

# Q and A from 9 7 - Part 1

📅 Sat, 9/11 11:15AM ⌚ 59:09

## SUMMARY KEYWORDS

people, zim, money, benefactor, humanitarian, quantum, question, funds, paid, contract, cac, beneficiary, financial system, problem, trust, bond, organization, rss, account, society

## SPEAKERS

Tracy, RG

**R** RG 00:00  
I'd like to welcome everybody to our question and answer, period. And hope that you enjoy yourself. I'm here with Tracy, who is the moderator. And I'm Ron Giles. So with that introductions, let's go ahead with question number one.

**T** Tracy 00:16  
What do you mean by unused funds returned to owner? Because the owner asked for further funds from the escrow account if needed?

**R** RG 00:26  
It's a good question. When do you get the unused funds is the idea that you get a quarterly allotment of money. And if you have a one quintet or 100, t note and ask for 500,000, that one quarter is going to be 1.25 quintillion. Now, if you even spend point two five quintillion, or even if you spend two or \$300 trillion, you're going to have a lot left over. And what I'm saying that's what I'm calling them unused funds. on a quarterly basis, you put that over into an account, and you use that to bond other things that you're doing other contracts and so forth. You bond your RSS participation as as in benefactor, so the people who sign up in your chain of beneficiaries will always be able to, you will always be able to fund them. That's the bonding in that account. Once you start on that trip, that is your budget. So if you need more, the place to go for more than a quarterly budget would

be to go into your your account that you're using for a bond, I suspect you'll be getting many quintillions in that bond and that bond in account. And if you need it for some big thing, then I'm sure that's available to us for that. I mean, it's your account, you own it. But you're not going to be able to ask for further funds. You'll just have that escrow account. Or if you want to call it escrow or Balint account, then that's your buffer mount of money. So I hope that clarifies that question. So it's

**T** Tracy 02:20  
her bonds only, what about special projects, grants, things like that.

**R** RG 02:26  
It's your money. Okay, so be sure that you're, you're bonding sufficient amounts of keeping a sufficient amount in there to bond, what you're going to do, we'll work out all the details about that. And guidelines.

**T** Tracy 02:43  
At the beginning, it should fill up pretty quickly. I mean, that will accumulate rather quickly. In the beginning, I would imagine,

**R** RG 02:50  
very much. So you won't be spending much more than a couple of billion dollars for that first year. And you'll be getting five quintillion in that account in one year. So if you're only spending two or 3 billion or 20 billion, or even 100 billion, you don't still have plenty in that account to do anything you need to do or want to do. It's your money. It's nobody's taking it away from you. It's your money, you control it. But that's your goal back to if there's a problem with a bonding or with something that you bonded and somebody calls on the bond. You've got the funds to take care of it.

**T** Tracy 03:31  
And more than one person be a benefactor via a limited company.

**R** RG 03:40  
It's an interesting question. And I'm not sure that the person who asked this really understands what the RSS benefactor is. a benefactor is one who has gone through their

appointment and receive their funds to do their work. Now, if you want to join together with another person and form some kind of a limited company, that's you can do that. But you are the one who is in benefactor, and you've got your own structure, and you're using your own money. In some case, you join with some other people in some kind of an association, then you can't just turn your back on this, nor can you create new people, in my opinion, to be Zim benefactors. Why didn't they go through getting their Zim and so on so forth. Zim benefactor has their own money. If you're in association with other people who don't have their money, why would you want them to be a Zim benefactor? They don't have the funds to do it.

T

Tracy 04:52

So what a real estate business broker, you know, the real estate broker for the NRA BLS would they need to sign a CAC contract?

R

RG 05:01

The structure for the National real estate Listing Service, we'll call it a listing service. The broker who's associated with that comes out through the auspices or is financed or funded by the Zim benefactor, that's him, those people will have to sign up to become a broker within the listing service, you have to have a contract. That, that you agree to the terms and conditions that are set forth for brokers. That means the commission structure you're, you've got agents that work for you, you might be introducing other new brokers. Anytime you do that, you might get another three cents on your download. It depends on how the Zim benefactor wants to work it out. But there's a certain amount that has to be under contract so that everybody's on the same sheet of music as they're doing their labors in the listing service. That is what I'm talking about as far as a platform and a contract within the platform. That will keep it running in a way that instead of everybody going here and there and wherever they want. We have some loosely held associations with other benefactors, and other people who are barred who are going to be part of the listing service.

