

“Teach Me to Fish” CAC#101

Full Video Here: <https://youtu.be/zwEqYTWosjg>

Project Summary: This project will assist communities in revitalization and growth through Wealth transfer, and in total citizen support

Project highlights:

- Revive and Thrive philosophy to all citizens in all communities
 - Revive: immediate help in the areas of: Shelter, Food, Health, Clothing and Shelter
 - Thrive: Following the resources that each CAC will provide
 - Provide a support of solving all that each community needs

Most important part of the CAC:

- Strategy Teams: prioritize the distribution of funds
- Directors/Assistant directors: Coordinate what projects need funding and work with the Area director to present those needs to the Strategy Teams

Teach me to Fish will join with the Love Won Society, and the Talent Loop programs to assist in the CAC implementation

As the Managing Director:

- I will serve as the coordinator of funds for each community
- My Strategy teams and Area Directors will be my point of contact
- My organization structure:
 - Citizens to assistant directors for their needs
 - Assistant directors to the directors; their project needs
 - Directors to Strategy Team; proposal of projects
 - Strategy team to Managing Director: Funds

The CAC and Connection points: Sub projects for the community based on their needs

Example of connection points:

- Housing point
- Employment/Educational point
- Financial point
- Local Government point
- Health/Wellness point
- Agricultural point

- Social/Community point
- Technology point

* Depending on population will determine how many points are needed

Connection points: 2 Examples of what they will offer: subject to change

Housing Connection point:

- LWS NRELS program implementation for new homes and condos
- Land development
- Commercial Real Estate acquisition
- Senior Citizen living
- Relocation needs

Health and Wellness connection point:

- Med Beds/ Celestial Chamber technology
- Revive and Thrive holistic center
- Meditation/ Yoga and other modalities
- Pet therapy
- Hiking/walking/spirit trails
- Conferences
- Physical/Nutritional fitness

Mobile CAC: For all communities

Traveling CAC to remote areas

CAC Central New Jersey CAC#102

Full Video Here: <https://youtu.be/T31is1b305A>

SHORT TERM GOALS

- Initiate RSS Program in local area, complement with Grants and Endowments
- Kick Start Abundance in Local Area
- Acquire Long Term Vacant Commercial Property in Forked River, NJ as Initial CAC

- Benefactor Training Ground and Debugging of LWS Software and Back Office Programs
- Offer RSS Registration, Humanitarian Triage Counter, Training, Conference Center at The CAC
- Train Benefactor and Directors For Future Expanded Operations
- Acquire Additional Vacant Properties in a Ten Mile Radius and Initiate Additional CACs
- Establish Local Government Liaison Office and Operations Within the CACs

LONG TERM GOALS

- Acquire Abandoned Complete Community College and Sports Complex in Central New Jersey
- Centralize Back Office Fiscal Monitoring and Accounting for Overwatch of NJ CAC Facilities
- Renovate and Expand Facility to Include Transitional Housing and Vocational Skills Teaching
- Develop “Humanitarian Reverse Corporation” Within The Facility
- To Undertake Strategic Society Improvements Through Planned Investments in 6 Major areas of World Societies
- Perhaps Partner with the Existing “Samaritan’s Purse” Aid and Distribution Activities
- Engage Army Corp of Engineers and Other Service Similar Functions For Rebuilding Efforts

Major Implementation Goals

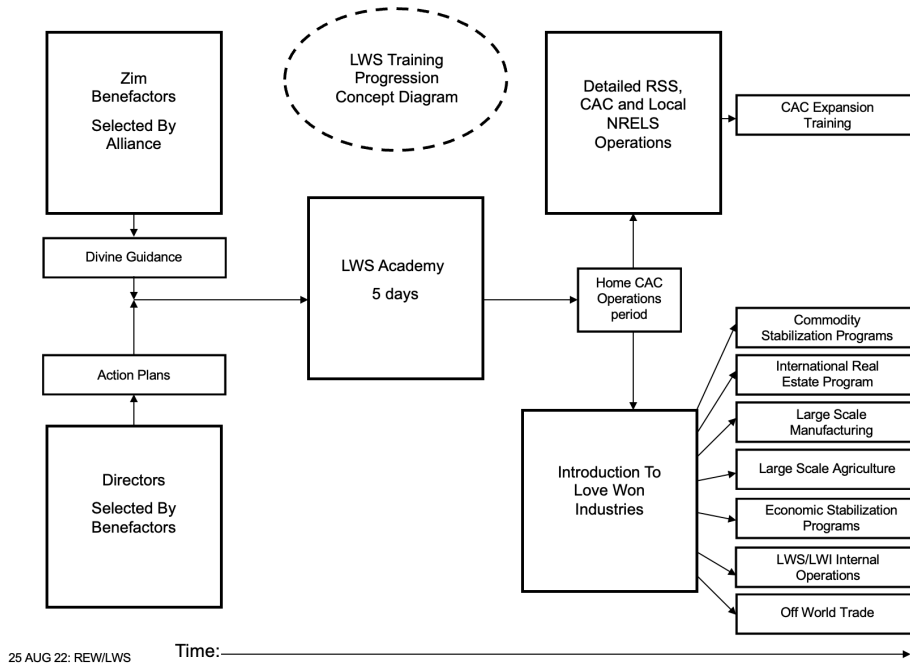

- Restoration of the Family Unit
- Affordable Housing and Feeling of Personal Security
- Improved Respect For God/Mindfulness of Others in Our Daily Lives
- Fair Work and Jobs/Improved Self Respect
- Improved Real World Education For Youth
- Re-Utilization of Retired/Veteran Skills as Mentors
- Re-Tool Public Health Away From Big Pharma and Insurance Companies
- Assist Local Government With Public Projects, While Reducing Red Tape

- Balance Importance of Science and Arts in Society
- Band Together For National, Strategic/World Projects
- Use LWS Elements to Expand Influence Worldwide
- Use Bond Account to Become Self Insuring, Eliminating Insurance Needs

PERSONAL GOALS AND PRIORITIES

- Establish Local RSS Cascade Wealth Distribution System
- Research Availability of local Community Assistance Center (CAC) in Forked River New Jersey
- Offer Employment Opportunity to a Known Excellent CAC Director Candidate
 - Begin Hiring, Training and Rotating Staff to New CAC Locations
- Quietly Begin Local Grants to Local Churches and Charities
 - Discuss RSS Program and Provide Cards in The Process
- Ascertain Status of Financial Service Centers and Couple to CAC if Possible
 - Install a Service Center in The CAC
- Seek Out Other Local Benefactors Through Alliance/LWS Channels
 - To Coordinate Activities For Best Community Effectiveness
- Begin Long Term Development of “Humanitarian Reverse Corporation” Concept and Location
 - Provide Facilities for LWS Academy Regional Training Activities
 - Partner With Existing Humanitarian Activities, (Such as Samaritan’s Purse) for Global Aid of Humanity
 - Initiate Strategic Program For Major Investments in Infrastructure Renewal Partnering with Military Building Services
 - Engage with International Humanitarian Organizations and provide, Engineering, Aid, and Technical Support on Location
- Offer Support For Zim Holders who Have Trouble Executing Financial Responsibilities Through LWS

–Support Existing Project Holders From Connecting Conciseness and MedBed Development Programs as Appropriate

Heart Light Society Project CAC#103

Full interview here: <https://youtu.be/Abvx-SksCkA>

MISSION

By accepting the Divine “Baton” from the Alliance, we will disperse and create as much prosperity from the Divine QFS Funds, first for ourselves, our Common Unity, Humanity, Animal Realm, Mother Earth and the Multiverse. This will be accomplished by using our Heart (Divine Prime Creator/ our Spirit) and the LWS Structure, in order to help raise our collective frequencies (Dark to Light).

We are willing, able, ready, available and changeable to accomplish these and many other divine projects as guided by the Prime Creator/our Spirit and our Divine Counselor, in total alignment with Love Won Society.

We are in divine love, gratitude, honor and respect always.

CORE VALUES

Our Core Values are fundamental when creating a Culture for assisting our Common

Unity... our Community Ascension Centre/s. The following concepts are designed to be integrated and experienced, where our Core Values are 1000% heart felt on all levels, by all Staffing, from the top down to the bottom up. To shine our heartfelt light and expand it from the individual, our entire campus and throughout the community.

- Heart Centered Love for all beings
- Work and Life Balance
- Grace, Caring and Kindness
- Non judgmental, only discernment (from the heart)
- Respect and courtesy for all
- Creating culture of divine abundance
- Team Cohesion
- Focus on Solutions
- Building win-win partnerships
- Positive attitude
- Inspiration
- Desire to improve oneself
- Dependability and trustworthiness
- Passion and joy for life

AREA IN NEED OF DIVINE FUNDING

- Towns of focus will be Prescott, Prescott Valley, Chino Valley, Paulden, Skull Valley and Native American Reservation
- Diverse Population – retirees, veterans, families, migrating people from out-of-state, community and private colleges
- Diverse Land – Bradshaw & Black Hills Mts., Farms and Ranches, Forests, BLM, Open Land, Native Am. Res., small communities
- Diverse Cultures – Ranchers, Cowboy, Western, Farmers, Native American, mix of races, urban and rural lifestyles

Short term Objectives

1. Hire Constitutional Lawyer, Accountant & Commercial Real Estate staff
 - o Foundation for creating the CAC and all other humanitarian projects
2. Acquire an existing build in downtown Prescott, Arizona (old City Hall) for CAC offices
3. Create our initial CAC building adjacent to the Yavapai County Courthouse
4. Recruit and hire CAC Executive Strategy team to establish action plan and policies
 - o See block diagram below for further descriptions on positions and roles

5. Recruit and train Executive Senior Directors, Program Directors, Managers and remaining Assistant personnel and open the CAC to the community
6. Purchase Bank building and create a Financial Center to service the financial needs of the community
7. Focus on major municipal improvement projects to uplift the community with Transportation, Public Safety, Animal care, Land Management, Schools, Airport Expansion and flight connections
8. Enroll the public and local businesses into RSS and BOCA/ECA programs
9. Create NRELS program to provide needed housing to low-income, Vets, Seniors, Families and all Beings within the community
10. Support local existing Farmers and Ranchers with Grants and Endowments to expand and connect local produce and meats to restaurants and community
11. Support, create local Agriculture, Farmers and Ranchers with Grants and Endowments
 - o As growth occurs, will refer all to the LWI for assistance via ESS and the ICCH
12. Purchase RV to disseminate the RSS and all other LWS programs to remote communities

Long term Objectives

1. Purchase a minimum of 2500+ acreages near and around the Prescott Municipal Airport
 - o See pictures below for Airport concepts
2. Continue maintaining, Recruiting and Training all personnel for scaling to larger projects. Ongoing Education to the Public Sector on all levels
3. Build our World Class Heart Light Community Ascension Centre to service additional communities/state
4. Creation of a World Class Heart Light Holistic Health Centre located on the same Campus as the CAC, for all Beings and Animal Realm
5. Expand Prescott Love Field Airport to inter-connect with CAC and Holistic Health Campus
6. Continue to purchase Land, Homes, Businesses, Buildings and other properties in

order to maintain the quality of life, promote opportunities within the community and to preserve land for all to enjoy

7. Further assistance to all Agriculture (Farmers/Ranchers) and depending on size, refer them over to LWI for the ESS and ICCH programs
8. Continue supporting local Farmers and Ranchers with Grants and other means to expand and connect local produce and livestock to local restaurants and Community
9. On-going expansion of local business support with LWS programs and other financial means
10. Build fundamental staffing to support National, International and Multiverse Programs in order to assist Humanity, Animal Realm and Mother Earth
11. Support for any Projects recommended by our Divine Counselor within the World or Multiverse

Summary of Proposed Projects

COMMUNITY ASCENSION CENTERS

- 1. Municipal and Governance**
 - o Educate the Governance of our Mission to serve the Community with love, trust, kindness and integrity
 - o Provide Sheriff, Police, Fire, Land Management, Public Safety and Public Transportation of grants and trusts
 - o Community Governance improvement and future projects with grants and trusts support
 - o Grants and Endowments to community Schools - Public, Private, Charter, Colleges and Trade with curriculum changes to reconnect to the Heart, ie: 1776 Commission, what inspires each individual within their own Dominion and their own Spirit
 - o Transportation connections to/from Love Field, Prescott, Airport, to the Heart Love Community Ascension Centre and Holistic Campus, including downtown Prescott and possibly Prescott Valley
 - o Support local Indigenous people and animals on Reservations with RSS and all other LWS programs
- 2. Financial Service Centre's (FSC)**
 - o Service local communities with all divine Funding needs under QFS
 - o Support local financial requirements of CAC programs, et al
- 3. Holistic Health Centre**

- o Build a World Class Health and Wellness Centre to service all Beings and Animals
 - o Restore and maintain quality health to community and animal realm in order to thrive
 - o Introduce new technologies, practitioners and modalities to improve overall health
 - o Provide on-going education regarding body, mind to heart and Spirit
 - o Pre “operation” and Post “operation” for Med Beds and any other procedures
- 4. Real Estate Community Assistance**
- o Provide homes with dignity for families/businesses and others in need
 - o Acquire land for preservation for Humanity, Animals and Communities
- 5. Organic Farm/Ranches Assistance**
- o Funding support for local organic Farmers and Ranchers to improve the quality of our soil, food source, livestock and health of the overall Community
- 6. Farm/Ranch to Table Restaurants/Tiendas/Local Business**
- o Support and develop organic farms/ranches that will provide fresh and organic foods to local restaurants and Tiendas (small neighborhood grocery stores and cafes)
 - o Support and create local businesses with all LWS programs
- 7. National and International Projects**
- o Ecuador Humanity and Animals
 - o Animal Care and Holistic Assistance
 - o Farmers Assistance and Education
 - o Indigenes CACs across the USA and other Countries
- 8. Other Projects and Donations**
- o Any and all Projects needed or recommended by our Divine Counselor
 - o Off World Projects and/or Donations in support of the Multiverse and all Beings

Dove of Peace Heritage Foundation **CAC#104**

Ceres Community Centre

“Alone we can do so little.
Together, we can do so much.”
Helen Keller

The Plan

Hold Community Meetings

- To determine policies for the Ceres Community
- Enforcement of the policies
- Consider a small, local Fire Department
- Security for the Community
- Building and Repair Division
- Maintenance and repair of community infrastructure.

