

Q and A - April 14th

Sun, 4/24 10:52PM 57:01

SUMMARY KEYWORDS

account, people, money, question, benefactor, beneficiary, rss, zim, currencies, contract, replicators, person, quantum, kinds, humanitarian, program, funds, pay, cac, download

SPEAKERS

Ron Giles, Tracee Gluhaich

R

Ron Giles 00:00

Hello humanitarian sisters, Ron Giles, I'm here with Tracee and we're going to do a question and answer period this morning. It is April, the 14th. One day away, one day away from the 15th. So the 14th of April and 2022. With that, let's go ahead and up our fun. Okay.

T

Tracee Gluhaich 00:25

Is there a deadline to become a Zim benefactor? Or will people be able to buys them even after the appointments have started?

R

Ron Giles 00:33

The zim is going to be, you buy the gym before your appointment, then you haven't, if you don't buy it before, then you buy it with your other money. And that's double dipping. And they don't want they're not going to do that. So you have to do it before. So it's invented. But manufacture if you want to be as in benefactor, then you get to zoom and go before that. And then that's, that's your period of time to get your funds, and get yourself set up for the rest of the 100 years or so. That's kind of a sad thing to say, and yet it's true. So, if you're having trouble getting it, then let us know. And there's other people who might be able to help you. Next question.

T

Tracee Gluhaich 01:20

need clarification on the Mentor Program, somehow I overlooked the word retired, or seniors, as Dominick says, I was thinking very differently, a whole group of qualified people have been left out that maybe retired or unable to work only due to their situation, either by choice or demands of the situation, I do not want to limit my mentor program to only seniors, retired people. And hopefully, my director can follow my advice, and seek out all qualified individuals for mentoring, I would advise my director to pay them all, not just retired seniors. Example,

one, a mother that has experience in child care, cooking or other skills can be a mentor example to someone who has physical limitations for various reasons, but has a skill that still can be taught to someone example three, a person with skills that decides to dedicate their life to teaching these skills, especially after RSS. So is that okay?

R Ron Giles 02:22

Well, can I do what I want to do? And I'm saying, Yeah, you're the one that's in charge, it's your money, or just open for suggestions, we're just kind of giving enough information out to tease your mind to come up with some of the things that are more, you're in line with. And, and that's the major problem, that's a major value to our training is that we're, we're here to just simply give you an idea of what can be done. So we want to keep it somewhat in a structure. And yet, we recognize that when the reality hits, we are the we are the ones who are creators. That's who we are. That's, we get that from our from greater God. So let's just all let ourselves be the creators that we are and know that we're going to come from what resonates with us in our hearts. And with the help of the Alliance counselors, we're going to be the best humanitarians that are available. So you've got a whole thing, here are the examples and so forth, you're gonna have a lot of fun talking with your counselor and getting all kinds of ideas. And so I like the idea that you're you're involved in it, your mind is involved in it already. Isn't that a wonderful blessing? And a lot of people, their minds are not there yet. However, they can get there. And that's the important thing. So you're doing a good job. And I commend you for that. Can you do it? Yes, she can.

T Tracee Gluhaich 04:13

Next question, employees with green cards who are not US citizens, when signing them up for the RSS, how do we explain the download rate they will receive?

R Ron Giles 04:25

You know, you're asking me, how, what are you gonna do with those? I don't know what to do with them. If they don't have the ability to have and this is going projecting into the future. If they don't have a bank account, which most people don't as they come to America. And if you don't have a bank account, then you have to get paid in cash and send it back to Mexico. That's your process. And I can't presume that that is either right or wrong. We don't know all of that. out, as we will work out the details and find out what's the best way to do it, we're going to be under an entire different government discharged compliant. So how's that all going to work African, we'll be working with quantum financial systems. So there's a lot of difference there, do we need to be stay within our countries, I'm not sure. I'm not sure how to do that yet. However, there will be ways to deal with that, that the alliance is going to be involved. And I haven't talked to me about it. But let's just, they're not leaving these kinds of things. For me to come up with all the time, they helped me in my thought processes so that we can deal with it. However, if we haven't dealt with it yet, then it's something that'll come into the future. And that's one of those things will come in the future. So let's just be sure that we're open to what the Alliance's is going to give to us. We'll see what happens. Next question.