T

Tracy 06:26

So what it start like so for instance, I'm a real estate broker. I'm not but just pretend. So I first sign up for the RSS to get in the system. And then I signed a contract with the CAC, as I begin the nr LS program.

R

RG 06:41

It's not the CAC, the contract that you'll sign is with the the becoming a Zim benefactor, if you'll establish your own CAC, but there's nothing there that will be signing contracts, except for when you go in and sign an employment contract. But that's under the Zim benefactors ID number. And they're the ones that fund everything that they're going to do in the CAC as well as the National real estate Listing Service. Okay,

T

Tracy 07:15

got it. So on one of the slides, it said, may purchase a new home at the same terms, does this mean an additional home or a replacement home? Can they have two homes or is it just like they believe one and get another

R

RG 07:33

you can only have one every every five years to get a new home that you have to have paid off the debt, paid off the loan on the and then make it available for somebody else to buy, if that's indeed what you want to do. But you can, you can, you can only have one, home, purchased one, and you can't do it again and five here. Now the loan is paid off, then you're relieved from that loan, real estate loan, where you have a balance due. If that's paid off, and the five years is up, you can buy a new home under the same conditions as before. Now the most important part of that is the fact that once that download is given to you on the real estate purchase. And you're you're paying it off by your per minute download, and you pay off that loan, then that download continues to come to you. And you can buy another house and have it on the same terms as the one that you just finished paying for. hope that makes sense.

T

Tracy 08:51

Yes, it does to me. I just downloaded the Qf s mobile app from Google Play Store. Is this the new q Fs app that we'll be using?

R

RG 09:01

No. And I say that very without hesitation? No, there's no q Fs app.

T

Tracy 09:09

Well, maybe there is one. But

R

RG 09:12

yeah, and there's that associated with the Q Fs, the quantum financial system that we're talking about.

T

Tracy 09:22

And Google wouldn't be dealing with it and hopefully, when we set up for an organization when that organization also get to set up six additional trusts, like an individual or will they be restricted to just the main trust.

R

RG 09:36

A trust cannot create trust. That makes sense. beneficiary they have to be a beneficiary not a trust. They can be an an organization like a nonprofit organization. If it's can, you know if it's together then they can form trust. But I'm gonna leave that open, because we'll look into that more in depth and see if that if an organization needs to set up trusts, but the trusts were designed for the beneficiaries, like they have minor children, they can set up a trust for them. And then they can manage the trust, a child grows up, they need braces, they need football equipment, they need cheerleading stuff. And all of those sorts of growing up, expenses can come out of that trust. And if the parents don't want to use it for their own, you know, household stuff, then they're certainly welcome to just be sure that the trust documents indicate what they can do with the money. At the end of the, the time, when the when the child is 18, they can get their own trust and their own beneficiary account and set up their own trust, trust. But the old one that the parents made for them continues on. Once it's established, we don't take we don't stop it. It's not it's not stopped start time when they think comes? Well, it is it start it starts there. 18. And that means they can start their beneficiary account. So

T

Tracy 11:20

cool. How would we communicate with loved one society, if we do this program,

R

RG 11:27

there will be a, we'll set up all of that stuff to be sure that the beneficiaries are taken care of. Now, we need to be sure that we under Well, I would like to say we might have four or 5000, Zim benefactors all over the world. So there's four or 5000 people that have the right to contact us and and resolve problems. But it's only going to be for Zim benefactors. Because we right now we got 4300 people that are involved with loved one

society. And we just can't do the volume of questions and answers that, really, we're doing the best we can. But it's going to get to the point where it gets too big there should be and I say should pay because that's a desirable thing to have communications. And it may be some kind of a captain of can and then the captain of 100. And, and that sort of structure that can be a chain of command, where questions and answers can be given. And if the if the captain of 10 can't figure out what the error answer the problem or the question, then it goes to the captain of the 100, which would be a captain of 10 people again, but it's going to take care of it'll take care of itself, within the structure, because just wanted the organization to give all the information out is going to be very difficult. Unless we have a zoom benefactor website and to be set up for that purpose of answering questions. We'll see problems as they come through.

T

Tracy 13:15

Yeah, we can get help. We can get a help desk for like beneficiaries that have helped us for benefactors that are trained and understand and that can help once everything happens. And you know, so because this next question also kind of addresses that. And she's asking she, you know, last week I did that email saying that this email box was not being manned anymore. And she said that just two weeks prior, she had sent to me she had received an email asking if she wants to join Loveland society to what she said yes. And then I sent out that email saying that we were going to shut off at email, and she was put off, and she her concern is, she says, If I'm to join, on what type of Zim benefactor customer service will exist, as well as customer service on the beneficiary side, if this is a contracted business tool for them, benefactor businesses, then contractors have customer expectations. Perhaps this will all be detailed in the contract.