Establish an office in the Centre

- Staffed by local Ceres residents
- Computers for local use and a Teaching Centre
- Med-bed availability for emergency use/Health Unit

2023

Other Intended Humanitarian Projects

Financial Service Centres

Set up a local FSC in the Portville, NY area utilizing an existing facility to provide banking services to members of the community. Also consider the option of maintaining other FSC's in nearby communities, (Bolivar, Friendship, Wellsville, Scio, and Shinglehouse, PA) that we expand into.

Work with Local Communities

re: Police, Fire and EMS needs in the Community. EMS would be linked to the Clinics that provide Med-bed etc. and other services. This arrangement would work in tandem with an existing medical staff and be a smooth Segway from what is recent/familiar to the public to what is new.

Water Distillation Project (Ozonation Processed)

Tap water, well water and bottled water when tested have a range of 26 to 310 dissolved solids, (none of the solids are listed on the bottles of water in order of type or weight). Water distillation process using steam, filtering system and ozonation results in zero solids. Presently, a distillation processing plant is not available to Ceres, and the Western New York area. We will change that situation to provide clean, drinking water.

Purchase existing/abandoned farms

To produce organic fruits, vegetables and livestock that is safe for human consumption. We will provide these farms to farmers in the area utilizing grants to promote the necessary upgrades, (including equipment, seed, feed, and livestock).

Establish a Sunshine Acres about Body Dysmorphia in the Western New York area that would address the need for individuals through a loving environment to recognize that they were made in the image and likeness of their Creator and in doing so, will come to revere that which the Creator has made. This would be the first of many across the Nation.

Assist an existing Morgellons Disease Organization Partner with (Bobbi D) to provide financial assistance to aid her in her fight against Morgellons Disease (Graphene Oxide and Nano-bots) that has spread throughout the world. She has been working for ten years at her own expense to help those who appeal to her through her website.

My husband and I have also suffered from this disease and thanks to God's help are presently in the recovering stage.

Set up a 24/7 Customer Service Organization for Humanitarian Projects across the Country. Each site would establish groups that would be assigned to the different time zones to accommodate the needs of the Projects. This arrangement would also eliminate the need for employees to have to work graveyard shifts that impact their lives and the lives of their families. Also, it provides an opportunity for each group to become familiar/proficient with their specific areas and puts faces to the needs of others.

Purchase Abandoned Malls and retrofit them as in-door farms and greenhouses where tropical fruit can be grown in the North and in a controlled environment apples and grapes can grow in the South. Also, Malls provide a secure structure in the event of hurricanes and inclement weather that can and does affect crops and livestock. Canning factories and grocery stores can exist in that environment and it's a great place for children to learn how food gets to the table.

Work with the Alliance to accommodate their needs with respect to other galaxies and universes. A separate account (Bond Account) will be set up in the QFS in anticipation of those needs. We want it known that it would be an honor to serve the Alliance that has served us all so well.

Spokane CAC [CAC#105](#)

About us:

We are of the opinion that new technology will come into play to fill in the gaps in our present technology to accommodate the massive changes to our society and the economy that are taking place.

Free Energy:

A new industry will spring up to transition between public utilities and private sources of electricity. Every location that uses electricity will require an installation of new equipment to allow free energy to be used. It will require disconnection from the present distribution system. It is a massive undertaking.

Matter Replicators:

While we believe they will have their purpose in helping to feed those who do not have access to food and water, there is a socialness of enjoying a meal with family and friends

The Community Assistance Center is for everyone. A one stop place to learn about the (RSS) Revenue Sharing Solutions program. Offering several Community Services that will assist with logging into our system with computers. Learn how to purchase a home through the (NRELS) National Real Estate Service. Business Owners Contract Accounts to support small businesses. Employment Contract Accounts (ECA) for employees. City, County, Rural Programs available.

Problem

Never Enough Mentality

For years, the basic fabric in society, the Family, has suffered from the lack of adequate financial opportunities. The present financial system was created by years of

mismanagement that tenders to the “elite” privileged class that excludes 99% of the population from major participation.

Individual Incomes

People are paid minimum pay to barely scrape by. Keeping us in constant need of money. Both Parents must work to make ends meet and still not make enough to do the things we would love to do. Working many hours a day to scrape by. No time to spend with our families.

Financial Lack

Never being able to enjoy the fun things in life since there is no money to pay for activities with your families. No money to go on vacations or to purchase a home to live in. In many cases not enough money to feed our families much less buy clothing. Expensive automobiles that most have never owned a brand-new car.

Homeless

Credit needed to purchase or rent a home. The Cost of homes is too high. Making rent or purchasing a home is too expensive for most people to afford. Having a stable home of their own that is safe and secure where the family unit can flourish and grow without the constant worry about money, is the dream we all have.

Solution

Revenue Sharing Solutions

This powerful RSS action plan is the foundation of the other four plans, it all starts here. The plan solves the problem of sharing the wealth with people and does so in a way that people can retain their dignity and avoid the feeling that they are on a government dole system. The RSS platform will be housed in the Quantum Internet system and will interface with the Quantum Financial System (QFS). This makes the platform safe and secure and easy to transfer money.

Training for Abundance

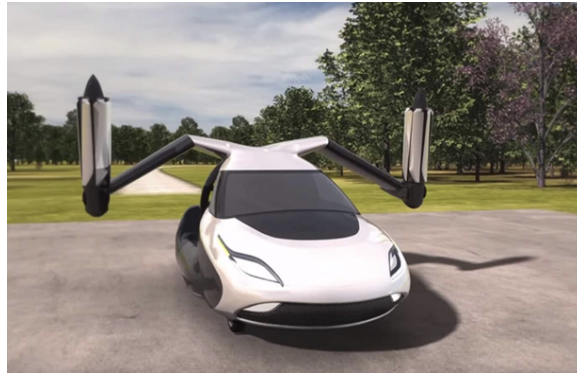

Training programs for learning how to have the abundance mentality. Training for the RSS program logging in on the computer in the Quantum Internet. If people can grasp how important it is to think more abundantly than ever before, life will be more joyful.

Hearts Desires

Working at something you enjoy. Purchasing the home you always wanted. Buy a boat, houseboat, or a yacht. Loving what you do. Being able to support your family with their needs.

Working for Better Wages

Working for a wage that you never thought possible. Being able to do what you want to do in your God given life. We were always meant to be prosperous; it just was stolen from us.

Program Overview

Unique

The only program specifically dedicated to help people have abundant lives. Offering a hand up and not a handout. There is no other program in the world that will help humanity like this one. Every heart will experience abundance.

First of its Kind

Never has anything like this been offered to people for creating and having an enjoyable, loving, abundant life. People choosing what they desire to do with their lives and the lives of the ones they love and care for. This program allows us to all be on the same level financially.

True

Giving people life choices to make their future what they want it to be. Having freedom to do what you want to do, not what you have to do. The abundance of experience is real. Enjoy it.

Authentic

Designed to get the money into the hands of humanity, entities, and beings. Other galaxies will prosper as well. New technologies available to us will bring us into a new type of living and believing in yourself and others. Looking to your heart for that fulfillment.

Program Benefits

- Freedom for life ...
- Community connections for employment, housing, and assistance...
- Training Center...
- Conference Facilities...
- Small Business development and assistance...
- Employer opportunities for assistance...
- City planning and expansion opportunities and assistance...
- Home buying program...
- Home construction assistance...

Programs Offered

Community Assistance Center

Everything is housed in one central place within the Main branch of the CAC.

- 1.) Revenue Sharing Solutions
- 2.) Financial Services Center
- 3.) Business Owners Contracts
- 4.) Employee Contracts
- 5.) National Real Estate Service
- 6.) City, State, Rural Cities, Government Assistance
- 7.) Construction Contracts
- 8.) Medical coverage
- 9.) Food Sources
- 10.) Loan/Grant Processing Services

National Real Estate Service

Everything to purchase a home in one place.

- 1.) Real Estate Brokers
- 2.) Realtors
- 3.) Land Title Company
- 4.) Construction Contractors
- 5.) Interior Designers/ Architects
- 6.) Land Developers
- 7.) Landscapers
- 8.) Textile Supply contacts
- 9.) Home Appliances Contacts
- 10.) Plumbing contacts
- 11.) Electricians
- 12.) Painters

Business Owners Contract Account

Everything Small Business Contract /Contacts in one place.

- 1.) Farmers Organic/Natural
- 2.) Gardeners
- 3.) Restaurants/Deli
- 4.) Grocery Store/Farmers Markets
- 5.) Clothing Manufacturers/Retail
- 6.) City/State/County Employees
- 7.) Water Facilities
- 8.) Refuge Facilities
- 9.) Utilities

Revenue Sharing Solution

1. Revenue Sharing Solution Action Plan: A summary

- a. Each Beneficiary (registered person) purchases 1 account only
- b. Cost of 1 account: \$10.00 which is the initial registration fee
- c. Once referred and approved for an account, the payout is as follows. Payment will remain with the Beneficiary forever.
- d. \$0.10 cents per minute=\$6.00 per hour
 \$6.00 per hour times 24 hours= \$144.00/day
 \$144.00 per day = \$1008.00 per week

\$1008.00 per week = \$4464.00 per month
 \$4464 per month = \$52,560 per year forever

e. Each Beneficiary will be given a User ID # in the QFS account, and a card to use for purchases.

ADDITIONAL BONUSES AVAILABLE*

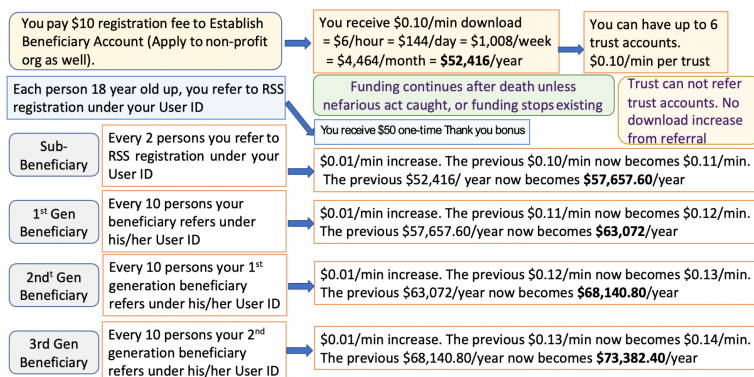

Thank You Bonus: Each Beneficiary uses their User ID# and their referral approval to sign up new Beneficiaries. A one-time bonus of \$50.00 will be paid for each new Beneficiary.

Registration Bonus: Each Beneficiary will receive an additional \$.01 cent download per minute for every 2 new Beneficiaries added using their User ID#. This amount equals: \$14.40 per day, \$100.80 per week, and \$5,241 per year.

Generation Bonus: This bonus pays a \$.01 cent download per minute for every 10 new beneficiaries signed up by a 1st, 2nd, and 3rd generational Beneficiary that registers under your User ID#. This bonus is useful for large organizations: Churches, Businesses, Non-profits, etc.

Trusts: Each Beneficiary has up to 6 trusts they can have in addition to their single account. Each trust will pay out the \$.10 cents per minute, similar to their own account payout. This can be used for saving for college, kids sporting needs, family members who aren't eligible for payouts, etc. Each Beneficiary controls who is in control of their trusts. A lawyer will need to be hired to do the necessary paperwork.

*All Bonuses are in addition to the initial \$.10 cents per minute download for your Beneficiary account. There are no limitations as to how many Beneficiaries can be signed up. Each new signup must have approval and be 18 years of age or older to qualify for the RSS (Revenue Sharing Solutions) program.

Business Owners Contract Account (BOCA)

The Human Resources Department for each Corporation may scale the Share payout to accommodate the pay structure of the company, starting at 25 cents per minute up to 2

dollars per minute. The RSS platform will call the Share, EC Share-37, for an Employment Contract Share @ 37 Cents per minute payout. Each penny added to the share download creates a 60 cent per hour increase - \$14.40 per day, or about \$100 per week. The local Managing Director will offer contracts to corporations with 20 or less employees.

Contract provisions for Corporations:

1. Binding minimum 10-year contract with options to continue in 10-year increments. Each Managing Director has a sister Corporate Managing Director agent, who will issue a 10-year Performance Bond for the upfront purchase of the company's annual production. If the Corporation has less than 20 employees, your local CAC Directors will do the purchasing of Goods.

2. A 5-year average production = quantity to pre-purchase.

3. The Price we pay for the item will be set at the Corporation's wholesale price, minus the labor set by a 5-year average labor cost. (We are already paying the labor with Employment Contract Accounts, which include employee benefits as well as free family health insurance.)

4. Existing or new Employees execute a 7-year Employment Contract and become independent contractors of the company. Our sister Corporate Managing Director is the contracting Employment Agency and will execute an Assignment of the Labor Contract to the Corporation where the employee will work.

5. Our Sister Corporate Managing Director will issue up to ??? billion-dollar Performance Bond** (see note below) to secure a corporation's position in the contract. (bond amount according to the corporation's economic body of factors yet to be determined.)

6. Corporate Human Resources to use existing chain of command supervision to ensure execution of Independent Contractor's responsibilities.

7. Middle management and below will be offered Employment Contracts. Corporate officers and upper management benefits and salary schedules will be the responsibilities of the CEO and Board of Directors and will be paid by Corporate Profits.

8. At the completion of the 7 Year employment contract, The Employment Contract Account will continue to payout indefinitely and will continue to include free Health Care benefits for employees, spouses, and family members under the age of Twenty-three. If the employee continues to work beyond the Contract term, the one-cent raise each month will continue as well as the other contract benefits until the employee retires. Otherwise, the increases will end when the term of the contract ends.

9. Our sister Corporate Managing Director will make expansion loans available for our contracted companies interest free. Small corporations will be handled locally.

****Note:** Our sister Corporate Managing Directors payments will be used to establish an Umbrella Bond account. This Umbrella-Bond controlled by our sister Corporate Managing Director will act as a Double Performance Bond to secure the Company's Interest as well as the interests of the participating local Managing Director. The Managing Director Bond and the other sister Corporate Managing Director Umbrella Bond gives a double Bond to establish credibility in the whole program.