T

Tracee Gluhaich 06:08

How is an ESS contract rate for Green Card employees handled? Remember, green cards must be renewed and the seven year contract is beyond that renewal timeframe?

R

Ron Giles 06:21

Well, why are you saying that we have to have a seven year contract for an employee that from another country, the seven year contract in the ESS program, if they're here, and they're part of a, they have a green card and what they're doing as in this year, then whatever needs to be renewed is renewed, that there's a problem with the renewal of green card and we have a contract that assumes that the green card is in effect, and then it is not in effect, then that person has to be released from the contract. So we just have to create the reality of what's going to be taking place. And it's not hard for us to come to release a con drag. That's not a problem. So when we talk about these things, let's talk about them as if we have the solutions to the problems as they come up before they come up each of those people, as a soul, and the counselor that you have as the ability to go and talk to that soul. So you're gonna get some really, really good information. I'm assuming that to be true. And yet, there may be some rules and laws and so forth that I'm not aware of. At that level, where they can't do that, I don't know. It may be that because they're here on the earth that they can't go ahead and make some changes. At that, that soul level. However, just keep in mind, you're going to get the right information. And, and if you don't use your your counselor, almost on a daily basis, perhaps. And especially if you have certain circumstances like this counselor with your counselor. That's the only thing that I can tell you to do. So I'll do it that way. Next question.

T

Tracee Gluhaich 08:44

Must be the same person, is there a difference in USS rates for Green Card employees to be paid as there is on RSS rates?

R

Ron Giles 08:53

Well, that's none of my business. If you're talking about the ESS rates, for Green Card employees, they have to be part of the organization. They have to be employed by that organization, if they don't have a green card, or their employers understand that they have a green card, and they're subject to certain things. Those are rules and regulations that you have to live by. And I don't know what that's going to be in the future. I just really don't know do draw if you know, then you can answer your own questions. I don't have that information. So I'm not. You're asking questions that don't have an answer until the time comes to make that decision. So let those kinds of things. They'll germinate in your mind because obviously, there it is, there's a question. But understand that all the things that we have now are not going to be part of the future. So don't drag these kinds of things out. Just just say, well, it could be a problem where There's a problem, then the solution to the problem will be evident. Problems come with solutions. We just have to find it at the time that they're there. Next question

T

Tracee Gluhaich 10:14

I'd like to hear if crypto will also be used under the QFS.

R

Ron Giles 10:18

QFS only has gold certificates, anybody that thinks that those gold certificates are going to be used for, for cryptos might have a different thought when they get into the real situation. Now, I'm not saying that the Kryptos can't be doing what they're doing like they are now and not part of the banking system or the quantum financial system. But why would you want to be doing that? So speculative? You're not buying currently, you're creating a whole set of currencies or possibilities that are part of a debt system, a debt system, meaning that you, you don't know what you're buying, and how much it's gonna cost, all that sort of stuff. So when you talk about to me about currency, or excuse me, cryptos currencies? I say it, I can't tell you. I don't know that people are going to continue to do that. But the quantum financial system is not part of crypto currencies. We have digital gold certificates that work for currencies that are already active in a country. So if you try and combine that and people are trying to combine it, I say, Wow, good luck on that one. And I'm saying that in a sarcastic tone, good luck. Don't tell me that the quantum financial system is part of the crypto currencies, because crypto currencies are not currencies, they have no country of origin. So the quantum financial system has currencies in a particular country, and they backed those, those currencies by gold. And you go through the figuration of what's going on with cryptocurrencies, and then you understand what the quantum financial system is, you'll see that there's a big difference there. Kryptos are not currency, you can buy things with it, but it's not currency, crypto currency, especially as their own way of dealing with things. You'll find, in my opinion, that anything to do with cryptocurrencies where you're making money on your investment, is not going to be part of the quantum financial system. So period, it may be doing something along with the internet, I don't know. But it's not part of the quantum financial system. So don't tell me that. We have digital gold certificates. You sell your digital gold certificate, excuse me, you sell your crypto currency, and you can get your currency out of currency, meaning gold backed currencies, if that's what you're getting in your country of origin, and then you go ahead and exchange that for crypto, excuse me, for quantum financial systems, gold certificates. All that's going to work out or not? We don't know that yet. So if you're planning on doing that, I would keep an eye on it. So I don't believe it's going to accommodate the quantum financial system. I don't believe it will accommodate crypto based currencies. Next question.

