

April 19 - Q and A Crypto part 2

Wed, 4/27 6:26PM 1:01:57

SUMMARY KEYWORDS

people, ron, gold, alliance, question, quantum, currency, information, god, humanitarians, listen, understand, corporations, commodity, crypto, children, benefactors, gurus, problems, happen

SPEAKERS

Ron Giles, Carrie, Speaker, Dominick

S Speaker 00:01

If you want to be crisp about this, yes, the old system as much of what's going on in the old system will be removed. Now, if you have gold, it's now going to be considered a commodity. It may take a year or two to do that. I don't know. However, there are certain commodities that are in high demand. Silver is one of them. So silver would be one that you perhaps want to keep. Because financially, it's going to go up, I think, maybe it's not, but keep an eye on that as not one of the first things to sell, but maybe down the line a little bit. But gold is one of those things, once a quantum financial system is up and running your money in gold. You can't spend it. And it's not. Yes, it may go up for a little bit. But it's eventually going to go down because you've taken a large percentage of the population who use gold for money and subtract that out of the the pricing of gold. There's no There's no buyers there for that sort of banking or using the gold for money. So it's not it's not going to be there. So perfect. Thank you for explaining that. You're certainly welcome. That's from my perspective.

C Carrie 01:33

All right. Next, we're going to have crystal crystal, just open your mic. I think he just answered my question. I was going to ask about silver, and if that was just going to become a commodity and the value is going to drop as well.

S Speaker 01:50

Well, it's a commodity now. But there's value in that because of the fact that commodity is it is a consumable commodity. There used to build things. So silver might have a different plan and other currencies could be the same. It's not everything. So you're well.

C Carrie 02:11

And next, we're going to have James Hodges, James, you're up. You need to just unmute your

mic. Thank you, Ron. It's been great. I'm enjoying.

S

Speaker 02:24

Thank you. Well, thank you. Do you have a question? I will ask you one question. I'm one of those that do have currency. And cryptocurrency? Yeah, good bit of it. Is it best that I get rid of it? Or just wait it out? Well, the, you know, look into your crystal ball and see what it says as far as what's going to be active with crystal with cryptocurrencies. I don't know, my perception is it probably will go up for a while. And yet, once the quantum financial system is taking place, and they switch over to the new internet, then it's a good chance that that that your position might deteriorate quite rapidly after that. So keep track of it. Keep an idea and allow it to take its course and make some money if you want. I'm not one who would know whether it's time to sell or not. If I don't have any. Don't get involved in them. You understand what I'm saying? But for those who. Just just okay, just watch it. Be sure you're taking care of things. Yes. All right. Appreciate it. Thank you. You're welcome.

C

Carrie 03:46

Dominick is going to be next and then Jennifer. Dom.

D

Dominick 03:50

Thanks, Carrie. Ron. You know, I so much appreciate when you come on these chats how you can make things so clear as glass for us. I want to throw this out and just get your response to it. With all the gurus with all the information with all the dialogue that's out there currently today that is so tailored to just confuse the living daylights out of us. Should we just totally ignore everything? I mean, I guess the question I have is, has there been any piece of information shared by the alliance that has been exposed into the public currently, or is this all just waiting to be revealed at one time?

S

Speaker 04:35

Well, I think that's an excellent question. If I were to listen to gurus, and wonder if they're part of the Alliance getting their source of information or intel from the Alliance, I can tell immediately. I have not had that opportunity for anybody at this point in time to have clear understanding from the Alliance When they get on and they start talking about things they think they do, and most often aren't just thinking and doing what other people have already done, or talked about. So they think it's okay to talk about it that way? Well, what I have is, I have a complete understanding of the quantum financial system. And so for me, it's very, very simple for somebody to come on and say, just a few words that are not accurate. And I can say, you need to go back to the quantum financial, excuse me the Alliance, and get your information from them. Because what you're saying is not really viable. I'm not gonna say it's inaccurate. I'll just say it's not viable. Is that the same as saying is accurate? I don't know.

D

Dominick 05:58

So one of the things for me, Ron is that I, whenever I hear someone have a discussion, and I basically have blocked away all the all the people that I used to listen to, and I only listened to what goes on here, but when I start hearing people talk about Well, I heard this from sources. And I've got my information from this source or that source, I immediately the red flag is up, and I'm completely away from listening to that. And to me, my advice would be for everybody that unless they're saying using the words the Alliance, which I don't think they can, because it's it would not be accurate, that you just should make a choice, whether or not you'd want to listen to it.