Employee Contract Account

Employment Contract terms:

1. Seven Year minimum with options to continue after 7 years to include benefits and periodic increases in account per-minute-payouts.
2. Human Resources of the manufacturer will administer and control employee relationships with the company. Grievances to be resolved by binding arbitration.
3. Employment accounts will range from 25 cents to 2 dollar per-minute scales to corporate salary levels as per existing structure. Once set-in motion, the Contract account payout will not diminish but will increase over the period of the contract. This is a built-in retirement benefit.
4. Employment Contracts will also include free Health Care insurance for employee and immediate family members or dependents until age 23 years.
5. During the Contract term, RSS will add one penny per minute download for each contract Quarter worked. Over the 7-year contract, the increase in Share downloads would be 28 cents added to the Share download, which equals an additional \$2,800 per week increase over the beginning contract payout schedule. One penny equals a raise of approximately \$100 per week or \$400 per month or \$1,200 per quarter.
6. Remedies for breaking the Employment Contract provisions may result in the lowering of the per minute download up to the deactivation of the Employment account. If egregious enough, the Arbitration Board may penetrate the Beneficiary's account and lower the payout for all bonus increases, such as the Registration Bonus of one penny for every two new Beneficiaries, earned up to the point of Arbitration's punitive actions. Beneficiary initiated Trusts may also be deactivated. The original Personal Share payout will not go below the 10 Cent per minute payout. This Share is inviolable and will not be a part of any further Arbitrations' Punitive actions. A Home purchase increase for the Share per-minute increase will not be affected.
7. Those who break their Employment Contract may begin registering new beneficiaries and Trusts and participate in the Bonus program after one year from the date of the Arbitration's punitive action.
8. An Employment Contract does not stop a person's involvement in the Individual RSS

Beneficiary program, including Bonuses.

International Commodity Clearing House

Statement of Purpose: The purpose of this ICCH program is to: stabilize prices for Food Commodities, Manufactured Goods, and Raw Materials, and to ensure Farmers and Manufacturers receive sufficient profits to stay in business and be productive. Our mission includes organizing a worldwide network of clearinghouses, warehouses, and distribution centers where commodities are stored and then shipped to where they are needed.

The Clearing Houses will be set up on a computer network similar to the internet, with a huge database where commodity availability are databases and made accessible to other Clearing Houses. The network will request and receive distribution orders to move commodities to where they are needed.

Statement of belief: Food should be grown Organically, to feed people healthy, nutritious foods; not grown with pesticides, artificial fertilizers, or hormones to justify larger profits. We need to create a computer network similar to the Worldwide Web, to accommodate the need-driven distribution of commodities. The Economic Stabilization System will be the underlying program in support of the whole ICCH operation.

Example of The Play for Farmers:

- The local farmers or manufacturers will be offered a ten-year contract (with options for more years) to Pre-purchase their entire annual production at fair prices, in the spring of each year. A Performance Bond will be issued to each contracted entity to cover our portion of the Contract.
- The moving average of the, then, last five-year annual production, will dictate the amount of upfront money they will receive for the following year. Provisions will be made to accommodate the local sale of produce at desired (farmer's markets). Paying it forward will be encouraged.
- At the end of the growing season, the ICCH will own the produce and store it in purchased or rented storage facilities or warehouses already being used locally.
- The head of each farm will make growing adjustments to ensure the crops qualify as Organic. Small loans or grants will be made available to restore the land to produce the most nutritious crops available. This is a long-term plan.
- Provisions for the growing of industrial Hemp, provided by the new Farm Bill, will be encouraged with grants needed for new machinery for planting, cultivating, harvesting, and processing of the Hemp crop.
- Each farm will be offered to refinance with the terms offered in the National Real Estate Listing Services refinance program. The resultant Real Estate Loan with the additional Revenue Sharing Solutions with the per-minute download adjusted to cover the Loan payment will ensure that the farm can never be foreclosed on again. (See NRELS, for the refinance process link)
- Each farm/farmer contracted shall receive an additional \$1.00 added to their RSS

Beneficiary account payout (\$525,600 per year) as a contract signing bonus.

- No pre-purchase contracts will be given for any GMO crop production. We will partner with farmers to finance the repair of the soil and bring the farm to a Certified Organic Farm status. This should be accomplished in less than three years.
- The Community Assistance Centers (CAC) Directors, who are local to the Farmers will act as the liaison between the Farmer and the Revenue Sharing Solutions program. The Director will have a unique User ID# to establish the Employment Contracts and have authority to access RSS Managing Director Accounts in support of the Farmer's contract.
- The Directors will have authority to adjust the Employment Contract Account (ECA) per-minute payout as per the Farmer's wishes. The Director will also have authority to secure loans or grants to assist the Farmer's needs.
- Employment Contracts Accounts will be available, for farm laborers to sign, at appropriate account payout levels for the work being performed. Family children of the farmer 12 years old and older may qualify for an adjusted Employment Contract Account up to the age of 18. The head of the farm who signs the contract shall administer the Employment Contract Accounts for those in his/her employ in concert with the CAC Directors. They too will be eligible for raises as per the Farmer's wishes.
- An Agriculture Board, made up of experts in soil repair and other Agriculture affairs, will be established to give guidance and education to Farmers to coordinate crop rotations for market needs with emphasis on soil nutrition and the use of fertilizers to maintain Organic certification, most true Farmers have superior knowledge acquired from working with the soil for years. This will only give them help with new soil technology and shared experience from the old blue jeans that have the experience.
- The local Farms will play their part in the preparation of food stuffs and the packaging required to support the marketing of commodities through the distribution channels. Grants will be given out freely.
- Farmers will return to the social strata of the old days when farming was a respected way of making a living. Corporate farms will be bought and sold back to Farming Families who have lost their farms and forced out of business by crooked bankers. The above micro example will support the Macro plan of the ICCH in the many varied aspects of food production, manufactured goods, and the raw materials industries. The foregoing example for farmers can be adapted to the manufacturing of hard goods as well as the enhancement of raw materials production in support of most sectors of the Economy.

The (ESS)

The net effect of the Economic Stabilization System will be to stabilize the profitability of all participants in the Economy with the net effect of lowering the prices of items to the consumer. Following the example of the Farmers, the emphasis of the program is to use nutritional processes that look toward the health of the populace rather than profit driven processes that cut out nutrition as the basis of the decision-making process. The same ideas will be applied to preserving the earth and its eco-systems, with the net result of cleaning up the environment from past profit decisions that hurt the environment.

NOTE: Profit; there will be a break even or non-profit approach to all that is done in all

the programs that our sister Managing Directors will implement with the help of Managing Directors. The ESS will use the manufacturing industry to support the famers with the latest technology available, and at prices that are affordable to the food industry. As we get established in the pre-purchasing of manufactured goods, and the use of Employee Contract Accounts (ECA) to support the work force, there will be huge sums of money injected into the economy with no expected profits in return. In fact, there will be no problems for Managing Directors operating under huge losses as a result of our service to humanity. The manufacturing sector of the ESS program will use the present national and international distribution systems to support farming endeavors all over the world. Farmers and food suppliers will have a major priority in the program to be supported with lower costs and better financial services for their success. Because ICCH is international, this will include developing countries to increase their production of food that will ensure that each country has enough nutritious food to feed their people. Having the contracted ownership of large equipment, ICCH will ship farming and construction equipment all over the world to support our farming programs. One of the main problems of feeding people, beyond the production, is the transportation of commodities to where they are needed. Large, responsible road building projects will be implemented to create a ribbon of highways in underdeveloped areas or countries to transport food to the local markets.

Brokers and Middlemen

The ICCH program will work with brokers and middlemen to enhance the effective distribution of commodities. These professionals are essential as proven distribution chains are already established. The ESS in conjunction with the ICCH program, will incorporate and enhance their participation with the use of Employment Contracts at any level needed. The over-all ICCH program will ensure that every person in the Distribution Chain of commodities and manufactured goods will be financially viable, as well as the producers.

Developing Water Resources – a Problem-Solution application Using New Available Funds. Sufficient clean water is essential to increase food production especially in under-developed nations such as the continent of Africa. Massive investments in developing natural resources to bring water to the farming location is a must. Africa, for instance, has a large aquifer under most of the African continent. Thousands of wells need to be drilled to bring the water up to the surface for famers to irrigate crops. Governments don't have the money to do this, Farmers don't have the money either, so it is left up to Managing Directors to provide the money to accomplish this necessity for increased food production. A system of wells needs to be engineered to bring the water to where large farms and villages can be constructed. There is sufficient water available during the rainy season to refill the aquifer and with the long sunny growing season, two or three crops per year may be possible. Clearing houses on the African Continent will collectively be called, PACH, for Pan African Clearing Houses. The 54 countries in Africa will form PACH with representatives from each country. PACH will be the exporting and importing authority in coordination with each country's government.

NOTE: There is a problem in the food supply in Africa. Many commodities are shipped overseas to markets outside of Africa leaving a shortage of these commodities for the African population. Cocoa beans are a good example. Many people in East Africa cannot afford the prices for cocoa from West Africa that European countries can afford to pay. So, they are left out, with many East Africans never having tasted hot chocolate. Increased production with an operating axiom, "Africa first, then export the excess." May be implemented. Many Managing Directors will be needed for this project. There are perhaps hundreds of these types of projects that can be implemented all over the world. This project started in Africa can act as a prototype for other areas. The clearing houses can be the right structure to accomplish the distribution. Other underdeveloped countries have similar problems with similar solutions being the investment of money without a profit incentive. It just takes money and a dedicated workforce paid by RSS bonded Employment Contracts to build up the required infrastructure. The ICCH, with the support of the ESS on a more local level, coupled with the equipment our sister Managing Director can supply, will take on this project with the intensity it deserves. There will need to be a coordinated effort with qualified individuals who have vision to get the ICCH up and running. It may take a year or two of intense planning to implement all phases of the program. Each Managing Director will have an opportunity to get involved in areas that suit their desires and capabilities. ICCH will provide the computer network and we can build large warehouses to store commodities for distribution.

Forward Looking Statements using New Technology. We are of the opinion that new technology will come into play to fill in the gaps in our present technology to accommodate the massive changes to our society and the economy that are taking place.

The Garden of Eden Project CAC#106

This project in its entirety is enormous in scope. Not only does it cover every aspect of recovering the planet's physical health but will build its spirit's health along with the inhabitants that will learn of the important aspect and responsibility of maintaining their dominion. From here I will cover the fine tuning of bringing mankind back to their innate sense of living whole and complete with a moral compass that can reflect one to another in satisfaction.

Discovery of value.

We know the words but we've yet to live like we know what they mean. If we were to pave our roads in gold tomorrow how long would the gold remain? Not until we have found greater value in something other than gold will we be complete and whole.

The valuable self.

Allowing all research to be viewed and trusted to add any personal research about the living domain. An open source system for the entire world to access and add their own research for others to utilize. Not only will we be learning and living in a way that is natural but in a much smarter way by utilizing all research for the betterment of all people. Included will be the health industry. This industry will be led by our most inspired Nutritionists, Botanists and Holistic healers.

How will our world look when we can say that we are about to enter Eden?

Every kitchen will have a greenhouse attached with a small pantry. Restaurants will also have greenhouses attached to their kitchens and their landscaping will be growing the produce used. The landscape will not be for mere vanity where it is groomed and watered yet has zero purpose other than how it looks. All landscaping will be for some kind of positive development utilized for the benefit of living beings. We, the ones that have dominion over our Earth will have found ways to guide our waters through the Earth's filtering system. These kinds of simple minded things will relieve the pressure from the farmers' great burden. Without pressure they can truly bring the kind of foods that they want to bring to our tables.

Family compounds.

Through the open source system of research better and cleaner material will be available for home and work. Many will be biospheres that have built-in layers for the monitoring of the home and area. Designs that will maintain frequency of light, temperature and moisture. Families will function from their homes more and will stay closer in many cases building family compounds that establish a protective core that binds community.

Community culture.

With plenty of old, poorly used and abandoned motels in many towns and cities is an opportunity to present local culture. The culture is often found in bars or the annual fairs. This is an opportunity to give the local talent a place to hone their skills and display them at a pittance of the price of traditional strip mall rents. To create the landscape into a secret garden with fire pits for people to enjoy a night out with musicians and new found friends. With each former motel room turned into a working display for an artist, tradesmen or musicians.

Community center.

These centers will be the meeting place for anyone conducting business, personal

development, health benefit, research, and help for anything that a living creature could possibly design in their mind as a contribution to the whole that they wish for guidance in its development.

These are the reasons why we are here as a multitude and why there are so many of us because we need each other, that is why.

Complex Humanitarian Project CAC#107

The Arcoaldea Humanitarian Complex project is an ambitious multidisciplinary humanitarian initiative that seeks to combine different aspects related to health, education , community life, personal development, training , spirituality, the creation of ecological products , sustainability, self-sufficiency, job creation , care for the environment, etc.

It will be located in an optimal place to be able to develop the project with the possibility of growing and multiplying the possibilities of action and reaching a large number of users and beneficiaries. The project can be developed in different phases depending on the available resources. We have an unequivocal desire to serve humanity with our work, commitment, dedication , determination and with full awareness of the moment our planet is going through within a cosmic order.

Our fundamental axes are:

- Creation and start-up of a holistic hospital for 120-160 beds, with technology bed-med and the implementation of different integrated alternative therapies in the middle of nature and supported by the creation of a medicinal water spa.
- Materialization of a conscious community and construction of a village of approximately 50 houses with bioclimatic and energy self-sufficiency criteria .
- Creation and implementation of a conscious school and respectful upbringing.
- Start-up of an agricultural holding to generate food resources for the self-sufficiency of the complex, the community and to be able to manufacture and market medicinal, dietary , aromatherapy preparations, etc.
- Creation of an International Training Center for health professionals, therapies, and other spiritual and growth disciplines.
- Refurbishment and expansion of a hostel to serve the Training Center.

SEWING AND EMBROIDERY COMPANY CAC#108

This business is a very profitable occupation, since such products are constantly in demand among buyers. In the article, we will consider a business plan for the garment production of clothes.