T

Tracee Gluhaich 14:21

In order to convince my ethical church members to be on my team, I would have to wait till I showed a chunk of money for any helping sector we have which would certainly then convince them to join up and use my user ID number as their way it instantly I'm sorry, I'm having a hard time reading this one. So on redemption meeting day, I have my new account with my first download of course, now I want our politicians out of town and out of the pig trough and away from what can be done. Can we fix this first?

R

Ron Giles 14:53

Well, I don't know. You sounds like you have to do it. And if you think you have To do it, you're gonna have a hard time GESARA compliance and means that they have changed the

government. And what you're doing is you're saying the government needs to change, and I'm saying the government is being changed. So all of your, your politicians, local, in your town, your counties, your states, your provinces, whatever it is. Everything that has been controlled by a corporation or a government acting as a corporation, or a corporation acting as a government is going to go away. So it's all going to change. Let's take a look at that. And then that's the question. I don't know. We'll see. So I don't really know how to answer that one.

T

Tracee Gluhaich 15:59

Okay, question, please. How long? Can my quarterly payments sit in the account? Forever? Okay, how?

R

Ron Giles 16:15

To start going anywhere? And if you don't, if you don't spend it, then it's there. As long as you leave it there. Next question.

T

Tracee Gluhaich 16:28

What will happen to the farms growing human food when we have replicators to obtain our meals and food? Well, they just grow other kinds of crops.

R

Ron Giles 16:38

Well, a man a replicator can produce other kinds of crops as well. I don't really know, I've asked that question. And from my perspective, and from the opinions that I've received from the other side, there is more of a social illness involved in preparing food and eating food. Matter, replicators can replicate where you have don't have that ability. So I don't see Mad replicators really overcoming all things. And I believe that, having small restaurants, rather than big, large chains, and all that's associated with that, like, like McDonald's or Wendy's or something, I don't know that they will last. We'll see. But don't assume that mad replicators will do away with the meals or food. Because people like that. And they will continue to do that. Maybe in 1520 years. We'll be tired of that. I don't know. But I don't see it for a long time. To exchange things to the point where we're using matter replicators instead of real food, you've got a problem and matter replicator being or excuse me, if you've got if you're in a spaceship or something like that, and you're not growing your own food, then you're going to use a matter replicator, if you're going on a trip or something and you don't want to stop and get food then you use a matter replicator. But it'll be a tool, an asset that you can use, and how that's going to be used. We'll see. Next question.

T

Tracee Gluhaich 18:38

You spoke about getting cash from a CAC to buy a car, why cash? Won't we be using debit cards for purchases, both large and small?

R

Ron Giles 18:49

If you want to know, you're saying why cash? Why not? Some people really like cash. I would not preclude them from having doing something that they wanted to use. It'll be a matter of convenience. And I say well, let's wait and see what happens. But don't presume things because your presumption is maybe not what somebody else wants to do. Next question.

T

Tracee Gluhaich 19:26

Apologies for the lights expanding on the collar for the 315 telegram chat to regarding the CAC and not having a beneficiary account. Although I see that also as the RSS level. Even caller was Julia Hi, she recommended having a beneficiary D for the benefactors and or demo account etc. And want to expand on her concern. I see it as well especially the first few you contact a sign up with your ID number. And this is not to be your master ID correct and to help keep our anonymity.

