

April 19 - Q and A Crypto part 1

Wed, 4/27 6:26PM 56:39

SUMMARY KEYWORDS

quantum, people, cryptocurrencies, banks, money, system, ron, gold, humanitarians, understand, consciousness, third dimension, dna, financial system, create, call, crypto, creation, talking, question

SPEAKERS

Ron Giles, Dominick, Speaker, Carrie

Speaker 00:00

Okay, today I wanted to discuss a little bit about we're going to call it the quantum consciousness versus crypto, cryptocurrencies. And this has more to do with what's coming. And I I'm not, I'm not sure about how this is going to come. I'm just saying that there are certain things that will make it so that the cryptocurrencies are not part of the quantum financial system, period. Because there, there's an entirely different operating system in play. So the only way to really understand this is to go into the functionality of the quantum consciousness and and understand that, and then we'll go into the Kryptos. And I want everybody to understand that I really don't know a lot about cryptocurrencies, I don't have any. I've helped people use it before in terms of sending money, but I don't really understand it to the point that I can be conversant with it. Well, I am doing is saying that there are certain things that are in play that will, there's a good like likelihood that the crypto currencies will not survive into the quantum financial system. And that's the reason I wanted to discuss that today. So let's first of all begin with a quantum consciousness, quantum consciousness, we call it a quantum computer, but it's quantum consciousness. It's divine consciousness. It's God consciousness, those who will say, comes from the fifth dimension. And which is true, but God's consciousness is involved in all dimensions. And you can't, it's going to be very difficult for people to separate them. However, the quantum consciousness has been moving towards this golden age of mankind for a long time. This is the plan. And this is the the disrupting or destroying the Cabal, which has been put in place over us back in 1871, or something like that, to me is, I think I'm remembering that correct. They established a system of government over us, they loaned money to us, and then they charged this, we could only pay the interest in gold. And once the gold was gone, in 1833, then we went into foreclosure, full for culture. That's our, that's our government. And so we were then the corporation of the United USA Inc. And so that whole system is it's not it's not our government is contrived, in they they placed us they foreclosed on us in an illegal sort of way. And yet, in the foreclosure, they, they put in there that they own the people and the rights to the people. And so, to a degree, they will let us be parents of our children. But you can see right now, what the government is trying to do, taking over our children and leaving us outside of the classroom, and then then teaching anything they damn well please to our children. There is no reason for a five year old to have sex education. This is the most disgusting thing that could happen to our children. And it's because they think they own us. That's the bottom line. They think they own us, they can do