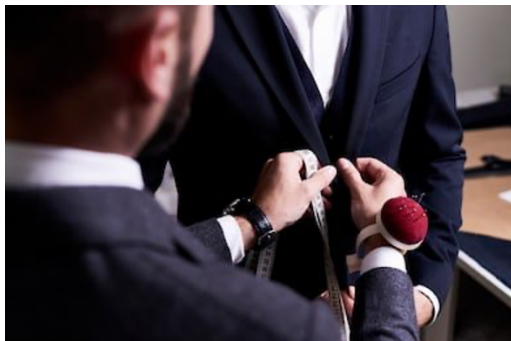

- It is difficult to find a person who at least once did not need the services of a sewing workshop - to shorten the length of the trousers or replace the zipper. Tailor-made clothing is the perfect option to stand out from the crowd or hide figure flaws. Therefore, this service is becoming more and more popular today. Let's figure out what steps you need to take to open a sewing studio and why a well-written business plan is the key to the success of any business. We define the target audience
- Why are you better than others?
- Advertising is not enough

How to open your business

- How to draw up documents
- How to find a room
- What should be in the studio

What equipment is needed and where to buy

- Recruitment
- Stages and terms of project implementation
- BRIEF CHARACTERISTICS OF THE BUSINESS
- It is often those who have worked professionally in this field, for example, seamstresses or cutters, who often decide to open their own sewing business. In fact, such experience alone is not enough to organize a profitable business.
- When planning the opening of a sewing studio, you need to clearly think over the strategy of its activities, find a suitable working space, and hire the necessary qualified employees. One of the key issues is the development of real ways
- Attract customers. Therefore, it is imperative to draw up a detailed business plan with careful planning of expected income, required expenses and taking into account all possible risks. The business plan should determine the payback period of the studio and the amount of expected profit from its activities.

WHAT SERVICES DO YOU PLAN TO PROVIDE?

Before you open a tailoring workshop, you should clearly define the set of services that it will provide. Perhaps it will be the creation of designer clothes and its sale, or a highly specialized direction. For example, sewing wedding dresses, making overalls or a simple repair shop.

The main thing is to decide on your niche, since the business plan should contain real calculations for a specific project. The costs of organizing a multi-profile garment production are much higher than when creating a small clothing repair workshop. Also, each clothing business puts forward very different requirements for premises, equipment and personnel.

WILL THE PROJECT BE DEMANDED

At first glance, it seems that the opening of a sewing studio is doomed to success. For people with a figure that goes beyond the accepted standards, or originals who are not used to dressing like everyone else, a tailor-made atelier is the only way out. However, everything should be well thought out and calculated.

For the success of any business, the presence of an ever-growing client base and the good location of the premises are extremely important. The needs of people in the region for such services and the possibility of increasing their number in the future should be carefully studied.

WHICH STUDIO CAN BE OPENED

To open, you can choose the following types of sewing:

- A small atelier for the repair of clothes;
- Tailoring of narrow-profile clothes;
- Tailoring by individual order of diverse clothing;
- Tailoring of designer clothes for subsequent sale;
- Opening a franchising studio.

A clothing repair shop is the simplest and least expensive investment option. It is much more difficult to create a salon-type atelier.

Atelier and shop

This is a union of 2 different directions - sales and tailoring. You can trade clothes made in the atelier, sell sewing accessories and at the same time provide tailoring services. Another option is to buy ready-made clothes in bulk and sell them in the store. This is a good way to attract additional customers and increase business profitability. However, free funds are needed for the purchase of goods and an increase in the cost of remuneration of sellers

Repair shop

You can't make big money here. However, much less investment is needed to get started. Over time, you can develop and expand this business.

Narrow-profile atelier

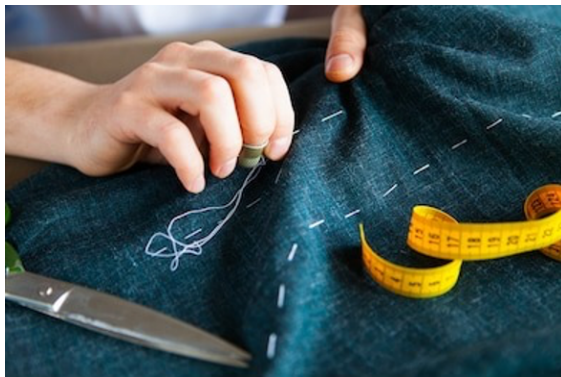

For this kind of activity, the correct location and the presence of an extensive client base are important. For example, sewing wedding dresses will be successful if the atelier is located near the registry office or a salon for organizing special events. And it is most reasonable to sew overalls in industrial zones near numerous factories that need such a service.

It is worth buying only specialized sewing equipment - this will reduce start-up costs

MASTER OF ALL TRADES - STUDIO FOR TAILORING OF DIFFERENT CLOTHES

This is the most expensive type of garment business to enter. The purchase of a wide range of equipment requires significant costs. Competent selection of personnel is one of the key points. It is necessary to find high-class professionals with practical experience. You can hire generalists, another option is to form a team of experts in their field. With proper organization and proper planning, this option atelier will pay off the fastest.

WE SEW AT HOME

A home business allows you to save on rent, because all the equipment will be installed at home. However, this method of organization is only suitable for a small workshop.

BUYING A FRANCHISE

Starting a sewing business in this way is a costly undertaking. The cost of the first installment can reach 1 million hryvnia. Pluses - work under the wing of a well-known brand, which itself is engaged in advertising and attracts customers. The main thing is to meet the requirements. This method pays off within a few years.

HOW TO ANALYZE AND CORRECTLY DESCRIPTION THE SALES MARKETS

The success of the implementation of the business plan depends on a competent and carefully conducted analysis of the clothing market, a sober assessment of the capabilities of competitors and the correct calculation of the number of potential customers. You should not only study someone else's successful and unsuccessful experiences, but also develop a plan in case of unforeseen situations, crisis phenomena and unfair competition.

DETERMINING THE TARGET AUDIENCE

Location significantly affects the number of customers and their requests. The sleeping areas of large cities are more in need of a small repair shop than a large and respectable salon-studio. It is preferable to place it in the central part.

Only a balanced analysis and a reasonable approach will bring success to any business. There are no trifles here - you should take into account the availability of convenient transport interchanges, parking spaces near the studio. The client will become yours only if he will be comfortable and hassle-free visiting the institution.

WHAT ARE YOU BETTER THAN OTHERS?

Of course, the ideal option is when there are no competitors nearby. But sometimes their presence allows you to perfectly develop your business. The client must understand that contacting your studio is beneficial for him, that here he can receive a greater range of services or a higher quality of service. Studying the mistakes and achievements of competitors allows you to organize your work in such a way as not to repeat their mistakes and improve your level. Find exactly your differences and advantages for business - tell about them in advertising, on the outside of the atelier, in leaflets and business cards. **THERE IS NO ADVERTISING**

HOW TO OPEN YOUR BUSINESS

After determining the direction of activity and the type of atelier, it's time to start organizational issues. Starting costs according to average calculations will be from 120

to 250 thousand hryvnias. Of course, the final figure may change under the influence of many circumstances, but even with the most optimistic scenario, it will not be possible to open a clothing business for less than 80 thousand hryvnias. It is important to consider that the profit will appear later, and the costs will start from the first day. It is necessary not to forget about this when calculating.

HOW TO DOCUMENTS

There are two options for the official start of activity - to register as a private entrepreneur or open a legal entity. In the case of one owner, the registration of a state of emergency is easier in registration and in the further payment of taxes. To pay salaries, employees need to register with the Pension Fund. You also need to open a bank account. You can entrust the execution of documents to lawyers, but this will at least double the costs. Registration costs will range from 2000 to 6000 hryvnia.

WHAT SHOULD BE IN THE STUDIO ROOM

The premises for placing a garment business object in it must meet the minimum requirements:

- There is a bathroom;
- Conducted electricity of the required power;
- Usable area of at least 10 sq.m;
- Providing uninterrupted heating in winter and air conditioning in summer.

WHAT EQUIPMENT YOU WILL NEED AND WHERE TO BUY

The cost of purchasing sewing equipment should be accurately calculated in the business plan, because it is one of the main items of expenditure. It is better to contact a specialized trading company to buy everything you need in one place and save money.

Need to purchase:

- Sewing machine for basic operations -
- for hemming
- Overlock -
- Cutting knives -
- Professional steam iron -
- Ironing boards -

It is necessary to provide the studio with consumables. You will also need to equip a fitting room with a mirror, take care of providing adequate lighting and fire protection equipment.

RECRUITMENT

For a repair shop, it is enough to hire one employee to help you.

However, for the work of the atelier, it is required to attract professional craftsmen - you will need a cutter and a seamstress. An experienced accountant is needed to maintain financial documents. The right staff will help your business grow and succeed. To assess the professional skills of the applicant, it is worth offering him to complete a practical task - this way you can quickly and accurately identify a good specialist.

STAGES AND TERMS OF PROJECT IMPLEMENTATION

First you need to develop a well-thought-out business plan, then find a premise and register a business.

Drawing up a financial plan

The financial plan should contain calculations of start-up investments and fixed costs. To calculate the payback period of the studio, you need:

1. Take into account all initial costs for registration, rental of premises, purchase of sewing equipment and consumables, advertising, etc. On average, at least 120 thousand hryvnias will come out.
2. Determine the average monthly income. The planned daily income is calculated as follows - the average cost of the service is multiplied by the number of orders. The result is multiplied by the number of working days in a month. After deducting taxes and social contributions, the average monthly income is obtained.
3. Divide the sum of the total start-up costs by the average monthly income. This will turn out the period for which the studio will pay off. Usually it is from six months to 10 months. The situation is worse if the payback period is more than 1 year.

ACCOUNTING FOR REGULAR PAYMENTS

Regardless of the profitability of the business, you will have to pay monthly:

- For renting a room;
- For the consumption of electricity and other utilities;
- For advertising;
- Wages;
- Social contributions and taxes;
- For the purchase of new consumables.

HOW LONG DOES IT POSSIBLE TO START WORK

In reality, taking into account all the necessary actions, the average launch time for such a project is six months from the moment the business is registered. This is important to consider when drawing up a business plan.

In order for a business to become successful, it is important to do your job professionally, to treat the problems and concerns of customers with understanding. A high level of service almost always helps to achieve the planned result.

CAC Project [CAC#109](#)

OVERVIEW

As this planet is in the middle of the greatest paradigm shift in recorded history, flexibility is a required attribute for any forward movement.

Initial Action Plan:

- Hire project manager and multi-lingual, professional Personal Assistant with experience in huge multinational projects and secure space for base of operations.
- Also, Common Law staff and accounting office manager to set up accounting office(s)
- Set up trust entities, trustees, accounts, etc.
- Secure property and initiate a homeless folks rehab/resource center where they will have temporary housing, community center, clinic, counselors,
- Researchers: Top students, graduates, interns from high-tech schools and universities.
- Also, those folks that simply show strong desire and skill sets for the task at hand.

Project Structure:

The various projects will take the form of “Unincorporated Business Organizations” similar to a Massachusetts Trust and be run by a manager who answers to a trustee board. All projects are set up to be self-running. Trustees have oversight of project managers and “Trust Protectors” (basically auditors) exercise oversight of the trustees/trusts. The contract that creates the trust contains the operational definitions such as the founding principles, job descriptions, tasks, etc.. All is defined in the contract

Studies have shown that nearly all ministries that fail never adopt into their foundational structure the following principles:

- Purpose: The reason the ministry exists
- Values: The non-negotiable beliefs that determine our behavior
- Mission: A statement of the overall purpose and vision. It should be a short, memorable “rallying cry” for the ministry. It is what we are trying to accomplish.
- Vision: A clear, inspiring image of a desired future
- Guiding Principles: The values, beliefs and philosophies of the ministry that provides direction in making day-to-day decisions.
- Position: How we want the world to see us. Defines our unique brand and distinct and valued place in the mind of the community.
- Objectives and Strategies, Projects, Job Descriptions and Tasks
- These foundational principles are defined in the trust contract for each project.

Operations:

As one cannot assume to do all that is required it seems logical that the first hire will be a project manager to start on the groundwork of acquiring facilities and hiring the initial people. Common Law lawyers to lay out the basic documentation. Then accounting office manager(OM) and let the OM hire the other accounting people.

Next might be a couple of professional trustees, etc. Next hire is a Personal Assistant(PA) that is multi-lingual to field all calls and keep calendar and other fidgets under control. By remaining anonymous, at least in the beginning, one might find time to

relax and direct the operations from a forty thousand foot perspective.

To keep in contact with the projects, communities, etc., one may dress appropriately for the visit and be the “under-cover boss” so to speak, keeping a finger on the pulse and observing other opportunities to serve.

Securing/acquiring space to work from was covered in the training videos. It seems good to have a base of operations for those admin duties that may remain stationary such as lawyers, trustees, accountants, etc. since we will probably be able to work remotely in a much more efficient manner in the near future, i.e. quantum phones and pads.

Researchers will be invaluable especially in the start-up phase and should be readily available from the younger population. Some of their tasks may be to find areas in most immediate need of our services, locating materials and people, finding the latest tech that is just coming available, etc.

We will use the “Love Won Society’s” RSS, CAC and NRELS programs to facilitate housing, community projects and getting personal funds to folks where we operate, to spread the love and meet the needs in communities where we can reach.

We will use the “Love Won Society’s” RSS, CAC and NRELS programs to facilitate housing, community projects and getting personal funds to folks where we operate, to spread the love and meet the needs in communities where we can reach. We plan to set up temporary offices in various areas of need. The purpose is to advertise funds being available for community projects and those people with the desire will show up hopefully in droves. They will be required to submit a simple project description and sign a contract to ensure completion of the project. We will be very generous, turning away very few if any, and promoting community/home gardens, parks, programs to get elderly involved with children and pets, etc.

The Trust:

The reason for using a trust structure is that it is a contract that is protected by The Constitution, not for any tax reasons.