S

Speaker 06:35

I think that that's why, if I were to give that counsel, that's the way I do it, if the information you're getting is not involved with the Alliance, and if their source of information is not the Alliance, and if they don't say so it generally won't be. Even if they say it's from the Alliance, then then I, I have to listen to what they have to say. But, you know, bless her heart, because I think it's Skye was doing a three, the med bed. And in November of last year, she said on the 15th of December, the Alliance, or the med beds will be released. Or she got that information from the Alliance, she talks to the alliance. But when I inquired about it, I was asked the question, Is that like a date? Is that like a something that we don't do? I said, Well, yes. They said, Well, come to your own conclusions about it. If this alliance, they will not give dates. And if they do give dates, it's a military deception. So if you don't believe military deceptions from the Alliance, then go ahead. That's all right. I don't, I don't go there. There's no reason to, because it's false. And the 15th of December came and went and there was nothing said or done about it. And I thought, thank you, thank you very much. And my heart goes out to sky. I mean, she's going through some really tough times right now. My heart goes out to her, she's trying to do a good job. I don't really understand who she is, calls her. Alliance, but whoever gave you that little bit of information did not really serve sky. So I'm looking for people. And I want to be sure that everybody's okay. But there, I can't do much more than that. So that's just an example. That Alliance doesn't give dates. They don't give circumstances, or looking for another two months or something. They don't do that. And if they do, they're going to exaggerate totally out of bounds. All that could be happening in 15 months. Oh, I wish I'd had and ask. There's things that can't be told and things that can't be told where or so let's just allow that to take place. So what have I tried to do to maintain some kind of a life? I don't listen too much. I'm encouraged to listen to people that I believe in. And I've made, you know, there are those Jayco and, and and Janine and people like that. They're they're not out there to hurt people. There's they're there. Doing a good job, I feel. And yet even that I have to take, especially with this last little bit that Janine says, this is the person who gave out the information about the the COVID-19. So, and the venom snake venom. She doesn't believe in that. And I have other people that really believe in that. And it seems like this information is gaining a bit of notoriety. Well, I have to go inside and and figure out what I feel about things and then I just don't get involved with it, why should I get involved in something that's, is really hard to understand. And yet, it's negative for what has taken place. So if I try and avoid those kinds of things, and keep into peace and harmony, then I just, if I listened to it, they'll say, Well, that's interesting. But if I have, if I start believing things, then I have problems. When I say problems, you know, I, I tried to maintain the balance of between spirituality and learning stuff, a lot of stuff for spirituality is not this not support some of the stuff that's been going on? So I just have a hard time with that. So I just withdraw from it, just like you're doing. And I think that that's probably in my opinion, is the best way to be because what does it matter? What does it matter? People have done what they're gonna do. I don't have people that I have to say, I told you, so I, you know, I don't

have to do that sort of stuff. So I'm, there's no reason for me to really know and understand when the chess game is over, and we've got checkmate. And things will change for us. And that's what I'm looking for. That does not come across the way that it's coming across now with with new stuff. We can have a discussion about that, as long as you want. But that's my feelings about intel from other sources, bits from the Alliance. I'll give it my my credibility. And yet, then I it's got to make sense to me. And if it doesn't make sense, then I have to go and inquire more or think about or ponder about it, and find out if there's something that I'm missing. It has to make sense. Everything that I get from the Alliance make sense? And that's what I have to go by. Sure. Thank you, Dominique, for your Thank you, Ron. Thank you. You're welcome.

C

Carrie 12:59

All right, we have we have Iraq, Kitty, and then Patrick Smith. So we'll start with Iraq. Go ahead and unmute your mic and Europe.

U

13:14

I agree with Dominick. Because I've been known following a lot of gurus. And I mean, I'm an old geezer I know I think don't want while you can be converted, we use. And I'm kind of skeptical of some of the gurus that have been listened to No, I no longer listen to them. Because I don't feel their heart for some reason. And I feel your heart. And I know you're being truthful. And they're misleading so many individuals. That is so upsetting to me when I see some content that's been put on the chat room and I shaved my head while these people are still following you on people. But yeah, like you mentioned, I don't want to mention the name. But on April 14, I think you did a talk when I listen to you, saying that someone took your information and voted for themselves. I don't want to mention his name. And you know, his and he took information and Utah spoken to him about it. And he is speaking the way I've seen him and I stopped listening to him because I don't believe what He says. And I just people I think that people because I'm an old geezer I think people should be really involved with this program in you because I think you've got st. Anton. I know you are in totally my heart. So that's what I have to say and thank you so much one.