whatever they damn well, please. And that's where that this whole system and all of the things that have happened with the COVID-19 are coming from because they think they own us. And we're taking back our government and restoring the restored government that is the Constitution of the United States that we are all aware of. So quantum consciousness and is God's consciousness comes from any, let's just say comes from the fifth dimension creation and just allow that to be true. It's not inclusive of everything, but it, let's say, let's just say that it's allowed to be true for what we're doing here. And for what is happening to the earth. And in respects to the golden age of mankind, I want to just say something it's a little digression from, from the information that I sent out. When the Cabal and let's let's just give it give him a name, it's the Anunnaki took over the world, they changed our DNA. The humans were here prior to those people. And they used us to mine their gold for them. They didn't have, we were not very evolved at all. And so they, they knew more than we did. So we called them the gods, the gods of the Old Testament is basically what it means. And but they changed our DNA from 10 strands to 12. stressed, they, they disconnected and I'm not sure the right word to use, didn't allow the 10 strands of DNA to be effective for us. So we've been running on 1/5, or two quilts of our one, six, or to 12 of our functioning DNA. DNA is our God consciousness, we have a system of being able to connect. And those are called energy centers in our bodies. And our bodies will take that it doesn't matter if we know about them, it doesn't matter at all. The energy centers, chakras, whatever you want to call them, that's part of our ability to communicate with our God, our Creator. And when you shut that down, then that means that you cannot function at that level. Now, where are we to have had our full strands of DNA? And I don't know how many 1000s of years could be 100 or 200 or 300,000 years, I don't know. But these people came in and mess things up. They're mining for gold, to fix their atmosphere in their, their country, whether they're their nation, wherever it is offworld. And they needed our goal. So they came and started doing that. And there are places in Africa where you can go and see there's some very sophisticated mining, stuff going on, or having gone on. Okay, so there's some physical proof, if you want to call it that. Some people would say, oh, that's just speculation. And that's probably true as well. But it doesn't matter. Fact is that our DNA was shut down. We could not communicate with God at a level where if we were allowed to do that, we would have developed in our spiritual prowess, in our physical nature, in our in the definite ways that our evolution as far as God is concerned, spirituality and so forth. It has been arrested. Now, that brings in the dispensation of the fullness of times. What does that mean? Well, when you take away our ability to evolve over 1000s, and 1000s, and 1000s of yours, then we are not where we're supposed to be or could have been had we been able to evolve ourselves and become like, under like other galactic people, or nations, where we're the weird ones, because we have not had our, our full evolution of time over time. So God knows about all of this. The Alliance knows about all this. And so they created a set of circumstances. The dispensation of the fullness of time dispensation is made there's there's changes to the ways that though, heavens work with us, live with us, communicate with us. So our DNA is going to be active reactivated. And we're going to go into we're moving up into the fifth dimension. That's the ascension process. It's all slated for us to do that. That is the plan. Now, the things that I'm telling you, it doesn't matter whether you know them or not, could help. But it doesn't matter because it's going to happen anyway. So the dispensation means it's different. Now we don't have the rules and regulations that we've had prior to this time, which means that now we get to activate our DNA, and we become like who we were supposed to be. And in doing so, we are accelerated in our evolution of our spiritual prowess, our spiritual nature, our physical nature. And we get to be in a situation where in a fifth dimensional realm, what does that mean? I don't really know, does anybody really know what that means? It means something really quite interesting. I believe that there's things that we can talk about. As far as our ability to create things we will create like, we've never had the chance to create before, because we've been shut down. This is payback. Let's call it karma. The Cabal has destroyed our ability