The included documentation is for your information and as a marketing tool for the creators of the documents. You may acquire the trust docs and licensing at this link: <http://www.svpvriil.com/ubo.htm>

As you will see in the docs, trust certificates are available for distribution to individuals, with certain restrictions. Keep in mind that the trust is a contract and may be modified in any way that suits the involved parties so that what is written is not in stone until signed by the parties.

It is our intention to distribute the trust certificates(TC) to those workers in the projects that show the most desire and commitment so that when the project is liquidated at its termination those people will hold the extra benefit that they put into the project in their

hand/account.

Keeping that the contract may be modified by the trustees at the direction of their boss to fit the situation in each project. As the trustees are hired by contract and that things have changed by then, it is in the contract that they will honor the wishes of their boss.

Although we may see darkly as in a glass, the basic future, the details are not created yet.

Light Hearts Sanctuary CAC#110

Working within the healing and carer community for many years, I have learnt and experienced the need for self healing and nurturance. As healers and humanitarians, we often experience a burnout of our own energies, leading to disempowerment and lack of joy. We wish to support and encourage good people to do their jobs with passion. Finding their creative joy and passion.

It is the intention of this project to create a safe and beautiful place(s) for retreat, recharge, community celebration and education, of planet and people friendly modems. Doing what they love, away from the normal activities and responsibilities of their everyday life.

We will be open to assist in the personal growth and development of people from a large area, by being centered in the middle of the country (U.K.) , possibly lower peaks depending on availability of potential sites.

With a wide and diverse range of activities to encourage personal expression and fulfillment. We will encourage self governance and soul sovereignty. The healing center and health facilities, including therapists and some structured workshops, will enable us to share skills and allow individuals to share their knowledge back into their communities.

One of the goals is to build an organic food supply for the centre and vegan restaurant. While showcasing and teaching methods of working with the land, ie permaculture and food forestry and how to include and promote diversity of plants, for humans and wildlife.

Light hearts sanctuary would also like to provide housing for on site staff (if wished), through the build of low impact homes; wood cabins, tree houses, lodges, cabins etc. This will take off the burden of commutes, strengthen the community of staff and strengthen the security of the site. Whilst giving privacy and independence of lifestyle, to their non working hours.

We wish to purchase a site of 50 acres minimum, with woodlands if possible. A large main building would be ideal for visitors and workshops, meetings, etc. By having large

enough grounds, we will also be able to invite healers and humanitarians to come and join in regular celebrations and events. Offering cabin style shared dorms, yurts, tipis, glamping pods, camping and camper/caravan facilities.

We do not envisage limits to our project, as we intend that it should grow based on the wishes and passions of those involved. Whether they be a gardener, therapist, builder, cook, painter, potter, sewer, dancer, musician or writer etc. We expect to quickly need to employ over 200 good, honest and reliable people, trained in each area of their speciality and running all facilities and departments. This again is expected to grow with our success, as we expand to take on new sites and facilities.

Our innovation centre is to support the development of incoming tech and shared knowledge and resources. We hope to include mechanical, engineered and electronic projects, as guided by those with the skills to take on these projects.

Our desire is to always work in harmony with the people and planet, treading lightly and improving our environment by our actions. Recycling, upcycling, goods and material swap shop, compost toilets on site, reed bed water filtration system if site allows etc. We would operate on a donate/ give/pay what you want/can, to our non for profit organisation/trust. To include options of; work on site in return for food, shelter and or workshops etc, schemes. Possibly on a token basis for non staff members/visitors. All donations to be spent on local celebrations for the community.

No More Sticker Projects [CAC#111](#)

Introduction:

A Place Where the Orphans and Silver Hair Generation and The Brave who made US Free along with the Furry Critters to roam. Somewhere to lay their head and have a place to call home and find peace and talk/learn about Our FATHER. My project is about everyday living and American Family Outdoor Fun. Getting to know each other, living off the Land. Growing fruit and vegetables, herbs, fishing, riding horses, UTVs, Cooking, Concerts, Speakers, Teachers, Restaurant, Camping, building their own space, natural healing center, Med Beds, making furniture, canning, greenhouses, landscaping, widows selling their jelly, resale junk like metal art, old furniture. Looking out for each other. There will always be a place to stay or call home.

Mission Statement:

Stay close to the FATHER and Let Your Spiritual Journey begin.

Objectives and Strategy:

My Project starts with purchasing Land at least Three Thousand Acres to start with a couple of Fishing Ponds on it. Trees would be an added bonus. From there we need to build a Seven Thousand square foot Barn dominium. This would be the Center Structure to start all other Structures. Welcoming Everyone on their healing journey. We can all help each other build, landscape, and heal Our Bodies and souls. Work is good

for the soul as long as it does not become slavery, just my two cents. I have purchased Zim in hopes to help others in my Project or other Humanitarian projects. I see a New Community of Freedom loving People wanting to help and grow in this New World to come.

Future Growth:

This Community can go on indefinitely and even more around Our Nation and World.

Special Consideration:

I have worked for the Public for well over 30 years. I am good with people and when I do something I do it right the first time. I make things beautiful. Now think about all the different people who need a place to call home and what better way than to teach them how to grow, build, make and find peace doing so. No more pressure or stress of doing without. No more negative worries. What a great feeling.

Target Groups:

- Homeless Military
- Elderly
- Orphans
- Horses
- Dogs
- Cats

Staff:

There will be many available jobs to make this happen

- Construction workers
- Grounds keepers
- Landscapers
- Caretakers
- Maintenance
- Housekeeping
- Medical Personnel
- Hospitality Personnel

Cost Estimates:

I have been told that I will have access to a team with this sort of expertise. I do know that this is quite an endeavor.

Final Comment:

We are put on earth to help others. And helping others succeed in all aspects of life. I have seen all kinds of struggles including my own. It is time to grow spiritually in love with others. It is time for "No More Stickers."

Creation of the Sensus Vitae CAC#112

Preamble

This document is intended for the members who will make up the redemption team and will be used to present in detail all the humanitarian actions, in connection with the exchange of foreign currencies and Zim or SKR bonds.

This document will be strictly confidential except for persons subject to an NDA.

Through this manuscript, it is indicated all the reflections undertaken for several months now relating to the choice of actions on the one hand and the conduct of the operations to be carried out on the other hand, for a rapid implementation of the ambitious program and realistic of the LOVE WON SOCIETY and associated personal projects.

Given the challenges and humanitarian problems in the world, linked on the one hand to the weightlessness of the administrative procedures and on the other hand to the difficult dialogues in certain countries, it would be desirable to have the support of an adviser from the Alliance and/or cooperation of international benefactors dedicated to the implementation of the programs.

It goes without saying that the full realization of the projects will depend on the status of France subject to universal laws, to the original constitutional laws and to GESARA.

Creation of the Sensus Vitae Trust

Why this creation ?

Although the initial investment comes from a voluntary and personal expense, it is only intended to serve humanity through concrete and realistic projects. The level of awareness and the experience acquired over the past three years have gradually led me to modify my vision of the world. A transformation and a paradigm shift to move from a life subject to the dictat of a globalist elite to a life of abundance and love for humanity including the diversity of living beings and plants.

This trust aims to protect and help people, optimize natural resources and allow the inviolability of material and real estate! A right for everyone.

The multiplicity of actions must meet specifications established by the administrators and benefactors, in order to facilitate donations, the sharing of RSS income, subsidies and investments.

Community Assistance Centers (CAC) will be created for the smooth running of operations.

All the proposed programs will be the subject of operations for philanthropic and charitable purposes. **No profit can be derived from it.**

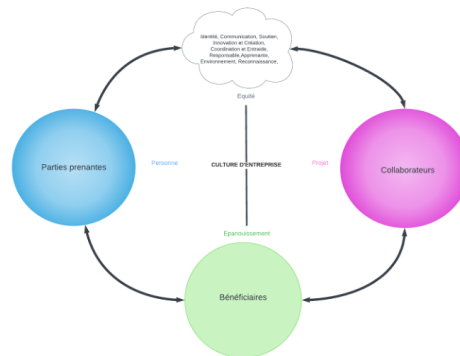

The transmission of most of the wealth of donor millionaires is not a transaction but a transition.

The future and the protection of each member of my family and of all generations must be ensured in the establishment of the plan.

The legal arrangement of this trust is revocable and will be entrusted to an administrator (trustee) under a specific contract.

The organization and the management will have to be done in a transparent way with a CODIR which will meet once a year. He will also have to elaborate a strategy of the organization for the HUNDRED YEARS to come. For a good installation of the personal programs associated with the programs of the LOVE WON SOCIETY, this committee of the directors will have to meet monthly during the first three years.

Culture - Mission, Vision and Core Values

OUR MISSION is to bring about the new golden age, to replace the mentality of scarcity with a mentality of abundance for humanity as a whole. The plan is to distribute through the whole LWS program, the available money donated by a few billionaires for the safeguard of humanity, animals, plants and minerals of our planet Gaia.

We put people at the heart of our projects aimed at job creation, in a dynamic of sustainable development, a source of social, societal, environmental and economically viable responsibility.

The implementation of the LWS program associated with the programs of the Family Trust SENSUS VITAE, will allow the realization of intergenerational aid projects, but also the planning of grants dedicated to the fields of health, economic development and territories through the support local businesses and artisans , job creation, innovation, agriculture and personal and spiritual development.

The projects correspond to all the key axes based on an expected durability of more than one hundred years.

Many are those who survive in the greatest precariousness, without ever having been able to flourish or enjoy a so-called “normal” existence because they are excluded or marginalized by this constraining, structured and specific society in which we live. “Making life meaningful” is what the Family Trust and LWS programs are all about!

OUR VISION will be realized through the RSS, CAC NRELS, ICCH and ESS programs of the LWS (LWI). Restore all legitimacy and dignity to all beneficiaries.

Recipients will be filled with hope in the eradication of all diseases whether physical or mental, disabling or incurable. An ode to life, a triumph of will, courage, good over the forces of evil and chaos.

One of our main **CORE VALUES** is to give meaning to life!

- We must open the way to a better and happy life filled with small and great happiness for each of our beneficiaries.
- We must learn to release all resentment, anger and guilt that have fed the emotional bodies with negative vibrations.
- We must learn to forgive, to communicate, to share, to respect each other, to get closer to mother nature but above all to bring out the luminous particles that are in each of us.
- We value people and building relationships, not what they own.
- We value transparency to create an environment of trust.
- We seek simplicity in everything and in everything we do.
- We act with generosity, benevolence with respect for fairness, integrity and justice for all.
- We place people at the heart of our actions. Each person is unique and we respect the principle of singularity.

Personalized projects associated with x RSS - NRELS – ESS – ICCH programs.

Definition of projects.

- Setting up **RSS** (from my REFERRAL ID)
- Creation of the **CAC PARIS** .
<https://www.wework.com/fr-FR//office-space/paris>
- Implementation of access to property with the **NRELS program** (inviolability of houses, apartments, etc.) with an increase in **RSS downloads**.
- Acquisitions of intergenerational houses,
- **BOCA /ECS contracts** for contractors and their employees who will work on our sites or in our structures.
- Establishment of Employer Contracts and Employee Contracts for VSEs, craftsmen through my network of the CMA Hauts de France.
- **ICCH** Redistribution and New Technology Program administered by **LWI**
- **ESS** Economic Stability Program administered by **LWI**

INTERGENERATIONAL HOUSES

- Example of Bastide on 2.7 hectares which will be renovated for

- accessibility for people with reduced mobility.
- All of our residents will enter the RSS program.
 - These residences will welcome the elderly living in unacceptable conditions or in great precariousness.
 - Eradication of the isolation and exclusion of many of our seniors.
 - Recreating a link will be important by setting up spaces dedicated to older people who are often homeless or living below the poverty line.
 - **These intergenerational residences will be exceptional and FREE places to live for those who have never or little had the chance to experience the warmth of a real home.**
 - The objective is to open a residence per department, i.e. a hundred residences, by engaging in a dynamic on the energy renovation of buildings and by using innovative materials or materials from organic farming (hemp)

This work will be carried out by VSEs and SMEs in the geographical areas of the residences to be renovated, allowing the creation of new jobs (BOCA/ECS contracts). A double challenge for the economic development of small and medium-sized enterprises.

ANIMAL HEALTH

- Each resident will be able to bring their animal and the residences will be equipped with shelters with care units dedicated to the most faithful companions.
- Abandoned animals will live in harmony with the elders, in complete freedom through facilities that will be entirely dedicated to them.
- Essential to the well-being of our seniors, hairballs will be pampered and cared for by all residents and staff.

AGRICULTURE

- **A sustainable development program will be implemented** through the action plan of the economic stabilization system (ESS).
- Farmers and companies that will develop products from organic farming will be supported in the purchase of their production at premium prices over several years, thus allowing them to stabilize and make their business profitable over the long term. *Mens sana in corpore sano.*
- Aid for the acquisition of innovative agricultural equipment will also be granted. Healthy living requires a considerable effort but above all a lot of investment and a lot of human resources.

- The ICCH and ESS programs will create jobs (supervisors, farmers, technicians, engineers, managers, salespeople) to guarantee on the one hand tillage without inputs but also for the purchase of innovative and high-tech equipment. and on the other hand, to market the harvested products.
- The very essence of longevity comes from what we eat.
- Giving the planet back its place and its size will allow us to consume better and live in perfect harmony with nature.

HUMAN HEALTH - HEALING CENTER AND SCAN CENTER

- **The purchase and installation of MedBeds (medical beds) will be used to treat all populations FREE of charge, prioritizing vulnerable people such as traumatized children, the elderly and people suffering from aggravating illnesses.** (Program support with a Humanitarian)
- With an estimated purchase cost of 150,000 euros for the three models of beds, adding the necessary costs for their use (costs of nursing staff, doctors, nurses, premises, fixed costs), we hope to be able to create 13 care units corresponding to the number of regions in France.

ERADICATING POVERTY WORLDWIDE

- **Famine in the world must TOTALLY disappear**, we must ensure that people are able to live decently and with dignity!
- The programs will be put in place to ensure children from all over the world a happy life by providing the means for the construction of well drilling (drinking water), agricultural crops, construction of HEALING centers, construction of buildings, housing etc.
- Quite simply, to assure them of the independence of a life turned towards modernity, a future filled with hope.