S

Speaker 14:43

Well, thank you I read that was kind of you'll see that most most everything that we have to say most everything that's out there. It doesn't really matter yet. And so that's why I don't get so involved with it. I have to maintain a peace of mind myself. So I get involved in that. And then I get oh, can I use the word pissy and grumpy? And get being the people? You know, I don't like that. I'm fully capable of getting angry with somebody, but I just don't, I don't need to do that. I don't need to go with that kind of information. That makes me angry. So I just avoided best way to do it.

C

Carrie 15:30

Let's go to Jennifer. She was waiting. Before Jennifer, you go ahead and open your mic. And kitty will come back to you. Jennifer de. Yes

they will come back to you, Jennifer de. Yes.

S

Speaker 15:43

Hi, Ron, and everyone else I want to say thank you, you guys are doing a wonderful job of bringing all of us together and teaching us everything. My question? I'm not sure if you answered it or not. But I know someone asked about bringing gold to the redemption. And you said it wasn't having any monetary value. But I was wondering about silver? Can we bring that to the redemption appointment to have that exchanged for a monetary value? Those are commodities, you're not exchanging for anything? Why would you take them to exchange when they have a value of that you can go down and sell them at a coin store something of this nature? That's the only reason I'm saying Why would you do that to take that to your redemption appointment? Because they're not going to give you money for it. There's no need. That's not part of the deal. They're redeeming bonds and exchanging currencies, not things of currency. Like silver or gold. Okay, thank you. I completely understand. No, thank you so much.

C

Carrie 16:58

You're certainly well, all right, Elsa. So happy to see you. Your turn, Elsa.

S

Speaker 17:05

Ah, all right. Good evening, instead of blocking South Africa at night. Ron, your voice is like, Yes, I appreciate everything. And everybody, carry, and tunic, and all the others. Now, with this intro, I just want to draw their attention to South Africa, Africa as a whole, that's got no, no thought, information, or ways to get to this information of yours. Now we are a group of people that is going on into Africa to solve the problem. And we were wondering if there will be any copyright on your teachings. Because with the new oncoming and awaiting high technology, we can easily translate all the teachings immediately into all the different languages. What is your concept, please, I have no problems with anything that I say being translated into different languages. If you do some videos, or pictures or things like that, I'd like you to send them to me. And then let me take a look at it and then saying, Yeah, I agree with that. And then let that be that go out. But I really don't have, I don't reserve the right to do that. Because people need to have the ability to translate from one language to another. And they can use different things to do that in by them in stores. So I have no control over that at all. And I don't want any control. I want you to understand what you need to know as far as love won society is concerned and, and be in a position to become a Zim benefactor. That that's my goal is to train people to become Zim benefactors that can function with the help of their counselor to be the best humanitarians they possibly can be. There is no more that I would like to have than that is that each person becomes the best humanitarian that they possibly can in service to one another. So I don't have a problem with people translating my stuff now. If there's copyrights or something like that, you know, some of the stuff on the websites just got copyrighted, but I'm glad to fastidious about I'm not too overly concerned about that. The bad people going to do it, the bad people do Who cares, they're not going to be with us. So they can do some damage to others with the tender hearts that we have. But let's, let's just allow everybody the freedom to be who they are. And if they understand who they are, then they'll do just things just perfect. That many of us really understand that we're children of God. And that's what I tried to teach his children of God. And so, would if you have something that you contemplate doing, what