R

RG 14:21

Yeah, we're motion solving the problems. And we'll solve those problems in an effective way. If we need to hire more people to do so, we've got the money to do that. We're never going to be short of that. So the good things will happen. If a problem comes up, we solve the problem. And that's our pledge to everybody who wants to be as in benefactor is getting bigger than what we thought because we built this for our own use, and now we're starting to share it with other people and we We still have our humanitarian projects that we want to do using our platform just like everybody else. But because we're doing it and sharing that, then it's our responsibility, in my opinion, to be able to take care of it, like everybody needs to have a certain amount of understanding and come up to speed. And if there's a question, all of the information that is disseminated, there's always going to be questions. So there's never going to be a time when everybody is all up to speed and they do everything themselves. And, you know, there might be another organization where

people can get together and, and we'll, we'll see how things go as far as security is concerned, maybe an opt in opt in sort of experience, so that people who want to share with others and benefactors can without giving up their private life or any information that would somebody could follow a trail and cause problems for, but again, those people will be gone. So I don't see a problem with a lot of what we would like to do, and probably will do once we don't have a lot of opposition, or resistance to what we're doing.

T

Tracy 16:21

Right. And we're transitioning and streamlining our processes, since Ron had Julie that was helping him and then I came on board. And that's why we decided to just make things easier and streamlined into one system instead of having multiple email addresses. Now we're basically just using one for him and one for me. And so everything is going to get more simple as we go. So we thank you in advance for your patience.

R

RG 16:51

Yes, and understand that, although the other one is not monitored, we've taken everybody from there and put them into the emailing system in the database. So they should be still getting their emails, if they're not. And you're listening to this, go to the website and sign up again. It's a database, and if there's duplications, one of them will be kicked out. So you're not going to be lost.

T

Tracy 17:26

Yes, for and then we also have all the trainings on the bit shoot channel as well as the website. So some people want to devour one bite at a time and others just want to binge and do all the trainings at once. So you guys can invade your appetite or however you prefer. Okay,

R

RG 17:43

yeah, well, in all of them, I'll be on the website as well.

T

Tracy 17:47

I'm making assumptions that nothing has been built on the beneficiary side either as we're waiting for funds. Correct? We'll be having marketing, will we be having marketing and branding? Did digital professionals build the website interface? Yes,

R

RG 18:05

I believe so. Just kind of an insight understanding Alliance or quantum financial system, whatever entity exists there is already started to prepare the platform, we just need to give our inputs as how we want to do it, because they listen to our conversations and know exactly what our thoughts are. And so they're going ahead and getting a much of it, if not all of it taken care of before the RV even takes place. That will take us from six, eight weeks down to maybe a couple of weeks to lodge. One of the big things is the wealth management or wealth education, we have a series of eight of those that have to be embedded in the website or to the and to each personal office, so that they have access to it all the time and can go ahead. It's irresponsible for us to start giving out money to people who've never had to use money had money to be available for extra things. So we're going to do some real good at wealth education, including how to market if you want to call it that the RSS program and spread it out. We have bonuses to do that. And that's what we want to do. So we're going to have what is necessary to take care of those kinds of things. A good professional organization or programmers and so forth would be really well used in our platform. So it's going to be really good jrss platform.

T

Tracy 19:45

Can a local county or state government be considered a nonprofit organization?

R

RG 19:52

I think so. If you're a director in the CAC program and you see a need Talk to your Zim benefactor, and work out some solution to a problem. It could be just the shortfall. Maybe something was funded and they lost the funds. And now they can't do anything. Go in and save the day and keep the program going, especially if it's serving the community.

T

Tracy 20:21

Does each trust need to be connected to a separate Qf s account?

R

RG 20:28

Yes, each Trust has its own account, and can have its own accounting system. And the reports for that those trusts and so far it will be taken care of as well.

T

Tracy 20:40

Is the currency exchange a different different from the redemption process?

R

RG 20:46

The end result is that there there both will end up in the Q Fs the quantum financial system of the liars that has no obligation to exchange currencies, that's a banking system. So we're destroying the banking system. So they said, let's let's redeem or Let's exchange revalued currencies, but it's going to go into the quantum financial system, period. So I'm going to go into a bank. So if you're thinking you're going to get your exchange money in a bank, you have to transfer it there yourself is going into the quantum financial system, which will interface with a bank until they're no longer there as a bank, and then that will interface with the financial service centers that are created to take the place of banks. That's already in play. Many of the people that you know in the banking industry are now being trained for the financial service centers.

