

# August 30th - NRELS Telegram Part 2

Thu, 9/15 10:52PM 1:09:13

## SUMMARY KEYWORDS

people, home, money, reservations, problems, question, listing, buy, property, ron, kinds, beneficiary, cac, open, mic, house, control, build, area, country

## SPEAKERS

Ron Giles, Speaker, Carrie, Dominick

---

**C** Carrie 00:00  
Go to Renee. Oops, wait a minute. There we go, Renee, your mic is open. I just wanted to add, I've already talked to her real estate friend.

**S** Speaker 00:11  
And she's ready, willing and able to help. So I just wanted to find out what else we had to do. Have a great day. Good comment.

**C** Carrie 00:21  
John, your mic is open.

**S** Speaker 00:25  
Hello, everybody. Yeah. Hi. So, um, I had been a realtor for having I've had my license for 40, some years, last 10 years, and it makes me sound younger. And, and the, but I was thinking, why don't we just partner with the National Association of Realtors, the dues, the fees, the realtors pay so much money anyway. Anyway, have I? Had you ever thought about doing that?

**R** Ron Giles 00:59  
It's a very good question. A very good question. There's a number of trains of thought. And this is this is one that just popped into my mind. If you have somebody that already is doing something that you want done, or the type of things you want done, is it better to talk to those people and have them do your stuff? Or is it better for you to find somebody who is has some skills and is capable, and you train them to do things the way you want them to do it. And

that's the difference. The the real estate brokerage and the real estate. listing services are different than what we want. Now, I'm not sure that there's a problem with all that I would love to hear somebody promote, who gets involved in our business in the loved ones in the national real estate listing service, or is familiar with it, and, and teaches them about what we're doing and see if there's some commonality and what we are doing to the point that we don't have to set up so many different locations and can use see our listings, our listing service will be national. And, and each individual state has their own real estate listing service. And that also accommodates local and regional areas. So that's a good conversation that has not happened yet. And I wouldn't preclude I wouldn't say anything that would show that I'm against that. I'm open to it. But we'll have to see the pros and the cons with that.

**S** Speaker 02:59

The Commission's that we're gonna be paying out are a lot more than they get now. So I'm sure they're gonna there's gonna be they're gonna be watching us. So, anyway. Well, Ron, thanks.

**R** Ron Giles 03:12

Yeah, I think just a comment before you close. When I took a second look at the commission structure with five, five cents per that, you know, a minimum of five cents for 250,000. And then it goes up from there with 50,005 cents for every 50,000. From then on, I'm realizing that that's kind of over commission structure. And we'll we'll take a look at that again, because I wanted to be Howard, I wanted to be aggressive. And yet I don't want it to be overwhelming to the point where everybody in the world wants to be a real estate agent because of the money that they're making.

**S** Speaker 04:04

Especially here in California, and that I mean, it was exaggerated, but I put my name on the list, by the way, for realtors, free to talk to or form that we filled out. So anyway, love you. Thank you so much. You're welcome. If I'm

**C** Carrie 04:26

the first person first time person, all good eggs. Your mic is open and we're so happy to have you here. All good eggs. If you just click the button at the bottom of the window, it will open the mic on your side. There you go.

**S** Speaker 04:41

Hi. Hi, Ron. I listened to you. My drive to work.

**R** Ron Giles 04:46

Oh, well. It's nice to having a conversation with you. No.

S

Speaker 04:50

Thank you. I have a question pertaining to NRELS. The home kits and plans that those that A group of people I saw in the past Sears had home kits, you probably know about 84 lumber, and also container homes. How do we, how do we accommodate people like that? Does it fall under the NRL s program still?

R

Ron Giles 05:16

Well, it a mobile home can Yes, I don't have a problem with it, if it meets the standards of the local areas that they are in. It's a good question to ask, as we're moving forward. How do we deal with mobile homes? With a foundation, you know, they build it somewhere else and then pull it out of the foundation. So it's permanent. And not not a mobile home as in it still has its wheels and its foundation longer beams or whatever?

i

05:54

I'll run? Yeah, I, I was more thinking that somebody would buy a lot, like 20 acres or so. And if they have it in them, like the contractor normally would build homes for other people. Why Why not for himself. But 84 lumber would be like they sell plans, actual house plans. And all they need to do is put down like a foundation. But the house isn't built yet. So that's kind of what what I'm thinking of having it permanent.

R

Ron Giles 06:31

Well, I like that idea. I really do. That's new homes. And being built over there and then build the foundation here and bring the home in and put it on the foundation is a really, really, in my opinion, is a really, really good idea. Some of those homes are just beautiful. And they're not low class are not cheap, as in the manufacturing. Things that they use are not cheap. They're built for, to last. Now, if you've ever been involved with plumbing or anything, you put in a new sink, and you have all that fancy Chrome and whatever. After a year or two, or maybe three or four or five, it all rots away. And that's just because they choose cheap stuff. But if we put in good stuff, then it will last longer. And then if it gets bad to where the point you don't like it, then you go buy a new sink or the drainage system. So but I do like them. I do like your idea. I think is cheesy isn't building new homes a really good idea for this program? Yes, I believe it is.

i

07:56

So Ron, so how will we find that we would give them we still did a 20% down for them?

