

Action Plans Overview

Revised 2-14-24

Dear Humanitarians, I call you Humanitarians because you have been called to assist The Divine in bringing forth the **Golden Age of Mankind**. You were called and appointed before you were born to be a Humanitarian at this time. This pivotal labor we are called to perform is to bring Humanity out of the darkness and into the light of a new dawn for mankind.

Many of you heart-centered people are awakening to your calling as a Humanitarian. As you respond to this awakening, you may be seeking and wanting to find a place where you belong, so you can dive into your Humanitarian projects with like-minded people. Most of us are not aware of the tools we need and where they can be found, but you will find those tools here in our Love Won Society Action Plans.

If this message strikes a chord in your heart, then this is where you belong. If it resonates with you

then you have been led here by the Spirit. Our Platform has been created through divine guidance to prepare you and give you the tools you will need to accomplish your Humanitarian plans. Now here you are, standing tall in your Sovereignty, ready to engage in your life-altering experience in service to mankind. There is no greater joy to the Divine than when you are in service to your fellow man. So, we have created the tools to accomplish this for you.

The Love Won action plans that are presented here, have been downloaded to servants of the most high creator. It is by Divine guidance that you are now being presented with the tools for your consideration. The Love Won Action Plans include;

- **Revenue Sharing Solutions (RSS)**
- **Community Assistance Centers (CAC)**
- **Private Homme Funding (PHF)**
- **Economic Stabilization System (ESS)**
- **International Commodity Clearing Houses (ICCH)**

These Action Plans will assist you to manage and enhance your Humanitarian projects. These Plans will consume a large portion of your huge Humanitarian funds. As you study and become familiar with the action plans you will see for yourself that there has been a Divine guidance in how they work together. The only additional piece required to complete the LWS action plans is **YOU**, a heavenly called Humanitarian with a sacred heart. We provide you with a free vehicle to drive down the road of success to your humanitarian destination.

The first thing I would like to state about the LWS Action Plans is that, if and when you receive your Redemption Funds, none of your money goes to Love Won Society. All of your money stays under your control in the Quantum Financial System for you and your humanitarian projects. We will use the QFS as if it is a bank that supports our projects.

Each Humanitarian also needs to know that the Alliance has set up its plan for the distribution of wealth to mankind. They are giving us the tools to

use to accomplish this task. Love Won Society was downloaded to the earth for Humanitarians to use in the distribution of the Alliance funds.

Only vetted Humanitarians will receive redemption funds.

Just because you purchased Zim Bonds and believe you are a humanitarian is not sufficient to receive redemption funds. You must be educated and conversant in the Love Won Society Action Plans (LWS) and be vetted by the Alliance to receive the funds. This is not an arrogant declaration by LWS, this is in harmony with the Alliance plan. To receive huge sums of money, the Alliance will need you to prove that you will not abuse the funds. It is too important. How you conduct your life is the salient factor that must show you have the Love Quotient and willingness to adhere to the Alliance plan. These are the things they will use to vet you. The Alliance knows who you are and everything about you. Exhibiting “Power Over Other People” because you have money is not tolerated by the Alliance. If you want to test this proclamation out, I suggest you disengage with Love Won Society and check it out

on your own. It is the Alliance Plan and they will not change it for anyone, so I suggest you do not try.

Personal use of Redemption Funds needs clarification.

As the Sovereign who receives redemption funds, LOVE needs to be the driving force. Can you use these funds for yourself and your family, the answer is yes. Loving yourself is a major factor in receiving your funds. If you use the funds from a Love perspective then you are taking care of yourself.

It is like flying in a commercial Airline. If there is a sudden decompression and the oxygen masks fall for your use, you are told to put the mask on yourself and then tend to children and others. Why, because you can not help others unless you have taken care of yourself first.

As a Managing Director, as explained below, you must take care of yourself. If you think that you must sacrifice to be sure others get what they need, you are exhibiting a lack mentality. The Alliance does not judge you for the use of funds for yourself.

The money you use for yourself is not money that could have been used for someone else. You will always have more than sufficient for your needs. Get yourself out of the Lack Mentality, which is the present way of thinking, and come into the Abundance Mentality that society is moving up to. Lead the way in your thoughts and actions. You were chosen because of who you are and have shown your willingness to serve others. If you would like the house on the hill, buy it. If you would like an expensive car, buy it. The money is yours to take care of your needs. If you spend money for aggrandizement, making you feel more important than others, you have crossed over into the inappropriate use of the funds.