to evolve, that created negative karma for them. It also created positive karma for us. Positive meaning we can respond now, because our DNA is being activated, it's starting to function. And when that happens, and there's other things that are going to take place, that will accelerate this far beyond our ability to do things over 1000s and 1000s, and 1000s of years. This is called the dispensation of the fullness of time, it came as a result of what the Cabal did to us. And it's all legal, it's all. As far as balance is concerned, we're not creating any imbalances with our ability to do the things that we're going to be able to do. It's a balance. And we're rebalancing it so that we can, as humans, can have the ability to do the things that is in our genetic makeup. Okay, so that's important for us to understand, things have changed. What are we talking about? Now, we're talking about angels coming down and being part of their, their redemption appointment. And then we get to have interactions with those angels, because they're going to help us become humanitarians. This could not have happened had it not been for the negative stuff that we've had to put up with all of these 1000s of years, things have changed. And we're now in a position to accelerate past, what we used to think was possible for us. And what we're going to create is something that nobody has ever seen before. Because this has not happened before. This is the end of the the third dimensional realms, as far as the heavens are concerned for mankind. So when there may be other little places and stories where people need to catch up, and they'll have their opportunities, nobody is left out. Everybody will be their loved. Doesn't matter if you're a cabal or not. You're loved and appreciated by the One who created you. And that's and then there's all kinds of distortions and all that sort of stuff that we just don't need to know about or care about. I don't care about them, because it's not my business. I don't like what they did to me, so I'm I'm disgusted with them. However, there are children of God just like anybody else and are treated with love and kindness as what God would what would you expect God to do to them? I don't know. And it doesn't matter to me. I just know that it'll just be perfect for them and perfect for us. As we create the golden age of mankind. This is the remedy for the damage that the cabal has done for us. And that's why we have all of these things that are coming. The Quantum anything quantum quantum consciousness, quantum financial system, quantum voting system, quantum education system, quantum internet. There's the real thing there. Quantum internet means that it's a third dimensional All creation, excuse me, fifth dimensional type creation. And things of third dimension cannot perform and the quantum consciousness or quantum computer system that's coming. Okay? Let's, let's just put a few more parameters around this, the quantum consciousness does not support using money to make money ever bank trading SWIFT system, quantum consciousness went into the Swift transfer system and totally destroyed the purpose for which it was created. And that's creation was a solution to some everybody had different computer systems. So they did one that we could work with everybody's, and then you had to buy a party into it and your bank and you got to do a swift I'd forgotten the name of that. But it's designed to transfer funds. The way they transfer the funds, you go in and you want to send \$100,000 to Switzerland. They'll take your \$100,000, put it in the into the SWIFT system and push the button and it's supposed to go to your bank's trading account before it leaves your bank. That's what the SWIFT system is all about. When they do that they get involved in the overnight bank trading that's ever been involved or understand. Billions and billions and billions of dollars are created in the overnight trading system between banks. That's 86% of their profits came from the SWIFT system. Now because the quantum consciousness does not support using money to make money. It went in to the third dimensional realms of the banking system, the computers. And when a banker pushed the button to send that to his training account, they took the money and transferred it directly into the person's account who's supposed to receive the money. They didn't have to spend two days or three days or over overseas, maybe even as much as 10 to five to 10 trading days. I don't know how many. But each time each bank that would go involved or be involved in that process, well hold your money and do their bank crating and then they'll send it on the next day. And that's why it takes you a week or two, to get money from here to

Switzerland. Not anymore. The Swiss system has been overcome by the quantum consciousness, and that the bank trading accounts have totally been dismantled, or doesn't go into them. They're still using the system now. It's still trading, but it doesn't go into the bankers, the central banking systems, bankers trading account, it bypasses totally okay 86% of their profits, whereas the other profits come from loans, interest rates and billions of dollars for insufficient fund \$35 Whatever it is, all of that has been taken away. So, talk to me about banks tell me how they're going to survive. Tell me how a bank is going to survive when 86% of its profits have gone. They can't afford to stay in business, they will go out of business. And all of this garbage that we hear a lot of the banks are all connected to content financial system. Well, that's a one way you can't go into that unless the quantum financial system allows you to and banks have no access to the the quantum financial system accounts period have no access to it, unless it is given to them for a particular purpose. So right now, the banking system has been has been destroyed. All of the the upper echelons of money management for the central banking systems have been arrested through sting operations traps and they've gone down as far as they need to to get into the lower management areas and find people whose hearts You are okay. What does that mean? Well, those are the people who will be involved in the financial services industries, financial service industries, financial service centers. So when the banks go out of business, then the funds have when they've taken and extracted funds from people who have been doing bad stuff, there's plenty of money there to run the system of the bank as the financial service centers. So that they're waiting for us to get our money. But there's sufficient funds there to take care of things and tell we do. Now, here's one of the reasons why I keep telling everybody go for the higher rates get the bigger bonds, go for the higher rates. Why? Because the financial services industry will depend on us to pay for all of the people through financial through through through, excuse me, employment contracts, and we'll pay all of the overhead for the banks. And then we will turn them into financial service centers. That's the way it's going to be. And that's why there was a banker, Vice President of Wells Fargo, but came on and said, I have been trained for six months in the financial services industry. That's where the financial service enters, those are the people who will take over and provide the service to us in terms of how we would normally have to conduct our financial affairs, they will be there for us to do that. So when we're talking about banks, and then going bankrupt, they're cleaning them out first. And then they're going to use the banks for the proper things that will help sort of help us as humanity as we go into the golden age of mankind, that will have the services of people who will help us with our financial situations. So if we wanted a loan or something of this nature, we go in, who's whose money, they're going to use our money. And we can't charge interest on it. Because that's a no no, for the money that's coming from the redemption of bonds. We can't make money to against the rules. Try it, you're gonna have some problem. So the banking system, the SWIFT system is gone. When I say gone, it still functions, but it does not provide the banks with any funds. Okay, so the QFC destroyed the SWIFT system transfer system. And we need to explain that the Q C, quantum consciousness has assigned a digital footprint for all Fiat and in fiat currency, in every account, in every bank in the world. This has nothing to do with the quantum financial system. They just took over the banking system as it was assigned digital footprints for the money that's being used. And with a digital footprint running for such a long time, it knows where every increment of money is found every increment of money. They know where it is, who owns it, who transferred it there, and where it came from. And there's probably a bunch of other stuff that they're totally aware of. Now, the most important thing about all of that, is very few people are aware of this phenomenon. What does that mean? You have politicians who are accepting bribes, and are doing things that they shouldn't be doing. The Quantum financial quantum consciousness knows all about that. And where their money is, and who stole it. Do you think they're gonna get away with that? Well, some people call Earth hell. They say no way in hell, you're not going to get away with it. So that's part of what's going to take place. And how does the caller the