R

Ron Giles 20:02

Okay, let's stop right there for a sec. I want to be sure that I understand the question up to this point. What you're saying is we're not to be your master ID Correct. That is not correct. A Zim benefactor only has their master ID number. They don't have a an ID number. So how do you just simply go in and create a an ID number, fictitious, or otherwise? Because you have to have a person, and then the email address, and have to have all of the things as an active person. So how can the Benefactor be creating accounts for fictitious accounts? It's not appropriate. You're not going to give somebody money or an account, just simply give it money? And then I don't know why you would do that. So the Zim benefactor, and please, if I'm wrong, let me know. But Bennett Zim benefactor, if you're going to be out there promoting the beneficiary program, this is just my opinion, from my level, I don't want to I don't want to be doing that. I get my job with, with working with the end contracts. Let the RSS program go by itself, it will grow faster than you have any capacity to think about it or even control it. Because we're not trying to sell something, we're giving money away. \$10, and you have money for the rest of your life. where's that going to come in? Why are you trying to promote that it will happen by itself. And so your job as as in benefactors to do the opposite side, meaning that you're setting up the program to keep people working. And I see that as is really where we have our responsibility. And I see a lot of people are trying to figure out how they're going to promote it. Well, make some cards and just start talking to people about it. And you'll find that it'll pick up on its own. If they can see money coming into their account or from a computer. And then they can draw that and, and then QFS that draw that down to their accountant to QFS and start spending it. There's no opposition. Tell me where there's your opposition, except for in somebody's mind. And I say to you, that's, that's not going to work. Okay, so we're going back to this school and, and hear what they have to say.

T

Tracee Gluhaich 23:15

Okay, so for example, I start and tell my family and extended family members, some are so brainwashed, and then to be shocked out of it, they may be very much in disbelief and say

something akin to well, if it's so fancy your account. I think that is also where Julia was coming from and her original question, especially in the beginning, and first few 100 or so accounts until it starts to travel by word of mouth, and references being made by next levels and so on. Or in such, I see people I see getting people on the RSS before our local local CAC is open. Same will or would happen again, if you like I plan to to possibly do a move around various areas in your regions or even to other regions, and it becomes like starting over each time. And you will continue to run into that initial Yeah, but and are you on it it if you respond with a no then more issues and losing credibility? If respond? Yes, probable response. Show me or show me yours then responses. Let's start there, and then I'll go I'll go forward after that. I think that's actually kind of smart. But if Oh, shoot you go ahead. Sorry.

R

Ron Giles 24:30

Well, I'd like to hear your comments. Not a problem.

T

Tracee Gluhaich 24:34

Okay. So my thoughts are I'm only signing up like my kids. But if they are in disbelief, okay. I may just sign them up anyway and let them see it for themselves. But if I thought like this idea if you as a benefactor, have your own account, even if it's just a sign up your first few people and then have them go out into the world and preach the Good News? Um, but that way it shows them what it looks like from your perspective. So they go, Oh, wow, that's really cool. And then they sign up. And then they can also show their own account when they're trying to sign up people just to show them how it works. But for your first few people, I don't think it's a bad idea to have a benefactor slash beneficiary account, because you don't want to show them your benefactor account. You want to act like you're a beneficiary as well. Does that make sense?

R

Ron Giles 25:32

It does. And yet, I feel like there's too much emphasis on people trying this is not network marketing. Ladies, gentlemen, there's no products to buy. What are you trying to sell them? The idea that they can have free money? I don't know that that's a problem. Yes, it's beyond belief. Okay, what is the beyond belief? Show them that the money is working. If you have an account, show them that account. You know, maybe there's maybe there's some ways of doing things. Let me let me, let me put it this way. You as the Zim benefactor, have your account. In the quantum financial system, in the RSS program, there's nothing in that account, that will that is proprietary to where you can't show them what you're doing. And your money is coming in, if that's what you really want to do. Now, I'm conflicted in my mind, because and I'm talking out of both sides, I don't know, which is the best way to do that. If there is a need for us to have a zoom benefactor account that they can show other people, then maybe that can be worked out as far as the programming is concerned. So maybe that's an answer to your question. I don't see that as a real good, really important important thing, because I'd go there, sign one person up. And let that person show their account, and then the next person shows their account. If you really get into that, that may be against the laws associated with network marketing, to show your account and say this is what's going to happen for you. Well, the fact is, is that it is going to happen for you. It's not speculative, it is viable, because there it is. It's