The RSS Platform will provide a way for you to set aside living expenses as a Managing Director. Set up your Humanitarian programs the way you would like by being abundant in your thinking. Be appropriate as you feel but be abundant. The word “Yes” should be used more than the word “No.” The Alliance has chosen you because you have the correct way of thinking about the use of the funds or you would not have been chosen.

Here are the Five Action Plans explained that Love Won Society created to assist you.

Once your Redemption Funds arrive, the implementation phase starts with the first RSS plan as it forms the foundation for the rest of the plans. You can then choose one or more of the other plans depending on the funds you receive at your appointment and the workload you want to take upon yourself.

The Revenue Sharing Solution Internet platform (RSS)

One of the biggest problems you will encounter is the distribution of wealth to the people. The RSS platform has been specifically designed to help Humanitarians distribute their funds to assist the type of work they are to accomplish.

Managing Directors

When a Zim or Bond Holder utilizes the Love Won Society software to implement the Action Plans, we refer to them as **Managing Directors**. As a Managing Director, you will be giving money to people in an organized and effective way that helps the receiver retain their dignity while receiving their funds. **This is not a handout, it is a lift-up, financially.**

The RSS Electronic Platform/Beneficiary Accounts

The **Beneficiary** account is for everyone in the world. To become a Beneficiary, you must be referred by a Beneficiary already in the program. The referring Beneficiary has an ID# that is used by a new Beneficiary to register. Word of mouth referrals will be the fastest way the program will grow. There are no limits as to where you refer a new Beneficiary. Anywhere in the world that has the internet is where you can refer a person to become a Beneficiary.

The registration form will be on a webpage found in the new Quantum Internet System. It is private for members and their referral persons.

The Platform does not hold funds in the RSS Beneficiary accounts. It is just a ledger process that downloads the representation of the digital funds into a Beneficiary's accounts.

As the Managing Director, you will establish a Master Account from which funds can be drawn. The Beneficiary will establish a QFS account to receive their funds so they can be used. Don't confuse the Managing Director's function to pay out redemption funds, and the Beneficiary account that receives the funds. This is the way we Managing Directors get funds to those individuals that sign up as a Beneficiary. Again, the platform will be secured by integration into the Quantum Internet that houses the new Quantum Financial System. The RSS software program acts as an accounting ledger attached to the [Quantum Financial System \(QFS\)](#). The Beneficiary's Account is an account set up in the Quantum Financial Service by the Beneficiary. This is an organized, automatic payment that

relieves the Humanitarian from doing payroll or other time-consuming money distribution duties. The digital funds are downloaded at 10 Cents per minute into the Beneficiary Account.

Managing Directors (MD) will have very little control as the Beneficiary can refer anyone at any time anywhere in the world. This RSS Program can be adapted to do many things in support of your projects.

As an RSS Managing Director, your funds will be kept in your RSS master account that is linked to the RSS platform computer. The funds stay in the Master Account until they are called for by the beneficiaries to be distributed to the Beneficiary's QFS account, which the Beneficiary sets up to receive their funds.

There are no fees associated with the use of the RSS platform, it is free to use. No one, including myself or anyone associated with Love Won Society, makes money off the RSS platform. It is my humanitarian project that can be used by Humanitarians for their Humanitarian endeavors.

[For more detailed RSS information, Click Here.](#)

Community Assistance Centers Action Plan (CAC)

The greatest humanitarian work will be done at the local level in Communities. The **Community Assistance Centers** is the major vehicle Managing Directors will use to bring a wide range of programs and services to support the community. The plan uses an organization of managers called Directors. The smallest organized geographical area is a community. This is why the Plan is called a Community Assistance Center. The Director of the CAC will set up an office as the base of operations for his geographical Community.

As a Community Assistance Center, this is the public's visible location for the Plan. The duties of a Director are many. The location in a city or a rural area will dictate their varied responsibilities. However, the office's main responsibility is to offer

Employee Agreement Accounts (EAA) to service-oriented businesses that support the community, such as local restaurants, Health food stores, or a mechanic shop. Small service businesses need to stay in business because they support the community. Coordination between the Director and the Managing Director, who are the two people who will establish policies to help guide a Director in his/her work, is the most important business relationship for the implementation of the CAC Program. The Director will work with the Business owner, to establish Employee Agreements Accounts for the employees. The RSS Platform will play a dual role in downloading the per-minute funds established by the Boss and the Director for the payroll account. This is the new way that employees will be paid. The business owner is the boss and can pay his employees as he wishes through the employees registering as a Beneficiary in the RSS Program. The RSS Beneficiary Program then takes over the bosses' payroll. The funds can be withdrawn at any time when there are funds in the Beneficiary's account.