R

Ron Giles 08:07

Well, 20% down No. It would, it would have to be a package deal. And then because it's a new

well, 20% down no. it would, it would have to be a package deal. And then because it's a new home, then there's no lot not a lot of remodeling unless you wanted to put in landscape and that sort of thing, which is, it's fine. And I think is essential. You know, if you you're living in a place that doesn't have landscape doesn't have lawn and things that you really enjoy. And it's hard to make that a really enjoyable home for yourself and for your family. So I would I would be open to see how that can work. And that seems like a package deal that you can finance. That is this this in this and then then the buyer can come in and make their idea get their ideas of what they want in their home. With the colors and the bids over here and the kitchens over there and we have a family, all of that sort of stuff are things that a buyer would like to be able to have a degree of control over. Floor plans. What a wonderful thing, especially for new people who don't really understand everything but would like to have things that are new so that their plumbing doesn't get messed up in a short period of time. I think it has some good merit to be honest with you, I think so. And I'd like to see a packages of homes like that, where you buy the house on the foundation sort of thing and then let the people do the work and get the pound and get it shipped to the foundation and put up and and then there's a final price that you pay for all that and that's where you can make Get 20% Good 20% discount and go from there. Sure. Good job. I like that. And thought of it before polite like that.

C

Carrie 10:18

All right, thank you. Thanks. Yeah, we have a couple more down here we have Luna, Luna, your mic is thin.

S

Speaker 10:28

Hi, Ron. Hi, Carrie. Hi, everybody else. first time caller a tiny bit nervous. But so what all good eggs was just speaking about sparked something within me because one of my personal projects is to build housing on Native American reservations. And I just wondering how the NRELS would fit in with that.

R

Ron Giles 11:00

I think that we would work with that just beautifully. Just similar to what was good eggs were there, I think that that would be a perfect thing for, for American, Native Americans to get involved with. They, they deserve the best that we have to offer in society. And let's just love them and appreciate them and bring them into what we can do and accomplish for them. And so the NRA LS shouldn't be involved in that sort of thing. It depends on who's local, and who the managing director is. And if you can get that CAC put together and get out there and get these people have a fair amount of money. And you know, when they live on the plan, or the reservations, they don't have a lot of need for money, and they don't have opportunities to make a lot of money. But when you come up with \$28,000, that has no reservations to and no restrictions, then these people can either get drunk on all they get, or they can start using money appropriately, and get into houses and do things there. People in the reservation can get involved in that to make to as a job as an employment contract. To get the people to Okay, here's a piece of land, what do you do to the land to make it work, because have the sewer in the water and you've got to have the roads, you got to have all of that sort of stuff. Those are the things that the city is normally bound to do and will charge you for it? Well, they always make a lot of extra money on it. But in maybe the corporation's who are now called

governments in local areas are not going to be around. So we'll see how that goes. But I believe that there's an opening for us to fill with Native American people, and Native American or indigenous people all over the world, for that matter. Let's just whatever they feel that they would like, we won't force it on them. Some people like you know, in Australia going on, walk back and you walk about and you come back a year or two later. Those are the kinds of this what those people do. And yet to put them in a house in a permanent residence, it might not be what they want to do. So you do things according to what they like. And let's just make everything available to them so that they can have a choice. They want to live in their own communities instead of having to go into a city where they may not be long, and buy cheap houses and are barely making enough money to live off. Thanks for going to church change because we can, we can give them the money that they need to do really have a life of their own, that brand new life of their own. But they may not be interested in all that. It comes with a certain amount of problems. If you don't know how to use money and work with money, you just have it and you want to get rid of it by drinking and so forth. Like I said before, but there's that's that's not a reason to stop. It's not a reason there's a percentage of people who will do that. But it's not a reason for the other 95 and 97% of the people to so it's for everybody that wants to do to improve their life and we're here to help Um, do that in any way that we can. I hope that helps.

S

Speaker 15:05

It does. Um, the, the main reservation that I was looking at I have been looking at for a number of years is Pine Ridge. And it's in a different state. I'm an Idaho. And so I think in the beginning of this little conversation, you mentioned getting involved with CAC director in that area. I, I was looking last night at the map, and I don't see anyone there. So after I established my first CAC, here, would it be beneficial maybe to move or to start another one in that area?

R

Ron Giles 15:42

I believe that would be start one and get it running and figure out how it runs and how you can help it and you're going to learn a lot in the first one that what you learn in the first one, there's something that you can use, you're never going to stop learning. But it's something that you can use to reproduce in another location. And it sounds like that's what you'd like to do. And I think that there's wisdom in what you want to do. I really do. Thank you.

S

Speaker 16:11

I really appreciate it. I appreciate all the admins. I appreciate you bringing Q on I've been listening nonstop to try to catch up with the love won society videos. And I've been listening to Q and Antonio and I just feel so blessed. And I just want to thank you for taking on the stewardship. Ron, you're you're an amazing individual. And I love you

R

Ron Giles 16:38

all thank you very much. I appreciate those kind words. We're doing it for people like you. That's why we're doing it for you right here. Russia.