CREATION OF SCHOOLS AROUND THE WORLD

- Access to education and culture for young girls around the world is one of the important issues, so that they can hold all the cards and understand the world around them.
- 132 million out-of-school girls in the world!
- The creation of schools accompanied by logistical support will allow them to emancipate themselves and considerably improve their conditions to acquire a healthy and productive life.

- **They will no longer be under the yoke of forced marriage or modern slavery** . More than one in six young girls is out of school worldwide.

REHABILITATION, LEARNING AND RESEARCH CENTER

- Many young people have no goals, let alone a future, because they are not qualified or simply trained.
- Many of them are unaccompanied or in great financial distress. The dream of being able to afford a high school or to study abroad then becomes a real obstacle course or quite simply a dream with no future.
- **Helping a few young people excluded from the school system each year to integrate the biggest schools would be the best way to get them to join our cause.**
- Partnerships with the EDHEC and ESSEC networks will be set up as soon as possible.
- Eradication of school dropout, illiteracy, a real scourge in certain departments and rural areas for the creation of tailor-made learning centers, the establishment of mobility adapted and oriented towards isolated and disabled people.
- Open source class opening with sports and fun activities.
- Learning (by speaking) foreign languages from the start of nursery or kindergarten.
- Apprenticeship through paid professional training (RSS if major, BOCA and ECS) for all small businesses and artisans.
- Creation of learning and research centers dedicated to organic, underwater, horticultural agricultural fields...
- Learning spiritual teaching.
- Creation of self-paced online modules freely accessible to the world on real natural health practices not taught in universities. (Preventive and curative care from plants)
- University with interactive modules for the study of the latest technologies (plasma, magnetic levitation, etc.)
- Creation of creative workshops for the arts, music, dance, theater, visual arts and link with art therapy
- Construction of a World Academy of Ascension Light for the mastery of our individual abilities.
- Implementation of modules accessible to all on telekinesis, levitation, bi-location, mastery of the elements, etc.)

The expected results

- Abundance and wealth for all RSS – Lifting humanity out of poverty
- Community Aids from Nonprofit Organizations RSS + Grants
- Help for service companies – BOCA-ECS contracts
- Assistance to large companies and national associations – ICCH - ESS programs
- Care and shelter for vulnerable people, children, tortured, traumatized and abused adolescents.
- Help with academic support and business creation for young girls around the world.
- Funding and creation of open source centers or schools
- Subsidy for young people from disadvantaged families to finance studies (Trusts)
- Care and shelter for isolated and excluded elderly people (300,000 people for 100 residences in France)
- Care and shelter for the homeless and people living below the poverty line (a majority located on the outskirts of Paris)
- Care and shelter of abandoned pets.
- Acquisition and management of a hundred intergenerational residences.
- Rehabilitation in accessible buildings (Ad'AP) and low energy consumption (HQE)
- Creation of permanent jobs nurses, doctors, veterinarians, personal services, administrative and technical jobs, agricultural engineers, agricultural workers, naturopaths, osteopaths, architects, project management assistants, engineers and technicians for the use of Med - Beds .
- Free care for the entire population thanks to Med- Beds centres .
- Resources from organic plantations to finance the running costs of residences.

Players

- The " Sensus Vitae" trust, the trustees, the general managers, the directors of CAC, all the employees, the appointed adviser.
- The Organization of United Nations
- The Alliance
- The Love Won Society and the Love Won Industry
- International humanitarian organizations
- For the protection of human rights (against violence and abuse)
- International humanitarian assistance (education, nutrition)

- Action against hunger
- Governments (Gesara / Nesara)
- Financial Partners (private banks)
- Consular Chambers (Agriculture, Crafts, Industry)
- national education
- Council of the Order of Independent Physicians
- The national order of veterinarians
- Territorial and local authorities (town halls, departmental councils, regions)
- Social and Children's Services
- Personal assistance organizations and home help services

Operations strategy

Advance Planning Checklists

- Checklist before redemption
- Post Redemption Checklist
- Checklist after 2 months of project
- CAC Checklist

Checklist before redemption

Am I prepared for a good state of awareness and confidence for the realization of my projects?	YES	
Have I prepared my Bullet point project?	YES	
Did I take my files from the LWS (5 programs)?	YES	

Have I prepared my action plan for my first CAC?	YES	
Did I have my loved ones sign the NDAs before the appointment?	YES	
Have I prepared my currency and bond table with desired amounts?	YES	
Have I thought about my structured payment terms?	YES	
Have I prepared all of my documents (CNI + proof of residence)	YES	
Have I thought about the name of my (or my) Trusts?	YES	
Have I prepared my list of questions for my advisor?	YES	

Post Redemption Checklist

Have I made an appointment with my Angel to work together? he is with me at the moment and answers my questions	YES	
Did I get a schedule with my angel?		NOPE
How is my frequency? excellent	XXX	
Can I build time into my schedule to work on myself and stay in the moment?	YES	
Have I made my list of immediate goals?	YES	
Have I asked for all the contact details of the people I met (Advisor, banker, lawyer, lawyers)?		NOPE
Have I taken the time to understand what awaits me and what I need to start?	YES	
Have I had my letter of recommendation signed to be general manager?		NOPE
Have I sent my recommendation letter and signed agreement to the LWS?		NOPE
Have I taken the time to assess my immediate personal needs and those of my family?	YES	
Are all my Trusts and CAC accounts set up to show the flow of funds? Will be done after redemption with my counselor		NOPE
Have I thought about hiring a security team for my CAC?		NOPE
Have I developed all of my core values, culture, mission and vision before hiring managers?	YES	
Have I taken care to draw up my lists of priorities?	YES	
Who will be the first to subscribe to the RSS? My friends, my family, my managers	YES	
Have I printed my RSS cards and CAC business cards?	YES	NOPE

Have I taken the time to think of a logo, graphic charter for my CAC?		NOPE
Have I thought about my very first actions?	YES	
What do I tell everyone who is not included in my confidentiality agreement?	YES	
Have I identified my first assistant directors, personal assistants, etc.? ?	YES	
Have you planned a strategic team to work with?	YES	
Did I find the location of my first CAC?	YES	
How did I plan the interior layout, the work to be done, the style, the concept?	YES	NOPE
Did I establish an organization chart of my first structure?	YES	
Have I made an understanding diagram of each program?	YES	
Have I thought about my training plan? For whom and how?		NOPE
Have I planned for my directors to take the Director Training Academy ?	YES	
What will be my first missions to carry out urgently, type of people to reach, how and why? <i>see appendix</i>	YES	
Have I drawn up my list of tasks to be accomplished for the proper functioning of the CAC (telecommunications, IT, furniture, suppliers, craftsmen, contractors)?		NOPE
Have I thought about creating operating accounts for the directors of each program? <i>Will be done on the day of redemption with my counselor</i>		NOPE
Have I thought about implementing the CAC in my absence?	YES	
Have I built a plan of my first actions?	YES	

Checklist after 2 months of operation

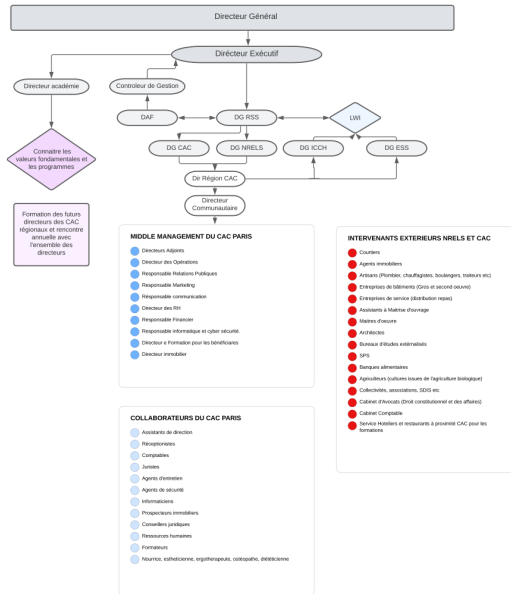

Who will be part of my startup team?		
Have I hired my executive director yet ?		NOPE
Where am I in my CAC advancement	X	
Have I set up a strategic team? Where is my strategic planning?		NOPE
Have I created my COPIL?		NOPE
Have I created my COMEX?		NOPE
Have I created my CODIR?		NOPE
What are the positive and negative feedback from startups?		
Am I available enough and am I always in the present?		
Do I still have a lot of questions to ask my angel, my advisor?		
What are the impacts of my plan on the community?		
Have I piqued their interest enough?		
What is the level of their involvement and/or enthusiasm?		
Is my team able to federate and give names of people?		
Am I on time		
Where is the development of the training manual?		
Have I delegated enough? Am I overwhelmed?		
What is my vibration level?		
Is my advisory board set up?		
What were the priorities put in place?		
Feedback with my management team		
Have I found outside contributors (lawyer, accountant, brokers,		

etc.)?		
Have I built a community relations plan?		
Where am I with my first action plan?		
Have I done a critical needs assessment of my team? Need the community?		
How many homeless people have we helped? Do we have to relocate urgently?		

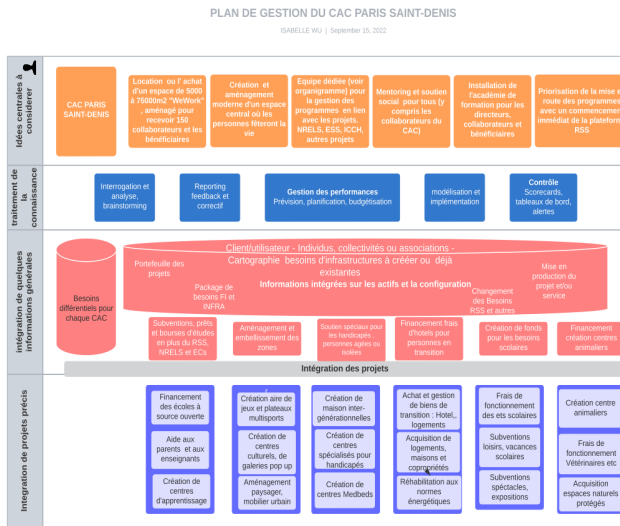

CAC Checklist

Did I find the address of my first CAC?	YES	
Will I have to fix it?	YES	
How am I going to structure it? and What services will be available to my employees?	XX	
What type of layout?		
Do I know the rental or purchase price?	YES	
Have I thought of an information and telephone connection? Which Operator? What type of computer? Cyber security?	YES	XX
Do I need order service? Which company ?	YES	XX

Project management

Paris Saint-Denis CAC Management Plan

Recruitment plan

- Start-up team – Who will be part of it?
- The Director General and the Executive Directors will be responsible for

recruiting all the directors of RSS, CAC, NRELS, ICCH and ESS. (People who will help with strategic planning and gave the tentacles of the community, people obviously receptive to the project)

- Each Director will in turn recruit his Deputy Directors and collaborators. Interdisciplinary people who will form the executive advisory board, implementation and financial management of each program)
- Recruitment of collaborators will also be done using Quantum computing for the insurance and the optimal guarantee of the execution of tasks without any attempt at embezzlement or conflict of interest. (HR, Marketing, Communication, Public Relations)
- The first recruitments will be made with our heart and our intuition, in our soul and conscience and with the help of God.

Training plan

- Strategic training planning for Directors
- Creation of the TRADING ACADEMY DIRECTOR
- Creation of the TRADING ACADEMY EMPLOYMENT & BENEFICIARY

Communication Plan - Public and Community Relations

- Name of the CAC PARIS SAINT-DENIS example “SERENITY CENTER PARIS SAINT-DENIS”
- Find a webmaster, graphic designer, content creators, editors, photographers, videographers, social media managers.
- Creation of a logo and a graphic charter
- Purchase of domains and filing of trademarks with the INPI of names and domains
- Creation of flyers, business cards, videos...
- Creation of the Community Public Relations team to meet local and territorial elected officials, parliamentarians, and government services.
- Establishment of an emergency cell and a free number to contact the CAC.
- Implementation of an advertising campaign for the CAC (priority aid and urgent needs for the homeless, isolated elderly, abused people, young people left to fend for themselves)
- Linking with the Consular Chambers (Chamber of Agriculture, Chamber of Trades and Crafts, Chamber of Agriculture at Regional and National level)
- Linking with Professional Organizations (CAPEB, OPPBTP, U2P, FFB, UNEC, etc.)

Budgetary approach .

* Tous les frais comptables, coûts juridiques, honoraires notaires et huissiers ne sont pas inclus dans le tableau ci-dessus

All surplus income or capital will be put on the “Surety” account for the financing of related humanitarian projects.

This is only a provisional estimate which will be reassessed by the DAF and his deputies. Additional research for acquisitions will be conducted by the Wealth Management team.

