

[NESARA Humanitarian Funding FM#101](#)

This letter is a brief summary for development of Sacred Heart Communities in the USA. It is the co-creation of two friends who are passionate about helping others to live independently and in harmony while on this Earth.

It is our mission to unite the skills and experience of people to create autonomous communities designed to end separation, poverty and hunger while living and caring for each other and respecting the Earth.

SH communities are autonomous co-op communities built in succession of 3, 6 and 9 throughout the USA. It is our hope that the design and strategic plans will be utilized by others around the world. The flow of the community is a Fibonacci design which respects the land, the people's privacy and their needs while creating a harmonious and energetically healing flow naturally.

Each community will include self-sustaining gardens and greenhouses, water filtration / collection and wells on the property. The gardens will include herbs, vegetables, fruit and nut trees and bushes. Each Sacred Heart Community will include a common area for spiritual, physical and traditional education. This center should be made from natural materials, mindful of the land and the people. This education and community area is designed to create unity and healing while preparing for the growth and evolution of future generations. Education and training will be inclusive and offered to all persons inside and outside of this community. Each member is encouraged and should be willing and able to participate, contribute and be an integral part of the furtherment and growth of their community.

The current vision includes 50 homes for families and 20 apartments for individuals who are committed to living and sharing their skills on site to create connection, inspiration and an impact on the future of our children. Included in the plan layout will be a healing center, bed and breakfast with cafe and shop to generate revenue from those coming into the community.

We are in hopes that there will be 3 Med Beds in the healing center of each community. The Healing center may be separate from the Community center. Each SH Community will be determined by the lay of the land.

The vision for these communities has been in our hearts for years and now it is time for the vision to become reality.

T9 Expanding Small Businesses Project FM#102

This project specializes in providing help to small businesses to start, expand, or help with getting ahead from the cost of being overtaxed and over insured. I am looking to invest in small businesses. Help them get started and to grow. I have over 25 years of environmental experience and have had several small businesses in the past. I lost my last business due to the Covid and the Texas Winter Storm in 2021. With all of the shutdowns, due to covid and other reasons, several small businesses are in the process of shutting down or have already shut down.

I would like to help these small businesses that are in a financial strain, by helping them get started again and help the ones that have managed to stay in business, to get ahead and out of their hardship. On my Humanitarian Project and with the wise guidance of teams of experts, working with specialists in every field; I am wanting to establish a humanitarian plan to help these small businesses, from the hard economic fall. Possibly build more strip malls with lower rental.

One of my main businesses that I would like to focus on is, small environmental companies. With my experience with running small businesses and environmental knowledge of properly disposing used and waste material correctly and finding the proper homes for the disposal material and my nationwide contacts with a variety of companies, I will help this small environmental companies to expand their companies in more assortment of job opportunities.

We can start a network of environmental companies that can help each other, with this we can help with the cleanup of all of the environmental needs of our country.

CAC Project: Banks FM#103

Contract with local banks and offer to purchase all assets and debt. Contract employees to stay on to convert existing mortgages into the NRELS program, providing downloads for their mortgage amount (if debts aren't completely removed).

Provide information on the NRELS for people looking for mortgages to purchase homes, provide downloads for their mortgages. (These will no longer be called mortgages?)

Provide downloads for people looking to purchase equipment, property, etc. for their business. People are used to going to the bank for their financial services; this is a good way to transition to a better future for everyone!

The Earth Desert Promotion Management Investment Group Project Plan FM#104

Application and use of humanitarian funds:

1. the Earth Desert promotes the establishment and operation of the Governance Investment Group
2. China, USA, Argentina, Africa, Australia, Saudi Arabia set up branches: xylitol production, nut cultivation, flower cultivation

Application and use of humanitarian funds:

1. the Earth Desert promotes the settlement of the housing of the graduate employees of the governance investment group (after five years of work, the total income is enough to buy a one-off house)
2. In China, the United States, Argentina, Africa (nine countries) , Australia, in Saudi Arabia, the company is working with local governments to invest in giant forest parks.

The earth desert promotes the construction of the governance investment group

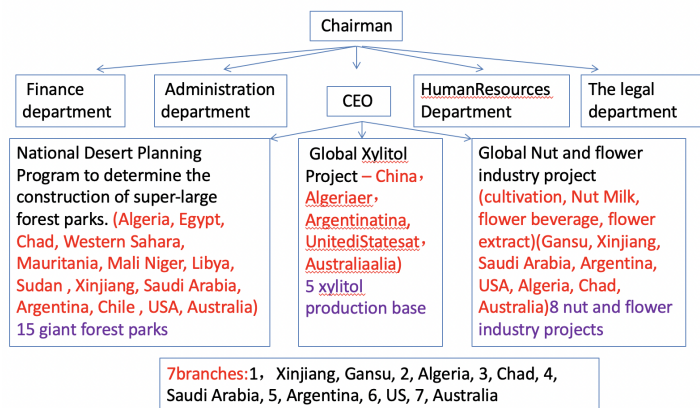

1. Global Desert Governance
2. Making the planet a better place
3. Changing the human diet
4. Caring for animals, not killing them, letting them live freely
5. Investing is not for profit, to make ends meet.