C

Carrie 16:51

Thank you so much. Have a wonderful day, everybody. Carlin, your mic is now open heartland.

S

Speaker 17:07

Good. First of all, I want to respond to laluna by five, five. First of all, Pine Ridge is in South Dakota in under three hours east of there and I am on that CACmap. The thing I'm curious about is how NESARA is going to affect the reservations because you know, reservations is on federal land. And my question is in the top of the top five poorest counties in the United States, four of them are in South Dakota, all on reservations. Okay. And, you know, I drive through I am a truck driver, and I drive through them a lot. And it's just it's so sad. And people don't realize is that. I mean, if you want to see socialism at its finest is go to a reservation. Because, you know, a lot of these natives would get free housing. They get free health care. But yeah, they're the poorest people in the country. And they and they do they need a lot of help. And how, how do you think the NESARA is gonna affect the Indian reservations? Do you have any idea at all?

R

Ron Giles 18:36

Yeah, I do. The Cabal, the federal government, the Nash, the USA Inc. owns everything. Okay. They did it that way for closed on America. And they think they own the people and the land. They're fraudulent. Okay, so they think they own that reservation. When the shark comes along, then all of those people go away. I don't know how they're going to resolve the ownership of the properties that the reservations are on. But I think it's a priority. And I think that it will end up that the reservations and the people and the American Indians and so forth. Whatever you want. I should the American natives will finally get a chance to be who they really are. We have destroyed their lives. Yes, we have taken away their children and put them in schools and taught them all kinds of garbage that the cabal wants us to teach everybody. And so there's things that are going to take place, how that's going to resolve the ownership. reservations, I don't know yet. But that is something that's very critical to accomplish if the SAR is going to really be effective. Now oftentimes it takes money to do that. And guess who has the money to do that? As humanitarians, humanitarians, yeah, and we get a chance to get involved, and we will do a really, really good job. Because we will have a counselor who comes from the other side of the veil and has knowledge about everything. And those kinds of people will really be of great value to all of us. So don't be shy about things because they're going to be made better.

S

Speaker 20:53

Yeah, that is gonna be my, you know, there's seven reservations in South Dakota, and I live not too far from four of them. And, you know, after the RV and, and get on with the LWS, I mean, I am really going to be dedicated to helping them out as much as possible.

R

Ron Giles 21:12

Well, I bless your heart for that. My friend, way to go.

S

Speaker 21:18

Thank you. Thank you for your time.

R

Ron Giles 21:20

Certainly welcome. Thank you. Thank you very much.

C

Carrie 21:27

Okay, we're gonna go to Iraq. Next. I rod, your mics open?

S

Speaker 21:31

Thank you. Thank you. Well, I have a question when it comes to all real estate brokers, and they have the real estate listing services. So let's assume that I purchased a big piece of property that's already been developed from the developer, and have all these homes. Now, there's the real estate services from the brokers that they have normally are going to be posting that property on their site, because if you if they're not beneficiaries of we're still allowed to sell the homes to people are not beneficiaries, or should we hold them off to sum up to the beneficiaries to give them a 20% discount on the retail value of the property?

R

Ron Giles 22:14

Every person in in the world should be a beneficiary. If they're not then make them a beneficiary.

S

Speaker 22:23

Okay, so that means I could tell the real estate broker to sign them up and make them on a fishery. So they could try to purchase the home.

R

Ron Giles 22:30

Yeah, who gets the bonus on those new signups? Whoever signs them up?

S

Speaker 22:38

Then the real estate broker could sign them up also. Yeah. So he agents. Okay, now when it comes to one, so you answer the question, when it comes to the gentleman that was asking the

question about the a lot that he wanted to put trailers or something in there. And he's whining about fixing the area. Now, if they get a 20 acre lot, and they have a number of the sites to display something called homeowners association. So that's a nonprofit organization. So all the locks, all houses are the tools that are in there, they all get involved and support the homeless situation with a beneficiary account. That means they're being paid to take care of the property. So the only one who doesn't have the care of the property, the homeless situation is being paid because they have beneficiary, because their nonprofit might pay to say that,

R

Ron Giles 23:31

yeah, that can work out. All homeowners associations that are now constituted, I believe, are not in the best interest of most people. Because if people get into a homeowner into positions of authority, and the homeowners association, and some of those people really enjoy having control over other people, and it is it is normal for them to exercise that control if it is given to them. And so I have problems with homeowners associations who have the ability to control people's lives where they live. I don't like that. I don't think anybody should have a homeowner's association that has controlled now if you have a homeowner's association, if you have a common areas that they have responsibilities in certain areas and snow removal and all those kinds of things and garbage pickup, those are the kinds of things that are available. And so there's a service there that can be rendered. But I do not want to have homes in a homeowner situation where they have control over what the homeowner, the homeowner owns themselves.

S

Speaker 25:01

Why agree? I agree. But what I would say is that if you have almost a position and you have like a chairman or vice president, and that money is going to be used to take care of the property fully, because every year, you want to probably hold somebody in from the, from the dump and from the development that's there. So they never have control, because the people that own the property have control because they've been funded as a nonprofit organization to take care of it because they're getting money from the QFS. might send that right.