would God do? Or what would Jesus do? I think that that's really good. And if you have that kind of thought processes, you're going to get the right things done. And that's the most important thing on an individual basis. Other than that, there are bad people out there, let them be who they are, I'm not going to control. So so. Go ahead, Thank you, Ron. So what I gather from this, and thank you very much, indeed, is that we should shift our focus from teaching into making benefactors and let the people themselves realize who they are. And go from that point onwards, am I right? Please, you're right. If if every person who listens to my voice would believe in the reality that they are a child of God, immediately his likeness in the image or, you know, obviously, male and female stuff, then they will, they will respond to the call that comes from with inside of them to be who they really are. If we, if we can get people to be who they will, the quantum of the Cabal would not let us be who we are. And that's what's created all of the problems. We've used, mankind has been used in our creation, so come up to the speed of destructive weapons, all this sort of stuff. That's where the, the whole system has changed. If we found out who we really are, and came from there, and we're supported in our efforts to be who we are, then the the best things will happen. And that's what we as humanitarians and we as love won society, people want to help people to become to know who they are. And then there with that the process of ascension is just it's not it's a moot point that it's, it's not a moot point, because you're going to be that way anyway. And isn't that wonderful? You're gonna be like God. Absolutely. By the way, I really appreciate you, precious lady. I think we need to move on to a new dispensation, and that is knowing each other. I've, I've got this deep feeling that we are going to look different, although we're going to be in the same body. But together, we're going to make an enormous impact in the physical and spiritual realm. And you right, Ron, of course, as always, that I as a person want to take over God's part of his decisions, what he wants, the people in Africa to know and to act on. And we are just using your programs to take the deep into the activity of God's plan. Am I right, please? You're right. Amen. Okay. Thank you very much. You're certainly welcome.

C

Carrie 24:30

Geraldine Europe and then Patrick, you'll be next. And then it will be Miss Betsy Ross.

S

Speaker 24:36

Oh, apologies. Thank you. This is Geraldine from Ireland. Can you hear me? Okay? Yes. Yes. Hi. Hi, Ron. It's such an honor to speak. And Hi. I just wondered if I could ask you. You mentioned that the gold will be assigned a value, which will be set in stone for all eternity. And which will equate to a given number or bits of currency. May I ask, how will that value be determined?

R

Ron Giles 25:22

Okay, that's a, that's a really good question. Keep in mind, every other currency in the world, and going into the galaxy will be the same currency, the same gold is going to back all of that. And so we have, let's, let's call it the quantum financial system. Bundle of gold, I'll call it a library of gold. And each one is it put there as a result of the the serial numbers that are on the, the actual kilo of gold, and they're all stored in the same way. So that they can go and find each other wherever, okay, so that gold is how, okay, when we when the time comes from the our the revenue sharing solutions program, quantum financial system is is opened up and

doing things, there is a snapshot in time. That means that the price of gold will then be determined, so that the kilo of gold will know how many pieces of increments or increments of currency, it can support or gold back. Once that takes place, then the digital gold certificate is married to that piece of gold and will always reflect the gold backing of the currency in that that digital gold certificate once has taken place that it's in, its perfect, it's it's no longer part of the the price of gold. Because if the gold goes up, then all currencies in the country or in the world go up as well. So there's no difference between one currency and another. That's the price of gold goes down. There's no difference in the price of gold, for that particular piece of currencies. It's all all currencies will be relatively the same. Always from then on, because we go through the golden Scooby, the Global Currency Reset, so all currencies are reset at the same value, then it's going to be that way forever. There's no changing. So you have the gold that's in the quantum financial system. And now you have there will also be gold, that is a commodity that will be traded back and forth and bought and sold as a commodity, not for currency. But for for gold, or for as a commodity. And those commodities like silver that are used in industry, for circuitry, and so on, that those are the kinds of things that will reflect the value of silver at that point in time. And I think that silver will go up and perhaps gold go down over a period of time transition between, you know, five or 10 years. I don't know how long it's going to take. But the gold in the quantum financial system will never be touched by anybody else. It's not going to be sold. It's not subject to sale. It is a permanent financial solution to the quantum financial system. I hope that helps.

S

Speaker 29:20

I understand. Thank you. Thank you, Ron. Thank you.

R

Ron Giles 29:23

Very welcome. You're certainly welcome.

C

Carrie 29:27

All right, so we're gonna have Miss Betsy Ross and then sherry. Oops, she just dropped away. So come back on Ms. Betsy and Sherry And Earu others Betsy Okay, Betsy, you're up. Hi, Ron. Hello, Betsy.