Project overview of the Earth Desert Drive Governance Investment Group:

1. promote the establishment of National Desert Planning Programs
2. the construction of super-sized forest parks in deserts of various countries (cooperation between local governments and Chinese governments or enterprises)

3. company project: Xylitol Production Project and Xylitol Soda Project.
4. the company planted flowers in desert greenhouses, and desert nut trees. (flower drinks and nut milk production of local beverage enterprises cooperation) (China, Saudi Arabia, Africa, Australia, the United States, Argentina) the Chinese embassy -- the governments of desert countries, the Chinese government, work together.

Organization structure of the Global Desert Governance Investment Group

QUANTUM HUMANITARIAN FINANCIAL: Worldwide Not-for-Profit Financial Services - Because life should be about living! FM#105

PROBLEM STATEMENT

Few Humans, if any, have experienced true financial freedom or lived a life of abundance. Humans become enslaved by the cabal’s 3D central banking paradigm from the moment of their physical birth and are subsequently forced to live their Human experience within the veiled confines of a “lack” mentality. Despite the cabal being dismantled and extinguished—for they reign no more—the negative, “lack” cabal programming seeped further into Humanity’s existence than many are aware. Humanity needs grace and multiple levels of support to awaken to the new 5D financial reality that is NOW.

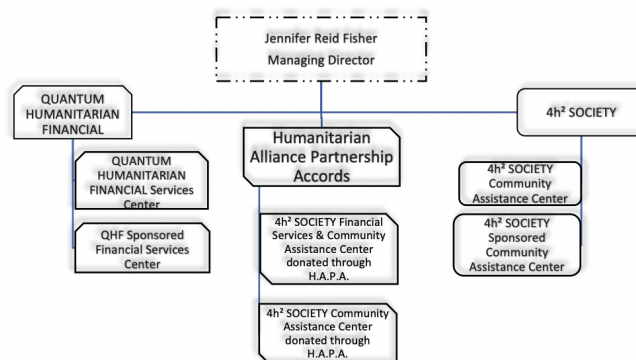

PROPOSED SOLUTION

Our mission is to create a worldwide (and hopefully galactic) network of thriving self-funded Humanitarian Financial Service Centers (FSC) and Community Assistance Centers (CAC) from the defunct central banking monopolies.

To accomplish this divine endeavor, QUANTUM HUMANITARIAN FINANCIAL (QHF) will acquire all available central banking infrastructures, both large and small, both known and unknown, and transition them into the QHF network. Within the acquisitions, tens of thousands of central banking structures will become available for rebranding, renewal, and repurposing as one of several 5D facilities options:

- 1) A QUANTUM HUMANITARIAN FINANCIAL* Service Center
- 2) A 4h² SOCIETY* Community Assistance Center (4h² SOCIETY = SOCIETY of Humanitarians Helping & Healing Humanity)
- 3) A 4h² SOCIETY sponsored Financial Service Center**
- 4) A 4h² SOCIETY sponsored Community Assistance Center**
- 5) A 4h² SOCIETY Community Assistance Center donated to a partnered Humanitarian organization via the Humanitarian Alliance Partnership Accords (H.A.P.A.) Project
- 6) A 4h² SOCIETY combined Financial Services & Community Assistance Center donated to a partnered Humanitarian organization via the H.A.P.A. Project

As each component of the QHF network manifests and becomes viable, the cabal's forced debt-slavery concepts will naturally become more and more transparent. Central banking entities will be exposed as having intentionally "overreached" into the Humanity's pockets to enforce cyclical indebtedness. Patrons who wish to transition into the new 5D Financial Services Industry will have ready access to the necessary technology to establish a Revenue Sharing Solutions (RSS) account, and partake in financial services built upon it, according to the universal law of free will.

VALUE

Not everyone will be ready for transition into 5D Financial Services at the same time. By meeting people within in their comfort zone(s), at the banking institutions they've come to know, and in continuing to support the legacy financial services they're accustomed to, but at no further cost to them, QUANTUM HUMANITARIAN FINANCIAL will help

Humanity slowly roll into the Quantum Financial Service (QFS) at a pace they can live with.

FINAL THOUGHTS & NEXT STEPS

Among the offerings within the multiple QUANTUM HUMANITARIAN FINANCIAL Service Centers and 4h² SOCIETY Community Assistance Centers, patrons will have access to: Traditional Banking Processes (checking/savings accounts), Vault and Safe Deposit Storage, Quantum Financial Services, Home Loans/Refinancing, Consumer Lending, and a bevy of community services and resources. We shall "Build it and they will come."

*Note that QUANTUM HUMANITARIAN FINANCIAL and 4h² SOCIETY are sister entities, operating independently with the same primary objectives and goals of not-for-profit services to Humanity worldwide and throughout the galaxy.