R

Ron Giles 25:33

Yeah, there's Yeah, RSS. Yeah. Yeah. I think you're right. I wrote. I think there's some things that can work out there. Yeah. But But homeownership is homeowners associations are oftentimes not in the best interest of the people. Sometimes they're really good. And sometimes you'd get the wrong people in there. People who are aggressive, and that have no problems, and having exercising control over other people. And they make decisions because they can do it. And that's where the problems come in. Every individual in a homeowner's association area has their own rights that cannot be.

S

Speaker 26:21

I agree. I agree. So yeah.

R

Ron Giles 26:27

certain commonality that you have, and then, you know, have nice homes and that sort of stuff. Yeah. But we'll, we'll see how that works out. But I, if I were just, what do you think about home owners associate? I'd say I don't like them. I don't

S

Speaker 26:44

like them either. But yeah, but if we're paying them, if they're signing up on the nonprofit, and all the homeowners are signing in to the profit, that means they're getting money because the same day. Right. So they've got to do that.

R

Ron Giles 26:59

It's not the homeowners, it's the association and what they have over the owners that I am opposed to

S

Speaker 27:10

that can be replaced with a choice. So another question. Another question. I

D

Dominick 27:16

gotta leave it for some other people. Cut out a big list of people. So the problem appreciate you. Thanks for

C

Carrie 27:27

All right, thank you go to Mrs. Mrs. Mouse. Mics open.

S

Speaker 27:32

Oh, thank you. Hi, Ron. Good afternoon. Hello, Mr. Cooper, eight and Oh, Happy Birthday on LWS the other day. So I hope you got all of our wishes. And everybody that was on the chat. I just wanted to bring up a couple things. A question. A lot of people did bring up some things that I was thinking of as well. But the most recent, yeah, HOAs seem to be very restrictive and controlling. In fact, we're looking at a property and they call them CCR, which is contract covenants and regulations, which are very, very controlling. So you know, you're not supposed to have a covenant with anybody but God. So for us, that was like a huge flag. And it's like, well, we'll just have to be creative and put up a bond or something, you know, but that was my two cents on the HOA. So my thought was about buying property, just raw land, you know, subdividing it, hiring a developer, to go ahead and do that, because you're right, we probably will not have enough homes for all of our RSS beneficiaries. So to increase the listings for the

NRELS would be one of those things to do. And then also, I think you had mentioned in one, one of your q&a before, that, using the NRELS to go and get developers that are currently you know, building and they have to worry about selling their homes. And of course, everything has gone up so much that that's something for us is, you know, managing directors or the people we hire, to have that in their bag of tricks or their to do list and to also go out and do it approach it that way. So I was just wanting to see what your thoughts were on that.

R

Ron Giles 29:42

Well, I think that the CAC program can really help out with that. The brokers themselves in the NRELS have a have a job of you know, taking care of the purchases and so forth. So everybody gets a chance to you know, they don't need to wear two or three or four different enhance at a time. And so you can have a director and assistant directors in the CAC in that area, get involved. Now, if I was a Amalthea, Managing Director, and if I want to have new houses in certain locations, then I developed I talk to a developer, a developer. And this is this is the terms and conditions will pay for everything. And you'll do all the work. And when we the house is finished, we'll have an agreed price that will pay for it. So you don't have to worry, as a developer about selling your homes, they're already pre sold. They're already pre purchased. So you're going to get what you as a developer, you're going to get what you get out of a normal home, you know, the price and so forth. So that's always going to be helpful for them. But it does take a contract. And you do have to abide by that he has to or she will ever the developer is has to be signed those contracts and and do the development and you buy the houses afterwards salad predetermined price, which could be thrown over to some of the people who appraised different homes and come up with the best price for that home. And then that's the price that you pay, that's the price that we buy from and then we sell it with a 20% discount.

S

Speaker 31:37

Great, um, in reference to the neighborhoods that might be a little downtrodden or neglected, that's something we could all probably set our sights on. Once we do get funded, we're gonna have so much money in that first quarter. And we're just kind of getting our legs under us and so many things to do. But it could be something that we go out and buy a lot of homes and start that process while we're developing some other things so that we could get some homes ready to have on our list in our own CAC. So I just thought I would mention that as well, that I've been thinking of, because we do have some areas around us in our town, and it's quite large, 75,000 people, because it's San Marino County, so lots of property that might need a little help. But I just wanted to add that and thank you so much. We're just really enjoying being part of the group and have love, honor and respect for you and your whole team. So thank you so much. Appreciate that. Thank you have a great day. Okay.

C

Carrie 32:52

Lyra ally right here. Mic is open.