S

Speaker 29:47

I would like some clarification on the DNA repair that we are looking forward to a situation as I have three adult children and all of them received the vaccine and there is tension in the family has manufactured, my children are not talking to my husband and I because we did not get it. And, you know, my, I feel like I've been ascending for over a decade, you know, slowly through each trial and tribulation. But this information is somewhat new to me the damage that's been done to our DNA. And, you know, of course, I'm wanting to be hopeful that my children will kind of come around. If this reset, in terms of DNA reset happens. What does that mean for someone who is uninformed about it, you know, what has been happening in Big Pharma, etc. That makes sense. I can appreciate what you're what you're saying. And it's, it's important for us

too. I have three children. And I have one atheist, one who has more of my way of thinking, and one who has an organized religion way of thinking. So that could cause me a major amount of distress. But I know that God loves them just as much as he loves me. They are an individual to God, who created them. Yes, there are children, we brought them forth. But we didn't create them, because that's the job of the Creator. So I have responsibility until they're 18, you know, and financial, and so on. And I try and raise them in the best way that I can. But there comes a time when I have to let go. And let them be who they are. Without me, trying to teach them stuff that they haven't learned or whatever. I can talk, but like, I can't, it's not appropriate for me to overstep my boundaries with them. So I just have to let God take care of his children. Yes, they're mine, we share that responsibility. But once they become a team, then they're no longer part of my responsibility. They're just God's children, and then they get to do what they want to do. Now, if we're not willing to let that take place, then we can have some really bad things happen, and we are stressed out about it. How do you get away from that? I don't know. But the reality is, is that they're going to have a life that's different than what I have. And from what I want, they may be on a different way of being. And I don't, it's not my responsibility to control that. And so you and I, and others, parents, who have had children that are having problems, our concern is that we would like them to be happy. And maybe their happiness doesn't come from the way that we do things, but from their own way. Is that more appropriate than the way we want them to be? That's all that I'm saying. So I have to let my children go and be in control with God and allow His purposes for my children to take place. And when that all comes over, and that's going to, you know, maybe we're all 1000 years old, a lot of time has gone by, things will change. Med beds will be remarkable for all of us. And so with the financial system, the way that it's working now, and all things financial, or quantum are working out just perfectly for us. Then eventually they're going to change they're going to make some changes. And let that just be according to a way God wants him to be. Just let them be. Let me cry all you want. Well, I just have to let it be you with my children, and it's hard because you know, I have a daughter, we haven't spoken to our children since Christmas, despite the fact, you know, we've, we've reached out, we've just let them know that we love them. You can do, yeah. And, you know, I just didn't know about how this repair is going to work, this DNA being reactivated

R

Ron Giles 35:28

let me just address that for a minute specifically. There, there's some, an event that's supposed to be taking place, I don't really understand fully what it is some kind of a blast from the Central Sun. What that's going to do, I believe, is to repair all of our DNA structure. So that our bodies can start tuning into our source of creation, like it supposed to. And they're going to have a change of attitude that change, there's things in their life right now that their energy that they're using for that are going to change. And the energy will change to the point where they don't have the energy that they had before. It's a different kind of change. Because their, their bodies are going to wake up to who they are. And I think that we'll find as parents will find that those children are, will become a pride, a source of pride and, and love for us. We're so thankful that God has made these changes in their lives, and we find them to be happy and successful in what they're trying to accomplish. And isn't, isn't that what we want them to do? So we're in that change right now. Now, I can let it happen. And be satisfied with knowing that they're doing God's will. Now, do I believe that? Yes, I do. Even though they may oppose me in some of the things that I try and say, I know that they're in God's control. And so I just simply let it be. And I say, in my mind, they're God's children, they get to do what they want to do, according to free agency, and God will not judge them. So why should I judge them, I know that things are changing, so that they all changed in ways that I want them to change perhaps. And

if that's the case, then you know, they get really excited about that. But if they don't, for two or three or five years, we need to understand that there are things that are going to change, they're absolutely going to change. funds, money makes a difference in people's lives. Now, it's still the logo and all that sort of stuff. Yeah, call it what you want. But if you don't have money, you don't have a life. And the more life you have, the more money you have, the more life you have. And it's going to equate that way. And it's it's nothing that we can have any control over. So there'll be times when you'll be upset with him. And other times when you'll just be really excited about where they're going. They may become humanitarians who want to be involved in what you're doing. Just don't destroy the relationship. Now as it's changing. Just be available, love them. Embrace them if they let you in and I know that they're in God's hands, and everything will work out just perfectly. That's the way I believe for them. And so I just allow that to be true for me. And I just simply say, I understand what you're you're going through to some extent I don't really fully understand, but I'm gonna let you go through it because that's what you're choosing. And let them be. Thank you. I hope that helps are there. I can see it. I can see the pain in your heart in your heart. But it's going to be better, better. It's going to be better. Much better.

C

Carrie 39:36

All right, Patrick Smith. Here net. And then Vincent. And we also saw Val Val wants to come back in so Patrick Europe.