T

Tracy 21:52

And the currency is exchanged and the bonds are redeemed. So the Zim bonds are redeemed. That's the proper language. I've heard you say, right.

R

RG 22:02

Yes, that is true. Okay.

T

Tracy 22:06

Will we be able to pay our directors and staff very high salaries?

R

RG 22:12

Do your money pay what you want?

T

Tracy 22:15

How many beneficiaries? Can someone sign up? As far as I'm aware, as many as possible? They get one cent for every two new signups? Do they continue to get one cent if they sign up 100? Hundreds of people which most will do, I'm also confused about the E SS is this for people who will be assisting me.

R

RG 22:36

Okay, those are really good questions. There are no limitations for people who introduced and sign up under a beneficiary's ID number. Keep in mind that the as that goes, there's three generations. And for every two, you get a penny. And if they go on into the those people who come under you, if they sign somebody up, that's the first generation, then there's a second generation and then the third, and you get paid down to the third generation for every 10 people that came in at that level, then you'll get paid one more penny per 10 people. And it was designed that way. Because if I wanted to do something with a church, then I go in and I sign up the church, if we didn't have a generation there, there'd be no incentive for me to go sign up a church, and then have them sign up all of the people in their congregation, under that person's account. Those people would be on my person, gender, or second generation, first generation, whatever. And they would, every 10 of those, I get a penny. This is the whole reason for the generational bonus. So that you'll go and sign up a lot of people and you'll still get credit all the way down to the third generation. tremendous way to make money

T

Tracy 24:08

and it's a great

R

RG 24:10

retirement.

T

Tracy 24:12

And it's a great way to exhale we share this blessing.

R

RG 24:16

Yeah, we get we get it out to more people.

T

Tracy 24:21

And the second part of the question I'm also confused about the SS is this for people who will be assisting me.

R

RG 24:30

Well, would you say assisting you these are for people who will be you'll? Well, that's that's the example as a farmer. The E SS system is designed to help people stay profitable in the economic structure. When go in and buy all of that that they're doing, then and put them on a nice contract and all that sort of stuff, then that's going to be sure that if They, if they have a problem with drought or something like that, they're not going to lose their farm. Because we've already paid for all of that, before that they even plant the seeds. And we're here to keep people in business. That's what the E SS program is about. So the, the potential problem is that the contracts and so forth, need to be fairly sophisticated. And so as a group, that's why we're signing, the year says program will be a contractual organization as well. So you have these terms and conditions have access to all of the legal things that you'd need for contracts, and the whole structure and everything. And it's, it's controlled, because we need to take what is purchased and put it into the international commodity clearing houses, or work through distributors, or dealers, or the distribution of the funds or the the cars or the tractors or the dump trucks, whatever we're producing. And so it has to come under some kind of an organization, so that we are all on the same sheet of music, so that we all have access to, we don't have to reinvent one contract over another, there will be some specifics for a particular Corporation. And that's why we hire people to do that. So but there's no reason for everybody to be going out and doing their own contracts. So we we come under one SS organization, and that feeds all of that product through the normal distribution system. But if there's an overage here, or there, we can warehouse that and send it to a place that's a little bit short on things. That's what the international commodity Clearinghouse is designed to do. We get into the inter galactic commerce, then the whole idea of international commodity clearing houses will extend it into the universe, or into the cosmos, whatever you want. So that concept will be same, and it'll be the same. There'll be computers that go throughout the galaxies, whatever, how exciting. It's a program that's really quite interesting in its ramifications, but it's going to be taking time to get put all all put together. So and we don't know what's out there. So right now we can't we can only speculate. We just know that the quantum financial system will be the financial system for the entire galaxy. And it may be multi galaxies. This is this is never been tried before, but it's got to be in place for the the golden age of mankind. We don't know what's coming, but we're trying to prepare for it.

T

Tracy 28:04

After the launch, have you considered having a CAC registry site?

R

RG 28:11

Each each individual will be I'm not sure the question. I'm speculating that. Well, we will rcac here and some of these. There's what the nobody over that city sort of thing. But I

don't see it organized that way, because each Zim benefactor will go where they want to go. It's an idea, maybe it'll work. And maybe somebody will put that together. Help us put it together. A registry is a good idea. I think we'll see.

T

Tracy 28:46

Are there any fake zims?