S

Speaker 32:56

Greetings, everybody lightens love tall. Yes, I just have two questions, I'll try to make it quick. First one is an issue that I see arising because you know, different parts of the world have different problems. For example, here in Eastern Europe, and in Bulgaria, in particular, a lot of villages have been depopulated. Everybody has been, have been pushed to the bigger cities. For example, we are a nation of six and a half million small nation, and two and a half million live in Sofia, the capital city. And there are hundreds and 1000s of villages, which are deserted for years. So okay, who let's say we have all the money in the world. So we can buy properties, we can buy land and all these villages and houses. What will need will be workers and developers. And I see an issue here arising that if we start implementing the process program, and people suddenly start receiving 24 28,000 units of money, whatever currency and they might, let's say 1000 a month. I see a lot of people getting crazy and not be willing to work and especially unpleasant jobs like how to avoid HVAC and plumbing and rebuilding houses, construction works or old works. So how do you see this issue and problems being canceled? I had similar concerns about the RSS program. And I know we will have a lot of new technologies but still we'll need to build them we will need factories we will need workers we will need all of that. So this my first question, what's your thoughts on that? Thank you. Okay.

R

Ron Giles 35:08

We are going to have those kinds of problems that have been caused by the Cabal and their concept of they want people all living in the cities, they don't want people outside and can't control them out there. So they move everybody into the city by shutting down the communities that are created where people live. And they've done this with the, with all kinds of different stuff like the pandemic and all of that garbage. So there's, you know, I look at that as a prime place to really get involved in the creation of renewing resources that are already there. And yes, we're going to have some technologies from the Alliance, and we're from Tahiti, there will be building new buildings and new ways of building we're coming into the reality that the hemp products will be available hemp is, is stronger than steel, and you certain ways of using it, you can create wood with hemp, you can create clothes and create most, a lot of things. That's why they didn't want hemp around. And so all of that has is going away. Those people in your country and every country in the world to become GDPR compliant, have to get rid of their own their government as it now exists. Every person in that government has to resign. Every person in who resigns has to be replaced by an election. And the election is by the people, there will be no agencies. I'm in saying that out loud. But I'm not sure that it's actually true. But I believe it to be true. agencies create bureaucrats who have the power to have control over people, they're not elected to do that. And any organization or government, who creates these e pas and all of the garbage that that is thrown at us, they're going to go away, they're not going to be with us anymore. Because we don't need those kinds of people in our golden age of mankind. They will not be able to participate with us, when the time comes for the event, they will be terminated or taken to some other location. And then they can do to one another, what they're trying to do die. I don't care what they do what God does. It's his job, not ours. But what we're going to have is freedom from all of the tyranny that's going on right now. So when you look at what you've got going on there, and you have all of these different, I see that as a gold, I think that is a wheat field already for harvest. And you who have the money can go in there and really do a good job. Yes, you can have to find people, yes, you're going to do this, and you're going to have to do that. It's doable. That's the thing that you need to understand. It's doable. And you're the one that's chosen to do it. Take that on as a responsibility for your for your country. You will have all the support you need from the NESARA government. So we'll be replacing those people who are doing things against the will of the

people and right now. There will be a transition Yes. And our money is not going to just buy us through the transition, we have to work it. We have to do things we have to let it grow naturally to some extent. But there are I've heard of different technologies for building homes and so forth that are very quick and can happen very shortly without using a lot of wood and things like that, that you have to cut down tree for. There's things that are going to take place and keep your eye keep your eyes open and your ears to the ground. Whatever it is it's necessary to find out what's coming down the line. And you'll have a counselor who will help you with what you need to do in your own country. They'll speak your language, so do everything that you feel is appropriate for you. And that's the important thing is that you will get the help that you need. And so you just Set your sail, rig your boat up for a sail and you set your sail and you're the one that's in charge. You might be out there on the water, but you're the one that's pointing in wherever you want it to go. You're the one in charge. You're the captain of your ship. And humanitarians need to be the ones in charge. And they are in charge, because there's nobody else going to be bossing them around. Again, a transition, but the end result is what I'm talking about. Did you have a second question? Very quickly.

S

Speaker 40:35

Yes. Thank you. So we we just have to find the holistic approach to things. Yes. The second question is, do you have a feeling of the RV happening soon? Because right now, in Europe, it's, it's really bad. I mean, the inflation prices and everything, they are threatening to stop our electricity. And I know it's it's a battle, it's a war. But do you have a feeling happening? Anytime this here, any chance? Thank you, and bless you.

R

Ron Giles 41:12

Thank you. There are things that are happening behind the scenes below the radar be tore below our understanding, that are moving things in a miraculous way. But we don't hear about it because the the white hats who are in control of these things, don't want us to know about it until we get a lot of minds changed about who's in charge. And we don't want any problems as as far as wars, you know, civil wars within our countries. And we don't want those kinds of actions to be involved. But things will change. And the things that are already being done will continue to be done. And every country when just sorry, is announced, excuse me within the revenue sharing solutions program. Did I say that wrong? Yeah, I did. When the when the redemption appointments happen, and we get our funds. It won't happen until we're safe with our fans. We won't happen until we're safe with our fans. So the fans in us have to be safe. That is the primary reason for what's going on now. Yes, there's people dying. There's people all over the world who are having some major, major problems. And yet, it's not going to happen because you can kill a lot of people off by doing stuff that's not appropriate at the wrong time. And good humanitarians might be the ones that get killed in doing that. So the alliance will not allow the redemption appointments that take place until it is safe for us to do so. There's a lot of reasons to hurry it, but they do not take precedence over the safety and security of the civilizations that we have. So do I know when they have no clue? I just know we got a hell of a lot of stuff to do for love won society to get it ready for the redemption appointment. And I'm hoping to get our funds and so forth in place for that. I hope that helps. You there, Kenny.