S

Speaker 39:47

Okay. Um, I wanted to get in on the conversation before when talking about the gurus. I don't call them good. truthers. I can't relate back to their guru. But they just get their information from free. dimensional resources once they tell you what they are, and the ones that I listen to tell you right out, do your own research. But for the most part, they're just conversing with on the ideas and speculating just like that we all got together and talked about button, like my hand used to dig up golden jewels out of the ground. As a hobby, she said, You dig through a lot of dirt and get one little morsel of good. The same thing, you hear a lot of just speculation and talk, but they do have some good information, save you some time and research. But you got to use a lot of discernment. And understanding most of it is just three dimensional, you got to check that out with a higher source. You don't just dismiss it. But you, you look at it, if it makes sense that you take a look a little bit further. And I say, I'll look at something until it doesn't make sense anymore. And then I'm finished with it. You know, I can revisit that with new information. But generally speaking, there are certain individuals who just refuse to have integrity. And if you don't have integrity for me, you know, you're, you're over there in some other field, where they have a whole field of people who have no integrity, and let them enjoy themselves, if that's what they want to do. But I have the ability to know, for myself, what I accept in my, in my heart, and in my mind is things that I'm going to be functionally where. And I'm very careful with that. So I understand that thank you for that. Go rose or Yeah, we laugh at him or we'll start crying. Yes.

C

Carrie 42:03

All right, next, we've got Val.

S

Speaker 42:09

Hey, Ron. How are you?

R

Ron Giles 42:11

I think I'm doing great, Val, how are you?

S

42:13

I'm doing great. Thanks to you, you know, I've been on the whole time we started talking about QFS versus crypto. And, you know, what, really love to get your thoughts on how you see the world. You know, I've had several discussions today about corporations. And it's one way or another. Almost all of us are involved with corporations. And, you know, one of the prevailing thoughts is what happens after the Global Currency Reset, and the SAR Gazzara happens relative to corporations and how life might be different how people identify themselves now. So we'd love to hear your thoughts on what you see the world like after corporations go away?

S

Speaker 43:06

Okay, well, corporations are a legal fiction for people. And we're corporations, all of us by ourselves. That's what they look at us, they can't deal with us as humans, they can only deal with us as corporates, corporations. And so I think that that's, that's, you know, disgusting from the very beginning, and not worthy of any real accolades for the way that they've treated us. So, all of those kinds of things, those people who would create a, a corporation that is doing negative stuff to humanitarian humankind, then I think it needs to go away. How that happens is the white hats way of dealing with it appropriately. And the best way from what they're showing is that they take away the top people, and they start working their way down into the management and find out what people are there that can maintain a viable structure. I'll say structure rather than a corporation because the corporation concept is going away. The Pope found all of the corporations in the world and controlled it through the different governments that were acting this corporate Corporation, so we're acting as governments. And you have a lot of those and you have also a lot of corporations that are are making decisions and changing the way things go and those people are either going to be part of us as we move then to the third dimension, or excuse me, the fifth the golden age of mankind. If they're going to be with us, then good. If they're not, then I think that we need to dispense with them. I have full and complete faith in the Alliance plan for us to all go ahead and ascend into the fifth dimension with our Mother Earth. I believe that that's going to take place. Now, here I am sitting here and thinking, How in the hell is that gonna happen? But I know it is because I know that we're dealing with God and with a God, all things are possible. So that's the way I look at it. Well, does that answer your question? Oh, yes, it does. I think that, you know, a lot of the corporate structure, a lot of the words and things that we use that are part of our vernacular. And it's all over the world, because it was basically the same. It's the same system that, you know, put us into that, that kind of that box. But the same basic language, you know, how we, how we refer to things in the world, all those Words have meanings. So, yeah, it's just going to be that's

going to be a huge wake up. For a lot of people, when, when that goes away, they're gonna, you know, what do we do? What are we doing now? You know, so anyway, I appreciate your thoughts on that.

R Ron Giles 46:39

Yeah, I think we're gonna go through some transition well, and when things go away, then they'll go away, and we won't miss them. New things will be taking over. And those are the things that we really enjoy and love and, and we'll learn to love and learn to appreciate in our lives as a difference from what was there before. So I think that we're open for some really, really good things to take place. Good talk.

S Speaker 47:09

Good talking to you, too. Yes, I, I believe that as well. Thank you.

R Ron Giles 47:14

You're certainly welcome.

