

Oct 21 - PHF Q and A

Thu, Oct 27, 2022 10:10PM 44:48

SUMMARY KEYWORDS

people, home, question, money, beneficiary, mortgage, program, problems, alliance, pay, funding, property, rss, agree, homeowners, house, homeowners associations, refinance, mortgage company, cabal

SPEAKERS

Ron Giles, Tracee, Kristin, Tracee Gluhaich

Ron Giles 00:00

Hello humanitarian family. Welcome to our first PHF question and answer period, we've got some changes to the home value recovery program that we'd like to discuss. I'll turn the time back to Tracee And, Kristin, we'll go from there.

Kristin 00:19

Okay, I'm going to reread the terms, we did change this program, you could call it a substantial change. So I'll just move right through the terms and then we can dive in to the details of it. The the new terms of the home value recovery program starts with a it's a one time funding event that will provide you 100% of your existing home value in a one time lump sum. It's limited to one beneficiary per property. If a beneficiary exercises this program, there's a 60 month waiting waiting period before they can exercise the new home purchase program. The home value can be established in several several ways either an appraisal, an old mortgage statement, a Zillow to estimate etc. The age of the document is not important, and we encourage you to find the document that is the higher value, the RSS will accept it if it's an authentic document. Also, reasonable explanations of value and investment are also accepted along with documentation. As before, there will be no encumbrances put on the property as a condition of funding and the funding is approved and transacted through the RSS platform just like the private home funding program. This is the big this is the other big change. If there are two beneficiaries on the existing title, they both must agree to the following three things in order to cash out the value of the home. Number one, they have to agree on the established value they are requesting funding for number two, they have to agree on how the funding will be distributed be the between the two of them, whether that's 50-50 70-30 60-40, whatever they decide. And finally, they need to agree to whose name is on the title moving forward, is it still going to be both parties or just one? Once they agree to the above terms, the RSS platform will proceed with funding and recording the terms the ownership that was agreed upon? Okay, well,

T Tracee 02:13

let's hit it. Oh, okay. The first question is, if you have a couple and both names are on the title, what do they do?

R Ron Giles 02:23

Whatever really what they want to do, if they agreed to have the wife exercise or recovery funding package, and they agreed to have both of their names on the title moving forward, then that works. And the husband will still have the option of an exercise in a new home purchase program at any time, hopefully, for the benefit of both of them, you would have to wait 60 months before being able to exercise a new home purchase program,

T Tracee 02:55

what if they don't get along,

K Kristin 02:58

they're going to have to come to an agreement to cash out the value of the home. So let's say they decide to separate and isn't exactly friendly, they're gonna have to come to an agreement, before the platform will approve the funding. And it can be as simple as one party saying, Okay, you exercise the home value package, give me 50% of the cash that we receive, and you can have the house moving forward, I'll go buy a different house utilizing the new home purchase program. And then the other party that's keeping the house wouldn't would not be able to exercise a new home purchase for another 60 months. But they would have 50% of the equity in their bank account. And they'd have their name on the title of the house that's paid free and clear. So they could sell that house and get all those funds to go buy another house with their own funds if they desired it. So it's designed to be as generous as possible to make it easy for people to agree on a desirable path moving forward, but that but we leave that agreement to them.

R Ron Giles 03:56

I was like I was like to make a statement there. When two people don't have the ability to get along and they're separating, if they go to court, they don't have to have a unanimous decision has been advised they can one of them might be opposed for something else. But when you're dealing with the Alliance, the two of you have to be in complete harmony with what you're asking for. Otherwise, it stops right there. Until you come into harmony. The Alliance will not let you move forward. The Alliance is not a judge. You to the two people have to come up with the solution to the problem, then the alliance will help you to move forward. So It's not your judge, it's just going to hold it in place until you guys, the two people get together on their agreement for what's taking place. That is important. That's why we have the allies in this program.

K Kristin 05:19

TRACEE 05:13

So that that just to summarize the, you know, the big change of this home recovery program is we had to incorporate what would happen when you have two people on a title. And it's still the same process, they would agree to eliminate the mortgage debt, one of the two of them would move forward with exercising the cash out of the home, it's now a one time thing it is not amortized over 15 years, it is a one time cash out. And they both have to, they both have to agree to those three terms in order to move forward.