C

Carrie 43:44

No one wanted to come in. There he is.

D

Dominick 43:47

Yeah. Hey, Ron, just wanted to quick comment on your your thought about the question your IRA had. And this is just a testimonial for me. I've been involved with a group in the United States called Habitat for Humanity. If you've heard of them, what they do is they build houses for people to move into who couldn't couldn't normally afford to do it. I was asked one time to volunteer and do one home. I'm now on my 10th. And I'm doing it because I want to do it. I doing it because I love to do it. And the feeling of joy that it gives you after you do it allows me to have the opportunity to do more. And I think that's what's going to happen here. Once we've the restrictions that we've been enslaved with have been pulled away from us. And people start to feel like they can breathe again. People are going to go out in droves to help and support and work because they'll love to do it. They won't have that restriction any longer of enslavement. So I do it as a testimonial for me and I enjoy I enjoy the heck out of it. And I would do it again if someone were to ask me.

R

Ron Giles 44:57

Well, you couple that with the fact that the earth is going to be liquid with funds. And there's nothing else to stop us except for restrictions. And once they're gone, just see what mankind is going to do with the funds that we have, and the things that we have in mind. And we're gonna get a lot of technologies from offworld people, and we're gonna have a lot of fun with what we do. And everybody gets to have a home and everybody gets to have fun with the money that they get. Everybody will be liquid. And money won't be important, like it is now. Because you'll have all you need, and more. So thank you. I appreciate that.

C

Carrie 45:44

All right, let's go 10 minutes,

R

Ron Giles 45:47

let's, let's move on or elsewhere. We'll never get to anything. So if you can just keep it down to three questions or three people. I would appreciate that.

C

Carrie 45:57

Okeydoke. All right. So we're up to the challenges that are solved with the NRELS Eliminating the lack of funding money to offer loans for homes, fed rates on homes will no longer be a concern. It reduces or eliminates foreclosures, and addresses people losing homes due to financial problems.

R

Ron Giles 46:01

R

Ron Giles 46:21

Yeah, these are, these are really good things. And you know, most of what you just read the four things, there are part of what we're going to be so we will eliminate the funding money finding money, to offer loans to for homes, we'll have the money, we'll have it ourselves. And we don't have to look for fed rates on the homes no longer concerned, the Fed has nothing to do with what we're going to be doing. The Fed is going to be gone anyway. And reduces if if not eliminates foreclosure, it does completely eliminate foreclosure for any home that is sold to the real estate listing service, or real estate listing service and addresses people losing homes due to financial problems. That's going to be a thing of the past. That'll go away with the Cabal and pack their bags and leave. John, next was there are there any questions about that?

C

Carrie 47:24

Well, how about if we just finished the last little thing on this page? And then we'll open it up back up for questions. Sounds good. Okay, so purchasing homes and other real estate procedures established the price of a home and property purchase price plus improvements. And then the last piece is offered a purchase, which must go through a licensed real estate agent associated with a contracted real estate broker.

R

Ron Giles 47:55

Hey, go, Okay. Well, purchasing home as a real estate, we established the price of the home through the multiple through the sale of properties. And the appraiser can come in and figure out what has been sold in that area and come up with a price for that home. We don't mark we don't bargain. We don't need to bargain. We pay the retail price that is that is on the listing service. We don't go in there and say well, we'll give you \$5,000 less or \$25,000 less and just to get your home's Yeah, that's garbage. We're not doing that. We don't have to do that. Why? If we go back to the 1.25 quintillion per quarter, what are you going to do with that money? You throw it into society, working into society, we don't care what the price is, as long as it is, it falls within the parameters so that the markets don't run away from us. We don't want that to happen either. So we that's why we do the sales are the appraisers through the sales listing, appraisal sales. That's how we list our homes and that's how we buy them. So we'll pay that price. Okay offers to purchase by school and licensed real estate associate with a contracted real estate broker. I don't know of any country or well I don't know about other countries anyway, but I don't know of any state or anybody that has that can give a that has the ability to give let people have a commission for the sale of a home if they do not have a license to do so. So that has to go through a listing has to go through the Through the broker, AND, OR, AND or his agents, and they're the ones who will go out, buy the houses and will be the ones to resell it in their listing service. And they will get their profits and so forth. So that's the way that I look at it. Are there any questions?

C

Carrie 50:22

Yeah, we do have a few hands up, we're gonna go to nNM next. You just need to push the button, the large button at the bottom of the window, and it'll open your mic on your side. All right, we will come back to you. And let's go to sissy. Sissy, your mic is open.

S

Speaker 50:46

So thank you so much, my regular open one, I must tell you just really, I know you've listened this often. But I must tell you, I love you really, from a bottom of my heart, and audio team. It's so great what you make here and all what you speak. All what is transpired in my body that you love us all. And I can't imagine how you come this ideas that you can make this this this is big program. And I'm so proud about this, that I can be with you. And I'm I'm I don't know what I tell you more. But I love you. I want to tell you.