not somebody's going out and getting other people involved, and then they they make all this money, and then show that and that's where people say, Well, if you can do that, I can do that. And that's not the point. The point is, you sign up, pay your \$10. And there it is, it's not a product. So we're a private organization. When I say private, we're not public. And that's why you have to have a referral to be a part of us. That sets us apart. We're not a public company. There's no money early outside of our company that has to come in in order for us to pay people money. That's our program. And we've qualified and we get our our structured payout. And that's because of the contracts that we have. And we get the money and it's our money that we're paying to these people. Show is not money that's coming in from other people and making profit on it so that other that it's not profits of earning money from other people. That is we are showing that money is coming from the revenue sharing solutions vary. Now, I'm not sure how that's all gonna work out. There are those who in the network marketing industry will say, well, we don't know that you can't do that. You can't show it. Well, you can. Because it's a private experience. It's a private negotiations. It has nothing to do with that network marketing. Because the money for this whole situation is from us. We're just we're just sharing the money and this is how we protrusion our choosing to do it. So how can they put any How can they put any rules or regulations into that? They can't, because it's private. And we are the ones with the money. And they may come after us and try and come after us and try. But we have NESARA GESARA. And that means that we have different laws and different rules to run by. And I don't see that there's going to be anything that would stop us from doing what we're trying to do with NESARA and GESARA compliance. And that's why I say we're probably if you're not part of GESARA, if you're not part of a part of GESARA or NESARA, then your country is not GESARA compliant, then we can't work with you. We can't deal with you. Because you probably have laws associated that we can't deal with you. So the point that I'm trying to say that's a bad thing. But the GESARA NESARA, it's going to be for everybody. So the changes will have to take place. How that's going to work in the transition? I don't know. Did you have a comment?

T

Tracee Gluhaich 31:15

Yes, well, and here's the thing, Ron, you have said yourself that you're going to have your own RSS account just so that you have a budget to follow. And so I would assume that people who want to have their own RSS account, for the same purpose can have one, and then therefore show people because if if, for instance, you sign up somebody in your own town, that doesn't necessarily mean that they are going to go to other towns that you want to extend into. So you may have to show more than one person. But that would be a way to kind of kill two birds with one stone, right? Have your own RSS account so that you can budget your own funds each month. And if you need to, you can always show how it works to somebody else. Because if they ask you, well, if it's so great, are you on it, you cannot respond? No. Because that's just like me telling somebody to eat a ketogenic diet? And I'd say, oh, no, I don't do it. But you should I mean, you know, so Okay, can we move on?

R

Ron Giles 32:20

How about how about if we use a difference would be if we use just as in benefactor account?

T

Tracee Gluhaich 32:30

Because we don't want them to know who the Zim benefactors are?

R

Ron Giles 32:34

We don't want to know, you set the hand up and use it. Nobody's gonna get it. Okay, I'll just be the permitted download. Isn't that really the, the important thing is, is to show them the download? Yeah. And so, look, right here. It's 10 cents a minute. And I've got six trusts, and there they are. They're there. They're, yeah. And there's not six trust, okay.

T

Tracee Gluhaich 33:05

That's exactly what I'm saying is to

R

Ron Giles 33:07

do, we don't have to have the trust in there. They just say, and if you get more trust, and you've got this, but here's the, here's the, here's the fact, this is the 10 cents per minute download that we're talking about. And you can see from here that it's coming down into this account, and then I can spend it. Let's, let's, let's just say, Okay, what we've what we've uncovered here is, is some proprietary information or is not proprietary, it's information that needs to be adjusted. And if that's the case, let's talk to the alliance and see what, how they've solved this as a problem. Or maybe they're waiting for us to solve it. And I'll just have to come up with the ideas.

T

Tracee Gluhaich 33:55

think it's already been said,

R

Ron Giles 33:56

I'm not I'm not trying to belittle it like to work it out so that it can be a show. We have to have a show. And it might be that there's a separate one that we can create. That's just for a show.

T

Tracee Gluhaich 34:09

Okay, well, what about how you said that you are going to create your own RSS account for budget purposes? Wouldn't that be something that you could show your neighbor? That Oh, yeah, I'm on it. And then you show them because you already are making the account for yourself. So it's not like you're even doing any extra work. You're just showing them what you already made for yourself. So it's an optional, it's an optional thing.

R

Ron Giles 34:34

Okay. Okay, well, we'll work that out. Okay, cuz I want I want people I was gonna do it my way

or the highway know, if there's a solution there, then we'll find that solution. So, okay.