T

Tracee 05:52

Nicely put, so will people that already have their mortgages paid off like my elderly mother, but continue to struggle with buying groceries and such Will there be a cash out refinance option for her,

R

Ron Giles 06:06

if you already have your property paid off, it doesn't matter your age or whatever, if you if you want to go to the refunding or what we're calling it something different refinance of of your property, where you're receiving your equity back, that's cash to you. And you can do that whatever you want. And it's for the entire value of your home. So this is a change. And that's what's available for you. And if you're an elderly person doesn't matter, you'll get your phones and then you have plenty of money for food or whatever you're going to do.

T

Tracee 06:53

Okay, next question, when and how is the 90% of the purchase price paid to the seller? Where is this 90% drawn from?

K

Kristin 07:03

Okay, and this this question came up multiple times in the questions submitted, so we are going to insert clarification on this to the main video. But the short of it is if we use the brand and Sally example. Okay, Sally's asking for \$100,000 When Sally and Brent agree on the details of the sale, the RSS platform is going to pull Brent's \$40,000 Down payment out of his general cash account and hold it like an escrow until the deal closes. Now if he backs out of the deal, then he loses the 40,000 just like how earnest money is used right now in real estate deals, so he doesn't waste Sally's time. At the time of closing, Sally will receive her full \$400,000 Asking price directly from the Managing Directors account, it will go from the Managing Directors account into Sally's account. And then Brent, their RSS platform will release brands \$40,000 stake that he had that he needed in order to proceed with the agreement, it will be given back to him in his general cash account, so he can spend it on whatever he wants. Okay, now, which managing directors account is this going to be pulled from it's going to be pulled from brands, so whatever, if Brent is in a Managing Directors chain of beneficiaries, then that managing director is going to be the account that the 400,000 is pulled from and put into Sally's general cash account. Okay,

T

Tracee 08:31

and I would like to also say that I have heard Ron say that with one beneficiary or excuse me, benefactor one 100 T note could buy every single human on the planet, a \$500,000 house. So I would hope that nobody has a scarcity mindset and is worried about running out of funds. If you all have SKR. This can happen over and over and over and over with all of us and we don't need to worry about any of it. Sorry, I just had to throw that in.

K

Kristin 09:09

Okay, it's true because it's putting your it really is putting your money your man at your your funds to work in a big way. Yeah,

T

Tracee Gluhaich 09:17

and we don't need to have scarcity. We have more than we'll ever be able to spend and some people based on emails I've received. Have, they're like, worried about this program and it's all automated. You have enough like there's should be nothing to worry about than just being excited. Okay, so the next question is why is the phf program? Oh, perfect segue mandatory for managing directors?

R

Ron Giles 09:43

That's an interesting question. When we say mandatory, it's just part of the package for the beneficiary. They get the 10% or excuse me, the 10 cents downpayment and additional hold In accounts, we call used to call on trust accounts. They also there's a section in there, where they have employment contracts, these are accounting features. And then there's, then you go over to the home financing, and that those two programs, and there's going to be some other opportunities that they will be participating in as well. Now, when we use the term mandatory, it's like the beneficiary getting a 10% 10 cent discount or a download. So we're not talking about anything different. It's just the fact that the program for the beneficiary to buy a house is going through that beneficiary back office. And the men and the mandatory concept of that is that the money has to come from someplace. Now, if you don't want to do this program, then don't become a Zim benefactor. So we want you to be sure that you understand that becoming a gym benefactor, there's things that you have obligations to do. Now, if you think that that's a problem for you, then I, I wish you wouldn't feel that way. Because most of the, it's never going to interfere with the projects that you're doing. However, this is a big one. There's a lot of money that you won't be able to use as the Managing Director, because it's just too much money. This is a way for you to use a lot of your money, and you have no control over it. It's just being done by the Alliance. So when we said donate to the alliance, this is basically what you're effectively doing. You're allowing the Alliance to help people get into homes. I hope that makes it clear. Yes,

T

Tracee 12:16

I think so. Okay, is the phf applicable only in the US? Or is it global, every country's housing

policies are different, particularly tackling speculations does onus of solving problems lie with the managing director of that said country? That's a good question.