**Sponsorship applies to a Humanitarian entity that has been approved by The Alliance and has submitted their approval letter to LOVE WON SOCIETY (LWS) to participate in LWS programs.

[Business Start-up Program FM#106](#)

Foreword:

The following LWS program proposal is intended to help all people to become professionally self-employed with their own talents, skills, qualifications and especially what they really love to do.

Although the two programs RSS and ESS alone may be enough for many people, for others the desire for professional realization may be a very strong one. Also the desire for independence (from any employer) can be a great drive for this - I speak from 40 years of my own experience.

More and more people want to live free and independent and in any case no longer in the so-called "hamster wheel". They simply want to do what they enjoy most and what they do best. They want to look forward to their work. It is precisely for these people that this proposal has been developed.

So, it is about a professional self-employment, the creation of a business and a program that can support this desire of a beneficiary. Regardless of size and industry.

The aim of this proposal was also to ensure the smoothest possible integration with the already existing 5 LWS programs.

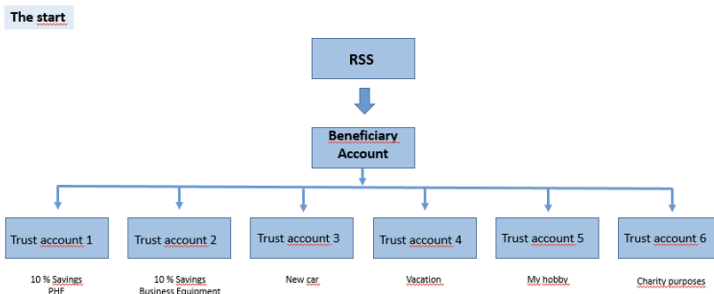

In my considerations, I essentially assumed business openings within a certain regional radius, which already assigns an important role to the CAC.

The start: "I love what I do"

After the beneficiary has set up his RSS account, he may decide, for example, to open another sub-account (Holding/Trust) e.g. to save the 10 percent down payment for his real estate purchase.

Following this example, the beneficiary could also open a sub-account, for example, to save a 10 percent down payment for his future business equipment. So we have a repeating principle here.

The amount of the calculated down payment is the responsibility of the beneficiary and requires his own research.

At the beginning there is the intimate desire of the beneficiary for professional self-realization within a certain industry and/or with a certain service. In the best case, this desire should be borne by love for the planned business activity. Possibly an interface to the QFS and the quantum consciousness can already be established here.

It might make sense to allow an additional download for the business start-up account, which could be based on the amount of the savings sum as well as on a savings period (still to be determined by the LWS/Allianz).

In particular, in order to determine the amount of investment needed/ desired, a professional business plan is required. It would be decided in this context to provide or hold out the prospect of providing the beneficiary with a fund/budget for an external consulting appointment with a professional. It would then be up to the start-up manager (see below) to grant such a support fund (non-repayable) to the beneficiary after an initial interview.

Alternatively, an established, already developed and proven concept (from third parties, i.e. franchise concept) could be adopted or adapted.

Step #2: "I know what I want and can do, and I know it's needed."

While still in the savings period, the beneficiary sets out for an appointment with the start-up manager at the regional CAC's Financial Center.

This meeting is to evaluate the beneficiary's desire. This involves, on the one hand, proof of qualifications and skills as well as the personal suitability of the beneficiary and, on the other hand, a feasibility and needs analysis/ regional due diligence regarding the business purpose. The beneficiary should be given tools to enable him to develop his own and serious business plan and due diligence by the end of the savings period. This is a prerequisite for business start-up (repayable) business financing.

If the beneficiary plans to also acquire a corresponding real estate for the performance of his business purpose, he will also take care of an appointment with the Manager Commercial Building Funding (CBF) in the Financial Center of the regional CAC.

The term for repayment of the commercial building funding is generally based on the business plan, but should not be less than 10 years.

It is the beneficiary's task to incorporate the acquisition of a commercial property into his business plan, taking into account the purchase price (and any existing ancillary purchase costs) and any renovation, modernization, conversion and extension work. In this context, the expected (regional) sustainability of the business purpose must be demonstrated by the beneficiary, in particular in coordination with the business start-up manager (see term for repayment of business building financing).

At the positive end of this process, the beneficiary will be credited the required amount to his newly opened business account in the RSS system (Financial Center in CAC). Proposal: the independently saved 10% for the business equipment remains on the savings account and serves as a security reserve for the business founder.

10 percent savings amount reached

Proof of personal education, qualifications, skills and talents with reference to the intended business purpose

Regional needs assessment and feasibility

Professional business plan

Thus, in order to benefit from the Business Startup Program, the beneficiary is required to provide the following evidence to the Business Startup Manager:

Step #3 "Can I do this alone or do I need employees?"

Depending on the size of the proposed business, salaried employees may also be required. This is where you will find the interface with the ESS- program (BOCA) as well as possibly another with the ICCH- program, which the start-up manager should also be familiar with.