R

RG 28:49

Not as far as the Alliance is concerned, of the euro humanitarian and you buy something that looks like it's fake. Don't assume it as a fake because if I don't know if you can write down 100 t note on a piece of paper and they'll accept it. If you put forth the effort to buy and prepare yourself to become a Zim, benefactor or humanitarian. If you purchase that and you take it to the lions, for your take you to the redemption for to be redeemed. Nobody will turn you down. And please understand there. The Zim is a vehicle only to get you the money that you need. There is no resale value for Zim anywhere in the world. So they're not taking the Zim and selling it to somebody else. They're taking the Zim are counterfeits whatever. The gold ones, the silver ones, the blue ones, and all that sort of stuff. You take it to your appointment and they if you're a humanitarian and that's it caveat that you really need to understand. If you are a humanitarian, they will redeem it for you. And so you have to go to a redemption appointment. And the angel sitting on the other side of there will vet you as a humanitarian. This is why these people that that think they can put your Zim serial numbers on a piece of paper and go in and, and redeem for you. As far as I'm concerned, that's total fraud. You show up because you're the, you're the humanitarian, you're going to go to work for the Alliance, whatever you want to call it. You're you're getting your tools for your trade, and that tool is the money. You don't show up to your appointment. You haven't been vetted, and you won't get any money out of the quantum financial system. I hope that's clear. Yep. Who cares?

T

Tracy 31:03

Why should we not purchase Zim bonds from the bank note to world?

R

RG 31:09

Okay, it's a misunderstanding. I never said don't you buy the bonds from whoever you want. The banknote world is notorious for being very expensive. So why would I send you to a banknote world is charging 250 to \$300. For the same thing that you can buy off of ebay for maybe \$200. And if you don't worry about the 100, keynotes in the sacred, this of

the of that particular note, why don't you buy some from some of the other dealers on there that are selling the gold ones or something like that for two or \$3 apiece? So I don't say don't go to the bank world, I say if you've gone short, if you're short of money, and you don't have them, go to eBay and find something that you can afford there. There's two California based sellers, and one New South Wales. Sellers that you can buy these things for New South Wales takes about three weeks to get here, Pasadena and Walnut Creek, you can get it within a week at a very, very low price. But if you have to have a 100 Why don't you get a one cent alien? on there? Those are big bonds. 10 trillion is 600. zeros. Excuse me. centralian is a 303 zeros. So you're really getting a lot of bang for your buck. bang for your buck on that one. Yeah, I said much about that. Because we didn't know.

T

Tracy 32:53

Is Australia and New Zealand, just psara compliant. Now Yeah. Okay,

R

RG 33:00

All righty are we don't know.

T

Tracy 33:03

Was there any resolution to the fact that your posting was copied and pasted on Charlie? Charlie's site by Steven Leonard? Who is he? And can he be trusted?

R

RG 33:13

Oh, well, the whole system that Charlie and and this Leonard guy have set up is a fraud. They're saying that there's somebody on this earth who is in charge of the quantum financial system. It's quantum consciousness that where the Qf s resides, it's not on this world. And it's not in a satellite. So these people have set up a whole way of deceiving people with information is not accurate. I caught Charlie or got this Steven Leonard in a trap, that he plagiarized my stuff and gave it to Charlie and Charlie put it on the air that has never been resolved. I've never heard back from anybody about that. My upset with it. Now people do what they do. I don't care what they do. I've got my own business. And I'm not going to worry about their cash register when I'm taking care of my own business. So answer the question. They're not to be trusted, none of them.

T

Tracy 34:30

And the next question probably from the same person is, she agrees it is challenging to

know who to trust, but she's wondering that she sent her serial numbers of all her currency and is wondering if there's any harm in doing this.

R

RG 34:48

There's no harm because those kinds of people that would cause harm will be taken off prior to us getting our money. You cannot redeem them. Somebody else. A humanitarian has to go in and be vetted as a humanitarian, in order for that person to receive money in the quantum financial system. This is in the beginning stages, you cannot redeem Zim for somebody else. Because it's only for humanitarians in the beginning, especially.

T

Tracy 35:25

Can we open businesses, if they don't fall under one of the five programs?

R

RG 35:32

A business is it is a way of making money. So I'm just going to say this this way. You're not allowed to make money off of this money. The UserZoom benefactor can start his main business as you want. for other people. You can be a small business, SBA, for people with that you want to help start new businesses. There's nothing to stop you from doing that. Just give all the money to them and not accept anything in return. Hmm, so why would you need that money when you're getting 1.25 quintillion every three months?