C Carrie 47:15

Here, you I'm sorry, I know I'm not pronouncing your name properly from Ireland, if you want to open up your mic, your next.

S Speaker 47:25

Hi, Carrie. Hi, there. Hello. You know, I've had my hand up a number of times, and for some reason, I kept getting bumped. Or maybe it just turned off. And listening to everything that has been discussed. So far, I could feel such a powerful alignment rising through a lot of the blocks and the pains that have come forth through all the questions tonight, which I would personally like to say has been tremendously helpful for me. So thank you very much for that. And the alignment that is happening, just to mention, there's a planetary alignment actually happening tomorrow, which is hugely significant. And the comets, I believe maybe is what you're referring to, about the energies from the sun, that are going to come towards us, according to the astrology technology is currently happening. And for the next few days, maybe more than that, what do we really know when it comes to the cosmos? And I just wanted to make that clear. And hopefully, that helps other people. And thank you again,

R Ron Giles 48:58

you're certainly welcome. And it's a good thing to comprehend, and allow to be true. When when we say when we look at things, Oh, that's good, I'm going to allow that to be true for me. Until, until for some reason is not right, I'm going to allow the good things to be true for me and

believe them as part of the creation process. I just allow it to be true. And then I find the things that are necessary, the thought processes that come to support that and if they come then I know that I'm supporting a really good thing. So I appreciate what you're saying and allowing whatever energies to come into us that are designed from our father to be able to help us in our I'll say evolution into the fifth dimension and and Yeah, the ascension process. We just know that like, God loves us, we just know that. So let that be true. There's just let it be true and, and we're gonna work things through, because He loves us and won't do things that are going to stop us from accomplishing what we came here to do. So,

S

Speaker 50:21

yeah, yeah. Thank you for your comments, my dear. Thank you, Ron. Thank you.

C

Carrie 50:31

We take the next question. Just want to let you guys know, we never bump you off on our end if your hand is up, but telegram is glitchy, as you've probably discovered one point or another. So if you get bumped and you have a question, just raise your hand again. And we'll we'll get to you as soon as we can. So right now we peacemaker, John and love for humanity lined up and so peacemaker, your turn.

S

Speaker 51:01

So good evening, everybody. Good evening, Ron. Greetings from Portugal. And yeah, Portugal. It's like the two guys in the two, two, not two guys. Two humanitarians in the in the forum map, signed up. So we have a lot of challenge. Getting away. I just want to say thank you for all the work you've done, Ron, and give you a suggestion, if I may. I was listening to your q&a from the 14th. And stopping upon the the talk about the RSS platform, back office. And the talk was about the anonymous unity, about showing the our back office to someone else showing that the platform works and the program works. I was wondering, did you consider high the balance button so that we can show the back office show how all things work without showing the balance of our benefactors accounts,

R

Ron Giles 52:16

I think that it's appropriate for us to have a video that shows the functioning of the RSS platform, that can be embedded in the in two places two different places, one would be the guests and have a chance to take a look at it. And then once they're already in, and that's then it can be in their back office, and a list of videos that they can watch. Because the first time they they go, they can always go back to the guest portion of it. But there's videos in that will be in there so that people can look at them and be refreshed in their minds about how things are going and how things are supposed to be running. And then they might get involved in relate, I got this person to end and I want to see if I got credit for it. So I want two people. And that gives me another penny. And so I got this person and oh, look, I got this person. And then that comes in and and now I've got another person and where's that or Penny? And where's that show. And all of that information is going to be in that back office. So we will have the

videos that will give the information about how it's running. They'll see in the video, how it's downloading 10 cents per minute, and then do an hour and then we show them maybe 24 hours, there's \$144 in there. This is the kind of thing that creates really good belief in what we're trying to accomplish. And I think that's why we're going to it's not going to be a cakewalk is we're going to have to address it properly. But it's not a hard thing to understand. It's just really hard to understand. It's hard to believe, but it's easy to understand. Once you see it happen.

S

Speaker 54:24

I was referring to the to the part of conversation on the q&a about wealth. The question of someone was do we as Zim benefactors, show our balance? And I was just suggesting to put a hide balance. If there is the need to show our back office to someone when we are signing up. There's 50 million people that have signed up. There's probably still only eight or 10 that were signed up by the benefactors because it goes so far asked, benefactors won't have to promote, promote it at all, I say, open up in different areas that you want. But spend time doing your CAC programs, because that's where your real value is going to be shown. The RSS program will grow by itself, it'll have a life of its own. It'll, it there's nothing really that needs to happen with that because it will happen regardless of what we do. Or, you know, we might think we have a big job ahead of us to get everybody saying, no, no, you're gonna find that you can sit back and relax and watch that thing happen. It's like a prairie fire. And it will be. It will. Yeah. It's all over the hills. So thank you for your time answering. You're certainly welcome. Thank you for bringing the question. Thank you.