NSA, how does the NSA know the voting system and who's who was fraudulent and that well, They have their own way of knowing it. They don't, they have the proof, they have everything, they have everything. It's all in place for the, for the corruption to be charged, they get charged with it. And and many of those kinds of people, it's against the law to do that. It's treason. And those people who have committed treason against the United States have been arrested. They've been turned into clones as far as the public is concerned so that they can still be here. But there's people like Biden, and so forth, who have left this earth because of their their treasonous activity, you don't get away with it. The military is in charge of America right now, and you're not gonna get away with it. Nothing. The time will come when they'll shut everything down. And it's going to be heyday for the military and doing their tribunals, because these people are going to be gone. Now, how's that gonna work? Well, a high profile person who committed fraudulent activities, has already been taken care of by the military, they've gone through their tribunals, they videotaped everything, including the confession of the individual. So all they have to do is arrest the clown, and then the clown crown clown, whatever you want to call them can be retired and go wherever they was a proper place for them to retire to. And then they play the actual footage from the the military tribunals, we get to see it. It's all, it's all a magnificent plan. We don't like it. We don't have to like it. But what's going to come out at the end of this is that we're going to have a society that is serving people. And now we're going to get into the service and of business. It doesn't matter how much money you make. If you're not in service to humankind, you're going to have a real problem. Where does that I don't know how that's gonna happen. I just know that there's no convenience. There's no energy in those people who are trying to do things that are not for the best good of everybody. And they won't be around. So large corporations that are been doing bad stuff, are involved in some of the pedophilia and so forth, they are already being taken care of the white hats have taken over the world. We're not going to know about that until it's time for us to really understand. But let's just be aware that the right things are taking place. And when they pull the trigger, then we start the chess game has finished. And we've won and it's just a matter of time before those last few plays are made that will ensure the chess matches over 3d creation to defeat the central banking system which eventually took it over. Okay to defeat the central banking system, the cryptocurrencies let's talk about them. Crypto currencies are, it's an investment program. It was designed in the initial stages to counter the central banking system and to defeat it because they wanted the privacy which was associated with it. Well, the Cabal understood all that and slowly and defiantly took it over. And they're using now the banks are using the cryptocurrencies for money laundering and all kinds of activities that are just support their negative way of doing business. Okay, it's an investment vehicle that took off when someone began accepting it instead of fiat currencies. It really took off when there were, I think it was, well, there's one tattoo company that overstock.com or something like that. And they started taking cryptocurrencies for the things that were huge amounts of stuff that they're selling. So it all of a sudden took off. And the value of those Kryptos are gone up into the 60,000 or I don't know course I don't know really where it is or what it's Then, because I just hear little bits and pieces. And sometimes my memory doesn't concern myself with that. But so the fiat currency or excuse me, the crypto currencies really took off. And the banks saw what was going on. And they inserted themselves into the crypto currencies and the central banking system as part of it. That's why the Three Gorges Dam, you have a computer system down there that's mining for Kryptos. It's out there, it's all part of the quantum error, excuse me, the the takeover of the way that the central bank system is why because they're going bankrupt, they can't stick around, they're trying to remain viable and irrelevant, but it's not going to happen. So it's an investment that took off and someone began accepting it instead of fiat currency. So the next thing, let's go, because of that central bank takeover, and beginning using, they began to use of her laundering funds and keeping things private, which were before that were taken care of. The NSA knew all about all of that the digital fiat currencies in each of

