

With a wide breadth of solutions ranging from a simple “plug-and-play” to complex multi-gig jobs, Araknis has what you need from routers, switches, and access points. Robust hardware plus OvrC cloud capabilities ensure Araknis provides you with peace of mind as well as a foundation upon which to scale your systems and build operational efficiencies for your team.

## Switches

Support all network needs with a full line of professional-grade switches. The entire Araknis switch family offers full Gigabit throughput, PoE/PoE+, front and rear port options, and cloud management through OvrC to confidently deploy a reliable residential network of any size and complexity.

- 110 Series**  
5, 8, 16, and 24 Port Options
- Unmanaged+
  - Fanless Operation
  - Compact Model Available
  - OvrC Remote Management

- 220 Series**  
8, 16, 24, and 48 Port Options
- L2 Managed
  - Partial PoE/PoE+
  - Dual SFP Uplinks
  - OvrC Remote Management

- 320 Series**  
8, 16, 24, and 48 Port Options
- L2 Managed
  - Full PoE/PoE+
  - Dual SFP Uplinks
  - OvrC Remote Management

- 620 Series**  
8 and 24 Port Options
- Full L2, L3 Lite
  - 2.5G Throughput
  - Full PoE++
  - OvrC Remote Management

- 920 Series**  
12 and 24 Port Options
- L3 Managed
  - 10G Throughput
  - Full PoE++
  - OvrC Remote Management

## Routers

Our routers support Gigabit Internet and come embedded with OvrC Pro for complete network monitoring and support. We’ve designed a go-to router for the professional system integrator. And with three distinct models to choose from, you will have a reliable router for every job in the queue.

- 110 Series**
- 1 WAN Port
  - 2 LAN Ports

- 110 Series with Wi-Fi**
- 1 WAN Port
  - 2 LAN Ports
  - Built-In 2x2 Wave 2 AC Wi-Fi

- 310 Series**
- 2 WAN Ports
  - 4 LAN Ports
  - Embedded Firewall

- 220 Series**
- 2.5 Gbps
  - Single Wan
  - OvrC Pro Enabled

- 520 Series**
- 2.5 Gbps
  - Dual Wan
  - OvrC Pro Enabled

## Access Points

Araknis Wireless Access Points delivers powerful Wi-Fi 6 performance. Choose from indoor and outdoor functionality, round or square designs, and wall or ceiling mount models. Mounting plates, mounting templates, in-wall ceiling brackets, and backing plates make installation incredibly simple.

- 820 Indoor**
- 2400 Mbps Wi-Fi 6
  - 4x4 Antenna Configuration
  - 2.4GHz and 5GHz Capable
  - PoE+ Powered with 2.5Gbps LAN port-in

- 520 Indoor**
- 2400 Mbps Wi-Fi 6
  - 2x2 Antenna Configuration
  - 2.4GHz and 5GHz Capable
  - PoE+ Powered with 2.5Gbps LAN port-in

- 520 Outdoor**
- 2400 Mbps Wi-Fi 6
  - 2x2 Antenna Configuration
  - 2.4GHz and 5GHz Capable
  - PoE+ Powered with 2.5Gbps LAN port-in

## Managed in the Cloud with OvrC

Wireless site management is simple with OvrC, a cloud management platform that makes it easy to set up, update, and manage all IP-enabled devices on the job, from any location, with no licensing fees. An end-user app allows your clients to reset devices based on macros that you customize.