K

Kristin 12:37

It is, the program is intended to apply globally. And it's also intended to bypass most all existing systems globally, as most existing systems are defined. And yes, we're hoping to find managing directors to solve localized issues that this problem, or this program does not address. The conditions that, for example, Heidi's trying to solve down in Mexico are drastically different than what a managing director in the suburbs of Seattle, for example, are presented with. So at this point, we are assuming that the local issues will be solved locally, which is why we're really pushing now to make sure that we have managing directors all over the globe, not just USA, we need we need boots on the ground everywhere for just this reason.

T

Tracee 13:17

And we are working on that. Okay, next question. How would the program handle second mortgages and he locks which is a HELOC is a line of credit, right home equity line of credit? With the mortgage elimination program, they have suggested that the answer should be that the homeowner be able to pay off all loans associated with the home at the time of this refinance? Do you agree?

R

Ron Giles 13:44

Yes, we do agree. The biggest problem with what we're doing has to do with the financing. The finances are usually these are the kinds of people who dictate to other people what they're going to allow them to do. And we don't do that. So we're going to pay all of the mortgage off all of them. And then you'll have your property free and clear. That's when you can either do the refinancing or you can do the purchase, sell your home, whichever you'd like to do. But you're gonna get your free and clear money out of it, period.

T

Tracee 14:26

And we need to drop the term refinance and amortization. So we're not really refinancing, we're really gifting the home value back to them. So, and then word amortized, we're not really using that either. So just to help you guys with your language when you're describing the program to others.

R

Ron Giles 14:47

We're using the term home value recovery instead of refinance because there's something that we have been told that's using the word refinances Not really good in the financial industry. So we're using the term home value recovery. And that's what it's, that's just the way it is. So it'll recover your value for your home. Again, financing is the key. If we don't have our own financing, we can do this. And that's why it's our private home funding program.

T

Tracee 15:27

I love that name home value recovery. Okay, next question, how will the home buyer and the home seller connect with each other? Will there be a database of homes they can use? Won't they need to walk through the home? And won't they need a real estate agent to facilitate that and introduce them? My idea would be to have several real estate agents on the payroll of the CAC that would also get a flat bonus Once the transaction is finished.

K

Kristin 15:53

That's a great idea. I would do that to you know, to answer the database question, we have people in the NRELS, the crew of 33 that are suggesting that when I say that, that a listing service can be as simple as a single website, where either the owner or an agent that the owner contracts can upload their house and it's searchable by everyone everywhere, then the buyers can just search the site and contact the owner or the owner's agent directly. So all of all of these solutions are excellent.

T

Tracee 16:29

Okay, next question, will credit checks be eliminated as part of this process when applying to purchase? No.

R

Ron Giles 16:41

credit checks, we don't care about that. Why? Because we're uploading, we're increasing the download to cover the payment. And so we don't care what their their credit is like. Again, the alliance is in charge of this. If you had problems with credit, and they feel like you're a person who they don't want to deal with, then you won't get a the possibility of something taking place. So if we understand that, that the reality of our whole transaction of buying a house is we have the money, we have the money, it's a private home funding. If we didn't have the money, this would not make sense. The Sharia is the remedy for the banking institutions that were falsely doing things and they take over the government by the Cabal. And that's supported this whole process. When we go through the NESARA, and it's implemented, then that's the solution. That's the remedy to all of the problems. So we're just adjusting things to make sure that our people, our family, get into homes that will never be foreclosed on. And it doesn't matter to us, you don't have to have correct credit or anything else. As long as you're a good person, then the alliance will work with you. Does that sound like it's the right thing, Tracee? Christian? I think so.