the banks. And so what happens with cryptocurrency, the quantum consciousness understands cryptocurrency, just like anything else it does, it knows all about it, it knows who owns it, everything, there's nothing that the quantum consciousness does not understand and cannot find out about. So when we're talking about this, let's take a look at how the quantum financial system is going to come into play. And why cryptocurrencies are not going to be a part of it. And it has to do with the level of creation things that are third dimension, don't even compare with things that are fifth dimension, the quantum Internet has been running parallel, just like it has been with the banks for many, many years. It knows everything about it. Now, the quantum financial system is fifth dimension, it uses digital gold certificates that refer back to a library of gold that has been stored and in the library of gold, you can take your digital gold certificate, you can figure it out, and take it in there. And you can search and find the actual kilo of gold that's backing a particular currency backing a particular digital gold certificate. You take it back there, and oh, here it is, right there. Nobody's gonna get to that gold, nobody is going to get to that gold. And that gold is responsible to back every currency in the world. Now, let's just really get it right here. You pile up pieces, some gold in the corner and in your country and say, This is the gold that's backing my currency in the quantum financial system, your gum hardness stick. Why? Because all the gold that's necessary to back the currency has been set aside and nobody can touch it. Unless you're somebody that's in charge of it. So there's nothing you can do about it. The digital gold certificates are not crypto currencies, they are not third dimension, they are fifth dimension. And when you talk about the internet, as it presently stands, yes, you can do all the things you want to do with the cryptocurrencies. But when the quantum internet is turned on, there's no facilities for any cryptocurrencies to be able to function because they need the old system. And when the new system is turned on, the old system is turned off. Now I'm a little conflicted with that because I've heard that the quantum financial system ever Excuse me, the quantum internet system cannot make money, people cannot make money using it. Because anything quantum is not You're not allowed to make money on it. And those who do are going to have some problems, personal problems trying to do something that's not allowed. So, if you talk about cryptocurrencies being a part of the quantum financial system, you don't understand the difference between third dimension creation and Fifth Dimension creation, they are not compatible crypto currencies are in third dimension, they are not compatible with the gold standard, excuse me with the digital gold certificates that are in part of the quantum financial system. So, there is a point in time where cryptocurrencies have no place to be. And as we get rid of all of the third dimension stuff, cryptocurrencies will be gone as well. And this is why, because it has to do with the level of creation, the quantum creation of the digital gold, excuse digital gold certificates and the quantum financial system. Okay. Now, that's what I felt needed to be talked about today. And I'm certainly now open for some questions about it, if somebody wants to ask questions.

D

Dominick 36:45

Okay, so let's let's, for a second, let's just kind of let that sink in what Ron just stated, I think it's important to understand because of what's happening in the future, but that's going to come about to support us as humanitarians, you need to know all the facts. So and I only bring this up now, as you ask your questions. Think of it in the realm of the discussion that we just had with Ron. And Ron. Also, I just want to let you know that I stood to attention when you refer to these people that dumber than a stick. I think that that was so appropriate. And it made me stand to attention. So I'm paying attention even more now. Just let you know,

0 1 2 3 4 5 6 7 8 9

S

Speaker 37:23

okay, okay. I don't mean to demean people, but their behavior sometimes has to be the main because they're not doing

D

Dominick 37:31

right. Absolutely. I understand. Totally. Okay, Carrie, I'm sorry. Go ahead.