C

Carrie 55:59

Thank you. All right. Our last question for today goes to love for humanity. Yeah, hi, Ron, how are

S

Speaker 56:08

you? I think I'm great today. Thank you. Wonderful, wonderful. We do hope you're keeping well and giving her any heads up because it must be very trying to do what you're doing. And we are obviously very concerned because of support queue where we can. You're welcome. Question is, if those who have crypto cell just before the RFS comes in with, which would obviously render that honestly purchase script invalid? Is would there be some sort of karma incurred? or would there be some sort of refund system for honest crypto buyers? Assuming they didn't have any helpful LWS? Folks close by close? Okay, I'm not sure I'm understanding the question. Right? Those who have crypto now, if you have first comes in and they sell the crypto but they've sold it does before the QFS comes in to somebody who's paid on this money. And obviously, the QFS comes in the crypto will be valueless? Is there going to be some sort of recompense for the person who's bought it? And maybe, yes, or the past, I'll probably refer the person who sold it.

R

Ron Giles 57:27

You know I I don't know if there will be or not. The problem that I have is if they turned the

You know, I don't know if there will be or not. The problem that I have is, if they turned the quantum, or if they turned off the internet, and reconnect with the quantum internet, which has been running in parallel. What is that going to do? And this is a this is a viable question. Because what I'm saying is that the old system that supports the cryptocurrencies is going to go away, I don't know how that's going to be a damage to a lot of people. And, yeah, I'm not sure how that's going to be dealt with. Let's just see what the Alliance thinks about that situation. And, and let them solve that problem. Because I don't want damage to a lot of people. You know, we don't we don't need that. And yet, it has to go away somehow. So maybe there'll be some time limit, where people will say, you can keep it and then maybe your Kryptos will be exchanged for gold certificates? I don't know. We'll see.

S

Speaker 58:53

That would seem to be a reasonable response, certainly. What exactly following on from that, how are people who don't know any benefactors or beneficiaries going to be living when the cure phase comes in when they haven't necessarily got any funds of some sort?

R

Ron Giles 59:17

Well, I can't tell you that I can't help you with I don't know what people are going to be like. There's no There's, you know, it's going to happen for everybody at a particular point in time. It's like the last one that comes in that it's going to have a hard time finding two people to get another penny. However, those are, those are some problems that can. It's just going to happen and we'll see how that happens. But most people are going to be really very, very good. Even if they don't get anybody else to join them. They're still going to be making 20,000 US dollars, here in America, at least. And then whenever they get over where they're at their country. So it's not as if they're going to be left out. They just won't maybe have the bonuses and so forth. Get more money.

S

Speaker 1:00:10

Right. But what about the people who aren't in your factories or beneficiaries? Just a, you know, a terrifying public so to speak?

R

Ron Giles 1:00:18

It's gonna happen for the firm's. Well you know, it's, it's one of those things that I don't know about each individual. So I don't, I really don't know. There are some that are going to be ahead of time and other students come in middle and summertime in the last person, then shut the door, please. Turn the lights. Still make plenty of good for everybody.

S

Speaker 1:00:52

That's great. So thanks. Thanks. For all you're doing. You're

R Ron Giles 1:00:57

certainly welcome, my friend. And with that, let's, let's say goodbye for now. And Carrie, Are we finished?

C Carrie 1:01:06

Yes. Yes, we are. And on behalf of Dom and myself and everybody here, we all want to thank you so much for your gifts and your wisdom and information and time.

R Ron Giles 1:01:19

Well, it's my privilege to be in the presence of such wonderful people. And I'm grateful for that. And it makes me happy. It just I do these and I when I'm finished. I'm not tired. I'm just happy.

C Carrie 1:01:35

Yeah, it's uplifting for all of us. We'll be back again next Tuesday at 2:30. Eastern. I'm not sure what the topic is yet, but it'll be a good one. So we look forward to everybody joining us then. Meantime, have a great rest of your day everybody.

S Speaker 1:01:51

Thank you all love you. And bye bye for now.