T

Tracee 18:31

So, oops, I had to mute myself. Um, okay, that sounds good to me. Next question, as it is now a simple transaction between a buyer and a seller without intermediary or without including them in the contract. What about renovations for energy and comfort improvements for use in properties

R

Ron Giles 18:57

the property can be as his or you can walk through now. If the two people are, are getting close enough to where one is walking through the house, that person will have been approved by the Alliance so you don't have to worry about somebody walking through your house. Just make an appointment and and get your names and everything and then location and and then you can do your walkthrough. It's a simple matter. So it's not it's not convoluted with a whole bunch of problems. So you're gonna have a chance to get you don't have to worry about showing your house to strangers, because the alliance will be sure that those strangers will be a mix of fix in harmony with with with you. So it's gonna be a simple transaction and once you agree on things, then the process will take place and the money will be transferred.

K

Kristin 19:59

Well and another Another thing to add maybe is when they when he's asking about, you know, what about renovations for energy and comfort improvements. That's where like in the in the condition of Brent, you know, he moves into Sally's home and he immediately has \$40,000 that he could start putting to work on some renovations until his RSS downloads start adding up for him. So there is there is a chunk of change right off the bat who do any, you know, at least start kicking off some work?

T

Tracee 20:25

Yeah, when they get the deposit back, that will help also right. So,

R

Ron Giles 20:31

deposit back Yeah.

T

Tracee 20:34

Okay. All right. The next question, the word amortized is referring directly to the word mortgage bringing the dead back to life? Wouldn't it be wiser to use a better term such as divided into payments or installments?

K

Kristin 20:47

Absolutely. And this is what we were just talking about. And, you know, this is, this is the pickle that we are kind of in and the experts that we consulted with, you know, we're purposely trying to use words that people are used to, so that they can absorb the concepts, but then asking them to forget everything that they currently know about them in this context. And it's not easy, we're kind of walking a fine line. And I think there's in our main video, there's a couple of times where we call it a mortgage, and should I call that an installment. So our intention is to

have the concepts be absorbed, but then, you know, all the loaded content, you know, all previous meanings be left behind. So just be a little flexible with us. As we move forward. Here, we're, we're, we're going to be able to go back and change as needed. But the intention is, you know, not to use cabal loaded words here. Okay,

T Tracee Gluhaich 21:38

perfect. So next question, will the original proof of ownership title certificate that the finance company originally kept in storage be returned to the homeowner? Well, I'm going to take a guess here, because when you pay off a lien, or a mortgage, what would happen is you would receive something called a deed of reconveyance, meaning that the bank or the mortgage holder would send an or record a notice saying that, okay, you're free of your debt, like your lien is clear. And it's called a deed of reconveyance, or a Release of Lien essentially. So that is an automated thing typically done, who knows what's going to happen with us stepping into this new system, but that is what they should receive, which would prove a clean and clear title upon the sale of the home. Well, and

K Kristin 22:33

unfortunately, right now, like I said, that's just proof that congratulations, you gave us all your money, but when push comes to shove, you don't, you don't actually own it. But yeah, that actual piece of paper, in theory, it should be automatically returned how it actually will work. We're not we're not sure.

T Tracee 22:50

Okay. So next question. If someone really wants to buy a \$400,000 house, but as a brand new beneficiary, can I help them with their downpayment?

K Kristin 23:00

Well, Ron, I would maybe defer this to you. But I don't if I had a friend in need that needed, you know, they just were brand new RSS beneficiary, and they had 20,000 and not 40. And they didn't want to miss an opportunity I kick in if I had it, for sure.

R Ron Giles 23:16

Yeah, the idea here is to be sure that it's the alliance would look at that and say, Well, are you discussing it? Are you telling your friend that you're going to get the full down payment back is just those kinds of things, be sure that you're in full integrity as you go into this? And I don't see any problems with having help from your downpayment. Don't have any problems with that at all. We don't care. It's not like skin in the game, because you're gonna get it back. It's just basically earnest money that will come back to you.

T

Tracee 23:52

And I think that's a good question. Because we know we've discussed that properties in California and other more expensive places. You know, you can't even get a condo here for under a million. So it's going to take up quite a bit of time to save up for a down payment for something like that. So I love that you just said that the benefactors have discretion to do what they want to help people get into homes. Okay, next question. When we pay off existing mortgages, Won't we be feeding the Cabal driven banks?