S

Speaker 37:37

No, no, I just want to say we're going to have another q&a after this one where you can ask more general questions, but let's keep the questions now to the topics that Ron just discussed. And oh, deeper. You are first. Okay, can you hear me? Yes. Oathkeeper I can. Oh, you're familiar to my ears? Yes. Good thing or bad? Yeah. That was speaking in respect to the the humanitarians. How us as humanitarians need to stem Oathkeeper We'll I come back to you. All right, we'll go to Patricia now, Patricia Cummings in oath, raise your hand again, and we'll come back to you in a bit. Patricia, want to open up your mic? Yes. Hi, Ron. Hi, everyone. Hello, Patricia. Hi, there. I'm trying to get rid of what thing something I've read. And I am not sure I've heard you bring it up. So I'm just going to bring it up and see if it is part of the banking system going down or too fried to just let it go. And I've read some on the basil three. That was supposed to be implemented with all the banking somewhere in April, Do you can you expand on the basil three? Or should I just let all that go? Thank you. The only thing I can do Patricia on that. The only comment I would have is that all the old stuff is going away. How that goes away and how soon it goes away is not available for us to really understand. But we're going into the quantum financial system. And in the quantum financial system, there is nothing in there. There's nothing in the old system that will survive. And you know, there's a transition And let's let the transition take place and and see what's happening as it as it unfolds. But the the problem that I'm having personally on a personal basis is that you get a lot of people who don't know what they're talking about, and presumed that they do, and then tell people how crypto and all of the other stuff is going to be really good. And the banks are going to be really involved. Well, the banks are going to be involved, but not as they think it is. And so we're in a whole new different way of thinking. And a lot of people are having a hard time letting go of the old. And I say, well, let's just watch the transition, and see how the old goes away and then do is the only thing that's available for us to use. So I hope that helps Patricia. We're in for some really good times, that those who have the bad stuff, are holding on to it are going to have a hard time with us in the future. Sure, I hope that helps. Next person. All right, the next person is Darlene Roselli. And then Kat is going to be after Darlene and we'll come back to you. Alright, so we're going to go to Cat you're up. Cat want to unmute your mic. Oh, I didn't know I had to do that. There you go. Thanks for the opportunity. Hi, how are you? Good. Good, good. Um, I've gotten a email here from the NESARA GESARA,QFS form. And it gives zoom links, which I have missed, because I didn't get this until today. Um, this has nothing to do with love one, is it?

R

Ron Giles 42:06

No. Yeah,

S

Speaker 42:08

I don't know where this came from, hey,

D

Dominick 42:11

if I can't run, if I can jump in there, I am a little bit familiar with this, this. This is a forum site similar to what France has set up for us. But it's a group of gentlemen that have gotten together. And they are basically hijacking other people's words and putting it into a forum process and trying to take advantage of some things that they really shouldn't be doing. And a lot of times we've had a lot of people do this with LWS just kind of steal the information and put it up there. But all it is is just a hijack forum that they've set up for people to join and do the same things that a lot of other gurus are doing. I wouldn't pay any attention to it. It's a compliment to Ron that they're putting it out there. But they shouldn't be just hijacking it and they are we've we've kind of recognized it and I just blew right through it.

S

Speaker 42:57

Yeah, it wasn't really resonating with me, but I didn't I wanted to make sure I wasn't missing. However, this angel is going to present.