T Tracee Gluhaich 34:52

Okay, let's finish this question because it's a long one. There's more to it. Additionally, may have rightfully curious directors is the Some directors that may look up our IDs, after all, they will have that ability it sounds like in their CAC roles to add download entries into people's accounts and such. So nothing would prevent them from accessing and unbeknownst to them benefactor account if we didn't have secondary ID numbers to use to start the chain. Unless, of course, this could be moot if indeed there is a flash or such that helps raise the other's consciousness in between then, and now, even so it may prove quite beneficial for us to have a mirror account, to have the look and feel like we are a beneficiary in all aspects and respects with things that will also aid in helping keep our anonymity. Appreciate your thoughts and helping clarify. And as you answer this, I'm gonna go down the hall and grab some socks because my feet are really cold.

R Ron Giles 35:47

Okay, I can see some some benefits as we approach this. And it may be that we'll just to have an account beneficiary account that the Benefactor can establish, so that they can at least have one that they can show. Now, I hadn't thought this through and I said, I'd like to have a beneficiary account. Well, who am I going to pay all of the bonuses to and that sort of stuff. But maybe that's not so important. We'll figure it out the best way to do this, and maybe the best way. And perhaps the reason I haven't really addressed this before is because we're going to have a benefit, we're going to have a video of an account that's active. And there it is, and I can just do one person, and then that's their account. And it can be on on the video. And you can show that here's the account, then this is the money going into the account, and you can see it from here, and then go to the point where it shows how much money they've got in their cash account report, box. And that will will suffice. They don't need to know totals, they just need to see the process. And it can be that that particular account can go up to a couple of \$100 or whatever, or a week or a week, yeah, we could probably be really good and then start all over again. So let's see how that works out. Okay, next question.

T Tracee Gluhaich 37:35

How much can a beneficiary receive for one beneficiary, the RSS will deposit 10 cents per minute from the Benefactor account to the beneficiaries account, that's \$1,000 a week totaling 52,000, a year beneficiary can create an additional six trusts for any purpose, a desire, therefore, a beneficiary with a maximum of seven accounts can receive a max total of 364,000 a year, I'm thinking this could be higher, and that the same beneficiary above could also have increased downloads of bonuses, generational bonuses, employment contracts, is that correct? Or am I missing something, in essence, couldn't the maximum number be much higher than the 364,000 per year?

R Ron Giles 38:18

year, that's 364,000 per year is only for the beneficiary portion, at 10 cents a minute, or \$28.20 8000 a month, or seven times \$1,000 a week, I'm thinking we've got the bonuses, if they go out, and they start using the spreading things around, it's going to be much higher than 364,000. Because all you need is another 30 people at 15 cents, and you multiply that out that's, that's 15,000 a week. Total me 1500 A week that you've just added to your income. So there's ways that you can make a lot of money and I'm not sure that that's so important. Maybe there's needs to be some additional literature concerning that. As if you've making your you're using this, the individual can make their full time work by you know, have instead of a contract, they can go out and, and, and work on the beneficiary program and go to churches and organizations and start making some really good money that way. And that's a good, viable way of making money. So that might be a different way and that's something that we can perhaps do. Next question,

T

Tracee Gluhaich 39:53

although I will be going to the redemption pointment alone my husband will still our work. While he is not the humanitarian in this sense of listening and learning to these teachings. He's a very loving giving person at heart, my daughter probably as a humanitarian at heart. And while I've shared much of what I've learned with her, she hasn't taken the initiative to listen for ourselves. My question is, what is the best way to pay them? I've heard you say that it is important that everyone have their own money and the freedom to spend it as they wish. And I wholeheartedly agree with you. Would it be best to set up benefactor accounts for them placing a set of money in each quarter? Or would it be best to pay them through the RSS using employment contracts for the work they will be doing with me? As I understand it, it can be done either way. Is that correct? And can you share any insight please, on what might be the best way to pay them?

R

Ron Giles 40:40

The solution for for family members and things like that, they may get involved in the work that you want to do, but the Benefactor account can be at any amount you want to download to them. So it's not a contract, it's just a benefactor account, you set it up, and you start paying people the way that person the way that you want to the amount of money. It doesn't have beneficiary accounts, it can be in addition to a beneficiary account. If you want it to do it that way, it's up to you. So the answer to your question is, yes, you're right. And be sure that you're paying them some, some really good money. And be sure that they are aware that there's a lot more and they can have virtually as much as they want. Within, you know, certain amount, but I would not be given them a whole lot of money to do things unless you had some reason for it. If you're gonna give them 1000, or a million dollars a week, to start giving away and going find people that need the money. The real, the real solution to that problem. Finding people that need money is to find the people and share them with a beneficiary account. And then there's their set up and they don't need to have extra money. You've got all kinds of different things. And the best way to do it is to tune into your heart and find out what is best way from that perspective. And then counsel with your counselor and get confirmation on it, and then the way you go. And that'll be the best way for you to do most everything that you're going to be doing as a humanitarian. Next question.

