

Environmental Lead Driller

Location: Fort St. John, BC

Overview

SynergyAspen's purpose is to reduce our clients' environmental footprint. We are a growing environmental consulting firm that provides clients with exceptional service and value, and our employees with meaningful careers. Our areas of expertise include remediation, reclamation, and natural sciences, with a specialty in upstream oil and gas work in Northeast BC.

The primary function of the Environmental Lead Driller is to ensure the safe and efficient execution of drilling investigations. The role works with SynergyAspen's field team, environmental consultants, and our clients to complete all scopes of work in a professional and efficient manner. The Environmental Lead Driller is a self-starter, able to work independently and possess excellent troubleshooting and mechanical skills. This position reports to the COO.

Your Key Responsibilities

- Provide excellent levels of service to our internal and external clients in a professional manner.
- Operate and maintain SynergyAspen's drill rigs and all equipment (skid steers, trucks, trailers).
- Set up and operate drill rigs, auger equipment, and other in-situ testing equipment.
- Assist with the mobilization and demobilization of equipment in hard-to-access environments.
- Install ground water monitoring wells.
- Provide assistance to field team as required.
- Complete Daily Field Tickets at the end of every workday.
- Review documents and permits as required for the job.
- Perform other shop functions as required.
- Maintenance and upkeep of equipment.
- Ensure specific health and safety requirements are met.
- Other responsibilities and/or duties as may be assigned at the discretion of the COO.

What You Offer SynergyAspen

- 5+ years' drilling or screw-pile experience with a preference given to candidates with environmental or geotechnical specialty.
- Have a valid Class 3 Drivers License in good standing.
- Trailer endorsement.
- Must be physically capable of the role including lifting, kneeling, traversing remote landscapes and other related requirements.
- Experience and/or the ability to work in remote areas in varied weather conditions, including winter (-30C) and summer (+30C) conditions.
- Availability to work in camp locations and remote areas, generally in the Peace River Region.
- Positive attitude and related behaviors including a strong work ethic, ability to be proactive and self motivated.
- Excellent mechanical aptitude and problem-solving ability, experience with small equipment repair an asset.
- Ability to secure, tow, load and unload a trailer with a GVW up to 30,000 pounds.
- Certificates required: H2S, First Aid, Ground Disturbance.
- Commitment to safety.