R

Ron Giles 43:06

Yeah, thank you for that. Let me just say loved one society is the only QFS 2020 is the only site on the internet that does love one society stuff. Anybody else is stealing it doing whatever plagiarizing trying to make it their own and make money on it. But one society is only on qf s 2020. And anything outside of QFS 2020. is just made up from other people copying our stuff, plagiarizing. Call it what you want. Let them have their fun, because it's not going to be so fun for them when they finally finished with it.

S

Speaker 44:01

Well, I appreciate that. Ron, that was my question for today. And thank you very much. And you're certainly. Yes. I appreciate that. And thank you. We're gonna go to DJ next. Hi, everyone. Hi, Ron. So good to have you here. Thank you. I just, yeah, I just have a real quick comment. And this might possibly help many that are struggling with the differentiation between moving forward and the QFS and staying in the old. You know, what's so difficult now in the system that we're in it and it's so convoluted and it keeps us so distracted, and all the what ifs and where we're going and where we're headed and what we're going to do that we don't really actually live and I think this new system will be absolutely so simplistic and so easy for all of us. And this is what we have to wrap our head It's around that anything that you're putting out there, that's even my newly part of the old, it's not going to be part of this system. It's all going to be creation and life and movement forward. And just just on a, just an absolutely brilliant level, everything's going to be on an equal playing field, there won't be struggles of casting of cast systems, it's going to be This to me is like, so easy. Finally, having that open space, kind of like a huge prairie. You ride all day, like a friend of mine says, and you never come to the end, because it the vastness of what's we're going to experience here is just unbelievable. And for

me, that right there is that, that open heartedness of humanitarian and things that we were brought here to do, like Ron was talking about earlier, when this was all taken as stripped from us, you know, all we're supposed to do to be on this planet, is create and love. And that's it. And that's it. And then anything else is anything else is putting struggle in your minds, let it go, it's not going to be about that. It's going to be the creation place, and how you want to create it, and anyone else you bring into your field is going to be what they want to create, you won't have any control of that, all you'll do is give them that platform to create their dream. And this is this is where we're all add, you know, and, and then we have to wait till things come. You know, we're not there yet. You know, we have to wait to prove, you know, so people can trust and, you know, which is all that all form again, you know, because we've never been able to trust but I just wanted to comment on that, that we're moving into a much more simplistic placement of our lives, we'll go through some stuff. But this is just what I'm holding on to and, and creating is that and like Ron says, people will come, we're going to build this, we're not going to have to ask people and how they're going to just be there. Because they're going to feel the energy. They're going to feel the movement of where we're headed. And I love every one of y'all. I love you to my leader, my fearless leader Ron, and I yield. Have a great day. Thank you, dear. That was nice. I appreciate that. I do we have. Darlene, you want to try one more time? Let's give you a chance here. Okay, can you hear me now?

C

Carrie 47:32

Yeah. My phone

S

Speaker 47:39

turned my hearing aids off. So, Ron, hey, it's good to talk to all of you guys. And this has just been a great, great journey here. And my question is, I have been in crypto for quite a while. And I got with things like I mean, basically, I'm with a crypto that's backed by gold, we had to buy the gold to turn it into crypto. And then also my question to is, will that I mean, I guess we can convert that to dollars and then put it in our QFS account? And yes, later down the road? And what about physical gold? Can we take our physical gold to our appointment? It's a good, it's a good question. And I'm gonna say no, there's no reason to do that. Because your gold is yours. It's a commodity that the quantum financial system doesn't recognize. Because the quantum financial system has its own role. And so when you have gold, that's your, that's your commodity. It's not money anymore. And so there's no reason to take it to your redemption appointment. But yes, darling. Well, as we as we move forward, there's the there's the things that are not real, that are going to follow away. And what's going to be left, his is going to be perfect for us in the New Age, the golden age of mankind. We've got all of the quantum stuff that's accumulating. And once we really find out what that is, and I'm going to say that there's a lot of quantum stuff that's involved in new technologies. I keep hearing people say, Well, we're gonna have problems, getting people to join revenue sharing solutions, and they say, No, you know, people are being moved by spirit to get involved. And we have no ability to control that because each individual is an individual that has their own guidance system. I'm just saying Ain't that we have a brand new way of doing things that is consistent with the way things are going to be doing going in the future. And everybody's going to have their, their questions and their doubts and their fears, but they will slowly, if not quickly be under, overcome. Because you just have to look at your, when you do the RSS program, just let your computer run for a day, pay your \$10 back to yourself, do whatever you want to do. And then