T

Tracee Gluhaich 42:42

 Tracee Gluhaich 42:45

I have a question regarding the ESS first, I didn't think I'd participate in it. But after listening to the training on I feel it is something I can do. From what I comprehend everything will be overseen by love won industries. Does that mean love won industries funds the entire ESS as well. And we are just refers to do? Or do we fund the ESS for the larger companies we are working on? I realized it doesn't really matter because we will all have enough money. But I just want to be sure I comprehend correctly. Well, I don't have specialized knowledge of particular manufacturing industries. I do have experience with manufacturers in general. And it doesn't sound as complicated as I first thought. So who funds ESS

 R

Ron Giles 43:27

ESS program, the biggest problem with that is the organization who pays for it, each individual gym benefactor that wants to be involved and get involved to the point where they can fund their own contracts and, and pull up the bonds and so forth to make sure that it works. The only reason that that we need to love won society needs to be involved is the what you're creating and products that you're going to be buying ahead of time. How do you put that through a system? Well, obviously, it's already in place or it wouldn't be there. So we're using the same redistrict or distribution system. Like if it's cars, and you've got car dealers. And those are the kinds of things that that we need to control to have a certain amount of control over so that we can be a unified voice in the prices that we're going to use. We don't need to have we there's a certain amount of competition that one manufacturer wants to have competition with another as far as safety features and things of this nature. I'm just trying to think how would be the best way to do that. There's going to be a lot of meetings there's going to be a lot of planning is gone. Bill a lot of stuff like that. And it's important that people who are interested in it can get together and and and do this. And it's going to be by contract that you're involved in that contract will say you do this and you do that, and then we do this. But there has to be some kind of a central organization, for the for the eventual prices that we need to send throughout the economy. So that's all I can say, for now, other than, you know, we're doing the best we can. But I think that there'll be more to it than people understand as we get into it. And in getting into it is where this success lies, and how we're going to change the way that the economy of the world is taking place, and how we buy and sell back and forth. Next question.

 T

Tracee Gluhaich 46:02

The one thing that is calling my name is the real estate program, can you tell me if I need to bring three folders etc, just to say I'm interested in helping with the real estate program, do I need to put this in writing as a project so I can get the higher rate?

 R

Ron Giles 46:16

While you're saying three ring, ring, three folders, you know, maybe I've made too too much out of the three ring binders as a way to prepare. And the reason for that was so that you can feel like you're comfortable with what you have been preparing and doing. And presenting. The reality is now that we're going to have a, an angel, somebody from the other side, as the facilitator, the interviewer is going to do to conduct the appointment. But what extent we need to prepare for that is different than what I had in mind from the beginning. Because that person