R

Ron Giles 51:41

Oh, thank you, my dear, that melted my heart. I appreciate that. What a wonderful kind words that you have spoken to me. Thank you. Thank you dare.

C

Carrie 51:54

Lee, your mic is open. Lee?

S

Speaker 51:57

Hi. I have a question that someone who's going to be one of my directors brought up a bow you have a couple that have their own RSS accounts. And now and they want to buy a home, traditionally, they'd go into a bank and enter a debt together and sign closing papers with this system, whose account is the download for the house can come out of the husbands or the wives, or both? And then her as the question was because this is her personal situation now, what if they get divorced, then what would happen? Have these kinds of things been asked her thought of

R

Ron Giles 52:36

yet? Well, we can we can start a program, but we can't keep people together. If they don't want to be married. Those are the kinds of things that we have no control over, and would not want to have control over. That requires judgment, and I won't do that. So we present we present the program, and people can buy the house, do what they need to do. And, and get into it. Now we're not using banks, we have our own money, we don't need banks. So you don't have to apply for a loan or anything like that. As a managing director with a broker you can go ahead and buy the house through the broker. And then he then the whole process of getting it upgraded to where everything is above board and better than just necessary. And then that's the price that they they, they get the 20% discount from and then they they go into the real real estate and into the closing which is done by closing companies, they'll have all kinds of opportunity for like buy real insurance and all that sort of stuff. But I don't I don't really see the need for insurance, to be honest with you. Because if there was a problem with the, like a flood or something like that you've got maybe five or six managing directors in that area who just stepped forward with all kinds of money to fix things. So I'm not overly concerned. You know, if somebody buys a house and I pay for them and they are living in it and there's a flood, I'm going to remodel my house and do everything I can to fix up the neighborhood unless there's

100 year floodplain that they built on and let's get them into a new homes somewhere else so that they don't have to purchase it participate in those kinds of flooding experiences again. There's there's you know The buck stops here. As far as I'm concerned, I won't I won't abandon anybody who buys a home through our listing service just would not do.

S

Speaker 55:11

I believe that the point of her question that she was asked me is that does the download come out of E. coli out of both of their RSS accounts, when buying a home together, or, for example, with one individual's account be the one that's paying them a house payment, where it's coming in and going out, and not the other partner?

R

Ron Giles 55:33

Okay, they're, they're showing your show me that there's two people involved. This is one of the problems that I have with a husband and a wife going into the redemption appointment together. They have one person who's going to be in charge of the money and the other person is not really humanitarian, they may be a humanitarian, they may be a really good one. But they don't have control of the money. Usually, relationship, there's a, there's a person who is the predominant one, color, the male, macho, all that crap. There, I'm the breadwinner, so I get to make the decisions on the home. Well, that transfers over to what they do together. Very few couples can survive that kind of situation, I recommend that they separate their their Zim bonds, each of them get as K ours, and go into the appointments. And when you get offered your appointment from talk to the person on the phone, and say, my husband and I would like to go through the redemption appointment together, but have our separate Zim and our separate money for us to do our humanitarian work. Then if we want to work together, we can do so. Each of us is controlling our own money, and can participate where we want to, that makes it clean and clear. So we don't have any problems or questions like just came up? Which one does it come out? Or which one in charge of it? Who's Who's in charge of that broker? Who's who signed the contract with the broker? The broker is the one that's going to come back to the person who signed the contract and say, this is where we're doing? And those are the that's the person who will be financing. Okay.

S

Speaker 57:32

My question was regarding the people that we're selling homes to that we're helping, not us. But we are people that we're helping to buy a home, and it's a couple and they come to us, and we're helping them to buy a home and we're gonna put him in the RSS, get their accounts going, they're gonna get their 5%. And when it comes down to it, does it come? Does whose account does that get all those real estate?

D

Dominick 58:02

So solely, solely, solely? If I can jump in here, because we want to leave a little more time for some people? The answer to the question is that the download is separate from what you're thinking about might be the RSS factor. So what happens is, once the home value is

established, and a mortgage is set up, we supplement we being the managing director supplement the download for that mortgage payment, and then the people just have to stroke the check every month. So it doesn't come out of their account. We supplement it as long as they're in the home. Okay, but we're gonna talk about that more detail next week.

R

Ron Giles 58:40

Yeah, there's just one point that was she was saying if there's two of them, which one of the beneficiaries does it work with. And that's a decision that the two of you have to make together. And when you make if one person says, The home is going to be mine, I'm going to I'm going to make the payments and they'll come out of my beneficiary account which will be increased to accommodate the payments. Those are things that have to be worked out between the two people that are involved. Love won society can't make decisions for you that way. We can give you suggestions but you do that yourself. Those are what people have to come they have to start communicating with each other and figure out the best way to do things there's only one person who will get the the increase in the downloads to make a payment paying make the payments on the home that they're buying. Could be the husband could be the wife and if there's a divorce involved, that gets really tricky there. So look ahead. Usually has happened as a result of no money but that's what we're eliminating possibility of that taking place I think.