T

Tracy 36:20

Yeah, she said not to run herself. So I'm assuming that's what she wants to do is Okay, there you go.

R

RG 36:26

Okay. Well, it's not running it yourself. It's not taking money for what you do.

T

Tracy 36:31

Is it \$10 to join as a benefactor?

R

RG 36:36

No, it's a beneficiary that pays at \$10 gets a beneficiary account in the RSS platform and

starts receiving money from there.

**T** Tracy 36:51  
Does this campus program benefit? A high end electronics company?

**R** RG 37:01  
And yeah, that would be under the Okay, that would be under the FSS program. And doesn't matter, their high end electronics company or not? The guidelines, if you want to set up a contract for them and give their employees contract employment contract, that's the whole system that he SS is about. So yes, you can do that. But I wouldn't want to do it on my own. I'll join together with others like in the in the loved one industries and get taken care of under the proper umbrella.

**T** Tracy 37:44  
How do I recruit individuals into my group?

**R** RG 37:49  
Which group are you talking about?

**T** Tracy 37:51  
I'm assuming she's, oh, that's true. She could be talking about RSS or CAC, or,

**R** RG 37:58  
yeah, you're gonna you're gonna want individuals to come in to help you rather than call them a your group to do your humanitarian work. Those people once they find out what you're doing, like in a community Assistance Program, they might know a director wanted to become a director. They'll come out of the word work. And we've been told this, the right people with a heart to do the job that you want done, will come seeking to be employed by you. Is there a certain amount of that, that we need to go out and find them in the beginning? Yes. But eventually there will miss. It'll reach a critical mass where you, it's going to be hard to control for the number of people who want to come out here. So just assume that there's going to be a lot of people seeking you out to do the things that they came here to the earth to do? Are they already prepared? I would say yes. If they're

responding to the call, then they have been prepared 2030 years ago, and complaining because you can't do the humanitarian work along come, you come with the opportunity to for them to come from their heart, and they will just throw the rocks around you and appropriately kiss you on the cheek.

T

Tracy 39:22

And what I'm doing is, is making lists of people who I know who have a heart to help either they're already doing the work or they would love to do the work and asking quite people that I know like and trust. The question is if time and money weren't an issue, and you could, you know, have a project that would help humanity What would you like to do? And that way, they have time to really think about it. And you know, they it gives them a they're able to respond without knowing why so they really can dig deep into their heart.

R

RG 40:00

I like that. Keep in mind that there's humanitarians that want to be involved with loved ones society that still have their jobs and have to do their work on a daily basis again, really offer a lot of I'm for a loved one society, or programs. Those are the kinds of people that will come out of the woodwork and start doing the work because it's in benefactor. And then there'll be finding others who are humanitarians that want to come from their heart and didn't get the money in the beginning. It there's a place for everybody that has a heart to do humanitarian work, and we'll find them what we have to do. Okay, well, their main tags

T

Tracy 40:47

they do with your with your antenna they do? Well, there you go. Well, there'll be a written agreement, or at least an electronic agreement when signing up, that will advise new beneficiaries that posting on social media or spamming will not be tolerated.

R

RG 41:06

The policy just procedures for the IRS program will be completed and published. And it's like I, I have read the policies and procedures with a little button behind it. And that has to be checked. You know, are we going to see and do a test or something like that? See if they read it? I doubt that. But if there's problems, and they don't know what's in that policies and procedures, and they can have some, you can't, you can't advertise publicly for the RSS program. Or we'd have hundreds of 1000s of people advertising. There's reasons for all of these policies and procedures to be put into place. So we want people to

do that. Can I share with whomever I want? Yeah. How do you share with them appropriately, give them a card or talk to them, do whatever you're going to do. But there's policies and procedures that will eventually get into this social media and spammy, and it will not be permitted.

T

Tracy 42:15

There's plenty of evidence over many years that Ripple Labs XRP distributed ledger is going to replace the arcane and corrupt swift system and the XRP coin backed by gold will become the world's reserve digital currency. Has anyone connected the dots between ripple XRP, or any other digital currency blockchain technologies to the Qf s? Whoa, that was a mouthful.