R

Ron Giles 24:25

Oh, that's mine. I get to tell you. No. Okay, the mortgage is if there's some mortgage company that is active, and still sending out their requests and so forth. We're talking about a system that is illegal and it's fraud is it's full of fraud. Now, if there's a mortgage company that's open then they haven't been dealt with yet. So we don't know No, I'm going to say that most of them, if not all of them have already been terminated because of their illegal activities. And they're facing their jail times. So what I'm thinking here is that if the if the money is paid to them, then the alliance will plot back somehow, because they're, they don't get any money. And so we don't have to concern ourselves with that, we just pay off the mortgage. And wherever the money goes as the Alliance's business, and they'll pull it back if necessary, or if indeed, there is money that's sent out the mortgage company, whoever is receiving those funds, will stop sending you the requirement for you to pay a mortgage payment, you won't get anything further from them. Eventually, you might get the property statements back. But we're talking about the difference of time between the redemption appointment when we are going to get set up. And when the sorry, is announced. And in that transition is where we can still have people buying houses and doing all the things that they're doing now. So this is really kind of an exciting situation. We don't have to wait till the NESARA to start doing stuff. We'll have our money and we start using our money. That's the way I see it.

K

Kristin 26:39

Just a little bit more background on that. And Ron, if I can share we we had the same question. We you know, because we we our first plan was to say, All right, let's just walk since it's fraud, let's walk Let's fund new homes. And let's find a recovery package. And let's just forget about the mortgages. And we were told that no, we had to do a lot of homework and a lot of research. And we were told that no, we need to offer the ability to release the beneficiary from the mortgage companies clause. And once that is done that what happens on the back end is between the Alliance and those banks, however, they close that out. So it was kind of we had the same question. And it was kind of presented that don't worry about that. That's a little above your paygrade type of thing. We got it just give give the beneficiary the ability to be able to get out from under these banks will handle the rest.

R

Ron Giles 27:30

Yeah, Nicely put. Okay,

T

Tracee 27:33

so what about homeowners insurance?

K

Kristin 27:37

We stay tuned, we are rolling a couple options around with that. That's, that's the most I can say we are gonna we're gonna have some package to handle that. So that's the most I can say right now. Cool. All right, Ron, am I missing something there?

R

Ron Giles 27:52

No. I think to mortgage home, homeowners insurance will probably go away because we're guaranteeing or taking care of the property with our own money. So we're self insuring our project. Or if we loan money to a house or buy a house went through us, and it's hard money that's involved. You're not going to be having a hurricane or a tornado come through and rip your house up. And, and that's just wondering, you're sitting there wondering, What am I going to do? No, you're you're going to get the money to rebuild your home, you're going to get the money to rebuild your life, wherever you'd like to effect. That's a floodplain or something like that, and you want to get out of there, you'll be able to do that. We're here to help the people. And so the homeowners insurance, they're not going to be a part of us. We're just going to self insure for our family. I love that

T

Tracee 29:01

because I've filed two claims recently and they both got denied. So I'm like well, why the hell am I paying you so much thing money, you know? Okay. Next question. If you get your debt eliminated, would you still have taxes, insurance, etc. Until NESARA occurs?

R

Ron Giles 29:25

There's some timing questions there that I'm not sure of. When the NESARA announced, or excuse me, when we get the redemption funds. That means that there are a whole lot of things are going to be changing at the same time. Now, how far away is is Nisar, I don't know, taxes and insurance etc. We don't require it. For you to have a loan. So what about taxes? You have to kind of work that out with your with the local people. But eventually they won't have the ability to tax you either because it's all their income is not from taxes is from? Well, it's from sales tax. And and until they start getting that, and working on all those details house is going to take a little time to settle things through. But as far as we're concerned, we'll be taking care of our people. There's no insurance or required and all that sort of thing from us. None whatsoever.

