with your local laws and regulations before you make a purchase.*