R

RG 42:38

I'm sure. There's a definite answer there. Because the quantum financial system, you can call blockchain, you can call it whatever you want. But it's never what you call it is way far further and far beyond anything that's been created on this earth. If you want to continue to trade in computerized cryptocurrencies, after the quantum financial system is up and running, then if it survives the changeover then that might be something that you want to do but why would you ever want to go into a cryptocurrency when you have gold backed currencies, and a quantum financial system? If you need to make money through cryptocurrencies or see there's a better way to do things in there? You have the freedom to do that. But don't confuse it with a con with a quantum financial system because it's not cryptocurrency it's not blockchain technology acts like it, but it isn't. Because it's far beyond anything that's there. I don't know enough about XRP or any of those cryptocurrencies have never dealt with them. I have no problems about them. People make money, they lose money, whatever they do, it's it's fine. It's just part of capitalism. Eventually, there'll be a choice. And if you want to continue to do things over there, if you have a heart Come and join with Levon society or any of the other in benefactors and and change your life will be different.

T

Tracy 44:19

How his overall level in society system security being addressed is it being programmed into the quantum consciousness, who are the programmers.

R

RG 44:31

The Quantum consciousness is already doing the programming for loved one society. It's a

system that's already been in place. It was created before we got here on this earth. It was just downloaded so that we could use it. So who were the programmers? They send it around table with the angels have probably one or two or three or 27 or 40 500 who have expertise in programming, they're all going to be a part of it. Okay, everybody's been all of the angelic realms, everything is all turning towards the golden age of mankind, we have the assistance through the Alliance is a quantum knowledge. It's just true. And it's just there. And anybody, we're all tapped into that if we knew how to access it in our, our pea brains here, then it would be helpful. But our bodies and our hearts know how to tune into it. But everybody in that quantum state of affairs is being what else does it What better things do they have do to do? I mean, you go to a heart concert or something in the skies. Maybe they do, I don't know. But there's nothing greater than the golden age of mankind in any location where there are humans. Because this is the golden age for them to succeed in where they have always been kept under the thumb of something else. Never been that free. Well, we have been before but that

T

Tracy 46:17

should we develop the mindset that we are way out of their league, especially when their conventional banking fees were based on assets under management.

R

RG 46:36

That sounds, assets under management, that sounds like a wealth management program that's associated with a bank, and they set it up to take care of their customers to do that sort of thing. All of that will go away. We're not designed to make money. Humanity was not designed to be working for other people. It's only in third dimension that that happens. As we move into the higher realms, we create the things we want, we don't depend on others to do work for us and pay them. It's not a system that was created in the heaven census system is created by the, the dark side, so that they could control us. All of that's going away. So assets under management, the concept that we just don't concern ourselves with, and it will go away with the banks and all that sort of stuff.

T

Tracy 47:35

I'm guessing that one was supposed to go after this one, when we have angels to consult with what value will wealth managers have?

R

RG 47:47

Well, it's it's a standalone question in my consideration, because a wealth manager is

designed to manage your wealth. That means you put control of that the wealth under that manager, and he'll put it in this account or that stock or whatever, and manage it for you, and then he'll make his profit on that, and managing your money. And, but those are the kinds of people that will go away, because it's profit oriented. And we don't, we don't do profit stuff with our money. And the reason for that is because next quarter, we're going to get another 1.25 quintillion, or more. So we don't have to worry about wealth managers, the whole concept of that will be going away with the banking system that's there to make money on your money or to make money on money. And that goes away. It's against the universal laws. As far as I'm concerned. It's, it's the antithesis of what's going to be taking place. So let's just let that all just go away. long answer for short idea.

Tracy 49:06

If we decide to have a trust, well, all our funds stay on the Qf s.

RG 49:12

Yes, it'll be the only financial system in accounts within the financial system.

Tracy 49:19

Do humanitarians participate in the employment service contract for example, when acting as the chief director or any other job title, etc.

RG 49:31

humanitarians participate? I'm not sure.

Tracy 49:35

I'm gonna say no, why we

RG 49:37

are the ones who are in charge.

Tracy 49:40

Now, why would we want to pay ourselves ourselves? No, to have a employment service contract.

R RG 49:49  
Our main job is to get rid of the money.

T Tracy 49:52  
Yeah, we don't want to care. We're

R RG 49:53  
not going to go out and do the work unless the work is helping other people to give away our money. Or put it, giving it away is not the right, put it in service within the community. That's our main jobs to get the communities up and running and supporting the families, which is the basic entity or the basic structure in any community. And it's a basic structure that God has created for us show. Whatever God you want to call it. Well, the good, the good side,

T Tracy 50:32  
when asking for the higher rates that redemption, will we will we have names of organizations? Or will it be loved one society that we will use?