K

Kristin 30:32

Well, and Tracee aren't, I think you started a research on how to get people out from under, let's say, let's say we were released and the announcement and as far as a ways out, and this just

starts organically growing, I think you were exploring a way that they can go down to the county and turn in a piece of paper and they are released, right? Didn't we find a loophole that we're going to share on that? Yes,

T Tracee 30:55

and we need to have a better structured conversation. Because there's different ways to do that I'm in the process of bringing forward my land patent, which is also something key was recommended. And I am less than a month out from completing that process. Because essentially, what happens is the reason you have to pay property taxes is because you do not own your property, or and property is also not a good term, but you do not own your land and the improvements there on. So the state owns it. And that is how they transfer title using the grant deed. And so what happens is they're renting it back to you. That is why you have to pay property taxes. That's why you have to apply for building permits, and you have so many stupid rules. So there's multiple ways to get out from underneath that. And so I think we should do a training on that, or something later. Okay. Sure. All right. Next question. How do we solve the issue of homeowners fees, from homeowners associations who have control in so many communities?

K Kristin 32:06

I might have to pass on this because I'm not familiar with how homeowner associations dig their claws in how is it set up? Do you know Tracee or Ron?

R Ron Giles 32:18

Well, if you live in their communities, and you have to pay the homeowners fees, and some of those are in some areas in weather, snow, or snow, where you move along the roads, there's trash that they pick up, there's if there's a pensez, common fences, common areas, they take care of that. So I can't see a way around homeowners, associations dues, I think that that's going to have to be paid. You'll know beforehand, going into a house, what and those are the things that you'd want to find out about. Some homeowners associations are around very nicely, and others, they put power over people type people in there. And they feel that they have the control and be able to assess fees and do all kinds of stuff that is not really appropriate. So you just have to, as a buyer, beware of homeowner association fees. And that should be part of the listing that we're going to be listing program that we're going to establish to so that they there would be an idea if you have homeowner fees, and you need to put that down and let people know about it. So when I look at okay,

T Tracee 33:47

next question, we're almost done here to more if the alliance has this set in stone as the best way for everyone to own a home, and we all must participate. Does that mean my project is wrong? And I'm assuming her project has something to do with putting people on homes? See?

K

Kristin 34:08

So, I don't think any projects wrong, this is just a you know, it's a solid rail that's supposed to go you know, all around the globe with the intention of making it easier for, you know, a standardized approach. But, you know, without knowing what the project is, and never, I don't think anything's wrong. And if it's, you know, in competition with the project, you know, I, I would I would well, I suppose to complement

R

Ron Giles 34:35

yeah, there's, there's an assumption here, that the person is not going to have enough money to do both. And I'd like you to count the zeros and see how many zeros is going to take to pay \$500,000 home for everybody in the world. Figure it out. And if you think you have to do that alone, then that's it. prob could be a problem, it might take up your monthly income or quarterly income. But the reality is, is that this is not a way of looking at it, you get to do all of the projects you want to do. And your beneficiary program will run without your help or without your needs even know about it, it's going to be a use of your money for proper for a designated humanitarian thing. If you have some problems with that, then when questioning your ability to be a humanitarian, there are people here who don't have a home, you're talking to me about the homeless and that sort of stuff. And then you're telling me that my project is going to be to help the homeless find homes? Well, we've already done that, who the beneficiary program so your projects are not going to be, are not gonna have any problems funding because of what you're doing with people helping people get into a home. Okay,

T

Tracee 36:05

last question, if we present this program before NESARA is announced and comprehended by the public, how do we circumvent the title insurance companies, etc, and assure buyer seller and the sale is valid and legal without using the traditional processes?