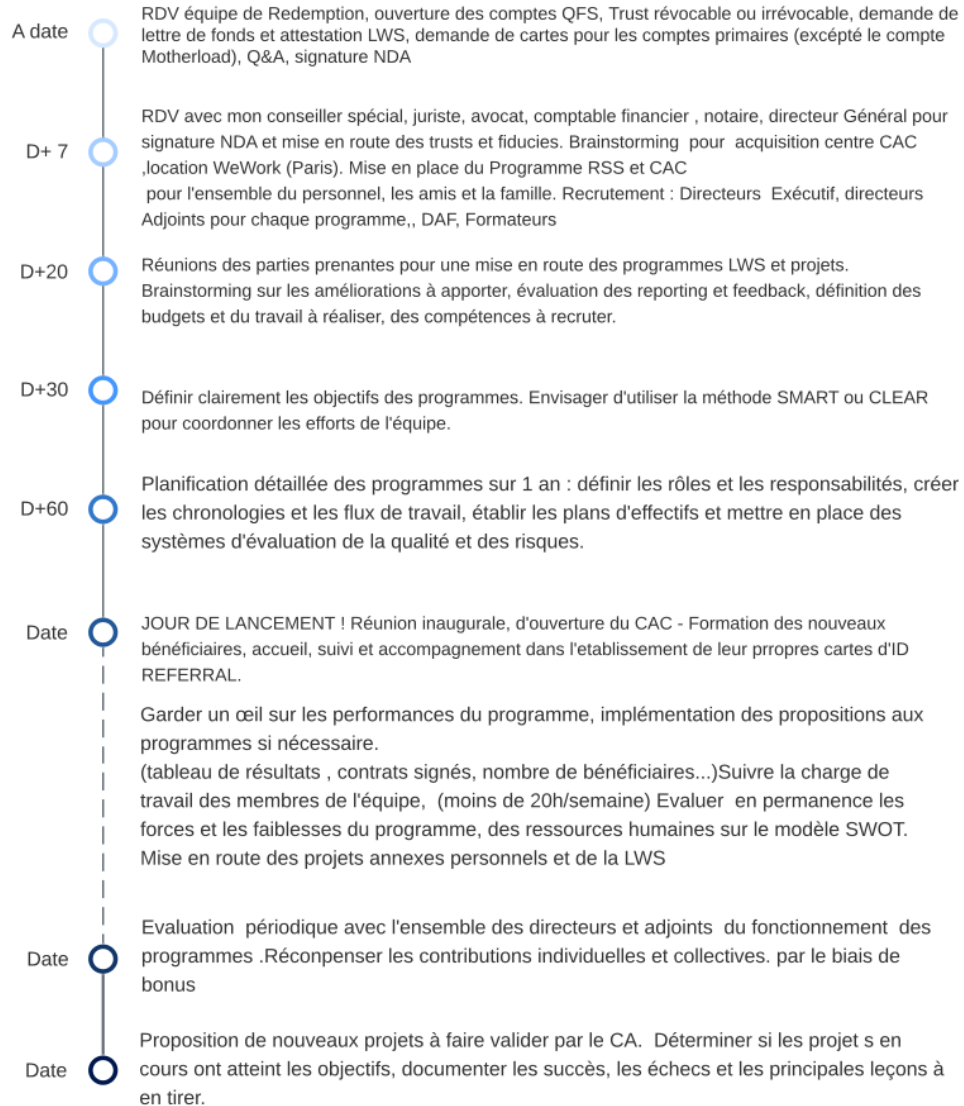

In addition to funding for the above projects, an appropriate percentage will be used for personal purposes to support my family, friends who are in need.

All figures are in euros without consideration of inflation (2021).

General planning

PLANNING GÉNÉRAL

Calendrier

Conclusion

In the near future, our foundation will be an important player in the field of development aid, with the aim of being particularly omnipresent in the sectors of health, well-being, education, agriculture, and the environment. The trust will primarily help people in distress living below the poverty line around the world, as well as service companies that create local jobs.

Acting and giving back to a certain extent, what we have earned, through a culture of trust and recognition is the SENSUS VITAE.

A change of paradigm, of behavior, capable of satisfying in a sustainable and transparent way, the interests of rights holders, donors and beneficiaries.

GALACTIC PROJECTS AND PATENTS

Vision: I plan to fund all the needs of the Alliance for as long as I can accommodate. If the Alliance contacts me for Galactic Projects I will fund the healing and restoration and whatever else needs be.

I plan to fund suppressed patents such as free energy and technology.

GLOBAL PRESERVATION & CONSERVATION

Vision: Limit building on land in areas to allow nature to survive in the habitat. Make sure all towns have building limits set.

Add structures to allow cohabitation with humans and animals.

HOW

Buy remaining land lots.

Teach people how to cohabitate with farm animals, wild animals, plants.

Use land for rotation of animals/farm food into contracts with farmers. The land can be of use for free to farmers.

LEARNING CENTERS

Vision: Replace schools and colleges into real-life learning centers.

Children/adults can choose what they want to learn based on their heart center.

Children/adults will be able to learn at their own pace.

Real history and skills can be taught at these centers.

Spiritual teachings and healthy practices can be taught.

In the beginning stages how to heal and how to expand the life force of one can be taught.

All ages are welcome to teach, share information, and learn.

Will be set up as a community structure so everyone can get to know one another.

RESTORATION

Vision: Global locations for farmers, artists, herbalist, ect., to go to for support and supplies to keep them in business.

Ex: Restoration of overcropped Frankincense trees, underpaid and taken advantage of cocoa farmers.

Research and develop programs to bring back extinct plants and herbs

Old & Young Living together, learning to act [CAC#115](#)

Introduction

No Poverty, No Hunger, Health and Well-Being, Quality Education, Child, Male and Female Equality, Clean Water and Sanitation, Affordable and Clean Energy, Decent Work and Economic Growth, Climate Action, Peace and Justice.

In our multigenerational houses, grandparents, parents, children and grandchildren live under one roof. They develop and consolidate love, human dignity, happiness and health, help and support each other and strengthen family ties.

Every child is given the opportunities for schooling and is prepared for a future profession.

You will learn and consolidate the traditional values of the Filipino generations. You use and maintain your cultural heritage, do sports, and keep your body healthy.

They learn about the values of nature, care for and protect nature and the environment and use their yields and natural products for a healthy diet, avoiding unnecessary waste. They engage with animals, learn to love them and consider them an important part of their existence.

Philippines: An end to the throwaway madness, an end to hunger and poverty.

Thunderstorms, typhoons and flooding

Storms, typhoons and floods constantly have devastating effects on people and their quality of life.

Shoddy shelters, tin shacks and constant danger cause hardship and fear

Philippines - Food from the garbage dump In the Philippines, more and more food is being thrown away. But many poor people are forced to look for their food at garbage dumps.

Every day, the children of the slum enter the water again to fish recyclable items or plastic waste from the bay, which washes the city's waste directly in front of their huts. 9.3 million kilograms per day is produced in the cities and suburbs, according to the Ministry of Environment.

1. business idea

Our project is a humanitarian, social project. We will build a housing estate with multi-generation houses.

Components of the project are rooms and open spaces for childcare, school and education, culture, sports and recreation, agriculture and animal husbandry, as well as medical care, catering and various courses.

"Hunger and poverty under palm trees" - this is the shortest way to describe the situation in the Philippines. The bitter poverty of the population stands in stark contrast to the vacation paradise for tourists on dreamlike beaches with turquoise blue sea.

44% of the urban population lives in slums. Entire families, who have lost their livelihood in the countryside, dwell in garbage heaps, cemeteries, along country roads, on embankments or under bridges.

In the multigenerational houses, grandparents, parents, children, teenagers and grandchildren live under one roof. They live and deepen social contacts. They learn from each other, care for each other and help each other.

We prevent hunger and poverty by creating areas for the cultivation of vegetables and fruit, as well as animal husbandry, and create conditions for clean drinking water and adequate sanitation, showering and washing facilities.

We have partners who provide training on more sustainable farming practices and efficient irrigation systems, and help with drought-resistant seeds.

During and especially after the completion of the project, about 20 jobs will be created, which will actively participate in the implementation of our business idea.

Activities, as craftsmen, caterers, service providers, teachers, kindergarten teachers and instructors, event managers and staff, course instructors, administrative and office staff, IT representatives as well as course instructors, medical staff, animal keepers and caretakers, farmers and fishermen.

There will be training rooms and ample space for childcare. We create opportunities for nature-based education and training. Courses for learning about flora and fauna, herbs and mushrooms for nutrition and health.

Various spaces and open areas will be created that can be used for learning, childcare, interaction with plants and animals, conservation and protection of nature and the environment.

Children learn about the plant and animal world, are engaged in handicrafts and agriculture, participate in the production of natural products and learn to eat healthy. In addition, there are various courses, outdoor lessons with practical relevance, enjoyment of work and preparation for vocational training.

3. humanitarian goals

Our goal is to enable the people who use and contribute to our project to survive in dignity and safety, to give them a perspective on life and to alleviate human suffering.

Our actions are directed to the protection and care of people who are currently in a humanitarian emergency. On the one hand measures for first aid and with the completion of our project there are possibilities and conditions which go beyond first aid.

The children and young people learn how to produce environmentally friendly products themselves, how to live close to nature, which herbs and plants are given to us by nature and can be used for healthy nutrition as well as healing purposes.

Children and young people learn things that you really need.

- Nonviolent communication - folk and natural medicine
- Truly healthy nutrition - Self-care
- Rules of honest success - Direct democracy
- Free energy - Survival in the wild
- Herbs and plants as food - Loving and caring for animals

4. climate and environmental protection

In the project, alternative environmentally friendly options for energy production and use are applied. Each house has its own environmentally friendly energy supply and water supply.

Reusable bottles are used in our own water station, no plastic or environmentally harmful tableware and transport material.

There is enough drinking water for every resident, but also enough water for the animals, as well as for vegetable and plant cultivation and fruit growing. In the process, rainwater is also collected, stored and used wisely.

Environmental protection means the future, therefore sustainability has a very important meaning in our project. For us, sustainability means that we are constantly engaged with nature and the environment, learn from and with nature and study and maintain the knowledge and experience of our ancestors and ancestors and pass it on to future generations.

We create areas with lots of greenery, trees, herbs and plants, but also permanent cultivation of fruits and vegetables for their own supply and sale. The people who are themselves involved in the cultivation of plants and food have a completely new appreciation of nature and the environment.

Organic waste is composted and residual waste is sorted and separated for possible processing for reuse or environmentally friendly disposal

5. The sustainability of the project

Growing poverty, inequality and injustice, are not unique to the Philippines, but a

worldwide problem.

Our goal is to contribute to the fight against extreme poverty, to improve the living conditions of the people living in our project in the long term and permanently.

To this end, we link a total of three dimensions of sustainability that are inextricably linked and mutually dependent - social, environmental and economic.

We oppose discrimination, including people with disabilities. We treat all participants in the project equally, main principles are mutual respect, help and support, selflessness, love for people and animals.

The founders of the project act as stakeholders and closely cooperate with other groups of people and strong partners. We sell fish and seafood, fruits, herbs and vegetables from our own cultivation.

We organize excursions for interested people and support them. We organize lectures and courses on health and nutrition. With our project we also pursue the goal of involving people from the surrounding area in the cultivation, care and harvesting of our vegetables and fruit.

6. perspectives for the residents, especially for the children and young people.

Our multigenerational homes offer unique living conditions where older and younger people live together every day, learn from each other and help each other.

They take advantage of various opportunities for education, further training, sports and cultural leisure activities, which we see as an important part of our project and include in our daily work. The residents of our residential complex are actively involved in various measures. Healthy eating, courses, games and fun are on the agenda.

There are rooms and areas for the care of the children when the parents are working, but also the grandparents living in the house take care of the children and teenagers. They go with the children and adolescents to nature, to farmers, fishermen, craftsmen and entrepreneurs, where the children and adolescents can already engage in economic and agricultural activities, are actively involved in simple activities and work and produce their first consumer goods or products themselves.

The goal is that the children and young people have joy and fun in the activities and in the work, that your interest is aroused, that you yourself would like to use a vocational training, in order to be able to earn your living later and the living of your family, their children themselves, to be able to work independently and autonomously.

The planned approx. 10 jobs will primarily be filled by our tenants and they will be trained or qualified for this purpose.

7. recreation, learning, training, getting to know nature and the environment.

Hobbies are great and important. They're fun and help build social connections. They also promote development:

Music lessons, for example, have a positive effect on emotional and cognitive skills, sports train motor skills and are healthy.

Filipinos love singing, we encourage singing in groups, at KARAOKE, and we encourage learning instruments.

On the planned sports fields are sports and games to promote regular community activities, healthy lifestyle and exercise. Gymnastics classes in the pool, swimming lessons for children and much more.

We offer various courses in the rooms and open spaces, in nature and by the sea, where all generations in the project can present their experiences and learn from each other.

We offer different cultural opportunities in the form of various events. Theater concerts, among others, to preserve and promote cultural heritage. Together with our residents, we create smaller nature reserves where small animals, birds, beetles and insects can gather and develop.

We publish the results of these actions in the media to influence that the participants are proud of their results and experience appreciation.

8. planned measures

An essential condition of our project is the construction of a housing estate with multi-generation houses for 30 families with 3 and more children.

With the funding we want to acquire a central plot of land on which will be built the apartments, outbuildings, sports areas, pool and outdoor facilities, areas for recreation and relaxation, for growing vegetables, plants and fruits.

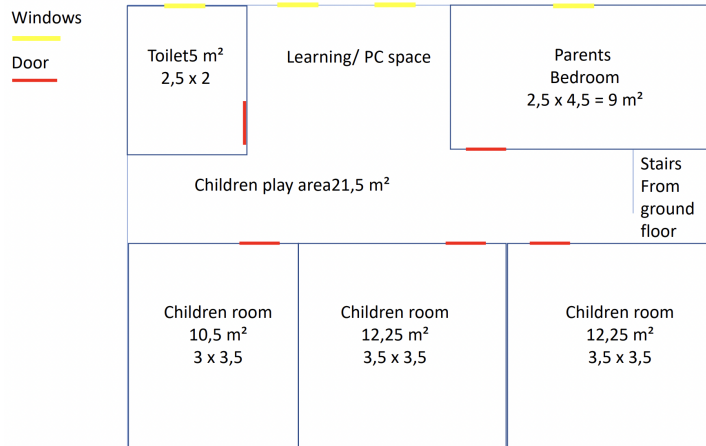

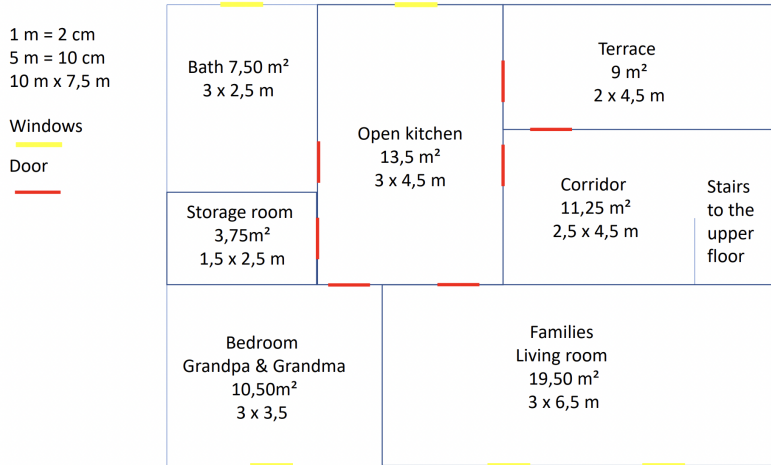

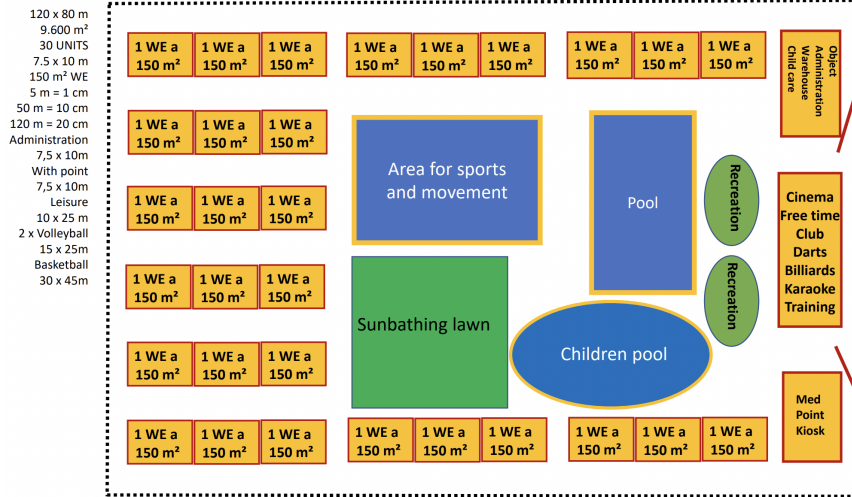

Part of the land is used for the cultivation of various local vegetables, plants and herbs. We plant fruit trees and create areas for the cultivation of fruits. A small pond with freshwater fish, for small animals, frogs, crabs and shrimps.