is already associating with you in your life, and observing your decision making process and how you do things. They are going to be so well equipped to deal with you that you're going to be surprised. I think. And you know, I'm going to be really thankful that I'm surprised because we need somebody at that level that can help us. So I have been told that yes, they want some indication of your thought processes. As far as the projects that you want to do. They want you to have thought about projects. Now there's others who say that projects are part of the Cabal, and I say no, it's not. It is as far as the revaluations of currencies, because they all have suddenly come up with the idea that certain amount of money has to be used for humanitarian activity. And depending on how much you've got is depending on the amount of money that you're going to get from the exchange of your currencies. I don't believe that the exchange of currencies has been taken over by the Cabal. And they've got all kinds of stuff in there because they don't want people like you and me and the rest of us to have money. They don't want us to have money. So they're going to do all kinds of stuff to screw it all up to mess it all up. When in reality, why do you feel that you can get \$26 per Iraqi dinar per dot dinar? And why do you feel that that's appropriate when the country itself is not going to have \$26 per hour or per whatever, per dinar? I don't understand at all. I just see the cabal is messing it up all over the place. The only thing that I really understand is the Zim bonds, or any other bonds for that matter. And we'll have to see because they're the alliance is saying Don't worry about all of that other garbage just bring your bonds in or your funds and your currencies dinar and so forth. And we'll see how that goes. And we'll redeem them here. Now, the basic understanding that the Alliance wants us to have money That's received through the redemption process. And then as a person who is doing the redemption process, and bring your dinar and Dong in, and it just adds to it those who don't have are not going to be involved and in the gym, how did they get? What rates do they get may go with contract rates and all that sort of stuff? I don't know, I, I would not have a lot of faith in any of those kinds of things. I would not have any faith in another person who's doing read is doing the exchange for other people. Like they have set this all up because I believe that's fraud. I think it's a total fraud. I don't think that can be done by somebody who with a good heart, but I don't see it. Because they're all They're all setting themselves up to be the one that have you come and be a part of their program so that you can get the the redemption or the contract rate that they're that they have already got who Peled? Which one of what is the contract rate? Have you ever heard anybody tell you what the contract rate is? That they have with a bank that guarantees that they're going to get this certain amount of money? You'd never hear that? Because it's all fraudulent? That's my opinion. Have I inquired about that? No. But I see the markings that tell the footprints, the markings of the Cabal all over that whole situation. And I don't have any faith in that at all. Tell you, we're talking about those who are going to get the funds, you have to be a humanitarian, in order for you to get and receive redemption money. And in addition to that, they will accommodate you because you're a humanitarian. And they will also exchange your dinar and Dong and other currencies, at the same time. Understand that other people who are not going to get their call from the Alliance? Where are they going to go to get their exchange? I don't know. I just don't know. And I really don't care. You know, love people. But if they're, if they those are the kinds of people that are led by greed. And just don't have that same opinion for people like that. Again, right. That's my that's my opinion. Next question.

T

Tracee Gluhaich 53:10

Will there be a way for them benefactors to help fund the ESS and the ICCH without participating in them directly?

R

Ron Giles 53:21

It's an interesting question. And I don't know that for sure. At this point in time. They're not, we're not going to have a lack of funds, that's for sure. So I'm not sure if you're not involved in those programs, then just be involved your money in the ones that you're doing, and make it grow and grow and grow, expand, expand, expand. And that's the best way for you to participate. Next question.

T

Tracee Gluhaich 53:57

as a benefactor, when I give money to a group or organization by transaction in the QFS, is there any liability that falls back to me if they spend it on something other than what they agreed?

R

Ron Giles 54:09

No, absolutely not. You're not going to be punished for somebody else's sins, period. Don't ever go there? Because that's not going to happen. Next question.

T

Tracee Gluhaich 54:24

I'm a benefactor and have been thinking of the RSS program, would it be possible to have a short video to view on the RSS program for new members probably speeding, speeded up showing a minute clock and the download going into an account that would help us share this new idea to someone and for it to be successful in their mind before they opt in?

R

Ron Giles 54:49

Yeah, just anticipate that it's going to happen and the RSS program and it will be found in the guest information. So when they go to the RSS program RAM, because they have the card, and they have the, the address, they can go in there, but they can't get into the program. And but there's three things that they can do. One is the guest. One is the registry, and one is the persons who are going into their own account. That's the that's the, that's the gateway. That's where you put in your own personal ID number, or your pin number. And then you go into your account. The rest of the people, there's just one place for for those who want to register. And another is for the guests. And for the guests. There will be videos that they can watch. And there'll be all the information that they need, as far as learning how to how to use the program. And that's where I propose to have the video that shows what actually is taking place when they get their their funds. So we'll see how that works. We've had some really interesting questions today. It's kind of set me back a little bit because you people are getting to the point where you're you're you're really being smart. And you're asking some questions that dive into things that I have not dealt with before. And I apologize for that. Maybe I need to quit responding to emails and start getting back into the programs again. Because I certainly want to be sure that we're covering all of the information that we need to very good questions today. Thank you, Tracee for your communications and your opinions and all that you bring to the

table. And it's been a challenge for me today. And I want to think things through so that I can be sure that we're on the right track. So thank you for today. And with that, let's go ahead and say goodbye. Thank you Tracee. Welcome