Each community, city, county, and state would have a Director, who oversees Directors down to the Community Director level. Each Director can have as many assistants as they need to accomplish their planned activities. The CAC Director will be the GO-To guy in the community to provide grants and funds to support the community's growth and development.

Implementation of the new NESARA/GESARA Governance for all Countries will take place.

Many of the present Government roles will be taken over by CACs as the changes in the NESARA/GESARA Governance take place. There will be no Income or property Taxes to support local, County/Province, State, and National Governance. These government entities will only get funds from the Sales Tax of non-essential items. They will not have enough funds to support their present governmental activities. This is where the CAC Directors will help subsidize the duties that the local government won't be able to handle due to the lack of income.

This role will be assumed by purchasing things like Firefighting equipment and Fire stations and establishing privately owned and operated businesses that will take over government departments that will not have enough money to fund these services. The CAC Directors will put these people on Employee Agreements Account so that the communities will continue to have these services provided. IE, Fire, Police, EMS, DoT, Etc.

As the CAC expands into many Directors at different management levels, you as the Managing Directors will be delegating responsibilities. The main work for you is finding and training new Directors to fill the growing needs. Love Won Society will provide videos to train Directors for each level required in support of the CAC program.

When the Managing Director wants to begin a CAC, they start with one community director. It builds up from there. The plan can be fully implemented or organized at different levels depending on the Managing Director and the funds they have to work

with. Information about the [CAC Action Plan details can be found **Here**](#).

The Private Home Funding (PFH) Program

The sanctity of one's home must be held inviolable. It stands as the basis of security in the raising of one's family. The Alliance has tasked LWS with streamlining and standardizing a housing solution that will operate in harmony with the incoming NESARA Law and Governance.

To solve these challenges, LWS has devised the Private Home Funding Program (PHF) that will facilitate home purchases and refinances in conjunction with the RSS Beneficiary Program (RSS). Like the RSS, the PHF will be administered through the RSS platform and will reduce these once convoluted transactions down to a straightforward agreement between the buyer, the seller, and the Quantum Financial System, overseen by Quantum Consciousness (God Consciousness).

The exchange of a property in the PHF is similar in concept to the 'For Sale by Owner' programs that

exist now. The purchase agreement between the buyer and seller can be consolidated into an adapted Bill of Sale, like the simplicity of buying a car on Craigslist. This PHF process does away with the government overseeing the Home Title that was previously used to conform to the Taxation structure that the Deep State created. Never again will there be any entity that can put liens on Homes for nonpayment of taxes. No one outside the buyer and the seller will have access to the documentation. The document that transfers the Title will be held in the RSS Platform, in the Personnel Office of both the Buyer and the Seller. Details will be forthcoming as procedures are given to LWS.

It has been communicated by the Alliance that the quickest and simplest way to help beneficiaries take advantage of these PHF programs is to first fund the payoff of any existing mortgage debt. NESARA or GESARA will forgive all Mortgages that created a lone for your home by monetizing your Promissory Note, which is your money, and then making you pay off the Mortgage including interest. The Alliance will help us with the payoff of mortgages that are part of the NESARA law.

This process will be administered by the Managing Director through the Beneficiary's back office. Once this is executed and a homeowner's title is free and clear, the homeowner can proceed with either selling the home or refinancing it through the PHF program.

Upon funding of a PHF program, the title will be essentially 'tokenized' in the QFS and homeowners will have established unalienable ownership of their property. The transaction will be housed in the QFS for a permanent record of the transfer of Title.