In the adjacent areas, the creation of stables on a natural basis and open spaces for various species of animals such as chickens, sheep, goats, pigs, etc. is carried out.

After completion of the project, the project is supported and financed by the rental income, for maintenance, ancillary rental costs, personnel costs, energy, water and events, purchase of sports and leisure articles, design of outdoor facilities, technology, transport costs, gasoline, as well as remuneration of mentors for courses and further training.

With the fair payment for the work done, the co-designers of the project and the employees receive, in addition to their professional activities, essential monthly income

for your rents and to arrange your livelihood.

Build Hope Community Centre CAC#117

The Community Centre will be an extension of the facilities offered by the Church of God 7th Day in Moore Street Derby.

The Church has been on this site for over 25yrs and facilitates events such as weddings, funerals, and baptisms within the Christian ethos.

Historically, Conventions, Seminars, Training Days, workshops and Health Promotion activities have been held at the church. Since Covid 19 pandemic started, online sessions have been held locally and internationally. A soup / sandwich outreach facility operates from this site weekly.

The venture is supported by several volunteers, in taking this project forward the Elkanah Trust aims:

- To deliver service using CAC, RSS, ESS, and NRELS Action Plans
- Appoint appropriate Director, Assistant Directors and other staff to effectively manage the project
- To Build The Community Centre, using land already available and suitable facilities
- To secure suitable infrastructure, office space within the nearby community for Philanthropic, humanitarian activities
- To provide Meals and Nutritional / Health Outreach
- A weekly soup kitchen / sandwich operates from the church, serving over 100 portions on a weekly basis, - Monday between 5 and 6pm. This is well received. Staff are trained in Food Hygiene. I am aware that a service operates nearby on a Friday evening, but does not conflict with what is being suggested To extend and further support the nutritional needs of the homeless through the development of restaurant facilities and other socially disadvantaged groups –
- To support training facilities for deprived communities with additional educational experiences
- To provide Bursaries – supporting the education of individuals into education opportunities aim at improving health and social outcomes locally. National and international

- support the provision of Gym facilities,
- Community Health will improve because of improve health care
- To offer access to MED Beds – when these become available
- Support well being through counseling music and art
- To offer support for mental health well being
- support people living with chronic health conditions for example diabetes
- To support global development / sponsorships – sponsoring charitable deeds within the national and international community's aimed and at improving life outcomes
- Support for other charitable endeavors through networking via church organizations globally
- To offer conferencing facilities
- To have cross over between Projects 1 and 2

Humanitarian Plan CAC#118

About me

I have had over 30 years of working in the education system, from primary to secondary level. I have come across children and families, including my own, who have suffered and are still suffering under the hands of dark forces and regimes. These include education, health, wellbeing, and lack of every kind. All lies and cover up to keep humanity under bondage and slave to their system.

I came across the Love One Society programme some years ago and did not think much of it- until late 2019 when I was directed again to this site. It felt at the time like something familiar, and so I decided to take a deep dive; and since- never looked back.

I have a sincere love for humanity, a great desire to help and am ready to do everything humanly possible with divine help to bring restoration to God's people on the earth.

Aim: To create a **self-sufficient community**- willing to support and help each other for the greater good of humanity. This model community can then be a testament to establish and build such a model in other communities near and far. The starting point is to find, educate, and establish Beneficiaries- within the family and around the community. These would be Beneficiaries with integrity- who share the vision of helping humanity.

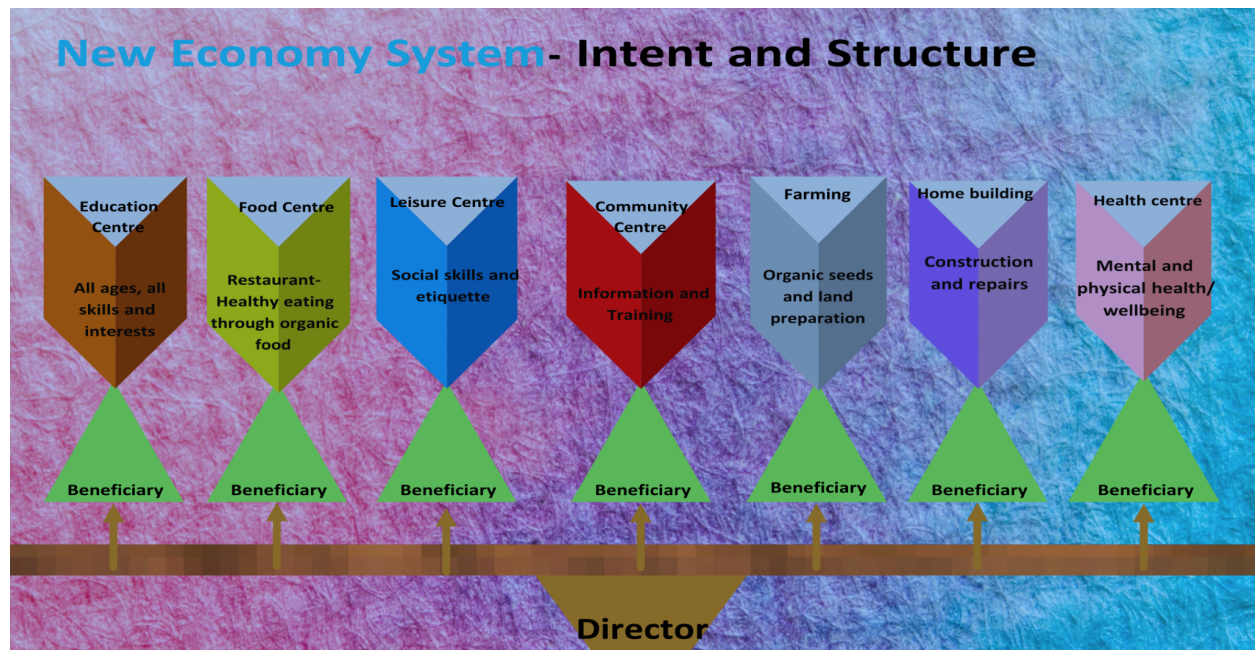

Action Plan:

1. Begin with a Community Centre- to promote the gathering of information, sharing of information, and training. By creating the foundation to establish needs and interest in the community, tailored training can be provided.
2. Move into the area of agriculture and farming- focussing on preparation of land and investing in organic seeds and plants to promote healthy food. This will include small

- scale home gardens and larger scales to support the wider community and export.
3. Construction and repairs. Seeking out people whose dwelling can be repaired and those who might need to be rehoused and housed for the first time. Creating a community of helpers within the community, under the umbrella of the Beneficiary.
 4. Create Health Centres, to cater for –Mental and Physical health and wellbeing within the community. Most of this information will be channeled from the Community Centre.
 5. The next three steps will follow accordingly. Leisure centre to continue building social skills and etiquette.
 6. Food centres and restaurants provide the community with healthy organic meals and food from the farmers for personal choice of preparing their own meals.
 7. Established Educational Centres for all ages- to promote and develop skills and interest for greater empowerment of the community and other communities at large.

As shown in the illustration attached, these are some of the intentions in a summary of my plan to support humanity.

I am sure it will involve much more than the skeleton plan or steps above, but with the help of the Alliances and my Angel, I am ready to put my shoulder to the wheel for the greater good of humanity.

Social Welfare Centers CAC#119

Application for projects for implementation in social welfare centers in the regions of Russia:

1. Academy for the training of teachers of the spiritual and moral formation of family values of various ethnic groups of the world.
2. Family planning center with the latest medical technologies, psychologists, teaching and medical staff.

Additional bonus program to encourage the creation of a family.

3. Center for technical creativity of different ages: preschool, school and adolescent with equipped workshops and personnel with a security system, emergency medical and psychological assistance.
4. Vocational training center for schoolchildren and adolescents with equipped training rooms with panoramic TV and vocational training and support, workshops for practical training in various activities of the society.

Additional bonus program to encourage the development of professions.

5. Project for the construction of a dispensary for the population of retirement age with reading rooms, rooms for master classes, creative workshops, rooms for literary readings and performing arts, recreational gymnastics and bioenergy practices, swimming pools and solariums, rooms for health-improving medical procedures, platforms for volleyball, tennis, a playground with exercise equipment, a stadium for jogging and a figure skating rink and equipped trails with observation for skiing.
6. A project for the construction of a mini-factory with a research center for water processing and saturation with minerals and useful components for the improvement and longevity of the population, as well as a laboratory for studying the effect of water properties on the environment.
7. Project for the construction of protected areas with related buildings.

The program will include: cleaning forests and reservoirs, planting trees and shrubs, planting mycelium, feeding animals and breeding rare species of birds and animals. Construction of forester's yards with a house and outbuildings, as well as a guest house for visitors to view animals feeding from observation platforms.

Construction of hotels for lovers of nature, fishing and hiking. Tourist routes with a security system.

8. Project for the construction of cottage townships of communities of various ethnic groups and confessions.

9. The project of building cities for pensioners or those who are over 60 years old.

Separate 4-5-storey houses in the form of cylinders with panoramic windows, planted around with a mixed forest of valuable tree species, interconnected by closed panoramic tunnels from paths for electric wheelchairs and walking paths.

The city assumes the harmony of man with nature with full care for the health and peace of mind of living pensioners.

Separate buildings of a cylindrical shape (in one architectural concept) provide an opportunity for all residents of the city to engage in all kinds of creativity, study of literature, sports, breathing and energy practices.

The city is under a unified system of security and social services.

The Sophia Trust CAC#120

Creation is sacred.

The hierogamous is the marriage of the sacred feminine and the sacred masculine. The masculine constructs, the feminine sources the fecund. As the feminine sources into form, action and being, vital and grace-filled, the masculine will heal and the marriage of the two will seed new earth. All we create will be resonant and effervescent, true to the sacred ways of life.

Energy has consciousness and form is energy. Form when created from source becomes love. Form when made for convenience and greed is black darkness. The past thousands of years the sacred plethora of beings has been decimated by the rule of the cabal. Physically, socially, emotionally, spiritually and energetically, all has been aborted and twisted by human arrogance, ego control, domination, violation, analysis distortion, cruelty, isolation from nature and spirit and each other, denial of that which seeds life and so on.

The results are visible as are the assumptions about how we live (what forms we live in and and with). Sprawl, highways, industrialization, technological obsession, mechanistic stuff, bulbous things, jail-like buildings, twisted and distorted buildings, and pavement suffocating life. The world we see is the cabal dissonance or dead energy. Nothing in new earth will be blasphemy.

We will seed places for the future and a new way of being. Objects, buildings and villages can and will be of the sacred source of life, in compassion, beauty and love. The Sophia Trust projects will be the hierogamous manifest.

The feminine grace, fecundity, gentility, connection, texture and delight will be infused and prolific amongst the pleasure of the masculine constructs. Villages, farms, schools will ground, root and engage the unseen joy and wisdom with:

1. Vernacular architecture of real dimensions, local materials, pattern, scale and relationship
2. Creation within the context of the myth and energy of place
3. Demeter certified biodynamic farms or local traditional farming
4. High end real craft businesses
5. Schools of traditional healing, wisdom, earth energy, food, music, objects building and craft

Designed in abandoned USA villages, along the east coast of the United States, each place will have a unique place specific focus. Outside of New Orleans, Savannah, Charleston, at the Florida panhandle, northern Alabama, Virginia mountains, and the Hudson River valley in New York, villages will be designed to settle humans with nature and the universal wisdom of beauty manifest.

Three projects will be designed abroad with the same focus and broadened into wisdom schools: northern Africa, north of St. Petersburg and southern France, in the area where Mary Magdalene lived. The French project will embody the sacred feminine in form and craft with a school, village, restaurant, inn and principles home. Russia and Africa will engage the essence of the local wisdom of form, design, resonance, materials, healing and pattern. When we heal how we create, we heal ourselves, our children and our future.

The principal will own a press and publish books on the sacred feminine in form. The principal has had environmental illness and has lived in a tent for ten years and so has a fairly accurate comprehension of the toxicity of form and so the importance of form for new earth.

The Sophia Trust CAC#121

CAC's will take over City and State Services as required.

- Interview and Employ Certified or Professional for each Service as needed.
- **The Public & current City, State Employees are Encouraged to Reapply for their Position.**
- Interview, Contract or Employ the Qualified Individuals.
- Provide Resources to Perform All Services.

Some Services Provided & Paid through Population Taxation by Cities and States.

- Police
- Fire

- Library
- Parks
- Natural Trails
- Animal Shelters
- Roadway Maintenance
- Trash Service
- Sewer/Waste System
- Dumps
- Community Services

Projects & Services will expand, contract and morph as needed.

Community Assistant Centers CAC#122