R RG 50:43  
loved one society, we have a structure that you as a humanitarian can use for your work. Other than the structure, there's not really much to love one society. So I'm not sure I fully understand the question, if I go into my appointment, and I say that I'm going to be participating in the loved one society's action plans. And using their structure for my work. that eliminates a lot of the discussion about what you're going to be doing with your money. Keep in mind that they're funding you as a humanitarian and not your projects. Once we get into it, and we have three or 4 million people, with the humanitarian heart to want to take care of all of the homeless people and find shelters for them, you're going to have to be fighting over which homeless person you get to put into a house. Because so this the humanitarian projects is, well meaning they are, you're going to have to dig deep to find where you can really make changes in society, rather than just focusing on on poor people, the poor people out there, because our society has been focused on making money rather than service to one another. If we focus on service to one another, there will not be the people on the sleeping on the streets. Many of them have been kicked out by a bank, because they are out of their homes out of the bank, when they couldn't make a

payment because they had gotten an automobile accident, we lost our home. All of those kinds of things we will take care of because the structure is going to support families. Nobody's going to be out on the street because they couldn't pay their bills. Nobody, there's no reason for that. Society was not built that way. This society won't be it was before because of a lack consciousness, and the fact that we have people who are trying to rule over us without our consent, though, things are changing, we just look for a different way of doing things.

**T** Tracy 53:17  
Is there a way to change how company owners and executives the upper management, how they are paid, so that they're paid out of the SS ECS instead of from company profits.

**R** RG 53:32  
We want them to still think that they're in charge of things. So we'll pay the employment contracts for maybe the upper middle management down, because the business will take care of them paying themselves with their bonuses and all of that garbage. And, you know, I don't feel it's appropriate for us to go in and start dictating what these people make. There's too much money involved in it for us to even be concerned about, the guy over there makes a couple million dollars, because he's a CEO of a corporation. I don't care about that. As long as he runs it in the new way of service to mankind. Everybody gets to do what they want to do in service to mankind. And if you're not that way, then you should, you will be finished with your activities because we won't tolerate the idea of power over other people, which is a corporate structure. And that seems to me to have to go. And this is for the bigger

**T** Tracy 54:42  
is not the smaller businesses that we're talking about. Right, Ron?

**R** RG 54:48  
That's correct. We're talking about the larger corporations. There's a middle corporations and others businesses, small businesses in a local community. We're going to be lycus SBA a place to get loans for these people, give them service contracts, be sure that they get involved in a business that they love to do. And we've just be sure that that business is successful. We can help them we don't be sure it will help them and assist them to be financially viable in their business as much as we can,

T

Tracy 55:25

purchasing all shares of companies within benefactor familiar industries and converting to ease up style ownership with simultaneously accomplished multiple humanitarian goals, including economic stabilization, would you imagine that I could proceed in this way?

R

RG 55:46

I think that there's a concept there that is, is a valuable concept. You have a corporation, you want employee participation in shares and things of this nature. And there's a lot of different ways to, to give service to mankind. And I think with the heart, you'll come up with the right things and the better way of doing things, as well as having a financial viable company or whatever endeavor that you're trying to accomplish. The whole idea of of corporate structure is oftentimes the bottom line is more important than people are going to turn that around that service to mankind. The person who is building your cars for you, is just as important to God as the CEO. Why would the CEO ever put down somebody that's doing that kind of work for him? The whole structure is changing the whole way the economic system functions on a worldwide basis or on an intergalactic basis. It's all changing for the betterment of the individual. We're just the last ones on the block that are really doing some things.

T

Tracy 57:07

Okay, next question. I have several humanitarian projects that I would like to run under the RSS program, am I able to have several RSS master benefactor accounts, one for each of my projects, so I can keep everything organized for each project? Or will I only get one master benefactor account,

R

RG 57:28

you only need one master benefactor account. And the reason I say that is because everything that you're doing can function under that, it's just the way that you want to apply it. The master ID numbers for the benefactors is designed to create a structure underneath it of the people who you are funding. And so how you do that the CAC program really can assist you in any of the projects you're going to do, I don't see the reason and then necessity of separating them. If you're involved in all of them in some kind of a management. In my opinion, this is only my opinion. And I would not get involved in that there's too many things to be doing. If I've got the larger humanitarian, or the larger redemption rates, then I've got the money to be out there doing more and more

and more things that I can do. So you hire the people to take care of your projects, set up the structure, do whatever you need to do. But let many other more qualified people pick up the ball and run with it. And you manage it from a higher level than just one project at a time. You'll have the reports that you can do that. You can manage things, and I wouldn't do it all myself because I don't have experience with it so that other people do it. We've got many more questions to do. So we're going to add this portion of it for now. We'll call out part one.