Beneficiaries will now enjoy direct control and access to not only their money but also the Title of their homes within the Quantum Financial System. The QFS will hold the Title of the Home and the Documents for the transaction will be in the Personal Office of the Buyer and the Seller for reference when needed. The funds to pay for the home will come with an increase in the per-minute download in the RSS Platform. With this approach, the new GESARA Governance will yield to the PHF process of buying and selling homes. Governments of any nation will no longer be in control of any Real Estate Title. [Information on the Private Home Funding \(PHF\) can be found here.](#)

The Economic Stabilization System Action Plan (ESS)

This Economic Stabilization System Action Plan can use up a lot of funds. The basic premise behind this Plan is, that if we purchase everything that a business can produce and we use the current distribution system for that product, then we can control the price of the item, from the suppliers of items required to build a product to the consumer who purchases the item. This means that we contract every supplier from the mining of raw material to the manufacturers of the end products. Because we have no profit incentive, we can serve the consumers with a fair price for what they get. Those prices will change very little from year to year. We get to be the buffer between the good years and bad years to **STABILIZE** the profitability of all persons involved in the production and distribution of the item. This goes for Farmers and their crops.

To accomplish this goal, we will establish contracts to purchase all items company produces for manufacturers in the various sectors of the economy. The real problem is convincing Corporate Heads to implement this Action Plan. Large Manufacturing Corporations may resist this move because once a Corporation signs a contract with us to purchase all the Company can make, it will change the way Corporation does business forever. Once the Corporation accepts our proposal, it would be very costly and perhaps impossible to go back to the way they were doing business before. That is not an impossible dilemma, there is a solution that is a Win, Win for all concerned. To create credibility in the Plan, we would have to offer them a Contract Performance Bond to cover our participation in the Contract. That means we put ten years of Annual Payments into a Bond that can secure the terms of the Contract. This Bond is renewed each year for another ten years.

If our Managing Directors go for the \$500,000 per Zim redemption rate we are suggesting, just one 100 trillion dollar Zim Bond, you would get 50 Quintillion. If you asked for a Structured Payout of

10% of the Principal every year, paid out quarterly you would get, \$1.25 Quintillion per quarter. The world economy is \$80 to \$120 Trillion per year. Many of our members have huge numbers of 1Trillion Zim Bonds to redeem, especially if they have Yottalillion Notes: each one of our Managing Directors will have a quarterly payment that exceeds the total world economy for a full year [Click for more info on the Structured Payout.](#)

If you were to put the excess of what you did not use per quarter into an Escrow account and set it aside to pay off any claims against your Performance Bond, you would have been accumulating a horrendous balance in that account each year.

Consuming the amount of a quarterly payout for your Humanitarian projects would be very difficult to do for a year or two or maybe three. There is your bond money, and if your Structured payments keep coming, which they will, you will never have to withdraw any of that money. It will just sit there, but you will use it as a bond to create credibility in the ESS Action Plan. Nothing is wasted. The

Performance Bond is renewed by Managing Directors every year for another 10 years.

The Action Plan uses the Employee Agreement Account to pay their labor force. We could even double their salary or hourly rate. It does not matter to us, we have the funds Correct? The labor force would still be under the management of their Human Resource Department. Details for this are in the [ESS document found here.](#)

Our price for the items they produce would be their wholesale price less a five-year average of labor costs per item. The corporation makes its profits on the wholesale price we pay and that pays for all the supplies to manufacture its products and pays for its overhead and the salaries of upper management. And if the economy grows as fast as it should, we give them zero-interest loans against the Performance Bonds to expand their production. We buy all they can produce because more retail sales are coming as the world economy expands with the new funds becoming available to the consumers. Again, you can find more details in the [ESS document found here.](#)

The International Commodity Clearing Houses Action Plan (ICCH)

This is the mother of all Humanitarian plans, it is huge. The plan is to establish Clearing houses all over the world. The houses will be networked together by a large computer network and housed in the Quantum Computer. Did you know that the Quantum Computer will be available for our use, like a Cloud application? It is big enough to run the new Quantum Internet System like the World Wide Web.

The computer network will keep track of inventories in each clearinghouse. If there is a shortage of commodities in one area due to a bad growing year, a search of the availability in the system will show where the commodities are located that can be identified and sent to the locations where there are shortages. The system will transport the commodity to where it can be used. It will be a worldwide service that is free to use. Reliable people in a particular commodity market can apply for and be granted access to the system. A normal distribution

channel can be used for transportation. It is expected that transport-sized anti-gravity machines will be produced that can transport the commodity in minutes anywhere in the world.

If your mind can go there, think about a more Galactic approach for us, where our Earth products can be shipped to intergalactic locations. This might be down the road away, but this is the Alliance's plan for the future.

The Action Plan for the International Commodity Clearing Houses can be used for almost anything that needs to be stored and shipped, without all the hassle that now exists. [More information on the ICCH can be found here.](#)