you're gonna say, Well, I gotta let it go. Because I don't believe that there's a lot of money out there, then I want to get as much as I can before it stops, we're bonding it, it's not going to stop for at least 100 years. And so it's going to be a brand new way of living. And this is just the smoke, the RSS is just a small thing. When you take into consideration all of what the quantum is, it's going to be a major change. And, Darlene, I think you understand what I'm saying. Bless her heart. Thank you for your question. Yes, I do. Also, you know, because, you know, with my involvement of what I've been doing, there was a lot of people that I see are going to lose a lot of their investments. So I, I you I mean, I see this as helping them later down the road?

R

Ron Giles 51:33

Well, I'm hoping it will, because gold is like crypto, it's not, it's not going to be money anymore. And when it's not going to be money anymore. And you've got the ability to sell that for some cash when the quantum financial system, then why would you want to keep the gold and that's why I say to people, be careful. If you've got gold, when it starts going down, it's going to plummet.

S

Speaker 52:04

I hear you saying this is the time to, to liquidate it. Right?

R

Ron Giles 52:09

Well, I'm not sure that that's true, either. What I would say is just monitor and know that there can be some problems, because profits are going to be made both in Kryptos, and currency and gold or silver or whatever commodity that you want to use. But I think you'd be in a position to once you know that there's a problem, then you ride that out. And there's a time when you say I need to sell. And so you do and liquidate your your goal. And you've got gold currencies, you've got money that's backed by gold in the quantum financial system. So it takes away the need for gold. If you understand that gold has been a really, really good thing to offset. What's the word I'm trying to say? The old system and creating inflation Excuse me. So inflation, we offset inflation with gold, and it's done a wonderful job. But when we have gold backed currencies that don't lose value, then gold is there's no longer a need for gold as money. It's just now a commodity and will be treated as such as far as the price of gold is concerned. And it's the same way for other cryptos except for the cryptos they're not going to be it's not going to be a something that is going to last because I don't see. And I would challenge anybody. Give me Give me some information about cryptos and why I believe that the third dimension, internet is going to be going down. And whereas the vehicle for cryptocurrencies to continue I, I don't see it. And so I'm just saying these things from my perspective. But I think that it's accurate because of the fact that the quantum consciousness created the quantum come quite quantum financial system. And they're not consistent with the way things are in third dimension computer systems to different operating system. So, okay, well, I've said enough for that. But thank you for your observations, and I appreciate your comments. Next question.

S

Speaker 55:00

We're gonna go to crispy business. Your next crispy. Yes, hi. Hello crispy. Hello. We love crispy stuff. Yes, go ahead. Just actually wanted to I know, I don't know if you're done speaking about what you were just talking about, but I did, just so I don't want to, you know, beat a dead horse but I was interested based on what you said what your take would be on with the knowledge and the access to things that you have is in that if someone may be purchase precious metals as a way to try to buffer something before they purchased bonds, and before they decided to really get involved in this humanitarian work as a means for them to be you know, for them and their family to be taken care of. I guess Are you saying that those those precious metals will not be worth I guess, going liquid in or or perhaps maybe saving them because the the bonds that you have would obviously be for the humanitarian project. But then I've also heard you mentioned that it is your your money in the sense to so I'm just kind of trying to figure out financially how you kind of take care of yourself and your family and then also take care of the humanitarian projects and not wanting to mix monies and all of that so I hope I didn't confuse