R

Ron Giles 36:24

Well, it's an interesting question. The Cabal set up a way to do things that you live in a home that they own, and they tax you to live there, you call it your own home, but it's not. You don't pay your taxes and see how many people are going to be knocking on your door and asking you to leave. So the whole process of this is getting rid of the cobalt way of doing things. Now, when NESARA is announced, it will go back to the way things were here in America, back to the restored Republic, that is, is under the control of the Constitution. Other countries will have similar types of things going on in their countries. But the reality is, is that funding is the way that they use to control people, we use funding to get people into houses, that will be theirs forever. And we're not interested in all of these extra things that are costing people money. So there's nothing in these people's and what they're trying to do this, circumvent all this title insurance and all this. That's just a way of making money off of the transactions. And it's illegal. In my opinion, you can say it's not illegal in and I have to do it. But you don't have to, because we're doing things with a bill of sale. A Bill of Sale between two people. We are the ones that are financing it and nobody can stop us from doing it. So those people cannot stop us from doing our transactions that cannot stop stop us from paying off the debt. And the ownership of the property, or the land. And its improvements are the ones who are there by

record. And we're using those records to establish ownership. And then we're transferring the ownership from one person to another through our program. I hope you understand that. The without the funding. These people have no control. Absolutely no control over what we're doing. Don't be afraid of it. When we pay off the encumbrances, then the title is free and clear. Home ownership is free and clear. And that's what we're all about. So we don't have to worry about those people.

T Tracee 39:08

Can I ask Dave here. So when I had that one on one conversation with brands, he's basically said that, that the only requirement would be is to send a notice of transfer a deed and sale for cash to the county and there is no obligation to identify the new owner. And the recorder will put the notice in the file and just forget about it. You want to do a certified return receipt. But in our current 3d, whatever world that we're in, that is what he recommends for people to do even right now if they were to sell. So but with the quantum consciousness, and then already having all the information on the back end of the RSS system. I think that that will be an automated process and title insurance Whereas you can sell a house with title insurance. So we just need to trust that the quantum consciousness is going to cover our asses.

R Ron Giles 40:11

Yes, they will. They're on our side. So we don't have the Cabal against us. The money indicates that we have complete and complete control over the ownership of the homes and we are purposes getting them in the home and then having the ownership forever. Let's say sell it. Oh, hey, right.

T Tracee 40:41

So that's a wrap, hey, well, that's a wrap, you want to close this out boss?

R Ron Giles 40:47

Yes, this is one of the biggest, best programs that the alliance has come up with other than love one society, everybody gets a house and everybody gets some money a beneficiary program is just phenomenal. They can get their home, they can get some individual finances, they and they don't have to work for it, there's no way to lose it. No way to lose the money and no way to lose it unless you spend it and so forth. And there's other ways of gaining more money. So we believe it's a really, really good program. There are other organizations that are saying things that may or may not be true about NESARA. They're saying that there's prosperity funds that will be transferred out. I don't know how they're going to do that. People are saying everybody's going to have a property or excuse me an account in the quantum financial system. I don't think you'll have one established until you do it. So I'm I don't I don't see what these people are trying to say. It's yeah, if I guess it's already there, but you still have to go and activate it. So there's a lot of stuff out there that is not true, that are giving that have been given out and some today on how Nisar is going to be announced, and so on so forth. I don't believe in any of that. I think that there are states and that sort of thing available. And

when that happens, that's usually military deception. So we've got other activities outside of what we're trying to do that would conflict with what we're trying to do with our private home ownership or funding progress progress programs. So let's let's stay true to what we know to be true. And, and I think you'll really find that that will help you a lot with not having a lot of confusion and living with a lot of torment that's not necessarily supposed to be there. So we love and appreciate you, we're grateful for the Alliance or their, their graciousness, and their ability to come in and help us. And we've asked many for many things, and we have received it. We know that they love it. And we know that we're setting up a program that will help us to create recreate the golden age of mankind, which is our tournament, that's our that's our goal. So that's paradise. Let's just say it that way is going to be paradise for us. We'll never have never had that kind of experience before. Well, this is what it's all about. So we send our love and appreciation to you. Thank you for the questions. And we hope we've answered most of the questions that have come. This is a big program, there's a lot of questions. And we want everybody to know the answer. So send your questions in. And if you don't get an answer specifically to you, it may be just a part of a whole bunch of people have asked, and we didn't say your name and all that sort of stuff. But we're doing it this way so that the majority of questions can be answered on this on this platform rather than having to go on an individual basis. So sending our love and appreciation to all of you and let's say goodbye for now. And thank you, Kristin. Thank you, Tracee for your great work as always. And with that, we'll say goodbye. Hi, bye