C

Carrie 59:53

Okay, go to D Raven, the Raven, your mic is open. Oh, All righty, we have some interesting. Oh, there we

S

Speaker 1:00:02

go. Okay. I'm not to go backwards. But I have so many comments about the Native American community discussion. I worked at a community college in northern Minnesota and experienced that community quite in depth. And in Minnesota, we have some of the wealthiest reservations in the country. They get money upon graduation of high school, quite substantial amounts of money, and it causes problems. Each year, each family gets large portions of money from primarily from casino profits across the state. Fond du Lac Tribal and Community College and their community have a phenomenal mentorship program. They bring in professionals across the country and share things you can do to create enjoyment in your life to create and be successful in business and in your personal life and whatnot. They have many, many successes, but they have much more sad situations. And I see it as a problem like, first I think having a healing center focusing on helping people think last week, it might have been Dylon speaking of Viktor Frankl, creating hope, and a sense of being and self worth, I think is a primary step before ownership of a home for not only this, but we know people in any community that is wealthy, that may not be happy. They might be faking it, or people that don't appear to be wealthy that are the most giving or joyful people in your community. And as I was listening, I just see that, oh, boy, you know, I know a lot of people who aren't ready for homeownership, they might, they would totally enjoy it, but they're not capable of maintaining it, which I think couple people were getting to the point of, you know, knowing that the yard is taken care of when their their leaky faucets are going to be fixed. Just because they have the money doesn't

mean that they take the step to correct it. And I think like some type of interim housing, while people go through some sort of program to help them spiritually, find themselves and have the hope and see that the future is good. Before they're just given. Not not for everybody, but I see it for many people across you know, like Red Lake reservation, it's gangs, it's they they hurt each other and steal from each other. And to break that cycle is very difficult. I've communities here do so well, they have so much outreach, but it takes years to make the change.

R

Ron Giles 1:03:26

You have identified some some concerns. What we as love won society have discussed many times is home ownership videos, that help people to understand what it takes to build to live in a home. The problem is that there are going to be the successes and the failures. Like you have said, we have no control over that people will make up their minds to do what they want to do. You'll have alcoholics that take their money and and become further alcoholics and then unproductive. And yet those people are very sad and there's other people don't have much money and they're really happy. It has to do with their own spiritual nature. And something of that nature cannot be put into a video. However, there are things that are coming. There are spiritual things afoot that we don't know about yet that can actually penetrate through a person's belief systems and understanding and fix things that they not aware that there is a problem. And in that they get a level field to play on. Meaning they don't have to be kicking up hill for a goal are the enemy is kicking downhill and getting get they've always got the ball. Those are kinds of problems that we can do. To some degree can mitigate. But we'll do the best we can to educate, we have the, the wealth education, videos, and they have to go through, we have to have them available before we can launch our RSS program. So we're going to do what we possibly can to do this as much education as possible for what we are trying to accomplish. And it's, it's our responsibility as given to us from the Alliance, that these videos are made available for everybody to to view, that means that the fifth, the 18 year old came out of high school can can watch those and learn how to use money for their benefit, rather than use it to bring curses to their life. All we can do is try to do what we can't. But we're not going to force people. We're not going to force everybody to do a specific thing, like living in a community where they learn how to do they're endless, they want to make it available, there might be a lot of people that want to do it, and maybe a few that don't. And those few that don't well will suffer the consequences of it. But it is not our control. Their soul is in control of them, and will get them in the right place at the right time to complete their purpose for this earth experience. So if we take that into consideration, and make our decisions so that we can support that premise, then we have fulfilled our responsibility. And that's all we can do. So I appreciate the fact that there's gonna be problems anywhere we go. But we can solve the problems. There is a solution, but it's gonna take people.

S

Speaker 1:07:03

Thank you. I appreciate that. And your comments on that I find the Native American community to be the most spiritual that maybe some have forgotten. And when it comes back, they'll be able to share and teach us what they

R

Ron Giles 1:07:21

correct. We have destroyed their belief system. So it's got to come back to him. They're

naturally inclined towards spiritual activity. So we'll see how that goes. I wish them the best. Pray for them. Yeah. Let's do that.

C

Carrie 1:07:40

One I wanted to check in with you. We still have a few questions, but we've gone over our time. So what is your pleasure

R

Ron Giles 1:07:47

today? Well, we've already gotten about 1112 minutes over. Yeah, usually would just like to have the three questions. I would like to go ahead and questions when we put it up. Instead of having five or six or, or 10 questions. It's just let's go with three and then call it a day. Usually, and but for today, I think we've gone through quite a few. And it's been good, good conversations, but I think it's we're over for today.

C

Carrie 1:08:21

Okey doke. Well, everybody, thank you so much for being here. We will continue this next Tuesday. And this coming Friday for the Friday training will be a little bit different, in fact, quite different. We're going to have an open mic type format, where you get to share your ideas for your CACS and members can make comments or ask questions to each other about their plans for their CICs. So we invite you to join us and that is in the project's room at 2pm. Eastern Friday and then we'll be back here again next Tuesday. So thank you, Ron, so much from gonna say from the bottom of all of our hearts for once again, bringing your heart and your wisdom and information for everybody and everybody have a great rest of your day wherever you are.
